On Friday of last week, the Senate, by a vote of 94 to 1, adopted an amendment offered by Senator CRANSTON of California, to the continuing resolution (H.J. Res. 631) that would provide benefits to the widows and children of those servicemen killed on active duty during the Vietnam conflict or who died of service-connected disabilities prior to August 13, 1981.

The Cranston amendment would provide that the Department of Defense shall pay these benefits which would replace social security benefits paid to this limited class of American citizens prior to the passage of last year's Omnibus Budget Reconciliation Act. The Senator and I had introduced this legislation together, and I am pleased that the other body accepted his amendment which carries out the intent of our legislative proposals.

I am very pleased, Mr. Speaker, that the House conferees accepted the Cranston amendment in conference and that this provision is contained in the conference agreement.

The fact that the House accepted the amendment reaffirms our promise to the members of the Armed Forces that we will fully carry out our commitment to care for their families in the event they lose their lives in service to our Nation.

I want to thank my colleague, the distinguished and very able chairman of the full committee, Mr. WHITTEN, the very able ranking minority Member, the gentleman from Massachusetts, Mr. CONTE, and all conferees of the House for having accepted this provision. It is the right thing to do and the surviving widows of Vietnam veterans and their children, whose lives will be enriched by this provision, should it be signed into law, are most grateful for the support they have received by both Houses of Congress and the administration.●

● Mr. BONIOR of Michigan. Mr. Speaker, last week, an extraordinary event took place in the House. For the first time in memory, a number of amendments were made in order on a continuing resolution. This occurred because of pervasive sentiment in the House that Members were no longer going to swallow distasteful policy and programs without a vote in the name of expediency, that a few chesnuts were not going to be pulled from the fire by playing on the general desire of Members to act responsibly. Seven of the eight amendments made in order passed. The eight failed on a tie vote.

Three amendments were made in order in the area of energy and water resources: To delete funds for the Clinch River breeder reactor and the Garrison Diversion water project, and to prevent the expenditure of any funds for the O'Neill irrigation unit in

Nebraska. All were adopted in the House, the last two by overwhelming margins.

Despite this, the House conferees receded to Senate language restoring the projects even as the Senate was offering conciliatory language on at least one.

Mr. Speaker, there are two points to be made here: One institutional and the other economic.

First, I think it is fairly obvious that the House Appropriations Committee is no longer representative of the Congress on these issues. That is not an unusual situation. However, the circumvention of the expressed will of the majority first by parliamentary means then by manipulation of time constraints is a device with dangerous ends. Members will recall that it was only through the graces of the Rules Committee that Members were able to vote on these projects at all this year. A groundswell of dissatisfaction is building in the House that could rebound with full fury to permeate and countervene much of the constructive work done by the Appropriations Committee. Members will not suffer for long that their participation in the representative process will be rendered absolutely meaningless.

Second, if we cannot be expected to bring projects such as these to heel in times of fiscal austerity and sacrifice, if we are not allowed to choose between, at best, marginal utility programs and policies, and those of a critical need then we have lost our purpose and place in the fiscal process.

The President has threatened to kill a program that would have provided more than 200,000 jobs while he has lobbied on behalf of the O'Neill project which costs $368 million and benefits 300 people. Like it or not, we will have embraced those priorities by approving the conference report on the continuing resolution. I doubt that there is little else to be done in this instance. However, I hope that enough Members will be revolted by the position to which they have been relegated in the legislative process to put an end to it before this institution loses all credibility as an independent, deliberative, and representative body.●

● Mr. GLICKMAN. Mr. Speaker, I rise in opposition to this conference report. I do so for a very simple reason: We have applied a double standard in putting this bill together.

On the one hand, the conferees found it convenient to literally give both the House and Senate what they wanted as far as compensation is concerned. The House gets its pay raise, and Senators can now go out and take in honoraria and other outside earned income to the hearts' content.

On the other hand, they decided that they simply could not find the funds to help put Americans back to work as envisioned in the jobs bill that came out of the House-passed version of this legislation.

I, for one, will make sure that this pay raise does not end up in my own pocket. Instead, it will go to Kansas charitable organizations so that it can help people who really need it in these incredibly difficult economic times.●

● Mr. HAMMERSCHMITT. Mr. Speaker, the continuing resolution has some provisions in it with which I have problems. However, I enthusiastically support one of its provisions. The Reconciliation Act of 1981 eliminated social security benefits for a number of sons and daughters of individuals who had been killed in Vietnam or who died as a result of disabilities incurred in that conflict. I believe that many Members did not fully realize the effect of their action.

An organization called the Survivors of Sacrifice is composed of widows of the deceased servicemen. They have very effectively argued that a solemn promise was made to them at the time their husbands went into the service that in the event of their husband's death, this social security benefit would be available for their children irrespective of the receipt of any other benefit. I accept their argument. This Government did make a solemn promise in this regard.

The other body has amended the continuing resolution to restore social security for these young people and it is in the bill before us.

President Reagan recently wrote to me endorsing the Senate action. It is my hope that all of my colleagues will support the restoration of this benefit to this most deserving group of individuals.●

● Mr. SEIBERLING. Mr. Speaker, with the approval by both Houses of the conference report on the continuing appropriations resolution, it would appear that the current round of debate over the MX missile and its basing mode has been completed. That does not mean that it will not be revived next year. It undoubtedly will be.

However, the debate, which was kicked off by the President's speech to the Nation on November 22, 1982, has been salutary indeed. The weaknesses in the so-called Dense Pack basing mode were glaringly revealed.

Beyond that, it has become apparent that there is probably no way to base MX on land that would not leave it vulnerable to a first strike. This very vulnerability, in turn, would force the Russians to view the MX as part of a U.S. first-strike strategy, thereby dangerously destabilizing the current strategic balance between the two nuclear super powers.

The debate also served the very useful purpose of bringing out the falsity of the President's misleading portrayal of the strategic balance between the United States and the Soviet Union. The misleading nature of the President's original arguments was nowhere better described than in an article by Senator PATRICK J. LEAHY of Vermont that appeared in the Washington Post of November 28.

As Senator LEAHY said:

By distorting reality to make a case of basing the MX in Dense Pack, the president is doing a serious disservice to the American public. He is making us appear weak when we are immensely strong. He is making the Soviets look superior, when in fact, there is overall nuclear balance.

Senator LEAHY went on to point out that the most objectionable aspect of the President's speech was his attempt to portray the MX Dense Pack decision as essential to his arms control negotiations. Indeed, the supporters of the MX Dense Pack appeared to argue both sides of that issue: in one breath they said MX was needed as a "bargaining chip," but in the next breath they said they had no intention of giving it up in any arms control negotiations.

As Senator LEAHY said:

The way to halt the nuclear arms race is to freeze it immediately before there is another dramatic escalation. There is a nuclear balance now, and it is time to stop.

The full text of Senator LEAHY's article follows these remarks.

[From the Washington Post, Nov. 28, 1982]

REALITY—OR A CARICATURE?

(By Patrick J. Leahy)

Speaking to the nation on Nov. 22, President Reagan painted a frightening—and misleading—picture of overwhelming Soviet military might contrasted with a stagnant and aging American nuclear deterrent. After hearing the president, you have to wonder what has been holding the Soviets back. But, fortunately, the president was doing a commercial for basing the MX in Dense Pack and not describing reality.

Let's look at the facts rather than the caricature put forward by President Reagan. First and most important, his glossy television graphics omitted the principal measure of destructive capability, nuclear warheads. It is warheads, not missiles, that explode and kill. Had he shown this comparison, the country would have seen that the United States and the Soviet Union each has roughly 7,500 missile warheads. When bombs and short-range missiles on strategic bombers are added, the United States has a substantial lead, some 9,500 to perhaps 8,000 for the Soviets.

It is true, as the president said, that the Soviets have more missiles. But, again, let's look at the facts. By the mid-1970s, the United States completed placing multiple, independently targetable warheads on its missile force. The Soviets are still doing that. The Soviets have indeed introduced new types of land-based missiles since the United States began fielding the Minuteman, but Minuteman III is still more accurate than Soviet missiles, and a new, more powerful warhead and advanced guidance system is being deployed on it. To think of the modernized Minuteman of the 1980s as equivalent to the 1960s vintage Minuteman I is absurd.

The situation with regard to missiles at sea is overwhelmingly favorable to the

Unites States. The Soviets do have more sea-launched missiles, but only recently began introducing multiple warheads on them. Many of their sea-based missiles are short-range and aging; their submarines cannot compare with ours technologically or in capability. In our forces, all the old Polaris SLBMs have been replaced by longer-range Poseidons, and the Trident I is now entering the force, both in Poseidon submarines, the U.S. SLBM force has over 5,000 warheads, while the Soviets have only about 1,500. Although the president did not say so, we are fortunate that U.S. defense planners had the foresight to put over 50 percent of the American deterrent at sea. By contrast, the Soviets, with better than 65 percent of their warheads on land-based missiles, will face a grave vulnerablility of the bulk of their deterrent by the end of this decade when the super accurate Trident II is introduced.

Another comparison the president neglected to mention is the enormous bomber advantage possessed by the United States, both in numbers and capability. The United States has now begun deployment of air-launched cruise missiles on B52s, which will enable these planes to launch an attack hundreds of miles away from Soviets air defenses. The Soviet do not have a comparable capability. The United States plans to deploy more than 3,000 air-launched cruise missiles (and hundreds more on suface ships and submarines).

The president also made it appear that NATO is almost naked in the face of the Soviet SS20 intermediate-range missile. He ignored the hundreds of nuclear bombers the United States, Britain and France maintain in Western Europe and on aircraft carriers in adjacent waters. Nor did he allude to the fact that our British and French allies have about 180 sea- and land-based missiles aimed at the Soviet Union, or that they have ambitious modernization programs to upgrade these forces.

Finally, the president dredged up the old comparison of U.S. and Soviet defense spending, with the graphics showing the Soviets spending vastly more than we. The sad fact is that no one (outside the Kremlin) really knows how much the Soviets spend on their military. The United States estimates Soviet military spending by calculating how much it would cost us to buy and maintain equivalent forces. That means that every time the U.S. military gets a pay raise, estimates of Soviet defense spending go up. Every time there is a cost overrun on a big American defense program, Soviet weapons cost more.

By distorting reality to make a case of basing the MX in Dense Pack, the president is doing a serious disservice to the American public. He is making us appear weak when we are immensely strong. He is making the Soviets look superior, when in fact, there is overall nuclear balance. Concern for America's security did not begin with Ronald Reagan's election. Congress and every administration, Republican and Democratic, have worked hard to maintain adequate defenses—and although one can quarrel about whether priorities between nuclear and conventional forces were right, I believe that in terms of quality and capability, U.S. forces are second to none. To imply otherwise is not the way for the president to make his argument for Dense Pack.

Perhaps the most objectionable aspect of the president's speech was his attempt to portray the MX Dense Pack decision as designed to advance the cause of arms control. His message to Congress was either support Dense Pack or undermine the hope for serious reductions. This is the old bargaining-chip theory all over again—support something whether it makes sense or not just so we can trade it in arms control negotiations.

I don't buy it.

The way to halt the nuclear arms race is to freeze it immediately before there is another dramatic escalation. There is a nuclear balance now, and it is time to stop.●

● Mr. BIAGGI. Mr. Speaker, I am pleased that the conferees retained the language adopted by the Senate which protects SSI and AFDC recipients from having their heating assistance be used to offset SSI or AFDC payments. As an original member of the House Select Committee on Aging, I have maintained an active interest in this area. My Subcommittee on Human Services conducted a number of hearings across the country several years ago which set the stage for the passage of our low-income energy assistance program. Our hearings pointed out—in dramatic fashion—that low-income seniors were making the cruel choice of heating or eating in the face of rising energy costs.

This provision protects these low-income recipients by insuring that their SSI payments will not be reduced when nonprofit organizations provide funds—an "inkind" donation—to help them pay their heating and cooling bills. This would include, for example, a payment made by a nonprofit group directly to a utility company to help pay an individual's heating bill. I am pleased to see that we retained the Senate language which went one step beyond the House-passed language for SSI recipients and included AFDC beneficiaries as well. Clearly, the economic choices which low-income seniors face are just as pressing a problem for AFDC families and this language protects both these needy groups.

It is important that we address this issue in this fashion because SSI and AFDC law now require, with certain exceptions, that support and maintenance, inkind or cash, be counted as income in determining SSI eligibility and benefit amounts. Program regulations defines this aid as anything given to a recipient for food, shelter, or clothing. Gas, electricity and fuel assistance from the private sector can be considered "shelter support." Federal energy assistance programs are not considered as income under present SSI and AFDC program rules.

Mr. Chairman, at a time when we are trying to encourage the private sector to be more involved in helping those in our midst who are truly needy, we cannot allow such work to be penalizing the very people we are trying to help. At a time when fuel costs have risen between 20 and 60 percent in certain parts of the country in just this past year, we should be actively encouraging the private and nonprofit sector to step in and assist us with a job we need to do. I commend the conferees for their recognition of this problem as well as our colleague Mr. TAUZIN who offered this amendment in the House and Senator JOHN HEINZ, chairman of the Senate Committee on Aging who authored this provision in the Senate.●

● Mr. GINN. Mr. Speaker, the continuing resolution contains a provision that postpones the effective date of a decision by the Copyright Royalty Tribunal until March 15, 1983. This action by Congress was essential to allow cable operators enough time to seek court review of the CRT's decision. It was also critical to prevent the loss of diversity that was threatened by the CRT's decision.

Mr. Speaker, the conferees agreed that March 15, 1983, would be the effective date of the CRT's decision. A cable system that carries a distant signal during this next 6-month period will be liable for a mixed royalty fee that would reflect charges for the signal for the 2½, month period under the current rates (until March 15, 1983) and for the remainder of the 6-period at the increased rates, only if a cable operator carries the signal during the second part of this bifurcatured 6-month period. The Congress does not intend that a cable operator who carries a distant signal after the March 15 date should have to pay the increased rates retroactive to January 1. That interpretation would frustrate the very purpose of this provision. This next 6-month period is clearly divided into two separate segments, each of which will have its own rates.

Similarly, Mr. Speaker, I believe that the Tribunal should look carefully at whether an operator should have to pay for a full 6-month period for a signal that he drops on or before March 15. It seems to me that Congress has changed the normal circumstances under which these decisions have been made in the past and an operator should not have to pay for a full 6 months, if he, in fact, only carries the signal for 2½ months until March 15.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, although I realize the urgency to pass a continuing resolution, as a stop gap funding measure, to prevent a major shut down of our Government curtailing services to the American public, I regret that I must rise in opposition to the conference report to accompany this legislation now before us. This agreement includes a major objectionable provision, which would raise Members' salaries by 15 percent to $69,800 annually, and repeal the outside earnings limitation for Senators.

Earlier this week, during House debate, I opposed the continuing resolution presented to the House from

the Appropriations Committee which contained a 27 percent salary increase for Members of Congress. I supported and voted for an amendment proposed first to reduce that raise to 15 percent which passed and then also voted for the Traxler amendment proposed next, which would have continued the pay cap on congressional salaries that has been in effect for the past 5 years. This one failed on a tie vote. Of course, both amendments would have reduced the $77,300 salary proposed in the continuing resolution brought to the floor by the House Appropriations Committee.

Now, we are again faced with a conference agreement that grants Members of the House a 15-percent pay raise. This unrelated pay raise was attached to a critical appropriations bill by the House leadership. We should now act to instruct the conferees to repeal this provision.

Earlier this session, I cosponsored legislation that would require that a recorded vote be taken on any bill or resolution that adjusts the rate of pay for Members, affect the limitation on outside earnings or provides Members with income tax credits or deductions. I provides that such changes in compensation be the only item considered—this is a critical feature of my proposal. It will continue to press forward for enactment of my bill so that these embarrassing predicaments can be avoided in the future. It is incumbent on Members to show the people of this Nation that we want open and proper procedures as well as full accountability on compensation issues. By attaching the pay raise to a continuing resolution, an umbrella bill, during the 11th hour of the 97th Congress, we are doing a disservice to this body.

Mr. Speaker, I must oppose the passage of the measure in its present form.●

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Let me repeat that in this resolution I do not think the country is sacrificing anything in that we know what the situation was with regard to the jobs bill. I would like to say again that we have not given up the idea that we need to do what we can to improve the economic situation in this country. We are asking the President to consider all of these things in connection with the budget for fiscal year 1984 which will be submitted to the Congress next month. We will be back here next year and we will have the opportunity to deal with these problems then. But under the circumstances, I think we have a good bill, and I wish to thank all of the Members for their support and for their kind statements.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. DANNEMEYER. Mr. Speaker, I demand a recorded vote.

A recorded vote was refused.

Mr. DANNEMEYER. Mr. Speaker, I demand a division.

On a division (demanded by Mr. DANNEMEYER) there were—ayes 232, noes 54.

So the conference report was agreed to.

A motion to reconsider was laid on the table.

□ 1300

WAIVING REQUIREMENT THAT ENROLLMENT OF HOUSE JOINT RESOLUTION 631 BE PRINTED ON PARCHMENT FOR DURATION OF 97TH CONGRESS, AND ENROLLMENT OF HOUSE JOINT RESOLUTION 631 BE CERTIFIED AS TRULY ENROLLED JOINT RESOLUTION

Mr. WRIGHT. Mr. Speaker, I offer a privleged concurrent resolution (H. Con. Res. 436) and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

Mr. WRIGHT. I ask unanimous consent that reading of the text of the concurrent resolution be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Mr. Speaker, reserving the right to object.

The SPEAKER. The Chair understands that this has been agreed to by the minority.

Mr. MICHEL. Mr. Speaker, reserving the right to object, and I shall not, I thought while a good portion of the Members were here we ought to give them a little idea of how the scenario will unfold for the balance of this day, if I might.

Under my reservation, Mr. Speaker, I would be happy to yield to the distinguished majority leader, if he would give us a little idea of how the rest of the day might go—Members would probably appreciate that.

Mr. WRIGHT. I thank the gentleman for yielding.

Assuming the adoption of this concurrent resolution, which does not do anything except waive the requirement that the bill be printed on parchment paper, that is all it does, assuming its adoption, then this legislation is ready to go to the other body and thence to the President presumably upon its passage.

Obviously we must await the action of the President, rather than leaving.

There are some 16 unanimous-consent requests of which the House leadership has been notified, some of them involve such things as conference committee reports.

Mr. MICHEL. What was that number again of unanimous-consent requests?

Mr. WRIGHT. I am told there are 16 who have notified the leadership and the Speaker that they would like to be recognized for a unanimous-consent request of one kind or another.

Mr. MICHEL. I would hope the gentleman would be sure that the minority is notified of exactly what those are, and in what form. We want to be cooperative. But when we get in this last day—and the gentleman very well knows the shenanigans that can be pulled—and we get the pressure "If you are going to do it for so and so, why not for so and so." And somewhere along the line we have to call a halt to the whole business.

Mr. WRIGHT. I sympathize with my friend's concern. I assure him, the distinguished minority leader, that we will share with him the knowledge we have. We have the list available. We will make it immediately available to the minority leader, and it will be continuously available to the minority leadership. There will be no effort to get something aboard that Members are not aware of.

I hope nothing is offered that has not been cleared with the minority. When a Member comes to me and asks for recognition under a unanimous-consent request, or to the Speaker, we ask that Member if he has cleared it with the minority. And only upon that affirmative assurance do we entertain recognizing such a Member.

So that will be our policy throughout the day. The gentleman may be assured that right of his and of his Members on his side of the aisle to know what is being considered will be fully protected. Because it is a right to which all Members are entitled.

Now, beyond that, I am told that the other body is working desperately to complete action on the highway legislation in hopes that a conference committee report may be considered on that before our final adjournment.

Beyond that I am not aware of any urgencies. While it is possible that the Caribbean Basin Initiative may be enacted by the Senate, I am not in any position to discuss what they are going to do about it.

The SPEAKER. The Chair will announce there will be no unanimous-consent request recognized unless it has already been cleared by either the leadership on the minority side or the ranking member.

Let us not go into another hour and a half dialog as we have been doing all week.

Many Members have come up to the Chair and said, "We have family obli-

gations at home. When are you going to get us out of here."

The Chair hopes the Members will cooperate in accommodating the needs of the body and their fellow Members.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman for yielding.

Mr. Speaker, did I understand the majority leader correctly in stating that there would be no motions to suspend the rules on legislation other than conference committee reports considered today?

Mr. PEPPER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Florida.

Mr. PEPPER. I thank the gentleman for yielding.

Mr. Speaker, the Rules Committee has not met and has no contemplation to meet.

Mr. WRIGHT. If the gentleman will yield further, we do not have any plans of which I am aware at this time to suspend the rules.

Mr. SENSENBRENNER. I thank the majority leader.

Mr. PEPPER. If the distinguished minority leader will yield further.

Mr. MICHEL. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Speaker, there is a certain bill which has passed this House. It is now embodied in S. 1939. It provides for the establishment of an institute for research in arthritis. It has been held up because of some differences of opinion of some other matter in the Senate. But Senator KENNEDY has to do I think with the release of it, and told me last night that he expected the Senate to pass the bill. And I wanted to advise the able gentleman that if we give him more details, we might bring that up, if the Senate does pass it.

Mr. MICHEL. The gentleman from Illinois would have to have some more details because we do not have what we need right at the moment.

The SPEAKER. The Chair understands that is a matter about which the gentleman from Florida should consult with the chairman from the Committee on Energy and Commerce. The Chair would advise the gentleman to go to the gentleman on the majority side and see if he can get it cleared there, and then go to the minority.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas to dispense with reading.

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 436

Resolved by the House of Representatives (the Senate concurring), That the requirement of 1 U.S.C. 107 that the enrollment of House Joint Resolution 631 or any measure continuing appropriations be printed on parchment be waived for the duration of the Ninety-seventh Congress, and that the enrollment of House Joint Resolution 631 or any measure continuing appropriations be in such form as may be certified by the Committee on House Administration to be a truly enrolled joint resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 5002, FISHERY CONSERVATION AND MANAGEMENT

Mr. BREAUX submitted the following conference report and statement on the bill (H.R. 5002) to improve fishery conservation and management:

CONFERENCE REPORT (H. REPT. NO. 97-981)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5002) to improve fishery conservation and management having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same.

And the Senate agree to the same.

SECTION 1. AMENDMENT REFERENCE.

Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or subsection, the reference shall be considered to be made to a section or subsection of the Act entitled "An Act to provide for the conservation and management of the fisheries, and for other purposes", approved April 13, 1976 (90 Stat. 31 et seq., 16 U.S.C. 1801 et seq.).

SEC. 2. FOREIGN FISHING.

(a) Section 201 (16 U.S.C. 1821) is amended as follows:

(1) Subsection (c)(2)(D) is amended to read as follows:

"(D) United States observers required under subsection (i) be permitted to be stationed aboard any such vessel and that all of the costs incurred incident to such stationing, including the costs of data editing and entry and observer monitoring, be paid for, in accordance with such subsection, by the owner or operator of the vessel;".

(2) Subsection (c)(4) is amended—

(A) by striking out "and" at the end of subparagraph (B);

(B) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof "; and"; and

(C) by adding at the end thereof the following new subparagraph:

"(D) take, or refrain from taking, as appropriate, actions of the kind referred to in subsection (e)(1) in order to receive favorable allocations under such subsection.".

(3) The first sentence of subsection (d)(4) is amended by striking out "shall be allocated" in the matter following subparagrpah (B) and inserting in lieu thereof "may be allocated".

(4) Subsection (e)(1) is amended to read as follows:

"(e) ALLOCATION OF ALLOWABLE LEVEL.—(1)(A) The Secretary of State in cooperation with the Secretary, shall determine the allocation among foreign nations of the total allowable level of foreign fishing which is permitted with respect to each fishery subject to the exclusive fishery management authority of the United States.

"(B) From the determinations made under subparagraph (A), the Secretary of State shall compute the aggregate of all of the fishery allocations made to each foreign nation.

"(C) The Secretary of State shall initially release to each foreign nation for harvesting up to 50 percent of the allocations aggregate computed for such nation under subparagraph (B), and such release of allocation shall be apportioned by the Secretary of State, in cooperation with the Secretary, among the individual fishery allocations determined for that nation under subparagraph (A). The basis on which each apportionment is made under this subparagraph shall be stated in writing by the Secretary of State.

"(D) After the initial release of fishery allocations under subparagraph (C) to a foreign nation, any subsequent release of an allocation for any fishery to such nation shall only be made—

"(i) after the lapse of such period of time as may be sufficient for purposes of making the determination required under clause (ii); and

"(ii) if the Secretary of State and the Secretary, after taking into account the size of the allocation for such fishery and the length and timing of the fishing season, determine in writing that such nation is complying with the purposes and intent of this paragraph with respect to such fishery.

If the foreign nation is not determined under clause (ii) to be in such compliance, the Secretary of State shall reduce, in a manner and quantity he considers to be appropriate (I) the remainder of such allocation, or (II) if all of such allocation has been released, the next allocation of such fishery, if any, made to such nation.

"(E) The determinations required to be made under subparagraphs (A) and (D)(ii), and the apportionments required to be made under subparagraph (C), with respect to a foreign nation shall be based on—

"(i) whether, and to what extent, such nation imposes tariff barriers or nontariff barriers on the importation, or otherwise restricts the market access, of United States fish or fishery products;

"(ii) whether, and to what extent, such nation is cooperating with the United States in the advancement of existing and new opportunities for fisheries trade, particularly through the purchase of fish or fishery products from United States processors or from United States fishermen;

"(iii) whether, and to what extent, such nation and the fishing fleets of such nation have cooperated with the United States in the enforcement of United States fishing regulations;

"(iv) whether, and to what extent, such nation requires the fish harvested from the fishery conservation zone for its domestic consumption;

"(v) whether, and to what extent, such nation otherwise contributes to, or fosters the growth of, a sound and economic United States fishing industry, including minimizing gear conflicts with fishing operations of United States fishermen, and transferring harvesting or processing technology which will benefit the United States fishing industry;

"(vi) whether, and to what extent, the fishing vessels of such nation have traditionally engaged in fishing in such fishery;

"(vii) whether, and to what extent, such nation is cooperating with the United States in, and making substantial contributions to, fishery research and the identification of fishery resources; and

"(viii) such other matters as the Secretary of State, in cooperation with the Secretary, deems appropriate.".

(5)(A) Subsection (i) is amended—

(i) by amending paragraph (3) to read as follows:

"(3) Observers, while stationed aboard foreign fishing vessels, shall carry out such scientific, compliance monitoring, and other functions as the Secretary deems necessary or appropriate to carry out the purposes of this Act; and shall cooperate in carrying out such other scientific programs relating to the conservation and management of living resources as the Secretary deems appropriate."; and

(ii) by adding at the end thereof the following new paragraph:

"(6) If at any time the requirement set forth in paragraph (1) cannot be met because of insufficient appropriations, the Secretary shall, in implementing a supplementary observer program:

"(A) certify as observers, for the purposes of this subsection, individuals who are citizens or nationals of the United States and who have the requisite education or experience to carry out the functions referred to in paragraph (3);

"(B) establish standards of conduct for certified observers equivalent to those applicable to Federal personnel;

"(C) establish a reasonable schedule of fees that certified observers or their agents shall be paid by the owners and operators of foreign fishing vessels for observer services; and

"(D) monitor the performance of observers to ensure that it meets the purposes of this Act.

(6) Such section is further amended by adding at the end thereof the following new subsection:

"(j) Recreational Fishing.—Notwithstanding any other provision of this title, foreign fishing vessels which are not operated for profit may engage in recreational fishing within the fishery conservation zone and the waters within the boundaries of a State subject to obtaining such permits, paying such reasonable fees, and complying with such conditions and restrictions as the Secretary and the Governor of the State (or his designee) shall impose as being necessary or appropriate to insure that the fishing activity of such foreign vessels within such zone or waters, respectively, is consistent with all applicable Federal and State laws and any applicable fishery management plan implemented under section 305. The Secretary shall consult with the Secretary of State and the Secretary of the Department in which the Coast Guard is operating in formulating the conditions and restrictions to be applied by the Secretary under the authority of this subsection.".

(b) The amendments made by subsection (a)(1) and (5)(A)(ii) shall take effect January 1, 1984.

SEC. 3. FOREIGN FISHING PERMITS.

Section 204(b) (16 U.S.C. 1824(b)) is amended—

(1) by inserting "hold" immediately before "capacity" in paragraph (3)(B);

(2) by striking out "and shall be set forth under the name of each Council to which it will be transmitted for comment" in that portion of paragraph (4) which precedes subparagraph (A);

(3) by striking out subparagraphs (B) and (C) of paragraph (4) and inserting in lieu thereof the following:

"(B) a copy of the application to the Secretary of the department in which the Coast Guard is operating; and

"(C) a copy or a summary of the application to the appropriate Council, upon its request."; and

(4) by striking out "After receipt of an application transmitted under paragraph (4)(B), each appropriate Council shall" in paragraph (5) and inserting in lieu thereof "After receiving a copy or summary of an application under paragraph (4)(C), the Council may".

SEC. 4. NATIONAL STANDARDS.

Section 301(b) (16 U.S.C. 1851(b) is amended to read as follows:

"(b) The Secretary shall establish advisory guidelines (which shall not have the force and effect of law), based on the national standards, to assist in the development of fishery management plans.".

SEC. 5 REGIONAL FISHERY MANAGEMENT COUNCIL ORGANIZATION AND FUNCTIONS.

Section 302 (16 U.S.C. 1852) is amended as follows:

(1) Subsection (a) is amended—

(A) by striking out "pursuant to subsection (b)(C)" each place it appears therein and inserting in lieu thereof "in accordance with subsection (b)(2)"; and

(B) by amending paragraph (8) to read as follows:

"(8) Western Pacific Council.—The Western Pacific Fishery Management Council shall consist of the States of Hawaii, American Samoa, Guam, and the Northern Mariana Islands and shall have authority over the fisheries in the Pacific Ocean seaward of such States and of the Commonwealths, territories, and possessions of the United States in the Pacific Ocean area. The Western Pacific Council shall have 13 voting members, including 8 appointed by the Secretary in accordance with subsection (b)(2) (at least one of whom shall be appointed from each of the following States: Hawaii, American Samoa, Guam, and the Northern Mariana Islands).".

(2) Subsection (b) is amended—

(A) by amending paragraph (1)(C) to read as follows:

"(C) The members required to be appointed by the Secretary in accordance with subsection (b)(2).";

(B) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively;

(C) by inserting immediately after paragraph (1) the following new paragraph:

"(2)(A) The members of each Council required to be appointed by the Secretary must be individuals who are knowledgeable or experienced with regard to the management, conservation, or recreational or commercial harvest of the fishery resources of the geographical area concerned.

"(B) The Secretary shall appoint the members of each Council from a list of individuals submitted by the Governor of each applicable constituent State. Each such list shall include the names and pertinent biographical data of not less than three individuals for each applicable vacancy. The Secretary shall review each list submitted by a Governor to ascertain if the individuals on the list are qualified for the vacancy on the basis of the required knowledge or experience required by subparagraph (A). If the Secretary determines that any individual is not qualified, he shall notify the appropriate Governor of that determination. The Governor shall then submit a revised list or resubmit the original list with an additional explanation of the qualifications of the individual in question.

"(C) Whenever the Secretary makes an appointment to a Council, he shall make a public announcement of such appointment not less than 45 days before the first day on which the individual is to take office as a member of the Council.";

(D) by striking out "pursuant to paragraph (1)(C)" in subsection (b)(3) (as redesignated by subparagraph (B)) and inserting in lieu thereof "by the Secretary in accordance with subsection (b)(2)"; and

(E) by adding at the end thereof the following new paragraph:

"(5) The Secretary may remove for cause any member of a Council required to be appointed by the Secretary in accordance with subsection (b)(2) if the Council concerned first recommends removal by not less than two-thirds of the members who are voting members. A removal recommendation of a Council must be in writing and accompanied by a statement of the reasons upon which the recommendation is based.".

(3) Subsection (f)(6) is amended by inserting after the first sentence thereof the following new sentence: "The procedures of a Council, and of its scientific and statistical committee and advisory panels established under subsection (c), must be consistent with the procedural guidelines set forth in subsection (i)(2).".

(4) Subsection (h) is amended as follows:

(A) Paragraph (1) is amended by inserting "that requires conservation and management" immediately after "authority".

(B) Paragraph (2) is amended by striking out "204(b)(4)(B)" and inserting in lieu thereof "204(b)(4)(C)".

(C) Paragraph (3) is amended by inserting immediately before the semicolon at the end thereof the following: "(and for purposes of this paragraph, the term 'geographical area concerned' may include an area under the authority of another Council if the fish in the fishery concerned migrate into, or occur in, that area or if the matters being heard affect fishermen of that area; but not unless such other Council is first consulted regarding the conduct of such hearings within its area)".

(D) Paragraph (4) is amended to read as follows:

"(4) submit to the Secretary such periodic reports as the Council deems appropriate, and any other relevant report which may be requested by the Secretary;".

(5) Such section is further amended by adding at the end thereof the following new subsection:

"(i) PROCEDURAL MATTERS.—(1) The Federal Advisory Committee Act (5 U.S.C. App. 1) shall not apply to the Councils or to the scientific and statistical committees or advisory panels of the Councils.

"(2) The following guidelines apply with respect to the conduct of business at meetings of a Council, and of the scientific and statistical committee and advisory panels of a Council:

"(A) Unless closed in accordance with paragraph (3), each regular meeting and each emergency meeting shall be open to the public.

"(B) Emergency meetings shall be held at the call of the chairman or equivalent presiding officer.

"(C) Timely public notice of each regular meeting and each emergency meeting, in-

cluding the time, place, and agenda of the meeting, shall be published in local newspapers in the major fishing ports of the council's region (and in other major fishing ports having a direct interest in the affected fishery) and such notice may be given by such other means as will result in wide publicity. Timely notice of each regular meeting shall also be published in the Federal Register.

"(D) Interested persons shall be permitted to present oral or written statements regarding the matters on the agenda at meetings.

"(E) Minutes of each meeting shall be kept and shall contain a record of the persons present, and accurate description of matters discussed and conclusions reached, and copies of all statements filed.

"(F) Subject to the procedures established by the Council under paragraph (4), and the guidelines prescribed by the Secretary under section 303(d), relating to confidentiality, the administrative record, including minutes required under subparagraph (E), of each meeting, and records or other documents which were made available to or prepared for or by the council, committee, or panel incident to the meeting, shall be available for public inspection and copying at a single location in the offices of the Council.

"(3)(A) Each Council, scientific and statistical committee, and advisary panel—

"(i) shall close any meeting, or portion thereof, that concerns matters or information that bears a national security classification; and

"(ii) may close any meeting, or portion thereof, that concerns matters or information that pertains to national security, employment matters, or briefings on litigation in which the Council is interested;

and if any meeting or portion is closed, the Council, committee, or panel concerned shall publish notice of the closure in local newspapers in the major fishing ports within its region (and in other major, affected fishing ports), including the time and place at the meeting. Subparagraphs (D) and (F) shall not apply to any meeting or portion thereof that is so closed.

"(4) Each Council shall establish appropriate procedures applicable to it and to its committee and advisory panels for ensuring the confidentiality of the statistics that may be submitted to it by Federal or State authorities, and may be voluntarily submitted to it by private persons; including, but not limited to, procedures for the restriction of Council employee access and the prevention of conflicts of interest; except that such procedures must, in the case of statistics submitted to the Council by a State, be consistent with the laws and regulations of that State concerning the confidentiality of such statistics.".

SEC. 6. CONTENTS OF PLANS.

Section 303 (16 U.S.C. 1853) is amended as follows:

(1) Subsection (b) is amended—

(A) by striking out "and" at the end of paragraph (6);

(B) by redesignating paragraph (7) as paragraph (8); and

(C) by inserting immediately after paragraph (6) the following new paragraph:

"(7) assess and specify the effect which the conservation and management measures of the plan will have on the stocks of naturally spawning anadromous fish in the region; and".

(2) Subsection (c) is amended to read as follows:

"(c) PROPOSED REGULATIONS.—The proposed regulations which the Council deems necessary or appropriate for purposes of carrying out a plan or amendment to a plan shall be submitted to the Secretary simultaneously with the plan or amendment for action by the Secretary under sections 304 and 305."; and

(3) Such section is amended by adding at the end thereof the following new subsection:

"(e) DATA COLLECTION PROGRAMS.—If a Council determines that additional information and data (other than information and data that would disclose proprietary or confidential commercial or financial information regarding fishing operations or fish processing operations) would be beneficial for the purposes of—

"(1) determining whether a fishery management plan is needed for a fishery; or

"(2) preparing a fishery management plan;

the Council may request that the Secretary implement a data collection program for the fishery which would provide the types of information and data (other than information and data that would disclose proprietary or confidential commercial or financial information regarding fishing operations or fish processing operations) specified by the Council. The Secretary shall approve such a data collection program if he determines that the need is justified, and shall promulgate regulations to implement the program within 60 days after such determination is made. If the Secretary determines that the need for a data collection program is not justified, he shall inform the Council of the reasons for such determination in writing. The determinations of the Secretary under this subsection regarding a Council request shall be made within a reasonable period of time after he receives that request.".

SEC. 7. ACTION BY SECRETARY.

(a) Section 304 (16 U.S.C. 1854) is amended as follows:

(1) Subsections (a) and (b) are amended to read as follows:

"(a) ACTION BY THE SECRETARY AFTER RECEIPT OF PLAN.—(1) After the Secretary receives a fishery management plan, or amendment to a plan, which was prepared by a Council (the date of receipt of which is hereafter in this section referred to as the 'receipt date'), the Secretary shall—

"(A) immediately commence a review of the management plan or amendment to determine whether it is consistent with the national standards, the other provisions of this Act, and any other applicable law;

"(B) immediately publish in the Federal Register a notice stating that the plan or amendment is available and that written data, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 75-day period beginning on the receipt date; and

"(C) by the 30th day after the receipt date—

"(i) make such changes in the proposed regulations submitted for the plan or amendment under section 303(c) as may be necessary for the implementation of the plan, and

"(ii) publish such proposed regulations, including any changes made thereto under clause (i), in the Federal Register together with an explanation of those changes which are substantive.

"(2) In undertaking the review required under paragraph (1)(A), the Secretary shall—

"(A) take into account the data, views, and comments received from interested persons;

"(B) consult with the Secretary of State with respect to foreign fishing; and

"(C) consult with the Secretary of the department in which the Coast Guard is operating with respect to enforcement at sea.

"(b)(1) A plan or amendment shall take effect and be implemented in accordance with section 305(c) if—

"(A) the Secretary does not notify the Council in writing of his disapproval, or partial disapproval, under paragraph (2), of the plan or amendment before the close of the 95th day after the receipt date; or

"(B) at any time subsequent to the 75th day after the receipt date and before such 95th day, the Secretary notifies the Council in writing that he does not intend to disapprove, or partially disapproval, the plan or amendment.

"(2) If after review under subsection (a) the Secretary determines that the plan or amendment is not consistent with the criteria set forth in paragraph (1)(A) of that subsection, the Secretary shall notify the Council in writing of his disapproval or partial disapproval of the plan or amendment. Such notice shall specify—

"(A) the applicable law with which the plan or amendment is inconsistent;

"(B) the nature of such inconsistency; and

"(C) recommendations concerning the actions that could be taken by the Council to conform such plan or amendment to the requirements of applicable law.

"(3)(A) If the Secretary disapproves, or partially disapproves, a proposed plan or amendment under paragraph (2), the Council may submit a revised plan or amendment, accompanied by appropriately revised proposed regulations, to the Secretary.

"(B) After the Secretary receives a revised plan or amendment under subparagraph (A) or (C)(ii), the Secretary shall immediately—

"(i) commence a review of the plan or amendment to determine whether it complies with the criteria set forth in subsection (a)(1)(A);

"(ii) publish in the Federal Register a notice stating that the revised plan or amendment is available and that written data, views, or comments of interested persons on the plan or amendment may be submitted to the Secretary during the 30-day period beginning on the date (hereinafter in this paragraph referred to as the 'revised receipt date') the plan or amendment was submitted to the Secretary under subparagraph (A) or (C)(ii); and

"(iii) review the revised proposed regulations, if any, submitted by the Council and make such changes to them as may be necessary for the implementation of the plan, and thereafter publish such revised proposed regulations (as so changed) in the Federal Register together with an explanation of each of such changes that is substantive.

"(C)(i) Before the close of the 60th day after the revised receipt date, the Secretary, after taking into account any data, views, or comments received under subparagraph (B)(ii), shall complete the review required under paragraph (B)(i) and determine whether the plan or amendment complies with the criteria set forth in subsection (a)(1)(A). If the Secretary determines that a plan or amendment is not in compliance with such criteria, he shall immediately notify the Council of the disapproval of the plan or amendment.

"(ii) After notifying a Council of disapproval under clause (i), the Secretary shall promptly provide to the Council a written statement of the reasons on which the disapproval was based and advise the Council that it may submit a further revised plan or amendment, together with appropriately re-

vised proposed regulations, for review and determination under this paragraph.

"(D) A revised plan or amendment shall take effect and be implemented in accordance with section 305(c) if the Secretary does not notify the Council, in writing, by the close of the 60th day after the revised receipt date of his disapproval of the plan or amendment.".

(2) Subsection (c)(1) is amended—

(A) by amending paragraph (1)—

(i) by amending subparagraph (B) to read as follows:

"(B) the Secretary disapproves or partially disapproves any such plan or amendment, or disapproves a revised plan or amendment, and the Council involved fails to submit a revised or further revised plan or amendment, as the case may be.", and

(ii) by adding immediately after the last sentence thereof the following flush sentence:

"The Secretary shall also prepare such proposed regulations as he deems necessary or appropriate to carry out each plan or amendment prepared by him under this paragraph."; and

(B) by amending paragraph (2) to read as follows:

"(2)(A) Whenever, under paragraph (1), the Secretary prepares a fishery management plan or amendment, the Secretary shall immediately—

"(i) submit such plan or amendment, and proposed regulations to implement such plan or amendment, to the appropriate Council for consideration and comment;

"(ii) publish in the Federal Register a notice stating that the plan or amendment is available and that written data, views, or comments of interested persons on the plan or amemdment may be submitted to the Secretary during the 75-day period beginning on the date the plan or amendment was submitted under clause (i); and

"(iii) by the 30th day after the date of submission under clause (i), submit for publication in the Federal Register the proposed regulations to implement the plan or amendment.

"(B) The appropriate Council must submit its comments and recommendations, if any, regarding the plan or amendment to the Secretary before the close of the 75-day period referred to in subparagraph (A)(ii). After the close of such 75-day period, the Secretary, after taking into account any such comments and recommendations, as well as any views, data, or comments submitted under subparagraph (A)(ii), may implement such plan or amendment under section 305(c).".

(3) Subsection (d) is amended by striking out the last sentence and inserting in lieu thereof the following: "The Secretary may enter into a cooperative agreement with the States concerned under which the States administer the permit system and the agreement may provide that all or part of the fees collected under the system shall accrue to the States. The level of fees charged under this subsection shall not exceed the administrative costs incurred in issuing the permits.".

(b) The amendments made by subsection (a) shall only apply with respect to fishery management plans and amendments thereto that are initially submitted to the Secretary of Commerce on or after the date of the enactment of this Act for action under section 304.

SEC. 8. IMPLEMENTATION OF PLANS.

Section 305 (16 U.S.C. 1855) is amended as follows:

(1) Subsections (a) and (b) are repealed.

(2) Subsections (c) is amende to read as follows:

"(c) Implementation.—The Secretary shall promulgate each regulation that is necessary to carry out a plan of amendment—

"(1) within 110 days after the plan or amendment was received by him for action under section 304(a), if such plan or amendment takes effect under section 304(b)(1);

"(2) within 75 days after a revised plan or amendment was received by him under section 304(b), if such plan or amendment takes effect under paragraph (3)(D) of such section; or

"(3) within such time as he deems appropriate in the case of a plan or amendment prepared by him under section 304(c).".

(3) Subsection (e) is amended to read as follows:

"(e) EMERGENCY ACTIONS.—(1) If the Secretary finds that an emergency exists involving any fishery, he may promulgate emergency regulations necessary to address the emergency, without regard to whether a fishery management plan exists for such fishery.

"(2) If a Council finds that an emergency exists involving any fishery within its jurisdiction, whether or not a fishery management plan exists for such fishery—

"(A) the Secretary shall promulgate emergency regulations under paragraph (1) to address the emergency if the council, by unanimous vote of the members who are voting members, requests the taking of such action; and

"(B) the Secretary may promulgate emergency regulations under paragraph (1) to address the emergency if the Council, by less than a unanimous vote, requests the taking of such action.

"(3) Any emergency regulation which changes any existing fishery management plan or amendment shall be treated as an amendment to such plan for the period in which such regulation is in effect. Any emergency regulation promulgated under this subsection—

"(A) shall be published in in the federal register together with the reasons therefor;

"(B) shall remain in effect for not more than 90 days after the date of such publication, except that any such regulation may, by agreement of the Secretary and the council, be promulgated for one additional period of not more than 90 days; and

"(C) may be terminated by the Secretary at an earlier date by publication in the Federal Register of a notice of termination, except for emergency regulations promulgated under paragraph (2) in which case such early termination may be made only upon the agreement of the Secretary and the Council concerned.".

(4) Subsection (f) is repealed.

(5) Such section is further amended by adding at the end thereof the following new subsection:

"(h) Effect of Certain Laws on Certain Time Requirements.—The Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), and Executive Order Numbered 12291, dated February 17, 1981, shall be complied with within the time limitations specified in subsection (c) or section 304(a) and (b) as they apply to the functions of the Secretary under such provisions.".

SEC. 9. STATE JURISDICTION.

Section 306(a) (16 U.S.C. 1856(a)) is amended by inserting immediately after the first sentence thereof the following new sentence: "For purposes of this Act, except as provided in subsection (b), the jurisdiction and authority of a State shall extend (1) to any pocket of waters that is adjacent to the State and totally enclosed by lines delimiting the territorial sea of the United States pursuant to the Geneva Convention on the Territorial Sea and Contiguous Zone or any successor convention to which the United States is a party and (2) with respect to the body of water commonly known as Nantucket Sound, to the pocket of water west of the seventieth meridian west of Greenwich.".

SEC. 10. SUBPENA POWER.

Section 308 (16 U.S.C. 1858) is amended by adding at the end thereof the following new subsection:

"(e) SUBPENAS.—For the purposes of conducting any hearing under this section, the Secretary may issue subpenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contempt or refusal to obey a subpena served upon any person pursuant to this subsection, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.".

SEC. 11. OFFENSES.

(a) Section 309(b) (16 U.S.C. 1859(b)) is amended by striking out ", or imprisonment for not more than 1 year, or both".

(b) The amendments made by subsection (a) applies with respect to offenses committed under section 309 on or after the date of the enactment of this Act.

SEC. 12. CIVIL FORFEITURES.

Section 310(a) (16 U.S.C. 1860(a)) is amended by inserting "(or the fair market value thereof)" immediately after "fish" each place it appears.

SEC. 13. POWERS OF AUTHORIZED OFFICERS.

Section 311(b) (16 U.S.C. 1861(b)) is amended—

(1) by inserting "(1)" immediately before "Any officer";

(2) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively;

(3) by redesignating subparagraphs (A), (B), (C), (D), and (E) as clauses (i), (ii), (iii), (iv), and (v), respectively; and

(4) by adding at the end thereof the following new paragraph:

"(2) Subject to the direction of the Secretary, a person charged with law enforcement responsibilities by the Secretary who is performing a duty related to enforcement of a law regarding fisheries or other marine resources may make an arrest without a warrant for an offense against the United States committed in his presence, or for a felony cognizable under the laws of the United States, if he has reasonable grounds to believe that the person to be arrested has committed or is committing a felony. The arrest authority described in the preceding sentence may be conferred upon an officer or employee of a State agency, subject to such conditions and restrictions as are set forth by agreement between the State agency, the Secretary, and, with respect to enforcement operations within the fishery conservation zone, the Secretary of the department in which the Coast Guard is operating.".

SEC. 14. AUTHORIZATIONS OF APPROPRIATIONS.

(a) Section 406 (16 U.S.C. 1882) is amended by adding at the end thereof the following new paragraphs:

"(9) $59,000,000 for the fiscal year ending September 30, 1983.

"(10) $64,000,000 for the fiscal year ending September 30, 1984.

"(11) $69,000,000 for the fiscal year ending September 30, 1985.".

(b)(1) Subsection (c) of the first section of the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)) is amended—

(A) by inserting "(1)" immediately before "Whenever"; and

(B) by adding at the end thereof the following new paragraph:

"(2) In the case of any State that has implemented an interstate fisheries management plan for anadromous fishery resources, the Federal share of any grant made under this section to carry out activities required by such plan shall be 90 percent.".

(2) Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended by adding after paragraph (3) the following new paragraph:

"(4) $7,500,000 for each of fiscal years 1983, 1984, and 1985.".

(3) The first sentence of section 7(d) of the Anadromous Fish Conservation Act (16 U.S.C. 757g(d)) is amended by striking out "and" after "1981,", and by inserting immediately before the period the following: ", and not to exceed $1,000,000 for each of the fiscal years ending September 30, 1983, and September 30, 1984".

SEC. 15. TECHNICAL AMENDMENTS.

(a) Section 3(27) (16 U.S.C. 1802(27)) is amended to read as follows:

"(27) The term 'vessel of the United States' means—

"(A) any vessel documented under the laws of the United States;

"(B) any vessel numbered in accordance with the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 et seq.) and reassuring less than 5 net tons; or

"(C) any vessel numbered under the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 et seq.) and used exclusively for pleasure.".

(b) Section 307(2) (16 U.S.C. 1857(2)) is amended—

(A) by amending subparagraph (A) to read as follows:

"(A) in fishing within the boundaries of any State, except recreational fishing permitted under section 201(j);"; and

(B) striking out "in fishing" in subparagraph (B) and inserting in lieu thereof "in fishing, except recreational fishing permitted under section 201(j),".

(c) The last sentence of section 311(a) (16 U.S.C. 1861(a)) is repealed.

(d) Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended by striking out "and 1982" and inserting in lieu thereof "1982, 1983, 1984, and 1985".

JOINT STATEMENT OF MANAGERS

The managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5002) to improve fishery conservation and management, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying Conference report:

The Senate amendment to the text of the bill struck a provision passed by the House which created three obligatory seats for the State of California on the Pacific Fishery Management Council. These seats are in addition to the seats held by the principal State official with marine fishery management responsibility and expertise.

The Conferees recommend that the House recede from its disagreement to the amendment of the Senate and agree to the same. The bill supported by the House and Senate Conferees in light of this recommendation is summarized as follows.

SECTION-BY-SECTION ANALYSIS

Section 1. Amendment reference

Section 1 contains an amendment reference indicating that, unless specifically noted otherwise in the bill, all amendment references shall be considered as made to "An Act to provide for the conservation and management of the fisheries, and for other purposes," approved April 13, 1976. The short title for that 1976 law is the Magnuson Fishery Conservation and Management Act (MFCMA).

Section 2. Foreign fishing

Section 2 makes several amendments to the foreign fishing provisions of Section 201 of the MFCMA.

Section 2(a)(1) amends Section 201(c)(2)(D) of the MFCMA to require, as a condition of each Governing International Fishery Agreement (GIFA), that the foreign nation involved permit U.S. observers to be stationed aboard their vessels operating under the exclusive management authority of the U.S. The provision further requires that such nations pay for all costs of such stationing in accordance with Section 201(i) of the MFCMA including the costs associated with the processing of data developed by such observers.

Section 2(a)(2) amends Section 201(c)(4) of the MFCMA by adding a new provision which requires, as a condition of a GIFA, a binding commitment on the part of foreign nations to comply with Section 201(e)(1) of the MFCMA.

Section 2(a)(3) amends Section 201(d)(4) of the MFCMA, which provides a mechanism for the phase-out of foreign fishermen from the U.S. Fishery Conservation Zone (FCZ), by deleting the requirement that the Secretary of State reallocate to foreign nationals, in succeeding harvesting seasons, surplus fishery resources not harvested by the U.S. fishing industry.

Section 2(a)(4) relates to the method by which fishery allocations are released to a particular foreign nation. Under the new provision, the Secretary of State, in cooperation with the Secretary of Commerce, must first determine a nation's allocation, if any, with respect to each fishery subject to the exclusive management authority of the United States. From this determination, the Secretary of State must determine the aggregate of all fishery allocations to each foreign nation and then initially release up to 50 percent of this aggregated total. The 50 percent release provision, however, does not necessarily apply equally to each fishery which is part of the aggregate total allocation. This will permit the Secretary to allow for small and incidental foreign fisheries while maximizing the flexibility of the Secretary in implementing "fish and chips" policy.

After the initial releases are made, the Secretaries of State and commerce must determine in writing that the foreign nation is continuing to comply with "fish and chips" before undertaking further allocation releases. The legislation does not specify a standard time that must elapse between the initial and subsequent allocation releases, and indicates that the Secretaries should take into account the size of the allocation given to the foreign nation under consideration for a particular fishery, as well as the length and timing of the fishing season for that fishery. If within that time frame, however, the Secretaries determine that the foreign nation in question is not complying with "fish and chips" policy, the Secretary of State is directed to reduce, in a manner and quantity he determines appropriate, the subsequent allocation release. If all of the annual allocation for a particular fishery has already been released to a non-complying foreign nation, the Secretary of State is directed to reduce the next year's allocation, of such fishing, if any, to such foreign nation.

Section 2(a)(5)(A) amends Section 201(i) of the MFCMA to provide a mechanism for ensuring U.S. observer coverage of 100 percent of the foreign fishing vessels operating in the U.S. FCZ and to clarify the responsibilities of such observers. Section 2(a)(5)(A)(i) requires that observers, in addition to their normal responsibilities under Section 201(i)(3) of the MFCMA, cooperate in carrying out other scientific programs such as the monitoring of sea bird mortality, as the Secretary of Commerce deems appropriate. Section 2(a)(5)(A)(ii) provides that in the event that appropriations are not sufficient to achieve the 100 percent observer coverage of foreign vessels required under Section 201(i), the Secretary of Commerce, beginning in 1984, is directed to set up a supplementary system involving the certification of U.S. citizens who have the requisite education or experience to carry out the functions of observers. It will be incumbent upon the foreign fishing vessel, operating under a U.S. permit, to contract with such certified individuals. This provision will also apply to foreign vessels operating in the U.S. zone for highly migratory species of tuna, if such vessels have a permit for an incidental take of billfish.

Section 2(a)(6) amends Section 201(i) of the MFCMA by adding a new provision which permits foreign nationals to engage in recreational fishing within U.S. waters including all State waters even if the nation of which that person is a citizen does not have a Governing International Fishery Agreement (GIFA) or other fisheries treaty with the United States. Such foreign nation must agree to obtain any permit, pay any fee and comply with any conditions or restrictions imposed. The Secretary of Commerce in consultation with the Coast Guard will make determinations with regard to activities by such vessels in the federal FCZ and the Governor of each State will make determinations when the proposed activity would occur in state waters. In no case can the foreign vessel operate in a manner inconsistent with applicable federal or state law and any applicable fishery management plan.

Section 2(b) provides that Sections 2(a)(1) and 2(a)(5)(A)(ii) relating to U.S. observers

stationed aboard foreign vessels shall take effect on January 1, 1984.

Section 3. Foreign fishing permits

Section 3 amends Section 204 of the MFCMA relating to foreign fishing permits.

Section 3(1) amends Section 204(b) of the MFCMA to require that an application for a foreign fishing permit contains, in addition to other information, the hold capacity of a vessel which would operate pursuant to such permit.

Paragraphs (2), (3) and (4) of Section 3 amend Section 204(b) of the MFCMA to relieve the Regional Fishery Management Councils of their responsibility to review each and every foreign fishing permit application made pursuant to Section 204(b) of the MFCMA, and to make such review subject to Council discretion.

Section 4. National standards

Section 4 amends Section 301(b) of the MFCMA to clarify that the guidelines, promulgated by the Secretary of Commerce to assist the eight Regional Fishery Management Councils in the development of fishery management plans pursuant to Section 303 of the MFCMA, are purely advisory in nature and do not carry the force and effect of law.

Section 5. Regional fishery managment council organization and functions

Section 5 amends Section 302 of the MFCMA which provides for the establishment, structure, and functions of the eight Regional Fishery Management Councils.

Section 5 (1)(B) of the House bill provides for the appointment of two additional voting seats on the Pacific Fishery Management Council for the State of California. Thus, in addition to the obligatory seat already held by the principal State official with marine fishery management responsibility and expertise, the Secretary is required to choose three residents of the State of California for voting membership. The Senate amendment struck this provision and the Conferees agreed to the Senate amendment.

As a result of the Conference, Section 5(1)(B) of the bill provides for the expansion of the jurisdiction and size of the Western Pacific Fishery Management Council to include the Northern Mariana Islands and other U.S. possessions in this region.

Section 5(2) amends Section 302(b) of the MFCMA to require that the Secretary of Commerce appoint to the Regional Fishery Management Councils only those individuals who are knowledgeable or experienced with regard to the management, conservation, or recreational or commercial harvest of fishery resources found within the geographical area of jurisdiction of a given Council. The provision further requires the Secretary of Commerce to review the list of candidates for such appointment submitted by the Governors of each affected State to ensure that such candidates are so qualified. The Secretary of Commerce is then required to announce the appointment of new Council members at least 45 days prior to the first day such prospective members will assume Council responsibilities. In addition, this new provision allows the Secretary of commerce to remove Council members appointed by him for cause, if the Council on which that person is a member first recommends such removal by a two-thirds vote of all voting members on the Council and such Council submits a statement to the Secretary containing the reasons for such recommendation.

Section 5(3) requires that the procedures of each Council, and of the associated scientific and statistical committee and advisory panels, must be consistent with the procedural guidelines set forth under a new Section 302(i) established by Section 5(5) of the bill.

Section 5(4) amends Section 302(h) of the MFCMA to clarify that the function of the Councils is not to prepare a Fishery Management Plan (FMP) for each and every fishery within their geographical areas of authority. Rather, such plans are to be developed for those fisheries which require conservation and management. Section 5(4) further provides that the Councils may conduct public hearings at locations within the area of authority of other Councils if such hearings are appropriate considering the nature of the fish and/or fishery concerned. Finally, Section 5(4) eliminates the present requirement for Councils to submit annual activity reports to the Secretary of Commerce, and authorizes periodic reports by the Councils to the Secretary.

Section 5(5) expressly makes inapplicable to the Councils or to the scientific and statistical committees or advisory panels of the Councils the provisions of the Federal Advisory Committee Act (FACA). Instead, Section 5(5) stipulates the minimum procedures that must be met by all Councils during the course of their deliberations over conservation and management practices. These include the requirement that all regular and emergency meetings be open to the public. A mandatory exception to this general rule applies to all meetings or portions of meetings where matters or information bearing a security classification are discussed. At the discretion of each Council, meetings or portions of meetings wherein matters or information that pertains to national security, Council employment or litigation in which the Council is interested are being discussed may be closed. Emergency meetings are permitted at the call of the Council Chairman. Timely notice of all regular and emergency meetings and the agenda for such meetings shall be published in the Federal Register and in local newspapers in major fishing ports having a direct interest in this fishery whether inside the area of authority of the Council concerned or not. The provision also requires that persons be afforded the opportunity to submit oral or written statements regarding matters before the Council at each meeting. Full and accurate records of the proceedings of each such meeting shall be available for public inspection and copying subject to certain confidentiality provisions relating to statistics submitted by state, federal or private entities. These requirements shall also apply to the proceedings of the scientific and statistical committee of each Council as well as all advisory panels established by the Councils. It is intended that the term "advisory panels" shall cover Plan Development Teams, Plan Management Teams, and any other formally constituted work group or team which meets at the request or direction of the Councils.

Section 6. Content of plans

Section 6 amends Section 303 of the MFCMA regarding the contents of fishery management plans.

Section 6(1) amends Section 303(b) of the MFCMA to add a new paragraph (7) which increases the discretionary powers of the Councils or Secretary of Commerce to include as part of an FMP, an assessment of the effects that the implementation of the conservation and management measures of the plan will have on stocks of naturally spawning anadromous fish within the region of such plans applicability.

Section 6(2) amends Section 302(c) of the MFCMA to require that those proposed regulations necessary for the purposes of carrying out an FMP or amendment thereto be submitted by the Councils simultaneously with the submission of an FMP or an amendment thereto.

Section 6(3) amends Section 303 of the MFCMA to add a new subsection (e) which provides procedures for the collection of supplemental data by the Secretary of Commerce when a Council determines that such data necessary for the determination of whether a fishery management plan is needed for a fishery or for the actual preparation of an FMP, and upon approval of the Secretary. Upon such approval, the Secretary must promulgate regulations to implement the program within 60 days.

Section 7. Action by Secretary

Section 7 amends Section 304 of the MFCMA regarding the participation of the Secretary of Commerce in the development of FMP's and regulations.

The provisions of Section 7 substantially revise the process of review by the Secretary of Commerce of FMP's and regulations prepared by the Regional Fishery Management Councils after the date of enactment of this legislation. The purpose of this review is to determine whether such plans and regulations are consistent with the national standards set forth in Section 301 of the MFCMA, the other provisions of this Act, and any other applicable law. Under this new system, the Secretary upon the simultaneous receipt of an FMP and regulations from a Council, must publish in the Federal Register such plan and a request for comments, the period for which lasts 75 days. Following the close of the comment period the Secretary of Commerce must complete a review of the FMP within 20 days of such date which includes addressing the public comments, data and views received, consultations with the Secretary of State regarding foreign fishing, and consultations with the Coast Guard regarding enforcement issues. At any time during this period the Secretary may notify the appropriate Council of his approval, disapproval, or partial disapproval. If approval is granted, the FMP becomes effective upon such approval. If no action is taken by the Secretary within the 20-day period, the plan becomes effective upon the close of the 20-day period. If the plan is disapproved, or partially disapproved, the Secretary of Commerce must immediately notify the appropriate Council of such action and the reasons therefor. The Council is then free to pursue the revision of the FMP without time restrictions. Upon submission of the revised FMP to the Secretary, the Secretary must again publish such plan and a request for public comment, the period for which lasts 30 days. Following the close of the 30-day comment period, the Secretary must complete his review as before, and notify the appropriate Council of his approval, disapproval or partial disapproval of the FMP within 30 days of such date. If approval is granted the FMP will take effect upon such approval. If no such action is taken, the plan becomes effective at the close of the second 30-day period. If the revised plan is disapproved or partially disapproved the Council may follow the same revised-plan procedure.

Section 7 also provides for a new system of FMP preparation by the Secretary of

Commerce. Upon such preparation, the Secretary must submit the FMP to the appropriate Councils for consideration and comment, and publish such FMP in the Federal Register requesting public comment, the period for which lasts 75 days. Following the close of the comment period and after consideration of such comments, views, data and recommendations, the Secretary may implement such plan upon his discretion.

All of the provisions of Section 7 relating to FMP's relate as well to FMP amendments.

With regard to regulations Section 7 requires the Secretary of Commerce, upon the initial simultaneous receipt of an FMP and regulations, to consider and revise as necessary and appropriate such regulations by the close of a 30-day period following such receipt. Although the receipt of the FMP and regulations are simultaneous, the review and subsequent action on such are independent. At the close of such period the Secretary must publish in the Federal Register such regulations and changes made thereto with accompanying explanations therefor.

Upon submission for review of a revised FMP, the Councils must also submit revised regulations which implement the proposed revised FMP. Again the Secretary has 30 days to make changes to the revised regulations and publish such regulations and changes thereto with accompanying explanations therefor.

Section 7 also provides for the Secretary to prepare and implement regulations to accompany any FMP prepared by him.

Finally, Section 7 provides that the Secretary of Commerce may enter into cooperative agreements with appropriate States by which such States can administer a permit and fee collection system for U.S. vessels. The provision restricts the collection of such fees to the level of administrative costs associated with such program.

Section 8: Implementation of plans

Section 8 amends Section 305 of the MFCMA regarding the process for the implementation of FMP's.

Section 8 substantially revises the process of promulgating regulations developed for the purposes of implementing FMPs. Under this new process, the Secretary must promulgate each regulation necessary to implement a plan; within 110 days of the initial receipt from a Council of such regulations and accompanying plan, within 75 days of the receipt from a Council of revised regulations and accompanying plan, and within such time as the Secretary deems appropriate in the case when the Secretary prepares the regulations and accompanying plan.

Section 8 further provides for the promulgation of emergency regulations, without regard to the existence of an FMP, at his discretion or at the unanimous request of a Council. Such emergency regulations must be published in the Federal Register with the reasons therefor, may remain in effect for a maximum of two 90-day terms upon the agreement of the Secretary and the appropriate Council, and may be terminated at an earlier date upon the discretion of the Secretary and/or an agreement with the appropriate Council.

Section 8 further amends Section 305 of the MFCMA to relieve the Secretary of the mandate to report annually to the Congress and the President regarding the activities of the Councils and Secretary with respect to fishery matters.

Lastly, Section 8 adds a new subsection (h) to Section 305 of the MFCMA which limits the applicability of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Regulatory Flexibility Act (5 U.S.C. 3501 *et seq.*), and Executive Order 12291 dated February 17, 1981, to the functions of the Secretary of Commerce under Sections 304 and 305 of the MFCMA.

Section 9. State jurisdiction

Section 9 amends Section 306(a) of the MFCMA by extending State fisheries jurisdictions to: (1) any pockets of waters adjacent to a State and totally enclosed by the territorial sea of the United States; and (2) with respect to the waters commonly known as Nantucket Sound, the pocket of water west of the seventieth meridian west of Greenwich.

Section 10. Subpoena power

Section 10 amends Section 308 of the MFCMA by adding a new subsection (e) which empowers the Secretary of Commerce to subpoena witnesses for the purpose of civil penalty hearings. This section further provides that witnesses are to be paid fees and mileage and treated as in any court of the United States.

Section 11. Offenses

Section 11 amends Section 309(b) of the MFCMA by eliminating the penalty which permits the imprisonment of the operator of a foreign vessel which conducts fishing operations in the U.S. FCZ without a valid permit or violates the terms of its fishing permit.

Section 12. Civil forfeitures

Section 12 amends Section 310(a) of the MFCMA by permitting the Secretary of Commerce to seize the fair market value of the fish on those fishing vessels that violate Section 307 of the MFCMA, except for those acts for which the observance of a citation under Section 311 of the MFCMA is sufficient.

Section 13. Powers of authorized officers

Section 13 amends Section 311(b) of the MFCMA by allowing persons charged with fishery or other marine resources enforcement responsibilities, and subject to the direction of the Secretary of Commerce, to make arrests without a warrant for an offense against the United States committed in such person's presence, or for a felony, if there is reasonable grounds to believe that the person has or is committing a felony. This additional authority may also be conferred upon an officer or employee of a State agency, subject to conditions and restrictions agreed upon between the State agency, the Secretary of Commerce and the Secretary of the department in which the Coast Guard is operating.

Section 14. Authorization of appropriations

Section 14 amends Section 406 of the MFCMA by authorizing the sums of $59,000,000, $64,000,000, and $69,000,000 for the fiscal years 1983, 1984 and 1985, respectively.

Section 14 also amends the Anadromous Fish Conservation Act (16 U.S.C. 757a(c)) by providing that in the case when States have implemented an interstate fisheries management plan for anadromous fishery resources, the Federal share of any grants made pursuant to such act to carry out activities required of such plan shall be 90 percent.

Section 4(a) of the Anadromous Fish Conservation Act (AFCA) is amended by reauthorizing appropriations for each of fiscal years 1983, 1984 and 1985 at $7,500,000.

Section 7(d) of the AFCA (16 U.S.C. 757g(d)) is amended by authorizing, for striped bass (*Morone Saxatilus*) research, $1,000,000 for each fiscal year ending September 30, 1983 and September 30, 1984.

Section 15. Technical amendments

Section 15(a) amends Section 3(27) of the MFCMA by defining vessels as: (1) any vessel documented under laws of the United States; (2) any vessel numbered in accordance with the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 *et seq.*) and measuring less than 5 net tons; or (3) any vessel numbered under the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 *et seq.*) and used exclusively for pleasure.

Section 15(b) also amends Section 307(2) of the MFCMA by deleting language referring to recreational fishing, thus conforming this section with the provisions which allow for recreational fishing by foreign nations as outlined in Section 2(a)(6) of the bill.

Section 15(c) also deletes the last sentence of Section 311(a) of the MFCMA, thereby relieving the Secretary of Commerce from the duty of reporting to Congress, on a semiannual basis, the degree and extent of compliance with the provisions of the MFCMA.

Section 15(d) reauthorizes funds for the Central, Western and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) for each of fiscal years 1983, 1984 and 1985 at current level of $5,000,000.

MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION ACT

Mr. MILLER of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7102), to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors and migrant and seasonal agricultural labor and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 41, lines 2 and 3, strike out "on December 1, 1982," and insert "ninety days from the date of enactment".

Mr. MILLER of California. Mr. Speaker, this has been cleared with the ranking minority member.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. ERLENBORN. Mr. Speaker, reserving the right to object—and I will not object—I take this time to yield to my colleague from California for an explanation of unanimous-consent request.

Mr. MILLER of California. I thank my colleague for yielding.

What this is, Mr. Speaker, is legislation that we passed to reform the Federal Farm Labor Contractors Act which was passed overwhelmingly in this House.

The Senate has put an amendment to change the effective date which would move it from 90 days to the passage by this body, which because of the delay passing the bill is necessary.

Mr. ERLENBORN. Mr. Speaker, it is my understanding, as the gentleman from California has explained, that the legislation before us, subject to the unanimous-consent request, is identical in every respect to the bill already passed by the House by an overwhelming majority. The only change is a change in the effective date.

Under those circumstances, I am very much in favor of the legislation.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Is it my understanding there is no money in this bill, so it would have no budgetary impact?

Mr. MILLER of California. If the gentleman will yield, that is correct.

Mr. WALKER. I thank the gentleman.

● Mr. FORD of Michigan. Mr. Speaker, I am pleased that the 97th Congress is finally acting to pass H.R. 7102, the Migrant and Seasonal Agricultural Worker Protection Act (AWPA) which replaces the Farm Labor Contractor Registration Act (FLCRA). If President Reagan signs this bill it will be by far the biggest step he has taken to enlarge and protect the rights of working Americans, rights Mr. Reagan's administration has often seemed to ignore or disdain.

I am a cosponsor of AWPA and, as one who has worked to insure decent working conditions for agricultural workers, particularly migrants, for many years, I know how desperately this law is needed. As chairman of the House Agricultural Labor Subcommittee during the midseventies, I learned firsthand that the housing, transportation, pay and working conditions of hundreds of thousands of farmworkers are grossly substandard, indeed, are a blot on the good name of our Nation.

H.R. 7102 offers a hope to correct many of the worst abuses which migrant and seasonal farmworkers are forced to suffer. For the first time, agricultural employees will, under Federal law, have a right to statutory damages from their employer if he furnishes unsafe housing or transportation, fails to give them itemized information concerning their pay and amounts withheld from it for taxes, or refuses to disclose in advance the wages, hours and working conditions under which the employees will work. The AWPA corrects the key weakness of the FLCRA, which held only the farm labor contractor responsible for such abuses and shielded the employer unless he fell within the narrow definition of "farm labor contractor" under that act.

It has long been apparent that neither volunteerism on the part of agribusiness nor the puny enforcement efforts of the Department of Labor can be expected to make a significant difference in the working conditions of farmworkers. Like the FLCRA, the AWPA provides for a private right of action and holds out the prospect of large damage awards against agricultural employers who mistreat their workers. This, I am sure, will prove to be the most important deterrent against the continued abuse of migrant and seasonal farmworkers. As budget cuts undermine the Federal Government's ability to enforce the law, farmworkers will depend increasingly on the private bar and legal services organizations to insure that violations are punished and that they are made whole for their losses and suffering.

In sum, the act maintains or strengthens most of the provisions of the FLCRA relating to itinerant crewleaders, while freeing fixed situs employers from the administrative burdens which they have protested against for many years. Employers will continue to be prohibited from using the services of any unregistered farm labor contractor and will be made directly liable for violations of the act when they engage in farm labor contracting activities such as recruiting, transporting or housing workers.

This is a consensus bill, and I am not happy with every one of its provisions. In particular, I can see no justification to limit damages in a class action to $500,000. Larger awards than this have been won for farmworkers under FLCRA, and underpayments to workers exceeding $500,000 can easily occur where 1,000 or more farmworkers are employed by a major corporation.

Overall, however, I believe H.R. 7102 is a step forward, and I applaud the success of CARL PERKINS and GEORGE MILLER in persuading the administration, the representatives of agribusiness and farmworker advocates to support it. I join with Representative MILLER in pledging to follow the implementation of this law very closely, to monitor its effect on the living and working conditions of agricultural workers, and to push for changes in the law if it does not succeed in correcting the worst abuses in agricultural labor relations.●

Mr. ERLENBORN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California (Mr. MILLER)?

There was no objection.

A motion to reconsider was laid on the table.

FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS

Mr. ROE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7159), to amend the Federal Water Pollution Control Act to allow modifications of certain effluent limitations relating to biochemical oxygen demand and pH, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, strike out all after line 5, over to and including line 5 on page 4, and insert:

"(m)(1) The Administrator, with the concurrence of the State, may issue a permit under section 402 which modifies the requirements of subsections (b)(1)(A) and (b)(2)(E) of this section, and of section 403, with respect to effluent limitations to the extent such limitations relate to biochemical oxygen demand and pH from discharges by an industrial discharger in such State into deep waters of the territorial seas, if the applicant demonstrates and the Administrator finds that—

"(A) the facility for which modification is sought is covered at the time of the enactment of this subsection by National Pollutant Discharge Elimination System permit number CA0005894 or CA0005282;

"(B) the energy and environmental costs of meeting such requirements of subsections (b)(1)(A) and (b)(2)(E) and section 403 exceed by an unreasonable amount the benefits to be obtained, including the objectives of this Act;

"(C) the applicant has established a system for monitoring the impact of such discharges on a representative sample of aquatic biota;

"(D) such modified requirements will not result in any additional requirements on any other point or nonpoint source;

"(E) there will be no new or substantially increased discharges from the point source of the pollutant to which the modification applies above that volume of discharge specified in the permit;

"(F) the discharge is into waters where there is strong tidal movement and other hydrological and geological characteristics which are necessary to allow compliance with this subsection and section 101(a)(2) of this Act;

"(G) the applicant accepts as a condition to the permit a contractural obligation to use funds in the amount required (but not less than $250,000 per year for ten years) for research and development of water pollution control technology, including but not limited to closed cycle technology;

"(H) the facts and circumstances present a unique situation which, if relief is granted, will not establish a precedent of the relaxation of the requirements of this Act applicable to similarly situated discharges; and

"(I) no owner or operator of a facility comparable to that of the applicant situated in the United States has demonstrated that it would be put at a competitive disadvantage to the applicant (or the parent company or any subsidiary thereof) as a result of

the issuance of a permit under this subsection.

"(2) The effluent limitations established under a permit issued under paragraph (1) shall be sufficient to implement the applicable State water quality standards, to assure the protection of public water supplies and protection and propagation of a balanced, indigenous population of shellfish, fish, fauna, wildlife, and other aquatic organisms, and to allow recreational activities in and on the water. In setting such limitations, the Administrator shall take into account any seasonal variations and the need for an adequate margin of safety, considering the lack of essential knowledge concerning the relationship between effluent limitations and water quality and the lack of essential knowledge of the effects of discharges on beneficial uses of the receiving waters.

"(3) A permit under this subsection may be issued for a period not to exceed five years, and such a permit may be renewed for one additonal period not to exceed five years upon a demonstration by the applicant and a finding by the Administrator at the time of application for any such renewal that the provisions of this subsection are met.

"(4) The Administrator may terminate a permit issued under this subsection if the Administrator determines that there has been a decline in ambient water quality of the receiving waters during the period of the permit even if a direct cause and effect relationship cannot be shown: *Provided,* That if the effluent from a source with a permit issued under this subsection is contributing to a decline in ambient water quality of the receiving waters, the Administrator shall terminate such permit.".

Mr. ROE (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, and I do not plan to object, I rise in support of H.R. 7159. This legislation—in its original form passed by the House and in its amended version from the Senate—provides an environmentally preferred means of dealing with a clean water situation in northern California.

The ranking Republican member of the Committee on Public works and Transportation, DON CLAUSEN, deserves full recognition for his efforts in bringing this matter to the attention of the Members of the committee and the Congress. The local community, including environmental interests, remain strongly supportive of this action.

The legislation permits discharge of nontoxic materials by two mills into the ocean as had been approved by the State of California prior to that decision being overturned by the Environmental Protection Agency.

As was noted when this bill first passed the House, discharge to the ocean has not caused nor will cause harm because of the ocean characteristics. In fact, failure to allow these discharges will lead to environmental problems because of the need to dispose of large quantities of sludge, related air pollution problems, and others. In addition, the expenditure of large sums of money on unnecessary facilities by the companies will certainly be economically harmful in this time of economic recovery.

The bill, as it passed the House was environmentally sound and economically reasonable. The Senate amendments merely "fine tuned" the provisions. For instance, one of the Senate amendments—No. 9—provides that competitors with facilities comparable to the applicant have the opportunity to demonstrate that they would be put at a competitive disadvantage. The Senate report properly notes that the burden for such a showing is on the competitor. If no competitors come forward, this provides the evidence that there is no competitive disadvantage created.

Again, Mr. Speaker, H.R. 7159 provides for appropriate action in this particular case and is in keeping with the goals of the Clean Water Act and will provide the best overall environmental results. I support this legislation and urge my colleagues to support it as well.

Mr. Speaker, I yield to the gentleman from New Jersey (Mr. ROE), the distinguished chairman of the subcommittee, for further explanation.

Mr. ROE. I thank the gentleman for yielding.

Mr. Speaker, H.R. 7159 amends the Federal Water Pollution Control Act to give the Environmental Protection Agency the authority to modify the permit requirements for two pulp mills in California currently discharging into the Pacific Ocean. The situation facing these two mills is unique and the legislation is drafted very narrowly so that it applies only to the circumstances in this particular case and does not establish a precedent for similarly situated discharges.

Under existing law, industries are required to achieve effluent limitations that require the application of the best practicable technology by July 1, 1977. The effluent limitations applicable in this case, pertaining to the pulp and paper industry, were finalized by EPA in 1976. The State of California, which had authority to administer the act's permit program, proposed to issue permits to the two pulp mills involved in this case that included variances from the effluent limitations set by EPA for discharge of biochemical oxygen demand and acidity. The State concluded that the discharge would not result in a discernible impact on the marine environment. EPA vetoed the permits and this veto was later upheld by the courts.

H.R. 7159, as passed by the House, authorizes EPA to modify the requirements for best practicable and best conventional treatment technology with very strict limitations. The applicants must show that they have established a monitoring system; the modified requirements will not require any additional treatment by other sources; there will be no new or substantially increased discharges from the applicant's facilities; and the discharge is into waters where there is strong tidal movement and other hydrological and geological characteristics which will allow for fishable and swimmable wate after the discharge.

The Senate amendments add further detail to the restrictions on the granting of a modification by EPA contained in the House-passed bill. These include:

First, the pulp mills must agree to spend at least $250,000 per year for 10 years for research and development on water pollution control technology;

Second, EPA finds that this is a unique situation which will not establish a precedent; and

Third, EPA finds that no owner or operator of a comparable facility in the United States has demonstrated that it would be put at a competitive disadvantage as a result of the granting of an effluent modification to the California mills.

Mr. Speaker, this legislation does not establish a precedent for similarly situated discharges. The bill, as passed by the House, was very narrowly drawn to insure that it would apply only to the two pulp mills in question. The Senate added two provisions designed to accomplish the same purpose. The permit numbers of the two mills are specifically mentioned, and the fact that it is not to set a precedent is stated in the legislative language. This bill is not to be interpreted as an indication that our committee intends to abandon the concept of technology-based standards. It represents, rather, a necessary solution to a very limited problem arising from a very unique situation.

Mr. Speaker, I urge enactment of this bill.

□ 1315

We have analyzed this amendment clearly and we have no objection to the Senate amendments.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, I yield to the gentleman from California (Mr. CLAUSEN), a sponsor of the bill.

Mr. CLAUSEN. Mr. Speaker, I want to thank the distinguished chairman, the gentleman from New Jersey, and the gentleman from Arkansas and all the members of the committee for cooperating with us in bringing about what I think will be a refined version of what passed the House unanimously.

Mr. Speaker, I am pleased to rise in strong support of H.R. 7159, a bill which in its original version I authored and which, in the amended form that we have under consideration today, preserves our House intent to provide a workable and attainable mechanism for the two mills covered by the bill to receive the effluent limitation modifications they seek.

When, some 2½ months ago, we in this body voted overwhelmingly—without a single voice being raised in opposition—to pass this bill, we voted to establish a reasonable and balanced procedure by which two California pulpmills in a unique situation could be granted relief from the need to install additional pollution control facilities that are unnecessary for both environmental and other reasons. The amendments added to H.R. 7159 by our Senate counterparts do nothing to upset the fundamental principles of reasonableness and balance that are the basic premises around which the bill has been developed and that are intended to be guiding with respect to implementation of this legislation.

Three of the eleven changes that were made to the bill in the Senate were designed to assure that decisions made under authority of H.R. 7159 were subject to the usual standards of judicial review. It was never my intent as author of the bill that such decisions would not be subject to judicial review, and I consider these three amendments to more specifically state what has always been our position on this matter.

Thus, the new requirements in paragraphs 301(m)(1) and 301(m)(3) calling for a finding by the Administrator and deletion in paragraph 301(m)(2) of the phrase "in the view of the Administrator" are not at all inconsistent with what has always been the intent of this bill.

Most of the other amendments adopted by the Senate similarly either make more explicit what has always been my intent with respect to this bill or add to the bill language that refines and particularizes my original intent.

For example, the pulpmills are described now in subparagraph 301(m)(1)(A) by permit number rather than in more general terms. In addition, statutory language has been added as subparagraph 301(m)(1)(H) with respect to the uniqueness of the pulpmill situation and the fact that H.R. 7159 is not intended to be a precedent with respect to similarly situated discharges. These amendments state in different statutory language what the original bill's subparagraph 301(m)(1)(A) was intended to address. These two mills and their situation with respect to their permits are entirely unique.

No precedent is created or intended to be created. The committee has already conducted a review of similarly situated dischargers who may wish to attempt improperly to avail themselves of this amendment and has determined that this is a unique situation and will not establish a precedent for the relaxation of the requirements of the Clean Water Act applicable to such dischargers. As Chairman ROE described when we passed H.R. 7159 in September: "The bill has been drafted very narrowly so that it applies only to the circumstances in this case."

And as I stated on the floor at the same time:

H.R. 7159 is in no way intened, nor should it be viewed, as a precedent for future general policy with respect to the act generally. The bill addresses what we believe is a totally unique situation, and it is meant to be and do nothing more.

The Senate adopted another amendment deleting the words "to the extent practicable" from the bill's subparagraph 301(m)(1)(C). This amendment has been described as one designed to clarify that the monitoring requirement imposed by that subparagraph cannot be avoided, waived, or diminished. With that understanding of the amendment, I strongly support it. It was never my intent that the bill's monitoring requirements be capable of being avoided, waived, or diminished. I have always intended, however, that all of the bill's requirements be bounded by the concept of reasonableness, and nothing about the Senate's amendment changes this underlying premise of the bill and its requirements.

Our Senate counterparts refined my original intent somewhat in paragraph 301(m)(4) by adding to the House-passed language a proviso whereby, if the effluent from one or both of the pulp mills is contributing to a decline in the ambient water quality of the receiving waters, the Administrator must terminate the contributing mill's permit. In making the degradation determination that leads to nondiscretionary termination of either mill's permit, the Administrator shall assess whether the conditions of paragraph 2 of this subsection are being violated. The primary gauge of whether this nondiscretionary responsibility must be carried out should revolve around considerations of whether and to what extent applicable State water quality standards are being maintained.

Two of the Senate's amendments Fine Tune H.R. 7159's language to more closely track the particular facts concerning these mills and their unique circumstances. Replacement of the word "economic" with the word "energy" in subparagraph 301(m)(1)(B) recognizes that the State of California, in deciding in 1977 to approve the mills' requests for permit modifications, concluded that the modifications were justified after thoroughly evaluating the energy and enivronmental effects of requiring additional pollution control facilities at the two mills. Second, the Senate's addition of a new subparagraph 301(m)(1)(I) reflects the fact that no known significant competitive advantage or disadvantage, with respect to the Clean Water Act's effect and operation within the United States, will result from enactment of H.R. 7159.

In paragraph 301(m)(3), a change has been made to my original language to limit to 10 years the total length of time that the permit modifications authorized in this subsection may remain in force under authority of H.R. 7159.

The final Senate amendment, adding a new subparagraph 301(m)(1)(G), is the most significant of the amendments made to the bill by the other body. In principle and effect, this new provision requires that the two mills commit a portion of the economic gain realized as a result of this legislation to research and development of water pollution control technology that could lead to the reduction or complete elimination of wastewater discharges from these mills as well as others. I heartily endorse this concept. I believe that this new subparagraph greatly enhances the already extremely strong case for granting the mills the permanent relief they seek.

And I believe that, if ever there was a doubt in anyone's mind that the environment—both locally and nationally—will be better off as a result of H.R. 7159's becoming law, this provision should lay those doubts to rest. The House Members understand that the money to be spent by the companies would be used for research, development, and installation of experimental equipment designed to achieve the progress toward attainment of closed cycle technology or other water pollution control technology at these and other facilities.

Mr. Speaker, before we pass this important bill, I would like to express my heartfelt thanks to a number of colleagues and their staff, without whose assistance and support this legislation would not have been possible. The gentlemen from New Jersey, the chairman of our full public works committee and its water resources subcommittee, have been truly outstanding in terms of their cooperation and bipartisanship. The gentleman from Arkansas. The banking minority member of our Water Resources Subcommittee, has been of inestimable assistance on this legislation as he has throughout the entire tenure of our Congressional relationship. And on the Senate side, thanks must also go to Senators STAFFORD, CHAFEE, ABDNOR, RANDOLPH, BENTSEN, and their colleagues on the Environment and Public Works Committee for recognizing how important the need for this legislation is and for being willing to make it a high priority

matter in these final hours of the 97th Congress.

Finally, Mr. speaker, very special thanks must go to Senator GORTON and his exceptional staff counsel, Marianne McGettigan, who toiled long and hard to enable this bill to become law.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. Mr. Speaker, under my reservation, I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

I understood the gentleman from New Jersey to say there is $250,000 a year in this for several years.

What I am wondering is how we are spending that kind of money with no budgetary impact.

Mr. CLAUSEN. Mr. Speaker, if the gentleman will yield further, there is no budgetary impact. It is simply a requirement on the part of the affected pulp mills that they themselves will have to pay that minimal amount. It is not Federal money.

Mr. WALKER. Mr. Speaker, if the gentleman will yield further, I understand then that the budgetary impact of this bill is nonexistent, that this will have no impact on the budget whatsoever.

Mr. CLAUSEN. The gentleman is correct, as I assured him before.

Mr. HAMMERSCHMIDT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from New Jersey (Mr. ROE)?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS ACT AMENDMENT OF 1981

Mr. HUGHES. Mr. Speaker, I move to take from the Speaker's table the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated, with the Senate amendment thereto, recede from disagreement to the Senate amendment, and agree to the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment.

The Clerk proceeded to read the House amendment to the Senate amendment.

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. WALKER. I reserve the right to object.

The SPEAKER pro tempore. The gentleman from Michigan reserves the right to object to considering the amendment as being read and printed in the RECORD.

Mr. WALKER. Mr. Speaker, I reserve the right to object. It is a little hard to tell in the House, with all the loud noise, just exactly what we are doing.

Is the gentleman considering to go to conference?

Mr. HUGHES. No, if the gentleman will yield, I asked to take from the Speaker's table the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated, with the Senate amendment thereto, recede from disagreement to the Senate amendment, and agree to the Senate amendment with an amendment.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey to consider the amendment as read and printed in the RECORD?

Mr. CONYERS. Mr. Speaker, might the chairman of the Subcommittee on Crime explain what is involved in the Senate amendment or amendments from which he is receding?

Mr. HUGHES. Mr. Speaker, if the gentleman will yield, I am going to explain that in the text of my remarks.

Mr. CONYERS. Mr. Speaker, I object.

Mr. HUGHES. Will the gentleman let me explain, if I might?

Mr. CONYERS. That is all right, I object.

The SPEAKER pro tempore. Objection is heard.

The Clerk will continue to read the amendment.

The Clerk continued to read the House amendment to the Senate amendment.

□ 1400

Mr. HUGHES (during the reading). Mr. Speaker, I withdraw the motion.

PARLIAMENTARY INQUIRY

Mr. CONYERS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. CONYERS. Mr. Speaker, does that request have to be made in the form of a motion?

The SPEAKER pro tempore. No; it does not.

Mr. CONYERS. Further parliamentary inquiry, Mr. Speaker.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. CONYERS. Does the request have to receive unanimous consent?

The SPEAKER pro tempore. No. It is a matter of right to withdraw the motion in the House prior to action thereon.

AUTHORIZING EXCHANGE OF CERTAIN LANDS HELD IN TRUST BY UNITED STATES FOR NAVAJO TRIBE

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4001) to authorize the exchange of certain land held in trust by the United States for the Navajo tribe, and for other purposes with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 9, strike out "Vanderwagon" and insert "Vanderwagen".

Page 1, line 10, strike out "Vanderwagon" and insert "Vanderwagen".

Page 2, after line 2, insert:

SEC. 2. The Act entitled "An Act to provide for the partitioning of certain restricted Indian land in the State of Kansas", approved October 15, 1982 (Public Law 97-344), is amended by striking out "township 11" in paragraph (1) and inserting in lieu thereof "township 12".

SEC. 3. Section 6(i) of the Maine Indian Claims Settlement Act of 1980 (Public Law 96-420) is amended by adding at the end thereof the following:

"Notwithstanding any other provision of law authorizing the provision of special programs and services by the United States to Indians because of their status as Indians, any member of the Houlton Band of Maliseet Indians in or near the Town of Houlton, Maine, shall be eligible for such programs and services without regard to the existence of a reservation or of the residence of such member on or near a reservation.".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, H.R. 4001, as passed by the House a year ago,

simply provided authority for the Navajo Tribe to exchange a small tract of tribal land for a similar tract of privately owned land nearby.

The Senate has added two unrelated, but completely noncontroversial amendments.

The first would make a technical correction in the land description contained in a law we passed earlier this year, Public Law 97-344.

The second provides that members of the Houlton Band of Maliseet Indians of Maine would be eligible for certain Federal services despite the fact that the land base they are entitled to has not yet been secured. The act settling their land claims in Maine made them eligible for these services, but this is administratively contingent upon their getting the land. Unavoidable delay in not securing the land has left them ineligible for the services. The Senate amendment remedies this problem.

I can say that all concerned, including the administration, support these amendments and that this bill, as amended, does not authorize any new appropriation or represent an additional cost to the Government.

● Mrs. SNOWE. Mr. Speaker, I rise in support of H.R. 4001, because it contains important provisions that would assist the Houlton Band of Maliseet Indians receive Indian services provided by the Federal Government.

Under the Maine Indian Claims Settlement Act, the Houlton Band of Maliseet Indians received $900,000 to acquire a land base of 5,000 acres of land. Also under the act, the Houlton Band would be eligible to receive all of the Federal services which the United States provides to Indians. The band has yet to acquire the land, however, and as a result is not located on or near a reservation. Since the Bureau of Indian Affairs and the Indian Health Service are legally bound from delivering such services to Indians who do not live on or near a reservation, the Houlton Band is presently denied access to these U5Federal services.

The Senate has added an amendment to H.R. 4001, which would make the Houlton Band eligible for all Federal services, despite the fact that the Houlton Band has not yet acquired all of the land provided to them in the Maine Indian Claims Settlement Act. These provisions would thus bring the act into conformity with the intent of Congress and allow members of the Houlton Band of Maliseet Indians to receive the Federal services which are desperately needed.●

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

AUTHORIZING PURCHASE, SALE, AND EXCHANGE OF LAND BY DEVILS LAKE SIOUX TRIBE, NORTH DAKOTA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 503) to authorize the purchase, sale, and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation, N.D., and for other purposes, with Senate amendments to the House amendments, and concur in the Senate amendments to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendments to the House amendments, as follows:

Page 8, strike out lines 17, 18, and 19, of the House engrossed amendments.

Page 8, line 20, of the House engrossed amendments, strike out "(4)" and insert "(3)".

Page 8, line 22, of the House engrossed amendments, strike out "(5)" and insert "(4)".

Page 9, lines 3, of the House engrossed amendments, after "interest" insert "of a member of such tribe".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, S. 503 is a bill to authorize the purchase, sale and exchange of lands by the Devils Lake Sioux Tribe of North Dakota specifically and also by other tribes.

This bill passed the Senate once and was referred to the committee. It was reported out of the committee with an amendment and passed the House by unanimous consent with the active support of the administration. The Senate has added a minor amendment and the bill is now in front of the House for its concurrence.

Mr. Speaker, this bill has been endorsed by all concerned parties, it does not contain any authorization for appropriation of any funds and on the contrary, if enacted, it will save the U.S. taxpayers some money by simplifying certain aspects of the U.S. administration over Indian trust lands.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

RELATING TO DISTRIBUTION OF CERTAIN JUDGMENT FUNDS AWARDED BY INDIAN CLAIMS COMMISSION OR COURT OF CLAIMS

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3731) to amend the Act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 3, line 9, after "2." Insert "(a)".

Page 3, line 16, after "involved." insert "Such plans or plans shall be limited to urgent needs arising from extenuating circumstances and shall accord with general principles governing administration of trust funds of minors and legal incompetents, including a requirement for strict accounting for expenditures.".

Page 3, after line 16, insert:

(b) Clause (5) of section 3(b) of said Act is hereby striking out "warrant otherwise" and inserting in lieu thereof the following: "warrant otherwise: *Provided*, That in the development of such plan the Secretary shall survey past and present plans of the tribe for economic development, shall consider long range benefits which might accrue to the tribe from such plans, and shall encourage programing of funds for economic development purposes where appropriate.".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, H.R. 3731 simply amends the Indian Judgment Distribution Act of 1973 to extend the time the Secretary has to submit plans under the act. A recent Federal court decision has shown that Congress did not give the Secretary adequate time to complete the task. The Senate has amended the bill in three major respects.

First, the one-house veto provision of the act has been eliminated in favor of a joint resolution disapproval. This was done at the request of the administration and I reluctantly accept it.

Second, the provisions of section 7 of the act, exempting the distributed funds from certain taxation and from being considered as other resources for purposes of certain Federal programs, is made retroactive to secretarial plans submitted and approved by Congress since January 1, 1982.

Third, the Senate amended the bill to provide that interests in lands held by the United States in trust for individual Indians shall not be considered

as other income for purposes of certain State welfare benefits.

These amendments are acceptable to the committee and, I understand, acceptable to the administration.

●Mr. JONES of Oklahoma, Mr. Speaker, I am pleased to have been the prime sponsor in the House of the Indian Tribal Government Tax Status Act, and wish to acknowledge the wholehearted support and assistance of the distinguished cosponsors of this measure.

This legislation addresses and corrects certain inequitable applications of the Tax Code where Indian governments are concerned in the areas of charitable gift and deductions, excise tax exemptions, municipal bonding, and so forth. Indian governments, whose people are the poorest in the country, have been especially hard hit by the current economic conditions. It is hoped that this legislation may, in some measure, relieve their dire economic situation and aid in their path toward self-sufficiency.

The conferees agreed to provide a 2-year period to assess the manner in which the legislation has helped the Indian governments and what further changes, if any, might be required to bring full equity in this area of the Tax Code as it relates to States, local governments, and Indian tribes. I will be particularly interested to learn how this measure has benefited the Cherokee Nation, the Creek Nation, and other Indian governments in Oklahoma, who have patiently waited since 1974 for this body to conclude action on this matter.●

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

A motion to reconsider was laid on the table.

REQUEST TO CONSIDER SENATE AMENDMENT TO H.R. 6612, MASHANTUCKET PEQUOT INDIAN CLAIMS SETTLEMENT ACT

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6612) to provide for the settlement of land claims of the Mashantucket Pequot Indian Tribe of Connecticut, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(a) there is pending before the United States District Court for the District of Connecticut a civil action entitled Western Pequot Tribe of Indians against Holdridge Enterprises Incorporated, et al., Civil Action Numbered H76-193 (D. Conn.), which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut;

(b) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(c) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on titles resulting from such Indian land claims;

(d) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have reached an agreement which requires implementing legislation by the Congress of the United States and the Legislature of the State of Connecticut;

(e) the Western Pequot Tribe, as represented as of the time of the passage of this Act by the Mashantucket Pequot Tribal Council, is the sole successor in interest to the aboriginal entity generally known as the Western Pequot Tribe which years ago claimed aboriginal title to certain lands in the State of Connecticut; and

(f) The State of Connecticut is contributing twenty acres of land owned by the State of Connecticut to fulfill this Act. The State of Connecticut has provided special services to the members of the Western Pequot Tribe residing within its borders. The United States as provided few, if any, special services to the Western Pequot Tribe and has denied that it had jurisdiction over or responsibility for said Tribe. In view of the provision of land by the State of Connecticut and the provision of special services by the State of Connecticut without being required to do so by Federal law, it is the intent of Congress that the State of Connecticut not be required to further contribute directly to this claims settlement.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(a) the term "Tribe" means the Maschantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes and all its predecessors and successors in interest. The Mashantucket Pequot Tribe is represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council;

(b) the term "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources, including without limitation minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights;

(c) the term "private settlement lands" means (1) the eight hundred acres, more or less, of privately held land which are idenfied by a red outline on a map filed with the Secretary of the State of Connecticut in accordance with the agreement referred to in section 2(d) of this Act, and (2) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act. Within thirty days of the enactment of this Act, the Secretary of the State of Connecticut shall transmit to the Secretary a certified copy of said map;

(d) the term "settlement lands" means

(1) the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claims as enacted by the State of Connecticut and approved on June 9, 1982, and

(2) the private settlement lands.

(e) the term "Secretary" means the Secretary of the Interior;

(f) the term "transfer" means any transaction involving, or any transaction the purpose of which was to effect, a change in title to or control of any land or natural resources, and any act, event, or circumstance that resulted in a change in title to, possession of, dominion over, or control of land or natural resources, including any sale, grant, lease, allotment, partition, or conveyance, whether pursuant to a treaty, compact or statute of a State or otherwise; and

(g) the term "reservation" means the existing reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes and any settlement lands taken in trust by the United States for the Tribe.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISHMENT OF ABORIGINAL TITLES AND INDIAN CLAIMS

SEC. 4. (a) Any transfer before the date of enactment of this Act from, by, or on behalf of the Tribe or any of its members of land or natural resources located anywhere within the United States, and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance with the Constitution and all laws of the United States, including without limitation the Trade and Intercourse Act of 1790, Act of July 22, 1790 (ch. 33, Sec. 4, 1 Stat. 137, 138), and all amendments thereto and all subsequent reenactments and versions thereof, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer: *Provided, however,* That nothing in this section shall be construed to affect or eliminate the personal claim of any individual Indian (except for federal common law fraud claim) which is pursued under any law of general applicability that protects non-Indians as well as Indians.

(b) By virtue of the approval and ratification of a transfer of land or natural resources effected by subsection (a), any aboriginal title held by the Tribe or any member of the Tribe, or any other Indian, Indian nation, or tribe or band of Indians, to any land or natural resources the transfer of which was approved and ratified by subsection (a) shall be regarded as extinguished as of the date of such transfer.

(c) By virtue of the approval and ratification of a transfer of land or natural resources effected by this section, or the extinguishment of aboriginal title effected thereby, any claim (including any claim for damages for trespass or for use and occupancy) by, or on behalf of, the Tribe or any member of the Tribe or by any other Indian, Indian nation, or tribe or band of Indians, against the United States, any State or subdivision thereof or any other person which is based on—

(1) any interest in or right involving any land or natural resources the transfer of which was approved and ratified by subsection (a), or

(2) any aboriginal title to land or natural resources the extinguishment of which was effected by subsection (b),

shall be regarded as extinguished as of the date of any such transfer.

(d)(1) This section shall take effect upon the appropriation of $900,000 as authorized under subsection 5(e) of this Act.

(2) The Secretary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund established under subsection 5(a) of this Act.

MASHANTUCKET PEQUOT SETTLEMENT FUND

SEC. 5. (a) There is hereby established in the United States Treasury a fund to be known as the Mashantucket Pequot Settlement Fund. This fund shall be held in trust by the Secretary for the benefit of the Tribe and administerd in accordance with this Act.

(b)(1) The Secretary is authorized and directed to expend, at the request of the Tribe, the fund together with any and all income accruing to such fund in accordance with this subsection.

(2) Not less than $600,000 of the fund shall be available until January 1, 1985, for the acquisition by the Secretary of private settlement lands. Subsequent to January 1, 1985, the Secretary shall determine whether and to what extent an amount less than $600,000 has been expended to acquire private settlement lands and shall make that amount available to the Tribe to be used in accordance with the economic development plan approved pursuant to subsection 5(b)(3).

(3) The Secretary shall disburse all or part of the fund together with any and all income accruing to such fund excepting the amount reserved in subsection 5(b)(2) according to a plan to promote the economic development of the Tribe. (A) The Tribe shall submit an economic development plan to the Secretary and the Secretary shall approve such plan within sixty days of its submission if he finds that it is reasonably related to the economic development of the Tribe. If the Secretary does not approve such plan, he shall, at the time of his decision, set forth in writing and with particularity, the reasons for his disapproval. (B) The Secretary may not agree to terms which provide for the investment of the fund in a manner not in accordance with section 1 of the Act of June 24, 1938 (52 Stat. 1037), unless the Tribe first submits a specific waiver of liability on the part of the United States for any loss which may result from such an investment. (C) The Tribe may, with the approval of the Secretary, alter the economic development plan subject to the conditions set forth in subsection 5(b)(3)(A).

(4) Under no circumstances shall any part of the fund be distributed to any member of the Tribe unless pursuant to the economic development plan approved by the Secretary under subsection 5(b)(3).

(5) As the fund or any portion thereof is disbursed by the Secretary in accordance with this section, the United States shall have no further trust responsibility to the Tribe or its members with respect to the sums paid, any subsequent expenditures of these sums, or any property other than private settlement lands or services purchased with these sums.

(6) Until the Tribe has submitted and the Secretary has approved the terms of the use of the fund, the Secretary shall fix the terms for the administration of the portion of the fund as to which there is no agreement.

(7) Lands or natural resources acquired under subsection (5)(b) which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(8) Land or natural resources acquired under subsection (b) which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such land and natural resources. Such lands or natural resources shall not be subject to any restriction against alienation under the laws of the United States.

(9) Notwithstanding the provisions of section 1 of the Act of August 1, 1888 (25 Stat. 357), as amended, and section 1 of the Act of February 26, 1931 (46 Stat. 1421), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon the purchase price and other terms of sale. Subject to the agreement required by the preceding sentence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General, in the United States and condemn interests adverse to the ostensible owner.

(c) For the purpose of subtitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b) applies shall be deemed to be an involuntary conversion within the meaning of section 1033 of such Code.

(d) The Secretary may not expend on behalf of the Tribe any sums deposited in the fund established pursuant to subsection (a) of this section unless and until he finds that authorized officials of the Tribe have executed appropriate documents relinquishing all claims to the extent provided by sections 4 and 10 of this Act, including stipulations to the final judicial dismissal with prejudice of its claims.

(e) There is authorized to be appropriated $900,000 to be deposited in the fund.

JURISDICTION OVER RESERVATION

0Section 6. Nothwithstanding the provision relating to a special election in section 406 of the Act of April 11, 1968 (25 U.S.C. 1326), the reservation of the Tribe is declared to be Indian country subject to State jurisdiction to the maximum extent provided in title IV of such Act.

LIMITATION OF ACTIONS: FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in—

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of the enactment of this Act, or

(2) an answer contained in a reply to a complaint before the end of such period.

(b) Notwithstanding any other provision of law, exclusive jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any State may be removed by the defendant to the United States District Court for the District of Connecticut.

(d) Except as provided in this Act, no provision of this Act shall be construed to constitute a jurisdictional act, to confer jurisdiction to sue, or to grant implied consent to any Indian, Indian nation, or tribe or band of Indians to sue the United States or any of its officers with respect to the claims extinguished by the operation of this Act.

RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation which are held in trust by the Secretary for the benefit of the Tribe or which are subject to a Federal restraint against alienation at any time after the date of the enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot Housing Authority, or any successor in interest to such Authority.

EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, Federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) The Tribe shall file with the Secretary a copy of its organic governing document and any amendment thereto. Such instrument must be consistent with the terms of this Act and the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claim as enacted by the State of Connecticut and approved June 9, 1982.

(c) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indians tribes as of the date of enactment of this act.

OTHER CLAIMS DISCHARGED BY THIS ACT

SEC. 10. Except as expressly provided herein, this Act shall constitute a general discharge and release of all obligations of the State of Connecticut and all of its political subdivisions, agencies, departments, and all of the officers or employees thereof arising from any treaty or agreement with, or on behalf of the Tribe or the United States as trustee therefor.

INSEPARABILITY

SEC. 11. In the event that any provision of section 4 of this Act is held invalid, it is the intent of Congress that the entire Act be invalidated. In the event that any other section or provision of this Act is held invalid, it is the intent of Congress that the remaining sections of this Act shall continue in full force and effect.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. WALKER. Mr. Speaker, reserving the right to object, this particular bill I think has some $900,000 in it. Is that amount of money covered anywhere in the budget?

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Arizona.

Mr. UDALL. Not in this year's budget, but we will propose it for next year's budget. I understand the administration has no objection to the bill.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Arizona?

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

□ 1410

AUTHORIZING CLERK TO MAKE CORRECTION IN ENROLLMENT OF H.R. 2330, AUTHORIZING APPROPRIATION TO NUCLEAR REGULATORY COMMISSION

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 135) authorizing the Clerk of the House of Representatives to make correction in the enrollment of the bill, H.R. 2330, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, may I ask the distinguished chairman if this resolution contains the correction which resolves the stalemate we had with the other body with respect to H.R. 2330, which simply provides for the study of the viability of the domestic uranium mining and milling industry and its relationship with our national security?

Mr. UDALL. If the gentleman will yield, the gentleman is exactly correct.

Mr. FRENZEL. Further reserving the right to object, does it contain any restrictions of any kind on imports, may I ask the chairman?

Mr. UDALL. If the gentleman will yield, no; there was a very serious limitation on imports in the original Senate amendment, and through negotiations in the conference committee we have reduced this to a study, and this contains a study on and no import restrictions.

Mr. FRENZEL. I thank the gentleman.

This bill has been considered by the gentleman from New Mexico (Mr. LUJAN), myself, the gentleman from Florida (Mr. GIBBONS), the gentleman from North Carolina (Mr. BROYHILL), and a number of others who are interested in the matter. We do not object to the studies.

We have noted that a certain percentage of imports triggers a section 232 study by the Secretary of Commerce. We don't object to a study at that level, but we don't believe that any specific level of imports should govern any Presidential decision on import restrictions or relief. In other words, we believe that the President should be able to act as he sees fit, and not be bound by the import percentage which generated the study.

We also believe the criteria for both of the studies contemplated in the resolution are overwritten. We believe the studies should go forward in the traditional manner. We are confident they will proceed well without diverting necessary departmental resources and without being unnecessarily detailed.

I withdraw my reservation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 135

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill H.R. 2330, the Clerk of the House of Representatives shall make the following correction:

At the end of the bill insert the following new section:

URANIUM SUPPLY

SEC. 23. (a)(1) Not later than 12 months after the date of enactment of this section, the President shall prepare and submit to the Congress a comprehensive review of the status of the domestic uranium mining and milling industry. This review shall be made available to the appropriate committees of the United States Senate and the House of Representatives.

(2) The comprehensive review prepared for submission under paragraph (1) shall include—

(A) projections of uranium requirements and inventories of domestic utilities;

(B) present and future projected uranium production by the domestic mining and milling industry;

(C) the present and future probable penetration of the domestic market by foreign imports;

(D) the size of domestic and foreign ore reserves;

(E) present and projected domestic uranium exploration expenditures and plans;

(F) present and projected employment and capital investment in the uranium industry

(G) an estimate of the level of domestic uranium production necessary to ensure the viable existence of a domestic uranium industry and protection of national security interests;

(H) an estimate of the percentage of domestic uranium demand which must be met by domestic uranium production through the year 2000 in order to ensure the level of domestic production estimated to be necessary under subparagraph (G);

(I) a projection of domestic uranium production and uranium price levels which will be in effect both under current policy and in the event that foreign import restrictions were enacted by Congress in order to guarantee domestic production at the level estimated to be necessary under subparagraph (G);

(J) the anticipated effect of spent nuclear fuel reprocessing on the demand for uranium; and

(K) other information relevant to the consideration of restrictions on the importation of source material and special nuclear material from foreign sources.

(b)(1) Chapter 14 of the Atomic Energy Act of 1954 is amended by adding the following new section at the end thereof:

"SEC. 170B. URANIUM SUPPLY.—

"a. The Secretary of Energy shall monitor and for the years 1983 to 1992 report annually to the Congress and to the President a determination of the viability of the domestic uranium mining and milling industry and shall establish by rule, after public notice and in accordance with the requirements of section 181 of this Act, within 9 months of enactment of this section, specific criteria which shall be assessed in the annual reports on the domestic uranium industry's viability. The Secretary of Energy is authorized to issue regulations providing for the collection of such information as the Secretary of Energy deems necessary to carry out the monitoring and reporting requirements of this section.

"b. Upon a satisfactory showing to the Secretary of Energy by any person that any information, or portion thereof obtained under this section, would, if made public, divulge proprietary information of such person, the Secretary shall not disclose such information and disclosure thereof shall be punishable under section 1905 of title 18, United States Code.

"c. The criteria referred to in subsection a. shall also include, but not be limited to—

(1) an assessment of whether executed contracts or options for source material or special nuclear material will result in greater than thirty-seven and one-half pecent of actual or projected domestic uranium requirements for any two consecutive year periods being supplied by source material or special nuclear material from foreign sources;

"(2) projections of uranium requirements and inventories of domestic utilities for a 10 year period;

"(3) present and probable future use of the domestic market by foreign imports;

"(4) whether domestic economic reserves can supply all future needs for a future ten year period;

"(5) present and projected domestic uranium exploration expenditures and plans;

"(6) present and projected employment and capital investment in the uranium industry;

"(7) the level of domestic uranium production capacity sufficient to meet projected domestic nuclear power needs for a ten year period; and

"(8) a projection of domestic uranium production and uranium price levels which will be in effect under various assumptions with respect to imports.

"d. The Secretary of Energy, at any time, may determine on the basis of the monitoring and annual reports required under this section that source material or special nuclear material from foreign sources is being imported in such increased quantities as to be a substantial cause of serious injury, or threat thereof, to the United States uranium mining and milling industry. Based on that determination, the United States Trade Representative shall request that the United States International Trade Commission initiate an investigation under section 201 of the Trade Act of 1974 (19 U.S.C. 2251).

"e. (1) If, during the period of 1982 to 1992, the Secretary of Energy determines that executed contracts or options for source material or special nuclear material from foreign sources for use in utilization facilities within or under the jurisdiction of the United States represent greater than thirty-seven and one-half percent of actual or projected domestic uranium requirements for any two consecutive year period, or if the Secretary of Energy determines the level of contracts or options involving source material and special nuclear material from foreign sources may threaten to impair the national security, the Secretary of Energy shall request the Secretary of Commerce to initiate under section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) an investigation to determine the effects on the national security of imports of source material and special nuclear material. The Secretary of Energy shall cooperate fully with the Secretary of Commerce in carrying out such an investigation and shall make available to the Secretary of Commerce the findings that lead to this request and such other information that will assist the Secretary of Commere in the conduct of the investigation.

"(2) The Secretary of Commerce shall, in the conduct of any investigation requested by the Secretary of Energy pursuant to this section, take into account any information made available by the Secretary of Energy, including information regarding the impoact on national security of projected or executed contracts or options for source material or special nuclear material from foreign sources or whether domestic production capacity is sufficient to supply projected national security requirements.

"(3) No sooner than 3 years following completion of any investigation by the Secretary of Commerce under paragraph (1), if no recommendation has been made pursuant to such study for trade adjustments to assist or protect domestic uranium production, the Secretary of Energy may initiate a request for another such investigation by the Secretary of Commerce.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

CYNTHIA GAMBON RABENA

Mr. MAZZOLI, Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 2481) for the relief of Cynthia Gambon Rabena, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Reserving the right to object, Mr. Speaker—and I shall not object—I take this reservation to ask the gentleman from Kentucky to explain the bill.

Mr. MAZZOLI. If the gentleman would yield, this is an adoption case of a 6-year-old child whose name is Cynthia Rabena. She was adotped while in the Philippine Islands. A favorable home study, which means that this is a legitimate adoption and that the parents are prepared to take care of this young child, has been submitted.

This was the subject of favorable action in the subcommittee meeting which we had on December 9, and the favorable action is within subcommittee precedents.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2481

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Cynthia Gambon Rabena may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Wilfredo Reg Rabena and his wife, Lourdes Gambon Rabena, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUEST TO CONSIDER H.R. 4746, KIN CHI ENG SIMS

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 4746) for the relief of Kin Chi Eng Sims, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object—and I shall not object, I take this time to ask the gentleman from Kentucky to explain this bill.

Mr. MAZZOLI. If the gentleman will yield, this is another adoption case of a young 19-year-old man named Kin Sims, who entered the United States from Korea at the age of 10 and has been in this country for 9 years.

A favorable home study has been submitted, in which this is a legitimate adoption. His parents do want him. This matter was favorably reported by the subcommitte on December 9 and it does fall within the precedents of the subcommittee.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. CONYERS. Mr. Speaker, reserving the right to object, might I inquire of the subcommittee chairman: Do not these matters normally go before the full Committee on the Judiciary before they are reported?

Mr. MAZZOLI. If the gentleman will yield, I would answer my friend, the gentleman from Michigan, that traditionally that is the case. We reached the end of the session without the opportunity of having a full committee meeting.

Mr. CONYERS. What irremedial harm would occur if this matter were put over until the next Congress?

Mr. MAZZOLI. If the gentleman will yield, the gentleman is fully and freely permitted to object. The harm, if not irremedial, would be that a young man would not be able to be affiliated legally with his parents.

Mr. CONYERS. But could that not occur in the 98th Congress?

Mr. MAZZOLI. I could not deny that to the gentleman. It could occur in the 98th Congress.

Mr. CONYERS. Then what is the emergency?

Mr. MAZZOLI. I would hope the gentleman would defer to the fact that when you have an adoption, a young man who needs a family, and whose people are willing to adopt him, at the Christmas season I would hope that the gentleman would understand that the subcommittee is trying its best to do essential justice and equity, and we have tried our best.

Mr. CONYERS. I commend the gentleman for that, and I do not want to be any less sentimental than he at Christmastime. But might I just inquire how many other cases like this were before the subcommittee?

Mr. MAZZOLI. We probably had 400 before the subcommittee, and we reported 6.

Mr. CONYERS. Then can the gentleman suggest what differentiates this case from the 394 other cases and makes it essential that we dispense Christmas cheer to this 1 family out of 400?

Mr. MAZZOLI. The gentleman asks a question, and I can only say that the subcommittee has worked for 2 years together. We have had a lot of private bills before us. And some, these few, rise to the point of being meritorious and have excited on the part of the entire subcommittee, and I want to commend all of the members of my subcommittee for their——

Mr. CONYERS. Just a moment, before the gentleman begins that. The gentleman may be premature.

Mr. Chairman, I happen to like the idea of reuniting young persons with their families at Christmastime. But there are 400 such cases that the gentlemen went through. A number of them went before the full committee. Some were approved and some were not approved. But what the gentleman is doing by this procedure is short cir-

cuiting the very kinds of questions that I as a member of the full committee would have every right to ask. We are now holding up the business of the entire House to find out what, if the gentleman had brought it in a timely fashion, would have been disposed of, probably favorable, in the full Committee on the Judiciary.

I think this is an extraordinary procedure, without any particular redeeming merits, especially since I and most of the Members here have no idea what is in the 394 similar requests that are before the gentleman's subcommittee.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. CONYERS. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman for yielding.

Mr. Speaker, as the gentleman from Michigan knows, I have probably got the most restrictive view of private legislation of anyone in the House. I will go to the defense of the gentleman from Kentucky in this particular instance. During the last Congress, as well as this one, I was one of the three Republican official objectors to the private calendar; and on the last or next-to-the-last day of the last Congress there were a number of private bills that were brought up by unanimous consent and were passed because it was deemed to be especially meritorious that the legislation pass. I recall that that was just before Christmas, too.

So what the gentleman from Kentucky is proposing to do with this bill and the preceding bill and four other bills is definitely in tune with at least the precedent that occurred 2 years ago when the 97th Congress ground to a halt, and I would urge the gentleman from Michigan to withdraw his reservation of objection.

□ 1420

Mr. CONYERS. I appreciate the advice from the gentleman from Wisconsin. I normally try to follow it whenever I can.

Let me ask one question. What happens to the other 394 similar petitions, which I presume by the gentleman's subcommittee action do not rise to the same level of urgency or charity as these several before us now?

Mr. MAZZOLI. If the gentleman will yield further, they are held over until next year. If the sponsors wish to reintroduce them, they may be reintroduced.

Mr. CONYERS. In other words, that is what could happen to these four?

Mr. MAZZOLI. That is right. I think it is time for the gentleman——

Mr. Speaker, regular order.

Mr. CONYERS. Is the gentleman advising me how to handle my objection?

Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

DANA BRAFORD BARETTO

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 5633) for the relief of Dana Braford Baretto and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Reserving the right to object, Mr. Speaker, I take this time to ask the distinguished gentleman from Kentucky (Mr. MAZZOLI) to explain this bill and why it ought to pass.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

I will very briefly. This is a case in which an illegitimate daughter of a U.S. citizen is being legitimized and being made a permanent resident of the United States. The natural father of this young lady has tried through the Red Cross to locate her and found her eventually in the Philippines in 1961.

The natural father has through this entire time supported the daughter. This again was before our subcommittee December 9. It was reported favorably. And it is within the precedents of our subcommittee.

Mr. McCOLLUM. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. Further reserving the right to object, I yield to the gentleman from Florida.

Mr. McCOLLUM. I thank the gentleman for yielding.

I would like to point out as part of the discussion here I am a member of that subcommittee. We met the other day on these private bills and reviewed those 400 that the chairman is talking about as an accommodation to the Members here to screen them.

We knew, at least we believed we were not going to have a full committee meeting. It was because of the vast majority, I think almost every Member here had some bill of theirs that was in the hopper, that met and did this 6 or 7 hours.

It seems to me it is utterly futile for the distinguished gentleman from Kentucky to even call such meetings to accommodate our membership if once we have done that and screened these handful we are not going to be able to proceed.

I think it is a very important point to make out that that is why we have done this, is to accommodate the Members.

Mr. MAZZOLI. If the gentleman will yield further, I would like to ask the gentleman to yield to the gentleman from Michigan.

Mr. SENSENBRENNER. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. I thank the gentleman for yielding.

I will make my own reservation of objection.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. CONYERS. Mr. Speaker, reserving the right to object, this bill is before us as the result of a very interesting procedure in the Committee on the Judiciary. We have been here for all of these months, and now I am told that 400 petitions had to be screened by the subcommittee and those petitions were never brought to the attention of the full committee, the full committee has never met.

Would it be too inconvenient to ask why the full committee, of which I am member, could not participate in the deliberations on this bill in the regular course. The Member who was the sponsor of the other motion to which I was forced to object is now begging me to reconsider.

I have nothing against the merits of the proposal. But the full committee has not met in months. Is there some particular reason why this bill could not have been scheduled in the regular order?

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

The gentleman is wrong. The full committee has met within months. The full committee has not had an opportunity to meet during the "lame-duck" session. The subcommittee in an effort to do essential justice to the petitions of many people like our friend from Florida has met, and I might say again to commend my colleagues, each one of my colleagues was there.

Mr. CONYERS. I would like to recapture my time.

I thank the gentleman for his explanation.

Now, when these bills were taken up in the gentleman's subcommittee, did the gentleman know that the full committee was not going to meet?

Mr. MAZZOLI. If the gentleman will yield further, I did know that it was probably unlikely for the full committee to meet. That is why my colleagues and all of us showed up for the meeting. We were there from 9:30 to 2:30 in

the afternoon. We approached this thing with care, and I think the gentleman would be proud of the kind of work we did.

Mr. CONYERS. I am sure I would. Let me ask the gentleman this.

What did the gentleman tell the other 100 or so Members who had petitions that were turned down?

Mr. MAZZOLI. The docket was probably perhaps—around 100. There were 400 cases in our docket. Not all the Members showed up. Some of them came and we had to turn them down.

Mr. CONYERS. The gentleman told them to come back if they were reelected in the next session. But these four cases were of such high merit that in the gentleman's judgment they should go forward. The gentleman not only felt that, but so did his subcommittee. And the gentleman feels, I guess by extension, that the full committee would support him.

Mr. MAZZOLI. I do not want to derogate to myself or the subcommittee saying what the full committee would do. I believe the gentleman would rest assured the scrutiny we give to the cases would probably mean the full committee would have looked with some favor on them.

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. CONYERS. Further reserving the right to object, I yield to my distinguished colleague from New Jersey, the chairman of the Judiciary Committee.

Mr. RODINO. I thank the gentleman for yielding.

I merely want to remind the gentleman from Michigan, though he is diligent about these matters, this is not an unusual procedure. In my 34 years in the Congress we have during the last waning hours of the Congress considered matters that were urgent matters, where there might have been prejudice to individuals, where serious injury might have occurred, where it might have been not only an act of charity, but an act of justice and equity to take these matters up.

During the time that I served as chairman of the Subcommittee on Immigration, we went through the thousands of bills that came before us. We considered them and whether they had any merit and whether they were of a substantial nature that we felt deserved action.

I was fully informed of what the subcommittee has done. This is just an act of compassion and justice in these last days. I would hope that we repose confidence in our subcommittee, especially when it is unanimous and that when it takes this kind of action, it is taking action that reflects credit on the committee.

Mr. CONYERS. I appreciate the chairman's explanation. It is perfectly logical, and I support it completely. I did not know this was an extraordinary procedure. The cases seemed to overflow with merit. Who am I to prevent a young person from being reunited with his or her family?

And I would further say to my colleague from Florida (Mr. MICA), to whose bill I objected, that I would be happy to support its reconsideration.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. LUNGREN. Mr. Speaker, reserving the right to object, and I shall not object, I just thought we might make it clear to this body that under the leadership of the chairman of the subcommittee during this Congress, we have met on a regular basis, far more than we ever did in my previous term on this subcommittee, in which we had, unfortunately, complaints from Members because we had private bills stacked up for months on end.

The gentleman from Kentucky has attempted to have approximately one meeting per month on only the private bills. I have talked with other Members who have served on this subcommittee before and I can find no one who has suggested that any previous subcommittee has worked more diligently on trying to go through the literally hundreds and thousands of private bills that occur in this Congress year after year.

We had a meeting just a week ago in which we dealt with—I hear the number 400—I remember something like 85 bills—in which we heard testimony and met for over 6 hours, in which we tried to cull very carefully from that entire list those that needed immediate attention.

Certainly it is true if they die at the end of this year they can be brought up again. But we thought as an accommodation to other Members and under the leadership of the gentleman from Kentucky (Mr. MAZZOLI), we ought to go the extra mile.

And that is purely and simply what has been done here.

I think the chairman ought to be recognized for the efforts that he has made which I would believe to be extraordinary efforts that have never been forwarded before to my knowledge in this House. And I think the entire body owes the gentleman from Kentucky congratulations for doing this.

We are only bringing very, very few private bills out of the literally thousands that are presented to us. And I would suggest that I have not found a tremendous propensity for Members to volunteer to serve on that subcommittee to do this work.

□ 1430

So I would just say, Mr. Speaker, that I withdraw my reservation; but as a member of that subcommittee, I think the record ought to be clear on what has taken place.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

The Clerk read the bill, as follows:

H.R. 5633

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for purposes of section 203(c) of the Immigration and Nationality Act, the petition filed on behalf of Dana Braford Baretto by Emily Irene Braford under section 204(a) of such Act shall be held and considered to have been filed on March 29, 1979, the date on which a petition was filed on behalf of Dana Braford Baretto under such section by Ralph Otis Braford.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CAROLE JOY MAXFIELD-RAYNOR, BRUCE SHERLOCK MAXFIELD-RAYNOR, CHARLTON BRUCE MAXFIELD-RAYNOR, AND MAXINE ANNE MAXFIELD-RAYNOR

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 717) for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, and I shall not object, I take this time to ask the gentleman from Kentucky to explain this bill.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding.

This is another case of legitimization of an illegitimate child involving Charles Maxfield, a U.S. citizen, who is in ill health. Mr. Maxfield has been in constant touch with his daughter, his illegitimate daughter, since her early youth and has sent money and supported her throughout the entire time.

This subcommittee did meet on December 9 and reported the bill favorably and we did find it within the subcommittee precedents.

Mr. SENSENBRENNER. Mr. Speaker, further reserving the right to

object, is it not true that there is some urgency in this bill, since Mr. Maxfield is suffering from lung cancer and that it is important that this bill be passed to legitimize his child for purposes of inheritance?

Mr. MAZZOLI. I thank the gentleman for suggesting that. That is indeed the truth. There is a matter of time. Time is of the essence in this particular case.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 717

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by the proper number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, the total number of immigrant visas which are made available to natives of the country of the aliens' birth under section 202 of such Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOSE RAMON BELTRON AIVENDA OSTLER

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 1364) for the relief of Jose Ramon Beltron Aivenda Ostler, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I take this time to ask the distinguished gentleman from Kentucky (Mr. MAZZOLI) to explain this bill.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding.

This again is an adoption case of a young man who is of the age of 16. Under the law he was not adoptable under the current terms of the law. He has no family to return to. He is a native and citizen of Mexico. The bill would grant him permanent residency.

The bill did come before the subcommittee on December 9 and was unanimously reported favorably. It is well within the subcommittee precedence.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1364

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in the administration of the Immigration and Nationality Act, Jose Ramon Beltron Aivenda Ostler of Orem, Utah, shall be classified as a child within the meaning of section 101(b)(1)(E) of such Act upon approval of a petition filed in his behalf by Mr. and Mrs. M. Ray Ostler of Orem, Utah, citizens of the United States, pursuant to section 204 of such Act. No natural parent, brother, or sister, if any, of Jose Ramon Belton Aivenda Ostler shall, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CESAR NOEL JUMP

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 1838) for the relief of Cesar Noel Jump, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I take this time to ask the gentleman from Kentucky (Mr. MAZZOLI) to explain this bill and why it is necessary.

Mr. MAZZOLI. Mr. Speaker, I thank my friend, the gentleman from Wisconsin.

This is another adoption case. It involves a native and citizen of El Salvador who has five brothers and sisters already in the United States, one of whom was the subject of a private bill in the earlier Congress.

This bill did come before your subcommittee on December 9, was found to be meritorious, reported unanimously and was held to be within the precedence of our subcommittee.

Mr. SENSENBRENNER. Mr. Speaker, further reserving the right to object, I note that the subcommittee did not have this bill until November 29, 1982; so there was no full committee meeting between the time it was referred to the subcommittee and the present time to consider it.

Mr. MAZZOLI. Mr. Speaker, the gentleman is correct.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. CONYERS. Mr. Speaker, reserving the right to object, is the subcommittee chairman proposing to this body that this November request, upon being carefully examined against the 399 others, had more redeeming merit?

Mr. MAZZOLI. Mr. Speaker, if the gentleman will yield, it came from the other body which had studied it carefully and it did have redeeming value, yes.

Mr. CONYERS. The other body's judgment was decisive in this?

Mr. MAZZOLI. No, hardly. I would say to the gentleman that this subcommittee worked it carefully and during that period of time of 6 hours that the gentleman from California suggested that we were in meetings, looked at the bill very carefully and found it to be meritorious.

Mr. CONYERS. Well, it is not included in the regular matters that came before the committee, Mr. Chairman; is that not correct?

Mr. MAZZOLI. The gentleman has before him the copy. It was done just like every other bill is done, with a copy of the subcommittee markup.

Mr. CONYERS. Well, Mr. Speaker, I apologize. It is in that list.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1838

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Cesar Noel Jump may be classified as a child within the meaning of section 101(b)(1)(E) of such Act upon approval of a petition filed on his behalf by Mr. and Mrs. Robert I. Jump, citizens of the United States: *Provided,* That the natural parents, brothers, and sisters of the said Cesar Noel Jump shall not, but virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

KIN CHI ENG SIMS

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 4746) for the relief of Kin Chi Eng Sims, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, just to confirm with the distinguished gentleman from Kentucky that this is the same bill about which we had a colloquy earlier?

Mr. MAZZOLI. I would say to my friend, the gentleman from Wisconsin, he is exactly correct. This is the identical bill we had a few moments ago and the subject of an extended discussion.

Mr. SENSENBRENNER. Mr. Speaker, further reserving the right to object, I support the bill.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. CONYERS. Mr. Speaker, reserving the right to object, I would like to indicate to my colleague, the gentleman from Florida, who I believe offered this matter before the subcommittee, that I apologize for any inconvenience that was caused him, Kin Sims, or her family, or any of our friends in Korea.

Mr. MICA. Mr. Speaker, I thank the gentleman.

Mr. CONYERS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4746

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of section 203(a)(1) and 204 of the Immigration and Nationality Act, Kin Chi Eng Sims shall be held and considered to be the natural-born alien son of Gerald and Patricia Sims, citizens of the United States: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 6094, AUTHORIZING APPROPRIATIONS FOR U.S. INTERNATIONAL TRADE COMMISSION, U.S. CUSTOMS SERVICE, AND OFFICE OF U.S. TRADE REPRESENTATIVE, 1983

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6094) to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes, disagree to the Senate amendments thereto and agree to a conference requested by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I reserve the right to object to ask the gentleman from Florida or the gentleman from Minnesota to confirm that the authorizations we are dealing with here are within the budget.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, all of these agencies have already received their appropriations either in an appropriations bill or in the continuing resolution. The Senate number on Customs is below the House number, so we cannot do the gentleman any worse than that. All the other figures are within the budget as we understand it.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida? The Chair hears none and, without objection, appoints the following conferees: Messrs. ROSTENKOWSKI, GIBBONS, and FRENZEL.

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 4566, AMENDING CERTAIN TARIFF SCHEDULES

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes, agree to the Senate amendments thereto, with an amendment which is the text of H.R. 4566 and H.R. 6867 as those bills were approved by the House, insist upon the House amendment, and request a conference with the Senate thereon.

□ 1440

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida? The Chair hears none and, without objection, appoints the following conferees: Messrs. ROSTENKOWSKI, GIBBONS, and FRENZEL.

There was no objection.

AUTHORIZING PRINTING OF ADDITIONAL COPIES OF PUBLICATION ENTITLED "GENERAL EXPLANATION OF THE REVENUE PROVISIONS OF THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982"

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent for immediate consideration of the Senate concurrent resolution (S. Con. Res. 136) to provide for the printing of an additional 3,000 copies of the forthcoming publication by the staff of the Joint Committee on Taxation, entitled "General Explanation of the Tax Equity and Fiscal Responsibility Act of 1982."

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, this resolution comes under the jurisdiction of the Committee on House Administration. The chairman of that committee, the distinguished gentleman from California (Mr. HAWKINS) and I have reviewed it.

It is similar to the resolutions which we pass after each major tax bill. It will provide a significant savings if we can publish the additional copies at the same time we publish the regular copies. They will be made available to Members of the House.

I withdraw my reservation:

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 136

Resolved by the Senate (the House of Representatives concurring), That 3,000 additional copies of the General Explanation of the Revenue Provisions of the Tax Equity and Fiscal Responsibility Act of 1982, prepared by the Staff of the Joint Committee on Taxation, be printed for the use of the Joint Committee on Taxation.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

REQUEST TO CONSIDER CONFERENCE REPORT ON H.R. 5002, FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. BREAUX. Mr. Speaker, pursuant to the order of the House of December 17, 1982, I call up the conference report on the bill (H.R. 5002) to improve fishery conservation and management, and ask for its immediate consideration.

The Clerk read the title of the bill.

Mr. WALKER. Mr. Speaker, I reserve the right to object.

The SPEAKER pro tempore. There is no unanimous consent request pending.

Mr. WALKER. Is there any money in the bill?

Mr. BREAUX. Mr. Speaker, I would say to the gentleman from Pennsylvania that the bill is supported by the administration and it is within the budget that we are operating under and supported by the administration as such.

POINT OF ORDER

Mr. ANDERSON. Mr. Speaker, I have a point of order.

The SPEAKER pro tempore. The gentleman was on his feet and will state his point of order.

Mr. ANDERSON. I make a point of order against the conference report on H.R. 5002 because the Senate conferees were not formally appointed at the time the conferees met. This procedure violates House rule XXVIII, clause 6, which requires an open meeting of the conferees. In this case there was never a valid conference meeting because the Senate conferees were not appointed at the time the conference met.

According to the rules on the conference report, it should be considered as rejected.

I would also like to point out that several of the conferees signed the signature sheets of the conference report prior to the premature meeting of the House and Senate conferees. This is clearly an improper procedure, so they actually signed the report prior to a conference. It was, if not illegal, a very improper procedure because there was no conference because the Senators were not conferees at the time, it was not an existent conference, and because they were not appointed until the next day.

That is my point of order, Mr. Speaker.

The SPEAKER pro tempore. Does the gentleman from Louisiana care to respond?

Mr. BREAUX. Yes, I do, Mr. Speaker.

I would only point out that I did not have any control over the Senate procedures. I would only say to the Speaker that the House does not have any control over the speakers of the other body.

I would only note for the Speaker's consideration that the conference report, when filed in the House, was done subsequent to the necessary action in appointing the conferees by the Senate.

Mr. ANDERSON. But the Senators that we met with were not conferees. It was wholly an improper conference.

The SPEAKER pro tempore. The Chair notes that pursuant to the Senate message of yesterday, the conferees were not named until yesterday, so the Chair is prepared to rule, unless either gentleman wishes to make a further statement.

Mr. BREAUX. This Member is certainly willing to abide by the rules.

Mr. SPEAKER pro tempore. The Chair sustains the point of order based on the concession that a conference formally appointed by both Houses did not meet in open session following appointment.

Pursuant to clause 6(b), rule XXVIII, the conference report is considered as rejected, the House considered to have insisted upon disagreement to the Senate amendment, and the Chair is authorized to appoint conferees without intervening motion.

APPOINTMENT OF CONFEREES ON H.R. 5002

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Messrs. BIAGGI, ANDERSON, BREAUX, STUDDS, SNYDER MCCLOSKEY, and PRITCHARD.

There was no objection.

ESTABLISHING CHEAHA WILDERNESS IN TALLADEGA NATIONAL FOREST, ALA.

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2955) to establish the Cheaha Wilderness in Talladega National Forest, Ala., and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so only to inquire of the gentleman from Ohio if this is the Cheaha Wilderness bill we scaled down, the Alabama wilderness to include only this area? Is that correct?

Mr. SEIBERLING. If the gentleman will yield, yes, this wilderness area was included in the bill as passed by the House, which passed on August 4 under H.R. 6011. this is the smaller of the two areas included in the bill. It is totally noncontroversial.

For reasons which I do not quite understand, the Senate took out the other area, but I see no opposition whatsoever to this. It is supported by the entire Alabama delegation.

Mr. WALKER. If the gentleman will yield to me under this reservation of objection, there is no budgetary impact of this bill; is that correct?

Mr. LUJAN. Absolutely none at all.

Mr. WALKER. And there is no problem with the individual Members whose districts this bill will affect?

Mr. LUJAN. As far as I am concerned, as a matter of fact, I have been asked to support it by the entire delegation, and it is supported by the administration.

Mr. WALKER. I thank the gentleman for yielding.

Mr. SEIBERLING. Mr. Speaker, if the gentleman will yield to me.

S. 2955 designates a 6,780-acre Cheaha Wilderness in the Talladega National Forest in the State of Alabama. The Cheaha proposal passed the House on August 4 of this year as part of a statewide RARE II bill (H.R. 6011) for Alabama. The Senate bill, however, designates only the Cheaha Wilderness and does not address the other areas and issues in Alabama. Apparently the Senate wanted more time to consider the other provisions.

The proposed Cheaha Wilderness is supported by the entire Alabama congressional delegation, and as far as I am aware has no opposition whatsoever. A description of the area can be found in House Report 97-646, part I, so I will not elaborate further here. I urge my colleagues' support of S. 2955 so that we can send this meritorious proposal to the President for his signature.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cheaha Wilderness Act".

SEC. 2. (a) In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), certain lands in the Talladega National Forest, Alabama, which comprise approximately six thousand seven hundred and eighty acres, as generally depicted on a map entitled "Cheaha Wilderness Proposed", dated May 1982, are hereby designated as wilderness and shall be known as the Cheaha Wilderness.

(b) Subject to valid existing rights, the wilderness area designated under subsection (a) shall be administered by the Secretary of Agriculture (hereinafter in this Act referred to as the "Secretary") in accordance with the provisions of the Wilderness Act of 1964 (16 U.S.C. 1131-1136) governing areas designated by that Act as wilderness except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

(c) As soon as practicable after the date of the enactment of this Act, the Secretary shall submit a map and legal description of the wilderness area designated by subsection (a) to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives. Such map and legal description shall have the same force and effect as if included in this Act, except that any clerical or typographical error in such map or legal description may be corrected. The Secretary shall place such map and legal description on file, and make them available for public inspection, in the Office of the Chief of the Forest Service, Department of Agriculture.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2623, TRIBALLY CONTROLLED COMMUNITY COLLEGE ACT OF 1978 AMENDMENT

Mr. KILDEE. Mr. Speaker, I call up the conference report on the Senate bill (S. 2623) to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 19, 1982.)

The SPEAKER pro tempore. The gentleman from Michigan (Mr. KILDEE) will be recognized for 30 minutes.

Mr. KILDEE. Mr. Speaker, I will not take up the time of the House. This has been fully discussed with the minority. This is basically like the bill that passed the House with some changes by the Senate which will not take effect immediately. I have discussed this with the majority.

There are no fiscal implications for 1983 and 1984. It is well within the Omnibus Reconciliation Act of 1983 and 1984.

Today, I ask the House to favorably consider a bill to aid American Indians in their postsecondary efforts. I support this measure principally because I know what a positive effect such community colleges can have in rural, isolated areas.

This program of support to tribal colleges located on very depressed reservations has already shown the progress and promise. The amendments to the program proposed today are the result of hours of research, discussion, and consideration. I am sure that they will improve the program.

The major thrust of these amendments is the clarification of the congressional intent for the program and the simplification of administrative provisions. The conferees also agreed to Senate provisions to aid in the development of facilities and to encourage these schools to seek and obtain outside, non-Federal endowment funding. Finally, the program is extended, at its present levels, for 3 years. This will greatly aid the schools in obtaining full accreditation.

The major provisions of the conference report are:

A tribe would now define its membership for the purposes of the program;

The method of computation of the number of students to credit to a school for the purposes of the formula (to be multiplied by $4,000) is simplified;

The bill states that this program is pursuant to the Federal trust responsibility as it relates to Indian education;

Planning grants are authorized for tribes that wish to examine the possibility of establishing a community college;

The amount authorized per full-time equivalent student is adjusted for the fiscal years 1985, 1986, and 1987, to reflect cost-of-living increases (for the first time since the program started);

New schools may not enter the program if this will reduce the pre-student amount of the participating schools (the per-student amount has fallen steadily each year since the program started. Further continuing reductions would seriously threaten the accreditation prospects, the program quality and even the continued existence of the participating schools);

The bill provides for assessment of available structures and for renovation to the colleges' use, where possible;

Money for new construction would be made available for fiscal years 1985, 1986, and 1987, on a matching basis (a 4-to-1 match, four parts Federal to one part tribal);

Endowment funds are authorized at $5 million per year for fiscal years 1985, 1986, and 1987. Colleges participating in the program are eligible for up to $350,000 per year on a 1-to-1 match, funds to be invested in a federally insured account and only the interest usable. This provision is designed to assist the colleges to begin tapping private sources of funding and to establish stable independent funding mechanisms.

The House passed the committee bill last Thursday under unanimous consent, and the other body has acted on this conference report yesterday.

In closing, I particularly want to commend the conferees and several members of the Education and Labor Committee for their special efforts on this measure. Mr. SIMON, who unfortunately could not be here today to see the product of his labors, chairs our Postsecondary Subcommittee. He worked long and hard to see that this legislation was fair and workable.

I would also like to give particular recognition to Mr. COLEMAN, the ranking minority member of the Postsecondary Subcommittee, Mr. ERDAHL, who has been untiring in his support for Indian education. And, of course, Mr. ERLENBORN, the committee's ranking minority member. Through the good offices and work of these gentlemen, we have maintained the nonpartisan and cooperative outlook that has always characterized the committee's work in the area of Indian education.

I believe that this conference is a good measure and I urge its approval.

● Mr. SIMON. Mr. Speaker, I am pleased to join my colleague from Kentucky, the distinguished chairman of the Committee on Education and Labor and Mr. KILDEE, in recommending House adoption of the conference report on S. 2623. The chairman has ably outlined the major provisions of the bill and several major reasons for enactment of the bill at this time.

I do want to emphasize several points that I believe are extremely important to these colleges and to the higher education community as a whole. Most of the 18 tribally controlled colleges are located in isolated areas and are providing a college-level education opportunity to Indian students who otherwise would not receive a college education. Additionally, these institutions are an important source of trained leadership and an economic resource for the tribes. The tribally controlled colleges are not only essential to Indian self-determination, but to the improvement of Indian educational opportunity.

S. 2623 contains two important provisions which I believe are critical to the growth and development of these colleges—many of which are operating at the financial margin. First, the act contains the endowment provisions, which I authored, originally included in H.R. 6485. This provision will permit the tribally controlled colleges to raise funds privately or use Snyder Act funds and have those funds matched by Federal funds appropriated under this section of the act. This provision will not be effective until fiscal year 1985, permitting the tribes to raise funds in the private sector and the Congress to provide additional appropriations for this new authorization. Funded endowments will be essential to the survival and enhancement of these colleges. Second, the construction and renovation section will permit the Federal Government to assist in improving the physical facilities at these institutions. Recently, my friend, Jim Spencer, chancellor of Illinois Eastern Community Colleges, wrote me regarding Sinte Gleska College on the Rosebud Indian Reservation in South Dakota. He chaired an accrediting team from the North Central Association, which is recommending that Sinte Gleska be fully accredited to grant baccalaureate degrees. In

his letter to me, Dr. Spencer emphasized "* * * that no better purpose would be served than to provide some funds for permanent construction for Sinte Gleska College." It is clear that if the Congress wants to help these colleges in a meaningful way, we must provide funds for construction.

I am most concerned about the quality of education provided to the students at the tribally controlled colleges and I believe that this bill will do just that—improve the quality of education.

I want to thank the gentleman from Kentucky, the gentleman from Missouri, Mr. COLEMAN, the ranking Republican member of the subcommittee, and the other members of the subcommittee for their hard work. I would like to pay special tribute to Mr. KILDEE of Michigan, Mr. WILLIAMS of Montana and to the full committee and the subcommittee staff on both sides for their fine contributions in these last few days of the session and during the past 2 years.●

● Mr. DASCHLE. Mr. Speaker, I rise in support of S. 2623, a bill to amend and extend the Tribally Controlled Community College Assistance Act of 1978. As a cosponsor of the House bill, I want to thank the distinguished full committee and subcommittee chairmen for their leadership on this very important legislation.

We have four tribally controlled community colleges in my home State of South Dakota. By virtue of the dedication of the Indian tribes, and the foundation funding provided under the 1978 act, these colleges are providing quality instruction tailored to the cultural and educational needs of the Indian students.

Mr. Speaker, of all groups in the United States, American Indians have the lowest average level of educational achievement and the highest rate of unemployment. On the Indian reservations in South Dakota, unemployment is running at the 80 percent level. But due to the wisdom of the Congress in 1978, Indian tribes have been given an opportunity to make an assault upon these deplorable conditions. And they do a fine job. Tribally controlled community colleges have high student retention rates and an impressive record of placement.

This bill will significantly improve and strengthen the tribal college program, and thereby improve the higher education opportunities available to our first Americans. Additionally, it will further strengthen the self-determination efforts of Indian tribes.

I strongly urge my colleagues to support this bill.●

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. KILDEE. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I assume this has been cleared by everyone over here on this side.

Mr. KILDEE. Yes, it has been.

Mr. Speaker, I move the previous question on the conference report.

The SPEAKER pro tempore (Mr. PANETTA). The Chair would inquire if anyone on the minority side requests any time.

Mr. LUJAN. No, Mr. Speaker, we do not.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extent their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

□ 1450

FLORIDA WILDERNESS ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speakers table the bill (H.R. 9) to designate components of the National Wilderness Preservation System in the State of Florida, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Florida Wilderness Act of 1982".

WILDERNESS DESIGNATION

SECTION 1. In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131 et seq.) the following lands are hereby designated as wilderness, and therefore, as components of the National Wilderness Preservation System—

(1) certain lands in the Apalachicola National Forest, Florida, which comprise approximately one thousand one hundred and seventy acres, are generally depicted on a map entitled "Bradwell Bay Wilderness Addition—Proposed", dated February 1980, and which are hereby incorporated in and shall be deemed a part of, the Bradwell Bay Wilderness as designated by Public Law 93-622;

(2) certain lands in the Apalachicola National Forest, Florida, which comprise approximately seven thousand eight hundred acres, are generally depicted on a map entitled "Mud Swamp/New River Wilderness—Proposed", dated February 1980, and shall be known as the Mud Swamp/New River Wilderness;

(3) certain lands in the Osceola National Forest, Florida, which comprise approximately thirteen thousand six hundred acres, as generally depicted on a map entitled "Big Gum Swamp Wilderness—Proposed", dated March 1980, and shall be known as the Big Gum Swamp Wilderness;

(4) certain lands in the Ocala National Forest, Florida, which comprise approximately seven thousand seven hundred acres, as generally depicted on a map entitled "Alexander Springs & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Alexander Springs Wilderness: *Provided, however,* That the Secretary of Agriculture shall not prohibit existing motorboat use on Alexander Springs Creek;

(5) certain lands in the Ocala National Forest, Florida, which comprise approximately thirteen thousand two hundred and sixty acres, as generally depicted on a map entitled "Juniper Prairie Wilderness—Proposed", dated November 1981, and shall be known as the Juniper Prairie Wilderness;

(6) certain lands in the Ocala National Forest, Florida, which comprise approximately two thousand five hundred acres, as generally depicted on a map entitled "Little Lake George Wilderness—Proposed", dated March 1980, and shall be known as the little Lake George Wilderness; and

(7) certain lands in the Ocala National Forest, Florida, which comprise approximately three thousand one hundred and twenty acres, as generally depicted on a map entitled "Alexander Springs & Billies Bay Wilderness—Proposed", dated March 1980, and shall be known as the Billies Bay Wilderness.

MAPS AND DESCRIPTIONS

SEC. 2. As soon as practicable after the provisions of section 1 of this Act take effect, the Secretary of Agriculture shall file maps and legal descriptions of each wilderness area designated by such section with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the House of Representatives and the Committee on Energy and Natural Resources of the United States Senate, and each such map and legal description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clercial and typopgraphical errors in such legal descriptions and maps may be made. Each such map and legal description shall be on file and available for public inspection in the office of the Chief, United States Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 3. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness: *Provided,* That any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of the relevant provisions of this Act.

SEC. 4. (a)(1) The Department of the Interior shall not issue phosphate leases in the Osceola National Forest, Florida, unless and until the President transmits a recommendation to the Congress that phosphate leasing be permitted in a specified area in the Osceola National Forest. Notice of such transmittal shall be published in the Federal Register. No recommendation of the

President under this section may be transmitted to the Congress before ninety days after publication in the Federal Register of notice of his intention to submit such recommendation.

(2) FINDINGS.—A recommendation may be transimitted to the Congress under subsection (a) if the President finds that, based on the information available to him—

(i) there is a clear and present national need for the phosphate resulting from a domestic shortage of phosphate reserves, and

(ii) such national need outweighs the overall public values of the public lands involved, including the wilderness area designated in section 1(3) of this Act, and any adverse environmental impacts which are likely to result from the activity.

(3) REPORT.—Together with his recommendation, the President shall submit to the Congress—

(i) a report setting forth in detail the relevant factual background and the reasons for his findings and recommendation;

(ii) a statement of the conditions and stipulations which would govern the activity; and

(iii) in any case in which an environmental impact statement is required under the National Environmental Policy Act of 1969, a statement which complies with the requirements of section 102(2)(C) of such Act. In the case of any recommendation for which an environmental impact statement is not required under section 102(2)(C) of the National Environmental Policy Act of 1969, the President may, if he deems it desirable, include such a statement in his transmittal to the Congress.

(4) DISAPPROVAL.—Any recommendation under this section shall take effect only upon enactment of a joint resolution of Congress approving such a recommendation. Any recommendation of the President submitted to Congress under subsection (a) shall be considered received by both Houses for purposes of this section on the first day on which both are in session occurring after such recommendation is submitted.

(5) NINETY-DAY COMPUTATION.—For purposes of this section—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day calendar period.

(b) Within sixty days of the date of enactment of this Act, the Secretary of the Interior shall, with respect to those individuals and companies (hereinafter referred to as "applicants") which have applied for phosphate preference right leases by applications numbered:

BLM-A-080538, 080539, 080540, 080544, 080545, 080546, 080547, 080548, 080549, 080093, 080297, 080298, 080299, 080801, 080975, 079903, 079904, 079905, 079906, 079907, 079956, 079957, 079958, 079959, 079992, 080004, 080027, 080028, 080048, 080067, 080069, 080070, 080632, 080634, 080638; ES-0980, 0982, 0983, 3181, and 3208.

determine if any of those individuals or companies have made a discovery or discoveries of valuable deposits in accordance with the regulations and policies in effect as of the date of filing of the applications.

(c) Within one year of the date of enactment of this Act, the Secretary, in consultation with the applicants, shall determine the present fair market value of leases which would be issued, absent the leasing prohibition of subsection (a) of this section, for those applications for which the Secretary has determined that a valuable deposit discovery or discoveries exist.

(1) The determination of fair market value shall be based on the replacement cost of the unmined recoverable phosphate in the ground, taking into account comparable sales of unmined recoverable phosphate in the ground in the Eastern United States, costs of compliance with all applicable Federal, State, and local laws and regulations, including reclamation and restoration of the land (including wetlands) and other costs normally incurred in the mining of phosphate. In determining fair market value the Secretary may contract with an applicant to perform any necessary exploratory drilling or other evaluation work and may compensate the applicant therefor through payment of money or as an addition to the monetary credit under this Act. In lieu of the monetary credits described above, the Secretary may, at his option only, offer to purchase the preference right to the applicant's lease.

(2) In the event the Secretary and any or all of the applicants cannot agree on fair market value within one year of the date of enactment of this Act, either the Secretary, or any of the applicants shall have the right to petition the United States Claims Court for determination of fair market value in accordance with the standards set forth in this subsection, and said court shall have jurisdiction to make said determination which shall be binding on all parties for purposes of this Act subject to the right of appeal.

(d)(1) Within three months of the date of enactment of this Act the Secretary of the Interior shall enter into negotiations and shall, within one year of the date of enactment of this Act for those lease applications for which he has determined a valuable deposit discovery or discoveries exist, extend to the applicant, its successors or assigns upon voluntary surrender and relinquishment by the lease applicant of the preference right lease applications and all right to lease the land covered by such applications, a monetary credit to be used against that portion of bonus payments, rental or royalty payments paid into the Treasury of the United States and retained by the Federal Government on any mineral, oil, or gas lease competitively won or otherwise held by the applicant, its successors, or assigns. Such credit shall be used over a period of years with not more than 10 per centum of the credit to be used in any one year.

(2) Monetary credits authorized pursuant to this subsection shall be based on the fair market value of the prospective leases as determined pursuant to subsection (c) of this section.

(e) The designation of the Big Gum Swamp wilderness shall in no way be construed to diminish, abate, impair, or modify any rights which may be vested in the applicants on the date of enactment of this Act for Federal phosphate preference right leases applicable to any lands within the Big Gum Swamp wilderness area designated by this Act. The fair market value of any such rights as may exist shall be determined without reference to any restrictions on access or use which may result from designation of this area as wilderness.

(f) Notwithstanding any provision of this section to the contrary, the Secretary and the applicant may mutually agree to extend any of the time limitations in this section.

(g) Effective October 1, 1983, there are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this Act: *Provided*, That any payments made pursuant to this Act shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts: *Provided*, however, That until the necessary sums are appropriated the holder of a phosphate lease application specified in section 4(b), will retain such legal rights he may have under such application and such rights shall remain in full force and effect.

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendment be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so because there was some concern about this bill. As the chairman knows, the ranking minority member of the subcommittee had some problems with it, had a hold on it, and I assume that by this point that that controversy has been cleared up.

Mr. SEIBERLING. If the gentleman will yield, that is absolutely correct. He has released his hold on this bill and has no objection to it.

Mr. LUJAN. Further reserving the right to object, could the gentleman explain the difference between what we passed over here with the exchange provisions and the Senate changing that?

Mr. SEIBERLING. Mr. Speaker, H.R. 9 is essentially the same bill which passed the House on December 15, 1981, and is long-overdue legislation to implement the RARE II wilderness recommendations for Florida and ban phosphate mining in the Osceola National Forest. H.R. 9 has the strong support of the entire Florida delegation and the State administration as well.

The wilderness proposals of the bill contained some modifications of the original RARE II submissions in order to accommodate the concerns of the administration, the Florida delegation, and other interested parties. With one minor exception, they are the same as were contained in legislation which passed the House in the 96th Congress, and I believe they are noncontroversial.

The other major issue addressed by H.R. 9 deals with the question of banning phosphate leasing and mining in the Osceola National Forest. Briefly, as passed by the Senate, the bill prohibits leasing and mining unless and until a future Presidential recommendation for leasing is forwarded to Congress and Congress approves such recommendation by joint resolution. The major Senate amendment to the bill deletes the mineral exchange provision of the House-passed bill and substitutes an extension of a credit to phosphate lease applicants whose

valid claims to leases would be terminated by the bill's ban on leasing. Such credit would be used in connection with other mineral or oil and gas leases held or sought by the lease applicant, and would be assignable. The Senate amendments also delete the House language providing for binding arbitration on the issue of fair market value of prospective phosphate leases and replace it with a process for appeal to the U.S. Claims Court.

Mr. Speaker, I am especially gratified that we are finally able to resolve this difficult problem. Legislation to ban phosphate leasing in the Osceola National Forest has been considered in four successive Congresses, and it is high time that the matter be settled. In closing, I would particularly like to commend the entire Florida delegation, and especially Congressman FUQUA and Senators CHILES and HAWKINS, for their tireless efforts on behalf of this bill. Additional thanks are also in order to Senators MCCLURE, WALLOP, and METZENBAUM for their patience and hard work in helping to achieve a bill that is supported by the companies involved, environmental groups, and the State of Florida.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Speaker, I appreciate the gentleman yielding to me. This bill, as he knows, came out of the Interior Committee. It has been in the Senate for over a year, and I think they made some corrections that essentially are constructive suggestions. It has no budgetary impact as far as revenues are concerned, and I would hope that there would be no objection to the bill.

Mr. CRAIG. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. Further reserving the right to object, I yield to the gentleman from Idaho.

Mr. CRAIG. Mr. Speaker, I appreciate the gentleman showing an interest in this. I am pleased to see that we have brought some final solution to H.R. 9 and the problem it addresses. I expressed concern on it in the subcommittee, and in the major committee at the time I was fearful of some precedents being set with this type of legislation.

I think the Senate amendments clarify some of that language, and I am pleased to see that there is no objection.

● Mr. FUQUA. Mr. Speaker, I rise in strong support for H.R. 9, Florida Wilderness act, legislation I first introduced back in 1974. We have come a long way since then and H.R. 9 has undergone many modifications. The essence of the act, however, remains intact. My original thesis was that we could not permit phosphate mining in the Osceola National Forest without doing irreparable harm to the environment, and H.R. 9 retains that prohibition.

The Senate changes do not do damage to the intent of the bill, and I urge the House to accept the Senate language and speed H.R. 9 to the President for signature.

I have spoken in the well of this body on two separate occasions in behalf of this act and shall not repeat earlier statements. Let me say simply that this bill is of great importance to me, its prime sponsor, as well as to the entire Florida House delegation, which agreed to cosponsor the act. Additionally, its Senate consideration was assisted by the fact that both Senator CHILES and Senator HAWKINS introduced similar proposals. The people of Florida and of the Nation want to provide protection to our national forests in situations where there is no overwhelming national need for the minerals. There is no need for phsophate now, and H.R. 9 provides a merchandism should we ever determine that mining is needed.

No one person makes a law and I received tremendous assistance from a variety of people, I would like to take just a minute to thank the staffs who helped, especially Lynda Goodgame with Senator CHILES and Mike Sauls with Senator HAWKINS. The staff of the Senate Energy and Natural Resources Committee did excellent work, and I must not forget the yeoman-like efforts of Andy Wiessner of the House Interior and Insular Affairs Committee.

Many Members on both sides of the aisle played a vital role in shaping H.R. 9. My special thanks to Congressman LARRY CRAIG and Congressman DON YOUNG as well as Senator MALCOLM WALLOP and Senator JIM MCCLURE.

Legislation like this never gets to the floor without the cooperation of the committee chairman and Chairman UDALL rendered invaluable assistance.

Mr. Speaker, since 1974, I have made this a cause because it is so important to the people I represent. One man, however, has made my cause his own. H.R. 9 would still be languishing in subcommittee if JOHN SEIBERLING had not accepted the challenge of protecting the Osceola National Forest. To you, JOHN, my heartfelt thanks and appreciation.

Mr. Speaker, I urge my colleagues to adopt H.R. 9 in order that we might provide the protection we need to this important national forest.●

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

QUIET TITLE AND POSSESSION REGARDING CERTAIN PRIVATE LAND CLAIM IN LIVINGSTON PARISH, LA.

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1978) to quiet title and possession with respect to a certain private land claim in Livingston Parish, La., with a Senate amendment thereto, and concur in the Senate amendment with amendments.

The Clerk read the title of the Senate bill.

The Clerk read the House amendments to the Senate amendment, as follows:

In lieu of the Senate amendment strike all after the enacting clause and insert the following:

SEC. 1. (a) For the purposes of this Act only, the limitation provision of section 1 of the Act of December 22, 1928, as amended (45 Stat. 1069; 43 U.S.C. 1968), popularly known as the Color-of-Title Act, that limits conveyances under that Act to not more than 160 acres, shall not apply to any claim for a patent that may be filed under the Color-of-Title Act for a parcel of land described as section 39, township 5 south, range 4 east, Saint Helena Meridian, Louisiana.

(b) Except as provided in subsection (a) of this section, all provisions of the Color-of-Title Act shall apply to any claim for a patent under the Color-of-Title Act for the parcel of land described in subsection (a) of this section.

SEC. 2. (a) Section 5 of the Act entitled "An Act to authorize the Secretary of the Interior to provide an administrative site for Yosemite National Park, California, on lands adjacent to the park, and for other purposes", approved September 2, 1958 (16 U.S.C. 47-1(e)), is amended by striking *"Provided,"* and all that follows in such section and inserting in lieu thereof *"Provided,* That he may grant nonexclusive privileges, leases, and permits for the use of land in the area and enter into contracts relating to the same which he determines necessary to further the purposes of this Act."

(b) The first sentence of the first section of the Act entitled "An Act to authorize the Secretary of the Interior to grant long-term leases with respect to lands in the El Portal administrative site adjacent to Yosemite National Park, California, and for other purposes", approved July 21, 1968 (16 U.S.C. 47-2(a)), is amended by striking out "for periods of fifty-five years".

SEC. 3. (a) Subject to subsection (b), the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary") shall release by quitclaim deed or other good and sufficient instrument, on behalf of the United States, with respect to the land described in subsection (c) which was conveyed by the United States to the city of Albuquerque, New Mexico, by a patent numbered 30-64-0081, all conditions in such patent—

(1) which require that such land be used for a public purpose pursuant to a plan approved by the Secretary, and

(2) which prohibit the transfer of title or control of such land by the patentee or its successor.

(b) The Secretary shall not deliver the release authorized by subsection (a) until the city of Albuquerque, New Mexico, simultaneously with such delivery—

(1) consummates an exchange of the land described in subsection (c) for the land described in subsection (d) and (e); and

(2) enters into a recordable agreement, in consideration of such release, that is satisfactory to the Secretary providing that—

(A) the city of Albuquerque will carry out at its sole expense a plan of development for the lands described in subsections (d) and (e), such plan to be submitted for the Secretary's written approval within one year after the date of the exchange and to be implemented by the city substantially in accordance with a timetable to be set forth in the plan;

(B) the city of Albuquerque will not use or permit the use of the lands described in subsections (d) and (e) which are received by the city of Albuquerque in exchange for the land described in subsection (c) for any purpose except exclusively for a community park or for other public purposes that are described in the plan of development, as approved by the Secretary;

(C) the city of Albuquerque will not transfer or attempt to transfer title to, or control over, any land described in subsections (d) or (e) after the city of Albuquerque receives title to such lands; and

(D) the city of Albuquerque will forfeit to the United States the title to and possession of the land described in subsections (d) and (e) if such property should ever cease to be used for a community park or for other public purposes described in the approved development plan, or if the city of Albuquerque attempts to transfer title to, or control over, such lands after the city receives title to such lands.

(c) The land referred to in subsection (a) which was conveyed by the United States to the city of Albuquerque, New Mexico, on December 31, 1963, by a patent numbered 30-64-0081 is the following two tracts or parcels:

(1) One tract or parcel containing 1.250 acres, more or less, which is all of the north half southwest quarter northeast quarter southwest quarter southwest quarter of section 33, township 11 north, range 4 east, New Mexico principal meridian, county of Bernalillo, State of New Mexico.

(2) A second tract or parcel which is all of the south half northeast quarter northwest quarter southwest quarter southwest quarter and the south 26 feet of the north half northeast quarter northwest quarter southwest quarter southwest quarter of section 33, township 11 north, range 4 east, New Mexico principal meridian, county of Bernalillo, State of New Mexico.

(d) The land referred to in subsection (b) which was conveyed by the United States to the devisees of Tom Hughes on October 17, 1955, by patent number 1155047 is the tract or parcel containing 1.624 acres, more or less, which is all of lot 58 (also known as north half northwest quarter northeast quarter southwest quarter southwest quarter) of section 33, township 11 north, range 4 east, New Mexico principal meridian, county of Bernalillo, State of New Mexico.

(e) The land referred to in subsection (b) which was conveyed by the United States to Leyburn B. Kimble on March 2, 1955, by a patent numbered 1150213 is all of the south half northwest quarter northeast quarter southwest quarter southwest quarter of section 33, township 11 north, range 4 east, New Mexico principal meridian, county of Bernalillo, State of New Mexico.

SEC. 4. This Act does not affect—

(1) any right to coal, oil, gas or other mineral deposit, or

(2) except as otherwise expressly provided herein, any right, title or interest held by the United States in any land described in this Act.

SEC. 5. The authority of the Secretary to execute and deliver the release required by the first section of this Act shall not be limited by the Act entitled "An Act to authorize acquisition or use of public lands by States, counties, or municipalities for recreational purposes.", approved June 14, 1926 (43 U.S.C. 869 et seq.).

And amend the title to read as follows: "To provide for consideration, under the Color-of-Title Act, of a certain private land claim in Livingston Parish, Louisiana, and for other purposes."

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the House amendments to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. President, I reserve the right to object to ask the gentleman if my understanding is correct. The basic legislation is the Livingston Parish land claim bill?

Mr. SEIBERLING. That is correct.

Mr. LUJAN. The gentleman has added the El Portal site?

Mr. SEIBERLING. That is correct.

Mr. LUJAN. Has the gentleman added also the Albuquerque land section?

Mr. SEIBERLING. That is correct.

Mr. LUJAN. All three sites are in there?

Mr. SEIBERLING. That is correct.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. MOORE. Mr. Speaker, reserving the right to object, and I do not intend to object, the basic bill, S. 1978, is the same bill as H.R. 5785, introduced in this House, which clarifies a noncontroversial land title problem in Livingston Parish, La., which is in the district I represent. I am a little bit disappointed that we are putting two amendments on this bill. As I understand it, the bill came back from the Senate as a clean bill. If we pass that bill now, it will go on for the President's signature.

As I understand it, both the gentleman from New Mexico and the gentleman from Ohio are putting amendments on it to which the Senate has previously disagreed, and we are sending it back, which will mean that this bill might not pass.

Mr. SEIBERLING. Mr. Speaker, if the gentleman will yield, as this bill passed the House there were two amendments attached. One dealt with the El Portal issue, a question of setting aside some public land at the entrance to Yosemite National Park so that the land can be used for housing for the Park Service employees who work in the park. The other amendment was a bill for the private relief of an individual in California. It is my feeling that with the private relief bill eliminated this bill should not result in a real problem on the Senate side.

The other amendment that we would attach is a substitute for the private bill that was deleted by the Senate, would be the one the gentleman from New Mexico has offered, which is a completely noncontroversial bill for a land exchange in Albuquerque, N. Mex. It has passed the House before, and it seems to me that we ought to dispose of both these issues and not have them tied up.

I realize that there is always the possibility that it might get somehow bogged down in the Senate, but I do feel that there is a strong case for this bill, the original bill, there is a strong case for the attachments we are making to it. I really do not think, if it is dealt with on the merits in the Senate, it will cause it to get blocked.

Mr. MOORE. I thank the chairman for his explanation. I certainly have no knowledge with which to disagree with any of the amendments the gentleman is putting on the bill. It is just that I am somewhat concerned about the bill being passed. I want to assure the membership that there is absolutely nothing controversial about the basic bill, S. 1978.

Mr. SEIBERLING. Let me assure the gentleman that if for some reason it should get stuck in the Senate and not get passed before adjournment, I will take it up promptly in the next Congress and try to get it over there, because I agree that this kind of legislation should not be bogged down. We ought to dispose of it expeditiously.

Mr. MOORE. I very much appreciate the gentleman's explanation and agreement.

● Mr. COELHO. Mr. Speaker, I am extremely pleased that my colleagues have joined me in support of language adopted as an amendment to S. 1978 to provide the Secretary of the Department of Interior with the statutory authority to extend the period of leases at El Portal, located just outside Yosemite National Park in the congressional district which I represent. I am hopeful that this legislation will provide the much-needed impetus to realize the master plan for this administrative site—a master plan which would alleviate the stress on the valley of Yosemite, one of the most spectacular valleys in the world.

Development of the El Portal area has been hempered by inability to secure financing through conventional

sources due to the length of time that the Secretary may grant leases for this land. This bill provides the authority to issue leases for periods deemed necessary to National Park, Service employees, concessioners and their employees, and individuals and organizations which are determined to support the administrative needs of Yosemite National Park. This will provide the flexibility necessary to write leases that are in keeping with the lending policies of financial insitutions so that an individual, organization, park service employee, or concessioner that may seek a development loan for an El Portal project can work within a timeframe acceptable to a lender.

This provision, in facilitating the development of El Portal, makes good environmental sense for Yosemite and good business sense for the private business community. I am pleased the Congress has taken this step to realize the goals of the 1958 El Portal Act.●

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. WALKER. Mr. Speaker, reserving the right to object, do we have any money in this bill at all?

Mr. SEIBERLING. No, there is no money in this bill.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

EDUCATIONAL MINING ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 1501) entitled the "Educational Mining Act of 1982," with House amendments thereto, and to recede from the House amendments.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I ask for this reservation of objection simply to ask the gentleman from Ohio if that just leaves the Educational Mining Act by itself, and if it is passed here, it goes to the President?

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield.

Mr. SEIBERLING. That is correct.

Mr. Speaker, on December 14, the House passed this bill with an amendment which added the provisions of an earlier-passed House bill to establish the American Conservation Corps. The Senate has amended the House version so as to delete the matter added by the House. Thus the bill comes back to us in the same form in which it originally passed the Senate—that is, it deals solely with the transfer of certain lands in Alaska to the University of Alaska.

I have discussed this matter with the senior Senator from Alaska, the senior Senator from Idaho, and other interested Members of the other body. Based on the assurances that they have given me with regard to other legislation now pending in the other body, and on early and serious consideration of the American Conservation Corps bill in the 98th Congress, I agreed to urge the House to pass the Educational Mining Act in the form in which the Senate has now returned it to us. That is the reason for my unanimous consent request.

□ 1500

Mr. LUJAN. Mr. Speaker, I thank the gentleman from Ohio (Mr. SEIBERLING) for his explanation.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. Mr. Speaker, I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, may I ask the gentleman, do we have any money in this bill?

Mr. LUJAN. No, there is not any money. It is just transferring some claims to the university for some instructional purposes, as I understand it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks with respect to the legislation just considered, S. 1978, and also with respect to S. 2995 and H.R. 9.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

S. 1777, ACADIA NATIONAL PARK—ISLE AU HAUT

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SEIBERLING. Mr. Speaker, during the last hours of the session before the election recess the House, by unanimous consent, passed S. 1777, a bill to establish a permanent boundary for the portion of Acadia National Park that lies within the town of Isle au Haut, Maine. The bill was passed without amendment to the Senate version. However, there were discussions within the Committee on Interior and Insular Affairs that clarify the intent of the bill language which should be part of the public record.

S. 1777 contained two provisions unique to national park legislation, which may have the potential for encouraging litigation: Subsection 3(b), authorizing the Park Service to accept easement outside the boundary of the park "for enforcement purposes only"; and subsection 4(a), directing that management and use of parklands "shall not interfere" with maintenance of a viable local community with a traditional resource-based economy outside the park. In approving the first provision, the Committee understood that, although the new boundary would define the national interest in terms of fee ownership and park use, nevertheless there is a public interest in maintaining the undeveloped character of land and islands in proximity to park lands. This public interest is manifest by the authority of the Secretary in subsection 3(b) to accept and hold, with other parties, easements outside the boundary. The committee felt strongly that; first, the National Park Service should provide adequate written notice to the committee in advance of accepting any such easements; second, the National Park Service should not undertake to enforce the convenants in any such easement through the initiation of litigation unless to do so is necessary to mitigate, abate, or prevent actions which would demonstrably harm park resources; and third, the committee should be advised in advance of any litigation begun by the Park Service or on its behalf. The committee noted that the authority to accept such easements is completely discretionary, and further, the committee intended that the decision to institute any enforcement proceeding is also completely discretionary and cannot be compelled either by a cotrustee or any other party. In approving the second provision—subsection 4(a)—committee was cognizant of the well-known maxim that the Government cannot be sued unless it consents to such suit and the management direction to the Park Service in this subsection did not hold the Park Service liable for the way it manages park lands. If the town at anytime believes that management practices should be changed, the remedy is legislative and not judicial. The committee felt in this regard, that the Park Service would consider carefully the concerns of the townspeople

and, consistent with proper management, seek to accommodate those concerns.

REQUEST FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 6324, ATMOSPHERIC, CLIMATIC, AND OCEAN POLLUTION ACT OF 1982

Mr. SCHEUER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6324) to authorize appropriations for atmospheric, climatic, and ocean pollution activities of the National Oceanic and Atmospheric Administration for the fiscal year 1983 and 1984, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk proceeded to read the Senate amendments.

Mr. SCHEUER (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WALKER. Mr. Speaker, reserving the right to object, we are authorizing money here for some specific purposes. Is this all money that has been included in the budget, or is any of the money over the budget?

Mr. SCHEUER. Yes, Mr. Speaker, if the gentleman will yield, there is a very modest amount over the budget. In the climate program under NOAA, the bill provides for $1.8 million, and, the administration budget provides for $1.1 million.

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

MAKING CERTAIN CHANGES IN MEMBERSHIP AND OPERATIONS OF ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

Mr. BROOKS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7173) to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations, with Senate amendments thereto, concur in the Senate amendments numbered 1, 2, 3, 4, 5, 6, 9, 10, 11, 12, and 14, and concur in Senate amendments 7, 8, and 13 with amendments.

The Clerk read the title of the bill.

The Clerk read the House amendments to Senate amendments 7, 8, and 13, as follows:

House amendment to the Senate amendment numbered 7: In lieu of the matter proposed to be inserted by Senate amendment numbered 7 insert "unit of local government".

House amendment to the Senate amendment numbered 8: Restore the matter proposed to be stricken out by the Senate amendment numbered 8, and on page 2, lines 15 and 16 of the House engrossed bill, strike out "or other municipal government".

House amendment to the Senate amendment numbered 13: In lieu of the matter proposed to be inserted by the Senate amendment numbered 13 insert the following:

(c) Section 3 of such Act is amended by adding at the end thereof the following new subsection:

"(d)(1) The term 'unit of local government' means the government of a town, township, or other municipal government which (A) is a unit of general government as determined by the Bureau of the Census for general statistical purposes, (B) meets the requirements specified in paragraph (2), and (C) imposes taxes or receives intergovernmental transfers for substantial performance for its citizens of at least two of the services described in paragraph (3).

"(2) To be considered a unit of local government for purposes of this Act, at least 10 per centum of a local government's total expenditures (exclusive of expenditures for general and financial administration and for the assessment of property) in the most recent fiscal year must have been for each of two of the public services described in paragraph (3), except that the foregoing restriction shall not apply to a unit of local government which substantially performs four or more of such public services.

"(3) The services described in this paragraph are (A) police protection; (B) courts and corrections; (C) fire protection; (D) health services; (E) social services for the poor or aged; (F) public recreation; (G) public libraries; (H) zoning or land use planning; (I) sewerage disposal or water supply; (J) solid waste disposal; (K) pollution abatement; (L) road or street construction and maintenance or street lighting; (M) mass transportation; and (N) education.

"(4) For the purposes of this subsection, a unit of local government shall be deemed to impose a tax if that tax is collected by another governmental entity from the geographical area served by that unit of local government and an amount equivalent to the net proceeds of that tax is paid to that unit of local government.".

Mr. BROOKS (during the reading). Mr. Speaker, I ask unanimous consent that the House amendments be considered read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. McGRATH. Mr. Speaker, reserving the right to object, and I do not intend to object, will the distinguished committee chairman please explain the amendments?

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. McGARTH. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Speaker, I am delighted to talk with my distinguished friend, the gentleman from New York (Mr. McGRATH).

On September 28, the House passed H.R. 7173, which would add three new members to the Advisory Commission on Intergovernmental Relations. The three would be one representative of school boards, one representative of the Federal judicial system, and one representative of the State judiciary. In addition, one of the current four members nominated by the National League of Cities would be designated as a member representing towns or other municipal governments with a population of less than 10,000 and the recommendation would be made jointly by the National Association of Towns and Townships and the National League of Cities.

The Senate amended the bill by providing four new members for the ACIR. Like the House, new members would represent school boards and Federal and State judges. However, instead of taking a seat from the current four recommended by the National League of Cities, there would be a new position added for small governments of under 10,000 population. In the Senate amendment, however, this position would be designated for officials of townships only.

The amendment I am offering to the Senate amendment would agree to the four new positions, but the position for small units of government would not be limited to representatives of townships only. It would allow the National Association of Towns and Townships to recommend a member representing towns, townships, and other general purpose municipal governments with a population of less than 10,000 as defined in the General Revenue Sharing Act.

The result would be four new members for the ACIR, one to represent school boards, one to represent the Federal judicial system, one to represent the State judicial systems, and one to represent units of government with less than 10,000 population. The National League of Cities would continue to, in conjunction with the National Conference of Mayors, make recommendations for four of the positions on the ACIR.

The only other amendment by the Senate is a technical amendment concerning quorums. Instead of requiring 13 members to be present, they would require a majority of the membership at any given time. My amendment accepts that Senate change.

Mr. McGRATH. Mr. Speaker, continuing to reserve my right to object, I supported the original House-passed legislation altering the membership of the Advisory Commission on Intergovernmental Relations to add Federal and State judges, elected officials from small towns, and elected school board members. This legislation retains the principles of the original bill, while accepting most of the proposed changes of the other body. Specifically these amendments add a representative of a municipality of not more than 10,000

population that performs significant governmental functions. This change is much more in line with the original House bill than that proposed by the other body. There is also a technical change in the Commission's quorum requirements.

These amendments improve an already worthy piece of legislation by alleviating a number of concerns raised by the groups responsible for nominating Commissioners. I support quick acceptance of H.R. 7173, as amended, and withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do not intend to object, but I am just making certain that my understanding is correct that all of the moneys in this bill are going to be covered out of previously appropriated moneys, is that true?

Mr. BROOKS. Mr. Speaker, if the gentleman will yield, that is my understanding.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Texas, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas?

There was no objection.

A motion to reconsider was laid on the table.

AMENDING SECTION 1304(e) OF TITLE 5, UNITED STATES CODE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3103) to amend section 1304(e) of title 5, United States Code, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. MICHEL. Mr. Speaker, reserving the right to object, and I shall not object, I would appreciate it if the good gentleman from Michigan (Mr. FORD) would explain briefly what the legislation does. I am in full accord with its purpose, but I think it would be best if the gentleman making the request would explain it to the Members.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, this bill grants temporary authority to the President's Commission on Executive Exchange to impose fees for private sector participation in the Commission's Executive Exchange program. These fees will be used to fund educational activities under the exchange program. Without this authority, the Commission will have to severely curtail its educational programs.

This legislation has been requested by the administration, and it will result in no additional costs to the Federal Government.

Mr. MICHEL. Mr. Speaker, is it not true, if the gentleman would respond further, that rather than costing the Government any additional sums of money, we are as a matter of fact authorizing the private sector to fund part of the cost of this exchange program?

□ 1510

Mr. FORD of Michigan. Yes. I suspect that they are doing that out of the anxiety of the private sector to make contributions and be able to deduct them from their income tax.

Mr. WALKER. Mr. Speaker, will the gentleman yield under his reservation?

Mr. MICHEL. I am happy to yield.

Mr. WALKER. This is the bill I think I objected to on the other night when there was not an explanation of a waiver being granted in the bill.

I have since been contacted and assured that the waiver is technical in nature and therefore I no longer have any objection.

Mr. MICHEL. I thank the gentleman for his consideration and express my personal appreciation to the gentleman from Michigan who was inconvenienced the other day and particularly appreicate his coming back today to make the request again. I appreciate the consideration of the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3103

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1304(e)(1) of title 5, United States Code, is amended by inserting "(i)" after "(1)", and by adding a new paragraph as follows:

"(ii) Participation fees, which the President's Commission on Executive Exchange may impose for private sector participation in its Executive Exchange Program shall be collected and credited to the fund, and shall be available for the costs of education and related travel of exchanged executives; for printing without regard to section 501 of title 44, United States Code; and, in such amounts as may be specified in appropriations Acts, for entertainment expenses.".

(b) The authority granted in subsection (a) shall terminate on December 31, 1983.

Passed the Senate December 15 (legislative day, November 30), 1982.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include therein extraneous material on the Senate bill, S. 3103.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

FEDERAL RULES OF CIVIL PROCEDURE AMENDMENTS ACT OF 1982

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7154) to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 8, after line 13, insert:

SEC. 6. Section 951 of title 18, United States Code, is amended by—

(1) striking out "Secretary of State" and inserting in lieu thereof "Attorney General if required in subsection (b)";

(2) striking out "$5,000" and inserting in lieu thereof "$50,000"; and

(3) inserting "(a)" before "Whoever" and adding at the end of such subsection the following new subsections:

"(b) The Attorney General shall promulgate rules and regulations establishing requirements for notification.

"(c) The Attorney General shall, upon request, promptly transmit one copy of each notification statement filed under this section to the Secretary of State for such comment and use as the Secretary of State may determine to be appropriate from the point of view of the foreign relations of the United States. Failure of the Attorney General to do so shall not be a bar to prosecution under this section.

"(d) For purposes of this section, the term 'agent of a foreign government' means an individual who agrees to operate within the United States subject to the direction or control of a foreign government or official, except that such term does not include—

"(1) a duly accredited diplomatic or consular officer of a foreign government, who is so recognized by the Department of State;

"(2) any officially and publicly acknowledged and sponsored official or representative of a foreign government;

"(3) any officially and publicly acknowledged and sponsored member of the staff of, or employee of, an officer, official, or representative described in paragraph (1) or (2), who is not a United States citizen; or

"(4) any person engaged in a legal commercial transaction.".

The Clerk read the House amendment to the Senate amendment, as follows:

Amendment to the Senate amendment to H.R. 7154, a bill to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes, offered by Mr. EDWARDS.

Strike all of the Senate amendment and insert in lieu thereof:

"SEC. 6. Section 951 of Title 18, United States Code, is amended by striking out '$5,000' and inserting in lieu thereof '$75,000'."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I take this time to ask the distinguished subcommittee chairman, the gentleman from California (Mr. EDWARDS) to explain this bill, the amendment attached thereto by the other body and the proposed amendment of the House to the Senate amendment.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Speaker, last July, the Congress delayed the effective date of proposed amendments to rule 4 of the Federal Rules of Civil Procedure. The President, when he signed that legislation, urged Congress to act promptly to cure the problems raised by the proposed amendments, and last week this House passed by unanimous consent a bill doing so. That bill, coauthored by the gentleman from Illinois (Mr. MCCLORY) and myself, was drafted after consultation with all the affected parties. It is endorsed by all the affected parties, including the Department of Justice on behalf of the administration and the Judicial Conference of the United States.

The Senate has passed our bill with extensive amendments to section 951 of title 18 of the United States Code. Inasmuch as most of the provisions of the Senate amendment were not subject to hearings and consideration by the relevant House committees and subcommittees, it would be inappropriate to accept the Senate amendment whole cloth. The amendment does, however, increase the fine for violating section 951. Raising fine levels is consistent with the policy applied by the Judiciary Committee and by the House in dealing with recent criminal enactments, such as the Record and Film Piracy Act of 1982, which the President signed into law earlier this year. It is, therefore, appropriate to increase the fine level for section 951. My amendment, hence, is to concur in the Senate amendment with an amendment that raises the fine level in section 951.

Mr. Speaker, this legislation is in response to the President's urging to act promptly to amend rule 4. It appropriately amends rule 4 and I urge my colleagues to endorse it.

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

Mr. SENSENBRENNER. Mr. Speaker, further reserving the right to object, is it my understanding that the bill which was originally passed by the House saved money in that U.S. marshals or registered mail would no longer have to be used for service of process and that the amendment that is proposed to the Senate amendment by the distinguished gentleman from California would increase the revenues of the Government perhaps only marginally by raising the fine for violation of the Foreign Agents Registration Act; am I correct?

Mr. EDWARDS of California. If the gentleman would yield further, the distinguished gentleman from Wisconsin is correct. The bill will save money in three ways.

The marshals' role in serving summonses and complaints in private civil actions will be markedly reduced. Registered or certified mail will not be necessary, because ordinary mail will be used. Also, the fines for violations of the Foreign Agents Registration Act will be raised to an appropriate level.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

WRONG COUNTS EXPLAINED

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, I am this afternoon releasing the results of a study which I know will be of interest to all of the Members. This study, commissioned over the weekend, found that recent apparent instances of willful wrong counting from the Chair were in fact not intentional but were the result of uncontrollable phenomena.

The study found that the television lights interacting with the varnish on the Chair's gavel has recently been causing an emission which leads to double vision and a lack of peripheral vision. Persons occupying the chair may at one moment see twice the number of people really occupying the Chamber and the next moment be completely unable to see people standing both to their left and right.

The study recommends as a long-term solution that a different varnish, nonsusceptible to television glare, be used on the gavel, but as a short-term precaution over the remainder of this lameduck session strongly suggests persons occupying the chair keep the gavel as far as possible away from their eyes.

RECENT OFFENSIVE LAWSUIT FILED AS UNITED STATES GOVERNMENT VERSUS HOUSE OF REPRESENTATIVES OF THE UNITED STATES

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LEVITAS. Mr. Speaker, I take this time to update the Members on the Gorsuch contempt of Congress matter that is now in process.

Subsequent to the action of the House last week in citing for contempt the Administrator of the Environmental Protection Agency, the Department of Justice filed a lawsuit unprecedented in the history of this Nation entitled the United States of America versus the House of Representatives of the United States et al. which in and of itself is not only unprecedented, it is obviously offensive by its very name.

This Justice Department suit has been described by Lawrence Tribe, a professor of law at Harvard University, as totally without basis or merit. He accused the Justice Department officials who filed the case with "either abject ignorance of the Constitution or contemptible cynicism about constitional separation of powers."

By instructing the U.S. attorney of the District of Columbia not to fulfill his duties to prosecute the contempt as required by the law, the Attorney General of the United States has failed to faithfully execute the law and is engaging, in my judgment, in an obstruction of justice.

I would hope that the Judiciary Committee will take action as promptly as possible to inquire into whether the actions of the U.S. attorney and the Attorney General of the United States constitute impeachable offenses for failing to carry out and faithfully execute the law.

This is a very serious and grave matter raising the most fundamental

constitutional questions, Mr. Speaker, and I think that when the highest law officer of this land fails to obey the law, it brings the entire system into discredit and into disrepute.

Accordingly, I would hope that the Judiciary Committee would promptly look into this matter to determine what further action might be taken.

The truth is that what we really want is the information from EPA to proceed with our oversight investigation of the Superfund program to clean up the hundreds of dangerous abandoned hazardous waste dumps. This investigation is our constitutional duty. It affects the health of the American people.

We do not want subpenas. We do not want contempt citations. We do not want impeachment proceedings. We do not want confrontation. We only want the facts so that we can do our job.

However, the administration seems to want a fight. They have failed to cooperate; failed to respond to a subpena; and now are failing to faithfully execute the law. That is our only way to get the facts. We must go forward.

DESIGNATING 1983 AS "BICENTENNIAL OF AIR AND SPACE FLIGHT"

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 270) to designate 1983 as the "Bicentennial of Air and Space Flight," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, and I will not object, will the gentleman from Michigan, the chairman of the committee, please explain what this bill is and what it does. Does it cost any money?

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. I thank the gentleman for yielding.

It does not cost anything. It is done at the request of the chairman of the Committee on Science and Technology.

I wish that the gentleman would yield to him.

Mr. ROUSSELOT. I would be glad to yield.

As I understand it our ranking minority member, the gentleman from Illinois (Mr. DERWINSKI) has supported this resolution; is that correct?

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. Further reserving the right to object, I yield to the gentleman from Florida.

Mr. FUQUA. I thank the gentleman for yielding.

Mr. ROUSSELOT. The year 1983 marks the 200th anniversary of manned flight. There are several ceremonies planned throughout this country and other countries of the world that have been leaders in flight. And this is to commemorate the 200th anniversary of the magnificent event that happened, and we have benefited, as the gentleman may use that means of transportation in order to get home for Christmas.

Mr. ROUSSELOT. Or to fly around the country when I am not doing this.

Mr. Speaker, I withdraw my reservation of objection because I think this is a very fine resolution. I actually am for it.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan (Mr. FORD)?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 270

Whereas the first manned flight in history was made by Etienne de Montgolfier at LaMuette, France, on November 21, 1783, releasing man from his terrestrial shackles;

Whereas a few months later in Baltimore, Maryland, a thirteen-year-old boy named Edward Warren soared aloft in a balloon launched by Peter Carnes, Esquire, who a few days previously launched America's first hot air balloon, the Splendid Chariot, from the grounds of the Indian Queen Tavern in Bladensburg, Maryland;

Whereas the United States and its first ally, France, together with many other countries will celebrate the extraordinary achievements in air and space flight of the past two centuries;

Whereas the United States Organizing Committee has been established to plan, coordinate, and assist in the implementation of national, State, and local festivities during 1983;

Whereas the bicentennial provides an opportunity for increasing public awareness in international trade, of education in science, mathematics, and engineering, and of reigniting the creativity and competitiveness that has historically fueled America and its economy: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year commencing January 1, 1983, is hereby designated the "Bicentennial of Air and Space Flight", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the year with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1520

ANNOUNCEMENTS BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will announce that the House will now proceed with special orders, and the Chair reserves the right to return to legislative business when legislative business is pending.

PENN STATE VERSUS UNIVERSITY OF GEORGIA

(Mr. CLINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLINGER. Mr. Speaker, I am pleased to announce to my colleagues that certain arrangements have been made between myself, representing with pride the fabled Nittany Lions of Penn State University and the gentleman from Georgia, Mr. BARNARD, representing the Junkyard Dawgs of the University of Georgia with regard to an athletic event which will occur in New Orleans about 10 days from now.

The gentleman from Georgia will be providing this Member with a bountiful supply of some of Georgia's famous products, namely peanuts and chickenfingers, as a result of the outcome of said athletic event. In the unlikely event that Georgia prevails I will supply the gentleman from Georgia with an equally bountiful supply of delicious Penn State cheese and luscious Pennsylvania apples.

In addition, the gentleman from Georgia will don the playing jersey of Penn States stellar tailback Curt Warner early in the new year for a photo opportunity. I promise to have it cleaned and pressed for the occasion. As a mere formality I have agreed to model Hershel Walker's jersey if Penn State is somehow done out of a deserved victory—a humiliation I do not anticipate being subjected to.

BULLDOGS TRIUMPH AT SUGAR BOWL

(Mr. BARNARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARNARD. Mr. Speaker, no doubt every Member already is aware of what will be taking place on the evening of January 1 in New Orleans, when the No. 2 football team from Penn State will be attempting to beat the No. 1 team in the Nation, the University of Georgia Bulldogs.

While I have the utmost respect from my colleague from Pennsylvania, Mr. CLINGER, and for the team from his district, I have no doubt whatsoever that the Dawgs will win out. Therefore I plan to enjoy the evening with the utmost serenity.

Meanwhile Heisman trophy winner Herschel Walker and his friends will be extending to the visitors the ultimate in Southern hospitality—including running, stomping, crashing, mauling, and otherwise running amok among the Penn State team.

So confident am I that the Dawgs will prevail that I have entered into a wager with the Honorable Mr. CLINGER. Mr. CLINGER is offering a bushel of Pennsylvania apples, and a wheel of Pennsylvania's finest cheese. I am putting up a bushel of Georgia's tastiest peanuts, and goodly supply of the Georgia delicacy known as "chicken fingers." When Mr. CLINGER and I meet again, I fully expect to be paid off for the Bulldogs' triumph.

I am so sure that the Bulldogs will win that I am willing to risk my integrity by making an additional offer. On the slim chance that the Bulldogs should lose, I offer to wear an odious Penn State jersey for 1 day in the Halls of this hallowed institution, submitting myself to the ridicule of my colleagues and the taunts of my friends. Of course if Georgia wins—which I fully expect—then Mr. CLINGER will be honored to wear the colors of Georgia.

THE RETIREMENT FROM THE HOUSE OF TWO OUTSTANDING MEMBERS FROM NEW YORK STATE, HON. PETER A. PEYSER, AND HON. LEO C. ZEFERETTI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 60 minutes.

Mr. STRATTON. Mr. Speaker, as dean of the New York delegation, I take this time to pay tribute to two of our distinguished colleagues who will be retiring from the House at the close of the 97th Congress, PETER A. PEYSER, from Irvington, N.Y., and LEO C. ZEFERETTI of Brooklyn.

As Members are aware, the vagaries of the 1982 congressional reapportionment actions in the several States have led to a large number of forced retirements from the House. No State suffered more from these redistricting statutes than the Empire State of New York, which lost a total of five of its House Members out of a 97th Congress total of 39 Members, the greatest loss of seats of any single State. Moreover, as usually happens in a situation of this kind, other Members decided to retire voluntarily. As a result, a total of eight Members of the New York State bipartisan delegation in the 97th Congress will not be Members of the House in the 98th Congress, four Republicans, and four Democrats.

As it turns out, special orders have already been taken previously to pay proper tribute to the contributions of six of these eight Members. Prior to the October recess, a special order was taken by the New York delegation to pay tribute to the gentleman from New York, Mr. BINGHAM. Earlier in the lameduck session a special order was taken by Hon. FRANK HORTON, dean of the New York State Republican delegation in the House to the four retiring Republican Members: Messrs. MITCHELL of New York, LENT, CARMAN, and LEBOUTILLIER. About a week ago members of the delegation scheduled a special order to pay tribute to our very distinguished and beloved colleague from Brooklyn, SHIRLEY CHISHOLM.

Thus, as we move to the close of this very hectic lameduck session of the 97th Congress it is most appropriate that we salute the two remaining members of the New York delegation who have not been previously honored. And I am pleased to be able to provide this opportunity today for our colleagues to join in commemorating the achievements of the two outstanding Members of the House, incidentally both of whom were victims of the two head-to-head incumbent Democrat versus incumbent Republican, election contests that were created by the reapportionment statute in New York State.

Our colleague, PETER PEYSER first came to the House in 1971 as a Republican in the 92d Congress, and was reelected to the 93d and 97th Congress. In 1976 Mr. PEYSER ran unsuccessfully for the U.S. Senate in the Republican primary in New York. However, having in the meantime became a Democrat, PETER ran successfully in 1978 to recover the House seat he gave up to run for the Senate, and was reelected again in 1980.

As Members will appreciate, it is no easy matter for any Member of the House, who gives up his seat to run for the U.S. Senate and who fails, to come back again to his old seat in the House.

Our colleague, PETER PEYSER, not only performed that difficult feat but did it while switching parties in the process, which clearly testifies to his remarkable political skills

In his reincarnation as a Democrat PETER has been a very active Member of the House indeed, and has been a very frequent and eloquent advocate of the Democratic philosophy and program in the House during the course of the 1982 election campaign, where Mr. PEYSER's own reelection, as a result of the State reapportionment plan presented him with a rather formidable task of campaigning in a new district, mostly on the west bank of the Hudson River, of which a very small percentage of the population of its new district included the previous PEYSER district on the east bank of the Hudson.

Thoughout the 97th Congress PETER PEYSER has been a tireless fighter for education, and was a primary leader in 1982 in the fight to restore the budget cuts made in student aid and the college loan programs, and was in large measure responsible for the action later taken by the Congress in restoring funds for these vital programs.

The other retiring Member whom we honor today is LEO C. ZEFERETTI of Brooklyn. LEO entered Congress in the 94th Congress, the famous Watergate-Vietnam 1975 freshman class which brought about a rather sweeping change in the operation of the House although not all of us believe that every one of those changes may have been completely helpful but LEO was a rather more moderate Member of that class. He came to Congress from a long career of government service in the city of New York and in the State of New York. LEO was a correction officer in the city of New York and later a member of the New York State Crime Control Planning Board by former Governor Rockefeller.

Although he was a rather junior Member of the House, LEO ZEFERETTI had the high distinction of being appointed to the very powerful and prestigious Committee on Rules, where he has served with great distinction. In addition, in the 97th Congress LEO took over the very important post of chairman of the Select Committee on Narcotics Abuse and Control from our former colleague, Hon. Lester Wolff, also of New York. LEO performed with great skill in that capacity, one of the most difficult and troubling problems in the Nation.

Like PETER, LEO also found himself in 1982 running in a new district where the large percentage of voters were not residents of his former district.

LEO ZEFERETTI has been one of the most respected Members of the House, a moderate in his views and one who would always give careful consideration to the issues, especially as they affected New York State.

We shall certainly miss his wise counsel and advice.

Mr. Speaker, we in the New York legislation want to wish both of these colleagues success and happiness in the years ahead. Yes, Mr. Speaker, as so many of our former colleagues who come back to these Halls from time to time demonstrate: "There is indeed life after Congress." We know that LEO and PETER will also discover that truth—and who knows, they may even be back again.

□ 1530

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I am very happy to yield to our distinguished retiring colleague, and I want to express my sadness that he is going to be leaving us and particularly that there are not more Members here in the House who

would be here to hear these remarks on behalf of our delegation.

Mr. PEYSER. Mr. Speaker, I thank the gentleman in the well, the dean of the New York delegation, for yielding.

I want the gentleman to know how much I appreciate this effort on his behalf.

I know our colleagues after the exhaustion of these last days are trying to pack up and put together to get home and I know where their thoughts are.

I do want to say that obviously I have loved serving in this House. To me it has been a high point in my life and something that I will never forget, and particularly to serve and work with the New York delegation that on both sides of the aisle have been really I believe outstanding Members who have contributed so much not only to our State, but to the country and to me personally have contributed so much in their friendship.

So I thank the dean of our delegation and I thank all of you for the honors that you have given me.

Mr. STRATTON. Mr. Speaker, I thank the gentleman for his comments. Certainly we will miss him and miss his very articulate and eloquent messages on the House floor and in debate.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Speaker, I thank the gentleman from New York.

I would like to join with the gentleman and stand here and say that the words the gentleman has so clearly put forth are words that those of us in the New York delegation feel very strongly about and feel appreciative that the gentleman, as the dean of our delegation, has asked for this special order.

I know that the time is late and it is one of the problems with these special orders in the lameduck session that so many Members are trying to come in from New York right now, many of our Members, but I know one or two of them have called me to express their support and the fact that they join with the gentleman as the dean of our delegation in a salute both to Congressman PEYSER and Congressman ZEFERETTI, who have long been a credit to our State.

Mr. PEYSER. Mr. Speaker, I thank the gentleman for his remarks.

● Mr. RODINO. Mr. Speaker, I would like to say a few words about two members of the New York delegation who have served with distinction in this House, but who will not be returning in January.

Congressmen LEO ZEFERETTI and PETER PEYSER have given a great deal of themselves to this institution, and in so doing have enriched our country.

As chairman of the Select Committee on Narcotics Abuse and Control, LEO ZEFERETTI has furthered Congress efforts to fight drug abuse throughout out Nation. I know my friend from New York is dedicated to finding solutions to the drug trafficking and addiction that destroy lives and devastate communities. I am confident that he will carry on his personal commitment to fight this national problem.

Congressman ZEFERETTI's efforts to save the minimum wage for American workers as a member of the Education and Labor Committee and his championing of human needs programs as a member of the Rules Committee have helped to improve the quality of life for millions of our citizens.

PETER PEYSER's enthusiasm, independence, and sincerity have made him a very special Member of this House. He has been one of the most outspoken and determined advocates in Congress for maintaining a high-quality educational system in our country. The battles he has fought on behalf of student loan programs and general education funding have kept the hope of advancement alive for millions of young Americans.

As a member of the Education and Labor Committee, PETER PEYSER has been a voice for many of America's most vulnerable citizens, as he has worked for senior citizens programs, child nutrition programs, and low-cost housing for the disadvantaged.

The House will miss the contributions of LEO ZEFERETTI and PETER PEYSER. I wish them good luck and good health in the future.

● Mr. BIAGGI. I wish to join with my colleagues here in paying tribute to PETER PEYSER who will be leaving at the end of this session.

I have had the pleasure of working with PETER during his term as a Representative from New York. His dedication to the interests of his district, his constituents, and New York State made him an active and effective member of our delegation.

As a colleague on the House Education and Labor Committee where we both serve, PETER distinguished himself as a fighter on behalf of a number of worthy causes. He was successful in raising the issue of student financial aid at a time when we were fighting to prevent budget cuts in these programs most effectively by mobilizing students—the beneficiaries of these programs. As a result of his efforts, student groups have formed across the country which have been effective in demonstrating the importance of financial aid to students and the schools they attend.

PETER has also been a tireless advocate for the American consumer in leading the fight against higher sugar prices through the price support system.

I am also proud to note that PETER has been one of the key members of the Ad Hoc Congressional Committee for Irish Affairs in helping us to raise the issue of Northern Ireland in the Congress and across the Nation. His commitment to peace, justice, and human rights for all citizens of Northern Ireland is second to no one and his contributions helped us bring this issue from a position of relative obscurity to one which now commands national and international atttention.

His activism on behalf of human rights did not stop with the Irish. PETER has been an outspoken critic of immigration policy of the Soviet Union for its Jewish citizens as well as treatment of citizens in a number of South American nations.

I would be remiss if I did not also note that PETER PEYSER has been an ambitious and energetic Member of this body, always ready to raise an issue or a question. Our Democratic Party, as well as his other friends and colleagues in Washington will miss him and his contributions. I join with other Members today in wishing him well in any and all of his future endeavors.●

● Mr. SOLARZ. Mr. Speaker, I rise to pay tribute to Congressman PETER PEYSER with whom I have served in the House for 6 years.

Congressman PEYSER has fought long and hard as a member of the Education and Labor Committee to protect Federal aid to students, particularly the guaranteed study loan program and Pell grants. He was a leader in the effort to mobilize thousands of students who came to Washington last year to fight for the survival of this important program which has allowed thousands of moderate- and low-income students to attend the college of their choice. And they won.

On a lighter note, I will never forget Congressman PEYSER's "Dear Colleague" on the sugar subsidy vote. In his unique fashion he sent each and every Member of this House a lemon. It certainly got our attention, and I might add proved of some use to the tea-drinking Members and their staffs.

It is hard to say goodbye to a colleague, particularly when redistricting shrinks your State's delegation. But given Congressman PEYSER's past performance, we may well be hearing from him some time in the not too distant future.

So let me just say that it has been a privilege to work with you in the House and I wish you the best in your next endeavor.

Mr. Speaker, I rise today to pay tribute to a distinguished colleague, LEO ZEFERETTI, whom I have come to know and respect through our 8 years of service in this House.

Congressman ZEFERETTI served as the chairman of the Select Committee on Narcotics where his background in law enforcement and criminal justice made him an effective advocate of in-

creased Federal, State, and local efforts to control the international trafficking in narcotics. He has sponsored numerous pieces of legislation to improve Federal law enforcement efforts and to improve the administration of our criminal justice system. But he has also been an effective advocate for health care and senior citizen programs, and the social and economic development programs that improve our neighborhoods and make them more decent places in which to live and work and raise a family.

As a member of the House Rules Committee, Congressman ZEFERETTI has constantly demonstrated his loyalty and commitment to the goals of the Democratic Party. He has worked long and hard to see that our Government not forget the needs of its citizens, particularly their right to live safely and securely in their homes.

As a colleague from the New York City delegation, and as another frequent commuter on the shuttle, I have come to know and appreciate LEO ZEFERETTI and what he has tried to do as the Representative of some of the best neighborhoods in Brooklyn, including those made famous by "Saturday Night Fever." I am proud to have had the opportunity to work with Congressman ZEFERETTI over the last 8 years in the effort to make both our borough and our State a better and fairer place in which to live.

Due to reapportionment, I am going to be representing some of those neighborhoods in the next Congress. My new constituents have already let me know just how much they will miss LEO and how grateful they are for all that he accomplished as their Representative.

So here in the closing hours of the 97th Congress, I wanted to take this opportunity to say to LEO and his family "Thank you and congratulations for a job well done." The New York City delegation will miss you but we won't forget you, or the endless hours and efforts that you put into representing the needs of your constituents.

Good luck and Godspeed in the years ahead.●

● Mr. RANGEL. Mr. Speaker, I rise today to pay a tribute to our esteemed colleague, the chairman of the Select Committee on Narcotics Abuse and Control, LEO ZEFERETTI.

We in this body will truly miss his stature, his expertise, and his experience in the field of narcotics control. And we in the New York delegation will miss his willingness to work with us on a number of issues for the good of the country and of New York.

I think that I can speak for all of us in the House in wishing him the very best for the future.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable PETER A. PEYSER, who represented the people of the 23d District of New York for 6 years in the 92d, 93d, and 94th Congresses, and was reelected to serve 4 additional years in the 96th and 97th Congresses.

Congressman PEYSER began his career of service to our Nation as a private in the infantry and was sent overseas in the fall of 1944 where he fought in the Battle of the Bulge and the Remagen Bridge engagement when the Allied forces crossed the Rhine in Germany. His military decorations include the Combat Infantry Badge, the Belgian Fourragere, the Presidential Unit Citation, the Bronze Star Medal, and three battle stars. During the years 1955-58, he commanded the New York National Guard infantry company stationed in Yonkers Armory. In 1963, he was elected the mayor of Irvington, N.Y.

PETER has given 10 years of dedicated and devoted service to his constituents in New York as a Congressman, and has compiled a splendid record of excellence and ability. His diligent efforts as a member of the House Government Operations Committee have been both fruitful and beneficial to the citizens of this Nation.

Few men have given more of themselves to good government, or have a more compassionate understanding of human problems than has PETER PEYSER. As a member of the House Committee on Education and Labor and the House Committee on Post Office and Civil Service, he was in the forefront of efforts to implement meaningful solutions and effective action on behalf of the individual citizen.

Congressman PEYSER'S actions on behalf of my constituent, Walter Polovchak, the Ukrainian boy who wishes to remain in America rather than return to the Soviet Union, are most commendable, and I urge my colleagues in the new 98th Congress to support his proposed immigration amendment to clarify Walter's refugee status.

PETER is a fine legislator and a distinguished leader, and he will be missed here in the House of Representatives.

I extend to PETER A. PEYSER my wishes for continued success in devoting to the highest principles.●

● Mr. BIAGGI. Mr. Speaker, I rise to join with my colleagues from New York and other places to pay tribute to one of our finest members, LEO C. ZEFERETTI, who for the past 8 years has served with the great distinction as the Representative from the 15th Congressional District of Brooklyn, N.Y.

The fact is I have known LEO for a number of years well before his election to the House, because of our mutual backgrounds in law enforcement. I was a police officer for 23 years before being elected to Congress and LEO was a corrections officer. When LEO was president of the Correction Officers' Benevolent Association we had many dealings with one another and even shared offices in the same building on Broadway.

LEO and I served together on the House Education and Labor Committee and together worked to insure that our home city of New York was provided adequate Federal funding from various education programs enacted by the Congress. He became a member of the House Rules Committee in the 96th Congress and was respected by his colleagues as one of the more effective members of this committee. However the apex of LEO'S career in Congress came when he was selected to be chairman of the House Select Committee on Narcotics Abuse and Control. In that capacity LEO has been an outstanding champion in this Congress fight against the grave problem of drug abuse. I have had the pleasure of serving on the committee and know firsthand that LEO was an outstanding chairman.

To bid farewell to LEO ZEFERETTI involves far more than saying goodby to a colleague. LEO has been a good friend for many years and will be in the future. Our families know each other, we spend time together, we have shared many good times together. The House will miss LEO ZEFERETTI but no one group will miss him more than the New York congressional delegation. LEO helped in the fight to keep New York City from going bankrupt and his voice has always been heard when New York City's interests were at stake.

I know that the future will be good to LEO ZEFERETTI, and I wish continued good health, happiness, and prosperity to both LEO and his wife, Barbara.●

● Mr. MOLINARI. Mr. Speaker, I rise in reference to the special order regarding Mr. LEO ZEFERETTI, Member of Congress from new York.

LEO ZEFERETTI served the people of his district for 8 years, but even before he was first elected to the Congress, LEO had already established a long and dedicated career of service.

LEO ZEFERETTI was elected to be head of the New York City Corrections Officers' Benevolent Association, and many of the benefits that those officers enjoy today were the direct result of LEO'S hard work and persistence. He was so much valued by the people of New York City and New York State, that he was appointed to the New York State Crime Control Planning Board by the late Gov. Nelson Rockefeller. His work on that important panel brought Mr. ZEFERETTI nationwide acclaim, and he was appointed by President Nixon to the Presidential Conference on Correction.

His wide experience was put to good use here in the Congress, where he

was selected to chair the Select Committee on Narcotics Abuse and Control, and he also served with distinction on the House Rules Committee.

The achievements of LEO ZEFERETTI are a matter of public record, and it is a proud record indeed. Few men or women achieve the position in life that he has gained, and even fewer do it while maintaining a spirit of friendship and personal warmth that is so much a part of his demeanor.

LEO has been a friend of mine for years, and through a quirk of fate, it was decreed that he and I should face each other in political battle last November, as the result of reapportionment.

In all of my years in politics, I have never faced a man who was as decent and honest, who fought the good fight, but never for a moment lost his dignity, even in defeat. In the weeks since the election, LEO ZEFERETTI has put all of his considerable assets at the disposal of the people he will not represent next year. He has cooperated fully in the transition, and has worked hard to make sure that not one single constituent will go even 1 day without the protection of the Congress of the United States, and he has done so with a humor and grace that passes all boundaries.

It is my sincere privilege to have had LEO ZEFERETTI as a colleague, a friend, and even an adversary. He has brought honor to the Congress, and on his own good name.

Whatever direction his life takes now, I am sure of two things, that LEO ZEFERETTI will continue to serve, and no matter what the future brings, he will always be my friend.●

● Mr. RANGEL. Mr. Speaker, I would like to take this time to say a special goodby to our friend and colleague, PETER PEYSER.

A champion for the rights of consumers, our colleague from New York struck a blow for us all in leading the struggle to keep sugar prices low. The gentleman has served his country well, served his State well, and served his district well.

I can only say that we will miss the gentleman not only professionally, but personally as well.●

GENERAL LEAVE

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the achievements and accomplishments of the Honorable LEO ZEFERETTI and the Honorable PETER PEYSER.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A TRIBUTE TO EDMUND L. (TED) HENSHAW, CLERK OF THE HOUSE, ON HIS RETIREMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, this body has been privileged for the last 7 years to have had the devoted service of Edmund L. (Ted) Henshaw, Jr., as Clerk of the House of Representatives. He has been friend and associate and comrade to all of us over here—member and staff person alike—and he has inspired us with a deep sense of affection and respect.

Ted is retiring at the end of this session, and he will be missed. As we all know, he has been coeditor of "Who's Who in American Politics" for the editions of 1967, 1969, 1971, 1973, 1975, and 1977. Appropriately, Ted's life is itself one of the bright pages of American political history.

After returning from wartime service with the Army Air Corps from 1943 to 1946, Ted graduated from the University of Maryland with a degree in business and public administration. He then attended George Washington University Law School for a year, during the course of which he began his long and fruitful public service career.

Ted served the Democratic National Congressional Committee as research director from 1955 to 1972 and as executive director from 1972 to 1975. He distinguished himself on the committee and was appointed by Speaker Carl Albert to his present position on December 17, 1975. He has earned reelection to the job on four occasions since then and has become, in truth, an institution.

We wish Ted further golden years in private life. He carries with him not only our heartfelt appreciation but a standing invitation to visit us here whenever he wishes—which we hope, of course, will be often. It will be hard to say goodby to his counsel and his great good will.

It is with a deep sense of affection that we say farewell to our friend, Ted Henshaw,

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Pennsylvania.

Mr. MURTHA. Mr. Speaker, I would like to add my personal comments to the gentleman's laudatory comments about Ted Henshaw.

I know that he has done a great service for the country, a great service for the Democratic Party. It is nice to see him on the floor tending to his duties today.

□ 1540

It is nice to see him working, as he always does, right up to the end of his term. There is nobody who has done more to make sure that the administration of the House was adhered to and all the details, delicate details, were taken care of, so I join the gentleman from Arkansas in commending and lauding Ted Henshaw for all the work he has done over the years and compliment the deputy whip for saying such nice things about such a fine person.

Mr. ALEXANDER. I thank the gentleman for his contribution to our friend.

Mr. FOUNTAIN. Mr. Speaker, will the gentleman yield to me?

Mr. ALEXANDER. I yield to the gentleman from North Carolina.

Mr. FOUNTAIN. I thank the gentleman for yielding.

Mr. Speaker, I just entered and heard the gentleman discussing our good friend, Ted Henshaw. I guess I have probably had the privilege of working with and associating with Ted Henshaw longer than most of the Members here, and I would like to say that one of the great joys I have had in serving as a Member of this body is not alone the friends you make among its Members, but the associations and friendships we make among those who make it possible for us to survive in this institution and to do our jobs.

Ted Henshaw, in a number of capacities before he became Clerk of the House, has done that. He has been most cooperative, he and his wonderful staff, in so many ways. He has reflected credit not only upon himself and his staff, but upon this House, this great institution, and upon his family and this Nation.

Mr. Speaker, I want to associate myself with the gentleman from Arkansas and others who have spoken words of tribute about Ted Henshaw, and I express the hope that he will continue to recover and that he will enjoy an abundance of the blessings of life wherever he may go and in whatever he and members of his family may undertake.

Mr. BARNARD. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Georgia.

Mr. BARNARD. I thank the gentleman for yielding.

Mr. Speaker, I want to say that I certainly associate myself with the remarks of the gentleman from Arkansas and the gentleman from North Carolina. The gentleman from North Carolina spoke from the view of those who have been in Congress for long periods of service and their impressions of what Ted Henshaw has meant to them. I am a relatively new Member of Congress, only three terms, but I might say, Mr. Speaker, that no one has been more helpful to new Members coming into the Congress than Ted Henshaw. He certainly took us by the hand and led us through all the

accoutrements of getting settled in the Congress, and that type of treatment is well received and well appreciated by new Members in the Congress.

I want to join the many, many friends of Ted Henshaw in wishing him well for the future. Certainly he knows that at any time and at all times he has friends in this Congress and always will.

Mr. HUGHES. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Speaker, I just want to commend my colleague from Arkansas for taking out this special order for our good friend Ted Henshaw.

I came to the Congress in 1974, and one of the first people I met was Ted. What impressed me about Ted was his willingness to try to assist young Members. I remember very well, as a matter of fact, a number of Democratic study group meetings where Ted Henshaw was present. He was always willing to listen; he was always willing to help; he always had a pleasant smile.

It really has been a pleasure for me to serve with him over the some 8 years that I have been in the Congress. I wish he and his family all the very best in the years ahead.

Mr. ALEXANDER. I thank the gentleman for his remarks.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. Mr. Speaker, I would have to say that I probably know Ted as well as and as long as anybody in this Congress. For many years he worked for the Committee to Reelect a Democratic Congress. From 1967 to 1971 I had the position that TONY COELHO has now, as chairman of that body. The organization was small in those days. We just had Ted and one or two others, and Ted was acting as executive director.

The help and the aid that he gave to the Members of the Congress, not only the help and the aid, the dedicated spirit that he had to this body, the love and affection that he had for the Congress of the United States, he did a tremendous job.

I remember being in the leadership with Carl Albert when the Clerk of the House job became available. How do you pick a man to become Clerk of the House? You look around the Capitol and you say, "Where is there a man with talent and ability, who is aggressive, with an engaging personality, who loves the body and has the respect of all the Members on this side of the aisle?"

In a matter like this, you want no confrontation, so you look around for a man who is universally liked. We came up with the name of Ted Henshaw.

There is Ted standing over there today. Adversity has come his way through ill health. I know of no person with such genuine character, such an effervescent personality, such a love and affection for this as Ted has.

Ted, it is with great regret that we see you leave, and if it had not been for your health I am sure you would have been here for many years to come. You did a magnificent job. You leave with your head high because you know the position that you held was improved by your innovative ideas, you prevented problems and abuses that could have occurred, and you have made the office a better place, and because of it this institution is a better place to serve in.

I guess it is 20 years that we have known each other. During this time your devoted wife, Barbara, has been a beacon of strength. I admire her greatly. Ted, I just want to say to you, thanks for your friendship, thanks for your loyalty when you were working for me, and thanks for what you have done for this institution. You are a great man.

Mr. ALEXANDER. I thank the gentleman.

● Mr. WRIGHT. Mr. Speaker, today I am honored to join my colleagues in paying tribute to Edmund L. Henshaw, Clerk of the House.

For two decades, Ted has been a devoted servant of the Congress, first as a professional staff director of the Democratic Congressional Campaign Committee, and since 1975 Clerk of the House of Representatives.

Members, will recall that Ted threw himself into his avocations as well as his work. In fact, Ted sported a handsome cast after throwing himself "a foul" in a congressional softball game. His ever-present smile and kind words helped remove the sting from long days and intense proceedings.

Always informed, patient, and professional, Ted assisted Members of this House with a myriad of problems. His expertise and soothing demeanor will be sorely missed.

Members of the House can never repay Ted for years of yeoman service to this institution, but we can thank him for his contributions.

We all wish Ted and his lovely wife, Barbara, a bounty of life's rewards in the future.●

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, I thank the gentleman for yielding. I, as a typical member of the minority, had occasion to work with Ted, and I can attest to the fact that he was always totally bipartisan. I did notice that he had a tendency to pretend to be a Boston Red Sox fan, which I attributed to the necessity of holding his office, but other than that occasional performance he was totally dedicated, very effective, had an excellent staff, and without a doubt was an outstanding public officer.

I would also like to remind the Members that as Clerk of the House Ted represented all of us at meetings of an organization called the association of Secretaries General, which is his equivalent in the parliaments of the world. His participation there was such that he was an instant leader, a tower of strength, and a source of great respect for his expertise.

Wherever Ted served, he served well, he served effectively. I wish him well as he contemplates retirement.

About the best you could say on an occasion like this is, Ted, we even forgive the partisanship of your very early years. Best wishes.

Mr. ALEXANDER. I thank the gentleman.

Mr. HOYER. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Maryland.

Mr. HOYER. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I rise at this time to give recognition and praise to Ted Henshaw who at the end of the 97th Congress will retire as Clerk of the House of Representatives.

As an official of the House during the 94th, 95th, 96th, and 97th Congresses, Ted has given much to this institution: dedication, devotion, respect, dignity, humor—above all, he has shown remarkable courage. His numerous contributions to this House will provide a legacy for all who follow. His achievements throughout his career are indeed laudable. Ted has been an outstanding leader and a dependable friend to every Member of this body.

Ted Henshaw has been involved in the political process all his life and has loved every minute of it. He started his career in 1955 working for the Democratic National Congressional Committee. His dedication and devotion to that job and the Democratic Party earned him the position of executive director. After 20 years with the DNCC, Ted was appointed and then elected as Clerk of the House of Representatives where he has served honorably and effectively to this day. Tomorrow will mark the anniversary of Ted's election to this position 7 years ago.

The 98th Congress will miss this courageous, brave, and honorable gentleman. I wish Ted, his wife, Butch, and his family their much deserved happiness in the years ahead. Ted, you have been an inspiration to us all, and we thank you for sharing your talents and professionalism with us.

● Mr. WHITTEN. Mr. Speaker, it is my great pleasure to join in paying tribute to my friend, the Clerk of the House of Representatives, Ted Henshaw. We are all saddened to learn of Ted's retirement for he will be missed.

It has been a pleasure to work with Ted for the duration of his tenure as Clerk. Ted's contributions to this body are innumerable and his dedicated service is second to none.

I would also like to point out the courageous example Ted has shown us all by his overcoming such extenuating personal circumstances to continue to serve the House. Ted has given us his best; I want to wish him well in all future endeavors.●

● Mr. SKELTON. Mr. Speaker, I take this time to say a few words in honor of Ted Henshaw, the retiring Clerk of the House of Representatives.

Ted Henshaw has been a good friend of mine for a number of years and his departure will be a great loss not only to this House, but to all of us who had the pleasure of working with him. I got to know Ted well not only through my work here in Congress, but also during the Many occasions that we drove to the House together as he lived near me. Ted's hard work and dedication make him a person that one not only admires, but a person that one tries to emulate in one's own life.

Ted's exemplary service has not been limited to his work here for the House of Representatives. Ted has a good family, and this comes not by luck but from the example he sets and provides as a husband and a father.

Ted has also served this country as well as he has the House of Representatives. His unimpeachable citizenship is a lesson to others, and a rare find in today's world. Ted will be missed by all and I wish him luck on the future.●

● Mr. PANETTA. Mr. Speaker, I want to join my colleagues in paying tribute to Ted Henshaw, who is retiring as Clerk of the House after the adjournment of the 97th Congress.

Ted Henshaw has carried out the duties of the Clerk—which are not only difficult and complex but absolutely vital to the smooth running of the House—with skill and sensitivity. It is not easy dealing with 435 disparate personalities such as ourselves and administering a large office at the same time, but Ted has managed with flying colors. I appreciate the help he has provided to me and to my office over the past 6 years, and I know my colleagues all appreciate the job he has done.

I know we all want to wish Ted the best of luck in the future. His shoes will be hard to fill, and we will miss him a great deal.●

● Mr. EVANS of Indiana. Mr. Speaker, I would like to say a few words in praise of Ted Henshaw.

During the past 27 years, Ted has well served the public and the Democratic Party. In his tenure with the Democratic National Congressional Committee he provided candidates with valuable directions for running their campaigns. When I made my first trip to Washington as a congressional candidate in 1972, Ted was one of the first people I met. Being a novice, I had no contacts and had no idea where to begin. Ted provided names of people who were important for putting together a good campaign. Without his help, mastering the intricacies of Washington would have been much more difficult. I will always appreciate the help he gave me.

Being the Clerk of the House is no easy task. Things that we as Members take for granted require a great deal of time and effort in order to run smoothly. Fortunately, Ted brought the same dedication to Congress that he has always displayed. His presence at the Capitol will be greatly missed.●

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleagues, Majority Leader JIM WRIGHT, Majority Whip THOMAS FOLEY, and Chief Deputy Majority Whip BILL ALEXANDER for taking this special order so that Members can salute the Clerk of the House, Ted Henshaw. As we all know, Ted will be retiring as the Clerk of the House at the end of the 97th Congress.

It is a pleasure for me to join in this well-deserved salute to my good friend, Ted Henshaw. I can think of few people, Mr. Speaker, who have served this body with such vigor and unceasing dedication as Ted Henshaw. We all shall miss him as he retires from his position.

Since 1974, when Ted Henshaw was elected Clerk of the House of Representatives, Members have enjoyed exemplary service from that office. Ted's admirable qualities of hard work, efficiency, and dedication to the Members and the American people have served as a perfect model for his staff. Accordingly, his staff has served both him and the Members well. Additionally, Ted has enjoyed the respect and admiration of Members on both sides of the aisle.

On a more personal note, Mr. Speaker, I can think of no time that I have called on Ted Henshaw for assistance that he has not promptly and efficiently rendered it. I take this forum to thank him for that service and consideration.

Even though Ted Henshaw is retiring from his position as the Clerk of the House, the work he has rendered will serve as a lasting tribute to him. Mr. Speaker, I send my best wishes to Ted on his retirement.●

● Mr. REGULA. Mr. Speaker, many words of appreciation will be spoken here today as the House of Representatives honors our retiring Clerk, Ted Henshaw. I would add but a few.

This is a man whose name appears immediately below yours in the Congressional Directory which attests to the importance of his duties to this body and the Nation.

I believe we should commend Ted for the manner in which he performed those duties and say to him—thank you for a job well done.

Ted has been always considerate of the Members and, despite the demands of his job, always helpful.

I join my colleagues in wishing him happiness in his retirement.●

● Mr. MONTGOMERY. Mr. Speaker, it is a great pleasure for me to join with my colleagues in paying tribute to a most outstanding and dedicated public servant, Ted Henshaw.

It just would not seem to be the same around here without Ted keeping things running smoothly as Clerk of the House of Representatives. He has handled the enormous duties of Clerk in a truly professional manner and I know he has earned the respect of Members of Congress as well as the hundreds of staff assistants who have worked with him over the past 7 years.

Ted has had an impressive career of service to this Chamber and to this country. He served with the Army Air Force during World War II before becoming research director of the Democratic National Congressional Committee in 1955. He worked in that position until 1972, when he became executive director. He was appointed Acting Clerk of the House on November 17, 1975, and elected Clerk a month later.

I know my colleagues will join with me in saying that we will indeed miss Ted Henshaw around Capitol Hill as the 98th Congress convenes. I want to wish him well and say that I hope he will visit us often. He has been a truly outstanding Clerk of the House and we appreciate the service he has given to this Chamber.●

● Mr. DE LA GARZA. Mr. Speaker, today we pay tribute to a man whose decision to retire at the end of this session I learned of with deep regret—Edmund Henshaw, Jr., Clerk of the House.

Those of us privileged to serve while he has been Clerk recognize his splendid character and fine ability. He is living proof of the success a man may attain by steady application, by long hours of hard work, and by unselfish discipline.

As a man who was always ready, willing, able, and highly qualified to lend a hand he will be missed. As I think back I remember when I first came to the 89th Congress how Ed Henshaw impressed me with his unassuming but highly effective conduct and how over the years I was proud to earn his friendship. The passage of

time has only confirmed and enhanced this high opinion.

While it is sad to see him retire to private life I know I can understand why a man has to go sometime to see to his own concerns and interests. I will certainly miss our association, but I have a feeling we will miss Ed far more than he will miss us.

It is my sincere hope that the retirement days ahead are blessed with good health and an abundance of those things which go to make up happiness. As he leaves may I say—Vaya con Dios.●

● Mr. DINGELL. Mr. Speaker, one of my very best friends has chosen to retire from service in the House. Ted Henshaw, our respected Clerk, is finishing a congressional career spanning years of both Democratic Party and House change and has seen and has been involved in many victories for the American people.

Ted has been a valiant defender of the system of representative government, always working for good government for the people as he was known to often say.

He served all Members of the House, but I can recall how he gave so much of himself when he worked on the Democratic Congressional Campaign Committee of the Congress to insure the election of good men and women to our American legislative institution.

My tribute to Ted goes equally to his wonderful wife, Butch, as we most affectionately call her. My personal family friendship with the Henshaws will always be treasured and my good wishes go with them always.●

● Mr. FORD of michigan. Mr. Speaker, it is with great pleasure that I join my colleagues in paying tribute to Edumnd L. "Ted" Henshaw, the retiring Clerk of the house of Representatives. Ted has served as Clerk since his appointment by House speaker Carl Albert and has subsequently been reelected for every Congress since then. In his capacity as Clerk, Ted has made life in the House a lettle easier for all of us. As the head of a 500-person staff, the administrative functions of the Clerk have grown over the years. The efficiency and diligence of the Clerk's office reflect the dedication of Ted to his position. The behind-the-scenes functions of the Clerk, such as payroll, finance, recordkeeping and publication of documents, are essential to the smooth operation of the House of Representatives.

Prior to serving as the Clerk of the house, Ted worked for 20 years for the democratic National Congressional Committee and served as executive director for his last 3 years at the DNCC. During his tenure there, the Democrats formed a substantial working majority in the House which has continued to this day. I will truly miss Ted Henshaw when he retires at the end of the 97th Congress.●

● Mr. REUSS. Mr. Speaker, I am delighted to join my colleagues in this tribute to a man on whom all House Members depend, Ted Henshaw, who is retiring this month after 7 years of excellent service as Clerk of the House.

That title might be deceiving to those who do not know this institution. But as one who trod these Halls for 28 years, I know well that the daily efficiency and long-term effectiveness of the House of Representatives depends largely on the skill of its Clerk and his staff. He is responsible for almost everything—the document room, the finance office, the bill clerk, office equipment, office supplies, records and registration, even typewriter repair. A well-run Office of the Clerk, serving the Members well, enables those Members to serve the public well.

Ted Henshaw, who has served as Clerk since November 17, 1975, has fulfilled his many tasks with dedication and professional skill. He and his staff are too often the unsung heroes of the House.

Prior to becoming Clerk, Ted proved his skills as an administrator at the Democratic National Congressional Committee from 1955 to 1975, and demonstrated his extensive political knowledge as coeditor of six editions of "Who's Who in American Politics." This combination of talent and experience ably served him in this body and has made his tenure as Clerk one of the most outstanding in history.

I wish Ted and his wife, Barbara, the best, and want to express again my deep thanks for a job superbly done.●

● Mr. ZABLOCKI. Mr. Speaker, it is a pleasure and a privilege to join the many friends and admirers of Ted Henshaw in paying tribute to his service to this House and to the Democratic Party over the past decade.

As Clerk of the House, Ted Henshaw has provided many important services to all Members of this body, and he has done so with conscientiousness, fairness, and efficiency. During his tenure, in fact, the Clerk's office has taken on added administrative responsibilities and has played a major role in instituting the televised floor proceedings.

As research director and subsequently as executive director of the Democratic National Congressional Committee, Ted Henshaw has served his party with great dedication and distinction.

To Ted Henshaw, his wife Barbara, and their three children, I extend my warmest best wishes and appreciation, and I wish Ted the happy and rewarding retirement which I know will be provided him in the great State of Virginia.●

● Mr. RODINO. Mr. Speaker, I want to join my colleagues in this tribute to a devoted public servant, Ted Henshaw, who is retiring at the end of this year.

As Clerk of the House since 1975, Ted Henshaw has been much more than an important officer of the House, who is responsible for the smooth running of this institution. He has been a friend and counselor to many of us, and I appreciate the many times he has performed above and beyond the call of duty to be of help.

As Ted Henshaw prepares to leave the House, I want to thank him for his commitment and wish him much happiness in the years ahead.●

● Mr. FUQUA. Mr. Speaker, as an officer of the U.S. House of Representatives, Ted Henshaw has conducted himself with a dignity and dedication which has done credit not only to himself but to the House of Representatives as an institution.

As Clerk of the House of Representatives of the United States, Ted Henshaw has had numerous and difficult duties.

He has dispatched these duties with efficiency, good will, and fairness, thus making all of our lives better as a result of his tireless efforts.

Added to his efficiency and dedication, the courage demonstrated by Ted Henshaw in fighting back from illness to continue the fine tradition of service he set and maintained as Clerk of the House cannot go unnoticed.

The fact that during his illness the office of Clerk continued to function according to the standards he had set is a tribute to the care he gave to his administrative responsibilities in hiring and training an excellent staff.

I will personally miss Ted Henshaw when he retires at the adjournment of the 97th Congress, and even more I believe he will be sadly missed by the entire House of Representatives.●

● Mr. WINN. Mr. Speaker, I have known and admired Ted Henshaw for many years. When I first came to Congress Ted was director of the Democrat Congressional Campaign Committee, and a party player. Though our politics differed he was always fair and honorable in our dealings. He was later elected to the post of Clerk of the House, a position he has held for a number of years. His service to the Members of the House has been exemplary.

In every day life we have opportunities to know people who you truly value. Ted Henshaw is one of those people. He has always been a dedicated public servant, and has given of himself to make this institution a well run hub of Government.

Ted will be missed by all of us who had the privilege to know and work with him. His retirement is well deserved and I want to wish him the very best of everything as he leaves his much loved post on the Hill.

89-059 O-86-26 (Pt. 24)

Good luck and God bless you in all your future undertakings.●

● Mr. SENSENBRENNER. Mr. Speaker, as the 97th session of the House of Representatives draws to a close, I am grateful for the opportunity to join with my fellow colleagues in extending my thanks and appreciation to Edmund Lee Henshaw for his dedication and fine service to the House of Representatives for over half a decade.

Having a broad range of both legislative and administrative duties, he is a jack-of-all-trades, always producing quality workmanship. It is testimony to this quality that he has been reelected as the Clerk of the House three times. Ironically, it is at the end of his career in the House that we take time to say thank you. But, like many of the tasks that take place in the day-to-day running of our Government, they and the people who perform them are taken for granted when they run smoothly and efficiently.

It is with deep respect that I join with my fellow colleagues in honoring Edmund Lee Henshaw and wish him the very best in the future.●

● Mr. CORRADA. Mr. Speaker, it is an honor and a privilege to join this institution in praising the dedicated and efficent service that Ted Henshaw has given the U.S. House of Representatives and, as he retires, I am pleased to note that Ted has exemplified the best in the tradition of public service.

As Members of Congress, we are the beneficiaries of the smooth functioning of many dedicated employees working long hours and at considerable sacrifice for all of us. Ted is a leader among all of our House employees and it is indeed fitting that we honor all of them by marking this occasion in his honor.

Ted has certainly earned the right to an enjoyable retirement, or another career, if he chooses to embark on one. His reputation for diligence, his attention to detail, and his courteous consideration of the requests of all Members of the House of Representatives is known throughout our institution.

It is a pleasure to join with the leadership in this special order and I wish the very best in the future to Ted and his family.●

● Mr. RAHALL. Mr. Speaker, it is my pleasure to participate in this tribute, arranged by the distinguished majority leader, majority whip, and chief deputy whip, honoring a man who has dedicated many years of service to the House of Representatives, the Clerk of the House, Ted Henshaw.

Ted has served as Clerk since 1975, and has done so with distinction and great skill. He has performed a task that few of us actually realize how demanding it is. While we may not come in day-to-day contact with Ted, we always have been confident knowing that he had things under control, that he was seeing to it that this House ran well.

I want to take this opportunity to wish Ted and his family the very best in the years to come, and hope that he can look forward to a happy and healthy retirement.●

● Mr. FASCELL. Mr. Speaker, I am happy to have this opportunity to join in tribute to my good friend, Ted Henshaw, and to wish him well in his retirement. It is always with a touch of regret that we say goodby to old friends, but Ted has served the House and all the Members with distinction, excellence, and humor through the years, and he deserves a hard-earned rest. He will be greatly missed.

I have known Ted since 1955 when I first came to the Congress and when he joined the Democratic National Congressional Committee as its research director. He was always an able and willing assistant, and very highly regarded by John Buckley, my administrative assistant for 20 years. I know John would want to join me in wishing Ted the very best. As all of us on this side of the aisle know, Ted became the executive director of the congressional committee in 1972 and held that position until he was appointed Acting Clerk in 1975.

The Clerk of the House is the CEO of the House of Representatives. We are all dependent on him to insure that the technical and very important procedures for enacting laws is followed, and that the equipment needed for the orderly functioning of this body is available and up to date. Under his leadership, for example, the House made great progress in efforts to join the computer revolution. The fulfillment of these and the myriad other duties requires a master of administrative skills and a great tactician. Ted has distinguished himself in these and many other areas. He has served the House of Representatives and his Nation well, and deserves our thanks.●

● Mr. HOYER. Mr. Speaker, I rise at this time to give recognition and praise to Ted Henshaw who at the end of the 97th Congress will retire as Clerk of the House of Representatives.

As an official of the House during the 94th, 95th, 96th, and 97th Congresses, Ted has given much to this institution: Dedication, devotion, respect, dignity, humor—above all, he has shown remarkable courage. His numerous contributions to this House will provide a legacy for all who follow. His achievements throughout his career are indeed laudable. Ted has been an outstanding leader and a dependable friend to every Member of this body.

Ted Henshaw has been involved in the political process all his life and has loved every minute of it. He started his career in 1955 working for the Democratic National Congressional Committee. His dedication and devotion to that job and the Democratic Party earned him the position of executive director. After 20 years with the DNCC, Ted was appointed and then elected as Clerk of the House of Representatives where he has served honorably and effectively to this day. Tomorrow will mark the anniversary of Ted's election to this position 7 years ago.

The 98th Congress will miss this courageous, brave, and honorable gentleman. I wish Ted, his wife, Butch, and his family their much deserved happiness in the years ahead. Ted, you have been an inspiration to us all, and we thank you for sharing your talents and professionalism with us.●

● Mr. BOLAND. Mr. Speaker, I am pleased to join with the House leadership in paying tribute to my long-time friend, Edmund L. Henshaw, Jr., who is retiring as Clerk of the House of Representatives.

Ted has been a valued friend of mine, going back to his early years as research director of the Democratic National Congressional Committee in 1955. He was always available to dispense wise counsel to new Members of Congress as they organized their staffs and offices and acquainted themselves with House procedures.

As executive director of the Democratic National Congressional Committee from 1972 to 1975 and as Clerk of the United States House of Representatives since 1975, Ted Henshaw has rendered dedicated service to this institution to the satisfaction of all Members of Congress.

Mr. Speaker, it is my fondest desire that as Ted prepares to leave us that he will continue to regain his strength so that he may have many happy years in retirement and good health with his beloved wife, Barbara, and their three children.●

● Mr. ANNUNZIO. Mr. Speaker, it is a genuine pleasure for me to join with my distinguished colleagues, Majority Leader JIM WRIGHT, Majority Whip THOMAS S. FOLEY, and Chief Deputy Majority Whip BILL ALEXANDER, in paying tribute to Edmund Lee Henshaw, Jr., who has ably served as Clerk of the House of Representatives since 1975. Ted's dedication to high standards is an inspiration to his friends and fellow citizens, and his exemplary service to the Congress, and to the people of this Nation is most commendable.

Before his election as Clerk of the House of Representatives, Ted Henshaw served as research director of the Democratic National Congressional Committee from 1955 to 1972, and as executive director from 1972 to 1975. He also honorably served our country in the U.S. Army from 1943 to 1946.

Appointed to the position of Clerk of the House of Representatives by the Speaker of the House, Carl Albert,

Ted Henshaw has served in this office with diligence and distinction for the last 7 years. His actions to insure that the business of the House of Representatives is running smoothly are deeply appreciated by every Member of the House on both sides of the aisle.

Ted Henshaw is an outstanding American, who has devoted his life to public service, and he will be missed by all of us who know and respect his integrity and his administrative abilities.

I extend to Ted Henshaw my congratulations for a job well done, and my best wishes for success in his future endeavors.●

● Mr. SAM B. HALL, JR. Mr. Speaker, Ted Henshaw has been an outstanding Clerk of the House, and all of us are going to miss him. He has brought innovation and automation to the House, and has been an untiring worker in behalf of a more efficient administration of the normal routine of the House. His has not been an easy job. Since the midsixties Congress has grown by leaps and bounds. Our mail has increased some tenfold in just the past 12-15 years, and the demands on our time and that of our staff makes the job one that is around-the-clock. Ted Henshaw has done his best to make the job easier. He is a forward-thinking person and was the right man for the job as the role of Congress expanded so dramatically.

When Ted suffered a severe illness some time back there was not a person in the House establishment who was not saddened and genuinely concerned for his welfare. Like all of us who admire and respect Ted so much, I want to wish for him good health and happiness in retirement. He has provided exemplary service, and I, for one, am grateful for his good advice and many courtesies.●

GENERAL LEAVE

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the tribute to Ted Henshaw today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

DESIGNATING CERTAIN LANDS IN WEST VIRGINIA AS MONONGAHELA NATIONAL FOREST

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 5161) to designate certain lands in the Monongahela National Forest in West Virginia as wilderness, and designate management of certain lands for uses other than wilderness, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the House amendment to the Senate amendment, as follows:

Strike section 6 in its entirety and insert in lieu thereof the following:

"SEC. 6. Notwithstanding any other provision of law, effective October 1, 1983, there is hereby authorized to be appropriated up to $2,200,000 to be paid to Pocahontas and Webster Counties, West Virginia; such sum in compensation for property tax revenues and other taxes or payments foregone by the aforementioned counties as a consequence of the acquisition of the nonfederally owned coal deposits and other mineral interests and rights within the boundaries of the Cranberry Wilderness as designated by this Act."

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. SENSENBRENNER. Mr. Speaker, reserving the right to object, I take this time to ask the subcommittee chairman, the gentleman from Ohio (Mr. SEIBERLING), to explain what he is doing and whether there is any cost involved.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker. H.R. 5161 is essentially the same bill which passed the House by voice vote on June 14 of this year and is long-overdue legislation to implement the bulk of the Forest Service's RARE II proposals for the State of West Virginia. The centerpiece of H.R. 5161 is the proposed 35,600-acre Cranberry Wilderness. The Cranberry area was designated as a wilderness study area by Congress in 1975 and has been proposed for wilderness by many West Virginians for decades. In 1979, the Forest Service completed the required wilderness study and recommended wilderness for the area contained in H.R. 5161. I have personnally visited the area and can understand why the Forest Service and so many West Virginians support such a designation.

An excellent description of the wilderness proposals and other provisions of H.R. 5161 can be found in House Report 97-561, part I, and on pages 30167-30170 of the CONGRESSIONAL RECORD of December 13, 1982, so I will not elaborate further here.

In brief, the Senate amendments to the bill delete the mineral exchange provision of the House-passed measure and substitute an extension of a monetary credit to the owner of the mineral interests in the Cranberry area. Such credit would be used in connection with other Federal mineral or oil and gas leases which the owner might seek and would be transferable. It is my understanding that this approach is agreed to by the CSX Corp., which currently owns the mineral rights underlying the proposed Cranberry Wilderness. The amendments also, include provision for compensation to two counties in which the wilderness is situated, for lost property taxes and other revenues from the acquisition of the non-federally owned coal deposits.

I urge my colleagues' approval of this legislation and in closing would particularly commend the CSX Corp., the West Virginian Highlands Conservancy, Congressman CLEVE BENEDICT, and Senators BYRD, RANDOLPH, MCCLURE, and WALLOP for working together to develop this consensus solution to a difficult problem.

□ 1500

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just approved.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 1029. An act to amend section 1 of the Act of June 5, 1920, as amended, to authorize the Secretary of Commerce to settle claims for damages of less than $2,500 arising by reason of acts for which the National Oceanic and Atmospheric Administration is responsible; and

H.R. 3809. An act to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS ACT AMENDMENT OF 1981

Mr. HUGHES. Mr. Speaker, I move to suspend the rules and take from the Speaker's table the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated, and recede from disagreement to the Senate amendment and concur in th Senate amendment with an amendment which is at the desk.

The Clerk read as follows:

House amendment to the Senate amendment to H.R. 3963: In lieu of the matter inserted by the Senate amendment to the text of the bill, insert the following:

SEC. 3. Titles I through III may be cited as the "Violent Crime and Drug Enforcement Improvements Act of 1982".

TITLE I—CONTROLLED SUBSTANCES PENALTIES AND CRIMINAL FORFEITURE

PART A

SEC. 101. This part may be cited as the "Comprehensive Drug Penalty Act of 1982".

SEC. 102. (a) Section 511(a) of the Controlled Substances Act (21 U.S.C. 881(a)) is amended by adding at the end the following new paragraph:

"(7) All land buildings used, or intended for use, for holding or storage of property described in paragraph (1) or (2), if the offense involved is a felony, except that no property shall be forfeited under this pargraph, to the extent of the interest of an owner, by reason of any act or omission established by that owner to have been committed or omitted without the knowledge or consent of that owner.".

(b) Section 511(d) of the Controlled Substances Act (21 U.S.C. 881(d)) is amended—

(1) by inserting "(1)" before "The provisions of law"; and

(2) by adding at the end of the following new paragraph:

"(2) In addition to the venue provided for in section 1395 of title 28, United States Code, or any other provision of law, in the case of property of a defendant charged with a violation that is the basis for forfeiture of the property under this section, a proceeding for forfeiture under this section may be brought in the judicial district in which the defendant owning such property is found or in the judicial district in which the criminal prosecution is brought.".

(c) Subsection (e) of section 511 of the Controlled Substances Act (21 U.S.C. 881(e)) is amended by striking out "used to pay" in the sentence beginning "The proceeds from" and all that follows through the end of the subsection and inserting in lieu thereof the following: "deposited in accordance with subsection (h) of this section.".

SEC. 103. (a) Section 511 of the Controlled Substances Act (21 U.S.C. 881) is amended by adding at the end the following new subsections:

"(h)(1) There is established in the United States Treasury a fund to be known as the Drug Enforcement Fund (hereinafter in this subsection referred to as the 'fund') which shall be available to the Attorney General, with respect to this title, title III, and section 1963(c) of title 18, United States Code, without fiscal year limitation in such amounts as may be specified in appropriation Acts for—

"(A) payment of expenses of forfeiture and sale, including expenses of seizure and detention;

"(B) payment of rewards for information resulting in a conviction or forfeiture;

"(C) payment of liens against forfeited property; and

"(D) payment of amounts with respect to remission and mitigation.

"(2) Any reward paid from the fund shall be paid at the discretion of the Attorney General or his delegate, except that the authority to pay a reward of $10,000 or more shall not be delegated to any person other than the Director of the Federal Bureau of Investigation or the Administrator of the Drug Enforcement Administration. Any reward for such information shall not exceed $250,000, except that a reward paid for information resulting in a forfeiture, shall not exceed the lesser of $250,000 or one-quarter of the amount realized by the United States from the property forfeited.

"(3) There shall be deposited in the fund—

"(A) during the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture—

"(i) under this title and title III; and

"(ii) under section 1963(c) of title 18, United States Code, in any case in which the racketeering activity consists of a narcotic or other dangerous drug offense referred to in section 1961(1)(A) of such title;

that, under this title and title III and such sections of title 18, United States Code, as in effect on the day before the effective date of this section, would have been deposited in the general fund of the Treasury; and

"(B) during the period beginning on October 1, 1983, and ending on September 30, 1985, all proceeds from forfeiture under this title and title III and such sections of title 18, United States Code, as a reimbursement to the appropriation for the fund.

"(4) During the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the provisions referred to in subparagraph (A) of paragraph (3) of this subsection (other than proceeds deposited in the fund under such subparagraph) shall be treated as provided under such provisions as in effect on the day before the effective date of this section.

"(5) Amounts in the fund which are not currently needed for the purpose of this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(6) Not later than four months after the end of each fiscal year, the Attorney General shall transmit to the Congress a detailed report on receipts and disbursements with respect to the fund for such year.

"(7) There are authorized to be appropriated from the fund for fiscal year 1984 and fiscal year 1985 such sums as may be necessary for expenses of payments under paragraph (1) of this subsection, of which not more than $10,000,000 may be appropriated for each such fiscal year for unreimbursed expenses. At the end of the last fiscal year for which appropriations from the fund are authorized by this Act, the fund shall cease to exist and any amount then remaining in the fund shall be deposited in the general fund.

"(i) The filing of an indictment or information alleging a violation of this title or title III that is related to a civil forfeiture proceeding under this section shall, upon motion of the United States or a claimant in that proceeding, and for good cause shown, stay the civil forfeiture proceeding.".

SEC. 104. (a) A reference in this section to a section or other provision is a reference to a section or other provision of the Controlled Substances Act (21 U.S.C. 801 et seq.).

(b) Section 401(b)(1)(A) (21 U.S.C. 841(b)(1)(A)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $2,000,000 if such person is other than an individual".

(c) Section 401(b)(1)(B) (21 U.S.C. 841(b)(1)(B)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$15,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$30,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(d) Section 401(b)(2) (21 U.S.C. 841(b)(2)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$10,000, or both" and inserting in lieu thereof "$100,000, or both if such person is an individual, or to a fine of not more than $250,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$20,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $500,000 if such person is other than an individual".

(e) Section 401(b)(3) (21 U.S.C. 841(b)(3)) is amended—

(1) in the sentence beginning "In the case of", by striking out "$5,000, or both" and inserting in lieu thereof "$10,000, or both if such person is an individual, or to a fine of not more than $25,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$10,000, or both" and inserting in lieu thereof "$25,000, or both if such person is an individual, or to a fine of not more than $50,000 if such person is other than an individual".

(f) Section 401(b)(5) (21 U.S.C. 841(b)(5)) is amended—

(1) in the sentence beginning "Notwithstanding paragraph (1)(B)", by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $2,000,000 if such person is other than an individual".

(g) Section 401(b)(6) (21 U.S.C. 841(b)(6)) is amended—

(1) in the sentence beginning "In the case of", by striking out "and in addition, may be fined not more than $125,000" and inserting in lieu thereof "a fine of not more than

$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) in the sentence beginning "If any person", by striking out "and in addition, may be fined not more than $250,000" and inserting in lieu thereof "a fine of not more than $500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(h) Section 401(d) (21 U.S.C. 841(d)) is amended by striking out "$15,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(i) Section 402(c)(2)(A) (21 U.S.C. 842(c)(2)(A)) is amended by striking out "$25,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(j) Section 402(c)(2)(B) (21 U.S.C. 842(c)(2)(B)) is amended by striking out "$50,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual".

(k) Section 403(c) (21 U.S.C. 843(c)) is amended—

(1) by striking out "$30,000, or both" and inserting in lieu thereof "$250,000, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) by striking out "$60,000, or both" and inserting in lieu thereof "$500,00, or both if such person is an individual, or to a fine of not more than $1,000,000 if such person is other than an individual." (l) Section 408(a)(1) (21 U.S.C. 848(a)(1)) is amended—

(1) by striking out "$100,000" and inserting in lieu thereof "$500,000 if such person is an individual, or a fine of not more than $1,000,000 if such person is other than an individual"; and

(2) by striking out "$200,000" and inserting in lieu thereof "$1,000,000 if such person is an individual, or a fine of not more than $2,000,000 if such person is other than an individual".

(m) Part D is amended by adding at the end the following new sections:

"ALTERNATIVE FINE

"SEC. 413. In lieu of a fine authorized by this part, a defendant who derives profits or other proceeds directly from the offense may be fine not more than twice the gross profits or other proceeds so derived, if such amount is greater than the fine so authorized.

"GENERAL PROVISIONS RELATING TO FINES

"SEC. 414. (a) In determining whether to impose a fine under this part, and the amount, time for payment, and method of payment of a fine, the court shall—

"(1) consider the defendant's income (regardless of source), earning capacity, and financial resources, including the nature of the burden that the fine will impose on the defendant and on any person who is legally or financially dependent upon the defendant;

"(2) consider the proof received at trial or as a result of a plea of guilty or nolo contendere concerning any profits or other proceeds derived by the defendant;

"(3) consider any other pertinent equitable consideration; and

"(4) give primary consideration to the need to deprive the defendant of illegally obtained profits or other proceeds from the offense.

"(b) As a condition of a fine, the court may require that payment be made in specified installments or within a specified period of time, but such period shall not be greater than the maximum applicable term of probation or imprisonment, whichever is greater. If not otherwise required by such a condition, payment of a fine shall be due immediately.

"(c) If a fine under this part is imposed on an organization, it is the duty of each individual authorized to make disbursement of the assets of the organization to pay the fine from assets of the organization.

"(d)(1) A defendant who has been sentenced to pay a fine, and who has paid part but not all of such fine, may petition the court for extension of the time for payment, modification of the method of payment, or remission of all or part of the unpaid portion.

"(2) The court may enter an appropriate order under this subsection, if it finds that—

"(A) the circumstances that warranted imposition of the fine in the amount imposed, or payment by the time or method specified, no longer exist; or

"(B) it is otherwise unjust to require payment of the fine in the amount imposed or by the time or method specified.

"CRIMINAL FORFEITURE

"SEC. 415. (a) Any person who is convicted of a violation of this title or title III that is punishable by imprisonmment for more than one year shall forfeit to the United States—

"(1) any property constituting or derived from gross profits or other proceeds obtained as a result of such violation;

"(2) any property used, or intended to be used, to commit such violation; and

"(3) in the case of a person convicted under section 408 of this title, in addition to the property described in paragraphs (1) and (2), any interest in, claim against, or property or contractual right of any kind affording a source of control over, the continuing criminal enterprise.

"(b) In any action brought by the United States under this section, the district courts of the United States shall have jurisdiction to enter such restraining orders or prohibitions, or to take such other actions, including, but not limited to, the acceptance of satisfactory performance bonds, in connection with any property or other interest subject to forfeiture under this section, as it shall deem proper.

"(c)(1) Upon filing of an indictment or information alleging that any property is subject to forfeiture under this section, the United States may request an order for seizure of such property in the same manner as provided for a search warrant. The court shall enter an order for seizure upon determining that—

"(A) there is probable cause to believe that the property to be seized is subject to forfeiture; and

"(B) an order restraining transfer of the property is not sufficient to ensure availability of the property for a forfeiture proceeding under this section.

"(2) The court shall enter an order of forfeiture of any property referred to in subsection (a) (1), (2), or (3) if the trier of fact determines that the United States has established beyond a reasonable doubt that such property is subject to forfeiture under this section.

"(3) The United States shall, to the maximum extent practicable, identify all persons with an alleged interest in property that is the subject of an order under paragraph (2) and shall provide to such persons notice of the order and the relief available under paragraph (4).

"(4)(A) Not later than sixty days (or such longer period as the court may order for good cause shown) after the date of an order under paragraph (2), any person with an alleged interest in the property may petition the Attorney General for remission or mitigation of the forfeiture—

"(i) on the ground that when acquiring the interest for value, such person did not know or have reason to know of the violation of law on which the order of forfeiture is based or of any existing order restraining transfer of the property; or

"(ii) on other equitable grounds that justify remission or mitigation.

A petition under this paragraph shall be verified and shall set forth the nature and extent of the petitioner's interest in the property, the time and circumstances of the petitioner's acquisition of interest in the property, any additional facts and circumstances supporting remission or mitigation, and the relief sought.

"(B) In the case of a petition under subparagraph (A)(ii), not later than ninety days (or such longer period as the court may order for good cause shown) after the end of the period specified in subparagraph (A), the Attorney General shall issue a decision with respect to the petition. The property shall be disposed of pursuant to such decision, which shall not be subject to review of any kind.

"(C) In the case of a petition under subparagraph (A)(i), not later than ninety days (or such longer period as the court may order for good cause shown) after the end of the period specified in subparagraph (A), the Attorney General shall provide the relief sought or submit to the court a written recommendation for other disposition of the property. Except as provided in subparagraph (D), the court shall order disposition of the property in accordance with a recommendation made under the preceding sentence.

"(D) The court shall provide notice of the recommendation and opportunity for a hearing to any petitioner under subparagraph (A)(i). If, at such hearing, a petitioner establishes, by a preponderance of the evidence, that such petitioner's interest was acquired for value without actual or constructive knowledge of the violation of law on which the order of forfeiture is based, or of any order restraining transfer of the property, the court shall grant appropriate relief that does equity to that interest.

"(5)(A) Except as provided in subparagraph (B), the provisions of the customs laws relating to disposition of forfeited property shall apply to dispositions of property forfeited under this chapter, to the extent that such provisions are not inconsistent with this chapter.

"(B) The duties of the Secretary of the Treasury with respect to dispositions of forfeited property under the customs laws shall be performed under subparagraph (A) by the Attorney General, except to the extent that such duties arise from forfeitures effected under the customs laws.

"(d) The United States shall promptly dispose of all property forfeited under this section through commercial means or as otherwise permitted by law, making due provision

for the rights of innocent persons, but the United States shall take such action as may be required to prevent any convicted person from purchasing or otherwise acquiring property forfeited as a result of such conviction. Upon entry of an order of forfeiture under this section, the court shall authorize the Attorney General to seize forfeited property under such reasonable conditions as the court may impose. If a forfeited property right is not exercisable or transferable for value by the United States, it shall expire and shall not revert to the convicted person.

"(e)(1) In addition to any order authorized by subsection (b), the court may, before the filing of an indictment or information, enter an order restraining the transfer of property that is or may be subject to forfeiture under subsection (a) of this section.

"(2) An order shall be entered under this subsection if the court determines that—

"(A) there is a substantial probability that the United States will prevail on the issue of forfeiture;

"(B) there is a substantial probability that failure to enter the order will result in unavailability of the property for forfeiture; and

"(C) the need to assure availability of the property outweighs the hardship on any party against whom the order is to be entered.

"(3)(A) Except as provided in subparagraph (B), an order under this subsection shall be entered only after notice to persons appearing to have an interest in the property and opportunity for a hearing.

"(B) A temporary order under this subsection may be entered upon application of the United States, without notice or opportunity for a hearing, if an information or indictment has not been filed with respect to the property and the United States demonstrates that provision of notice will jeopardize the availability of the property for forfeiture. Such a temporary order shall expire not more than ten days after the date on which it is entered, except that the effective period of the order may be extended by the court for not more than ten days for good cause shown and for a longer period with the consent of all parties affected by the order.

"(f) There may be a rebuttable presumption at trial that any property of a person convicted of a felony under this title or title III is subject to forfeiture under this section if the United States establishes by a preponderance of the evidence that—

"(1) such property was acquired by such person during the period of the violation of this title or title III or within a reasonable time after such period; and

"(2) there was no likely source for such property other than the violation of this title or title III.

"(g) The findings of the trier of fact with respect to property subject to forfeiture shall be set forth in a special verdict.".

SEC. 105. (a) Section 1010(b)(1) of the Controlled Substances Import and Export Act (21 U.S.C. 960(b)(1)) is amended in the sentence beginning "In the case of" by striking out "$25,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual".

Section 1010(b)(2) of such Act (21 U.S.C. 960(b)(2)) is amended in the sentence beginning "In the case of" by striking out "$15,000, or both" and inserting in lieu thereof "$500,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual".

(c) Section 1010(b) of such Act (21 U.S.C. 960(b)) is amended by adding at the end the following new paragraph:

"(3) In the case of a violation under subsection (a) involving more than 1,000 pounds of marihuana, the person committing such violation shall be imprisoned not more than fifteen years, or fined not more than $250,000, or both if such person is an individual, or shall be fined not more than $1,000,000 if such person is other than an individual.".

(d) Section 1011(2) of such Act (21 U.S.C. 961(2)) is amended by striking out "$25,000" and inserting in lieu thereof "$50,000".

(e) Part A of such Act is amended by adding at the end the following new section:

"APPLICABILITY OF SECTION 413 AND SECTION 414

"SEC. 1017. Sections 413 and 414 shall apply with respect to fines under this part to the same extent that such sections apply with respect to fines under part D of title II. For purposes of such application, any reference in such section 413 or 414 to 'this part' shall be deemed to be a reference to part A of title III.".

SEC. 106. Section 408 of the Controlled Substances Act (21 U.S.C. 848), as amended by section 4(1) of this Act, is further amended—

(1) in subsection (a)—

(A) by striking out "SEC. 408. (a)(1)" and inserting in lieu thereof "SEC. 408. (a)";

(B) by striking out "paragraph (2)" each place it appears and inserting in lieu thereof "section 415"; and

(C) by striking out paragraph (2); and

(2) by striking out subsection (d).

SEC. 107. (a) The table of contents for part D of title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by inserting after the item relating to section 412 the following new items:

"Sec. 413. Alternative fine.

"Sec. 414. General provisions relating to fines.

"Sec. 415. Criminal forfeiture.".

(b) The table of contents for part A of title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970 is amended by inserting after the item relating to section 1016 the following new item:

"Sec. 1017. Applicability of section 413 and section 414.".

PART B

SEC. 201. Section 607 of the Tariff Act of 1930 (19 U.S.C. 1607) is amended to read as follows:

"SEC. 607. SEIZURE: VALUE $100,000 OR LESS, PROHIBITED MERCHANDISE, TRANSPORTING CONVEYANCES.

"(a) If—

"(1) the value of such seized vessel, vehicle, aircraft, merchandise, or baggage does not exceed $100,000;

"(2) such seized merchandise is merchandise the importation of which is prohibited; or

"(3) such seized vessel, vehicle, or aircraft was used to import, export, transport, or store any controlled substance;

the appropriate customs officer shall cause a notice of the seizure of such articles and the intention to forfeit and sell or otherwise dispose of the same according to law to be published for at least three successive weeks in such manner as the Secretary of the Treasury may direct. Written notice of seizure together with information on the applicable procedures shall be sent to each party who appears to have an interest in the seized article.

"(b) As used in this section, the term 'controlled substance' has the meaning given that term in section 102 of the Controlled Substances Act (21 U.S.C. 802).".

SEC. 202. Section 608 of the Tariff Act of 1930 (19 U.S.C. 1608) is amended in the second sentence by inserting after "penal sum of" the following: "$2,500 or 10 percent of the value of the claimed property, whichever is lower, but not less than".

SEC. 203. Section 609 of the Tariff Act of 1930 (19 U.S.C. 1609) is amended by striking out ", after deducting the actual expenses of seizure, publication and sale, in the Treasury of the United States." and inserting in lieu thereof "in the Customs Forfeiture Fund.".

SEC. 204. Section 610 of the Tariff Act of 1930 (19 U.S.C. 1610) is amended by striking out "If the value of any vessel, vehicle, merchandise, or baggage so seized is greater than $10,000," and inserting in lieu thereof "If any vessel, vehicle, aircraft, merchandise, or baggage is not subject to section 607 of this Act,".

SEC. 205. Section 612 of the Tariff Act of 1930 (19 U.S.C. 1612) is amended—

(1) by inserting "aircraft," after "vehicle," each place it appears;

(2) by striking out "and the value of such vessel, vehicle, merchandise, or baggage as determined under section 606 of this Act, does not exceed $10,000," in the first sentence and inserting in lieu thereof "and the article is subject to section 607 of this Act,"; and

(3) by striking out "If such value of such vessel, vehicle, merchandise, or baggage exceeds $10,000" in the second sentence and inserting in lieu thereof "If the vehicle is not subject to section 607 of this Act,".

SEC. 206. (a) The last sentence of section 613(a) of the Tariff Act of 1930 (19 U.S.C. 1613(a)) is amended—

(1) by inserting after "proceeds of sale" the following: "shall be deposited in the Customs Forfeiture Fund, except that in the case of an application of this subsection to a law other than a customs law, the proceeds of sale"; and

(2) in paragraph (3), by striking out "with the Treasurer of the United States as a customs or navigation fine" and inserting in lieu thereof the following: "in the general fund of the Treasury of the United States".

(b) Section 613(b) of the Tariff Act of 1930 (19 U.S.C. 1613(b)) is amended by striking out "(a) (1) and (2) of this section" and inserting in lieu thereof "(a)(3) of section 613A of this Act".

SEC. 207. Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581 et seq.) is amended by adding after section 613 the following new section:

"SEC. 613A. CUSTOMS FORFEITURE FUND.

"(a) There is established in the Treasury of the United States a fund to be known as the Customs Forfeiture Fund (hereinafter in this section referred to as the 'fund') which shall be available to the United States Customs Service without fiscal year limitation in such amounts as may be specified in appropriation Acts for—

"(1) payment of expenses of forfeiture and sale, including expenses of seizure and detention;

"(2) payment of awards of compensation to informers under section 619 of this Act;

"(3) payment for satisfaction of—

"(A) liens for freight, charges, and contributions in general average, notice of which has been filed with the appropriate customs officer according to law; and

"(B) other liens against forfeited property; and

"(4) payment of amounts authorized by law with respect to remission and mitigation.

"(b) Payment under paragraphs (3) and (4) of subsection (a) of this section shall not exceed the net proceeds of the sale or, if the property is retained or transferred for official use, the appraised value less all applicable expenses.

"(c)(1) There shall be deposited in the fund—

"(A) during the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the customs laws that, under such laws as in effect on the day before the effective date of this section would have been deposited in the general fund of the Treasury; and

"(B) during the period beginning on October 1, 1983, and ending on September 30, 1985, all proceeds from forfeiture under such laws as a reimbursement to the appropriation for the fund.

"(2) During the period beginning on the effective date of this section and ending on September 30, 1983, proceeds from forfeiture under the customs laws (other than proceeds deposited in the fund under paragraph (1)(A) of this subsection) shall be treated as provided under such laws as in effect on the day before the effective date of this section.

"(d) Amounts in the fund which are not currently needed for the purposes of this section shall be kept on deposit or invested in obligations of, or guaranteed by, the United States.

"(e) Not later than four months after the end of each fiscal year, the Commissioner of Customs shall transmit to the Congress a report on receipts and disbursements with respect to the fund for such year.

"(f) There are authorized to be appropriated from the fund for fiscal year 1984 and fiscal year 1985 such sums as may be necessary for expenses of payments under subsection (a) of this section, of which not more than $10,000,000 may be appropriated for each such fiscal year for unreimbursed expenses. At the end of the last fiscal year for which appropriations from the fund are authorized by this Act, the fund shall cease to exist and any amount then remaining in the fund shall be deposited in the general fund of the Treasury of the United States.".

SEC. 208. Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581) is further amended by adding after section 615 the following new section:

"SEC. 616. TRANSFER OF FORFEITED PROPERTY.

"(a) The Secretary of the Treasury may order the discontinuance of forfeiture proceedings under this Act in favor of forfeiture under State law. After the filing of a complaint for forfeiture under this Act, the Attorney General may seek dismissal of the complaint in favor of forfeiture under State law.

"(b) If forfeiture proceedings are discontinued or dismissed under this section—

"(1) the United States may transfer the seized property to the appropriate State or local official; and

"(2) notice of the discontinuance or dismissal shall be provided to all known interested parties.

"(c) The United States shall not be liable in any action arising out of seizure, detention, or transfer of property transferred under this section.".

SEC. 209. Section 619 of the Tariff Act of 1930 (19 U.S.C. 1619) is amended by striking out "$50,000" each place it appears and inserting in lieu thereof "$250,000".

SEC. 210. (a) Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581 et seq.) is further amended by adding after section 588 the following new section:

"SEC. 589. ENFORCEMENT AUTHORITY OF CUSTOMS OFFICERS.

"Subject to the direction of the Secretary of the Treasury, an officer of the customs may—

"(1) carry a firearm;

"(2) execute and serve any order, warrant, subpena, summons, or other process issued under the authority of the United States;

"(3) make an arrest without a warrant for any offense against the United States committed in the officer's presence or for a felony, cognizable under the laws of the United States committed outside the officer's presence if the officer has reasonable grounds to believe that the person to be arrested has committed or is committing a felony; and

"(4) perform any other law enforcement duty that the Secretary of the Treasury may designate.".

(b)(1) Section 7607 of the Internal Revenue Code of 1954 (26 U.S.C. 7607) is repealed.

(2) The table of sections for subchapter A of chapter 78 of the Internal Revenue Code of 1954 is amended by striking out the item relating to section 7607.

SEC. 211. Sections 602, 605, 606, 608, 609, 611, 613, 614, 615, 618, and 619 (19 U.S.C. 1602, 1605, 1606, 1608, 1609, 1611, 1613, 1614, 1615, 1618, and 1619) of the Tariff Act of 1930 are each amended—

(1) by inserting "aircraft," after "vehicle," each place it appears; and

(2) by inserting "aircraft" after "vehicles," each place it appears.

PART C

SEC. 301. This title and the amendments made by this title shall take effect on March 1, 1983.

TITLE II—AMENDMENTS TO OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968

PART A

SHORT TITLE

SEC. 201. This part may be cited as the "Justice Assistance Act of 1982".

DECLARATION OF PURPOSE

SEC. 202. The declaration and purpose contained in title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701) is amended to read as follows:

"DECLARATION AND PURPOSE

"The Congress finds and declares that the high incidence of crime in the United States is detrimental to the general welfare of the Nation and its citizens, and that criminal justice efforts must be better coordinated and intensified, and made more effective and equitable at all levels.

"Congress further finds that there is an urgent need to encourage basic and applied research, to gather and disseminate accurate and comprehensive justice statistics, and to evaluate methods of preventing and reducing crime.

"Congress further finds that although crime is essentially a local problem that must be dealt with by State and local government, the financial and technical resources of the Federal Government should be made available to assist in the development of innovative and effective National, State, and local efforts.

"Congress further finds that the future welfare of the Nation and the well-being of its citizens depend on the establishment and maintenance of viable and effective justice systems which require systematic and sustained action by Federal, State, and local governments; and continuing efforts at all levels to streamline programs and upgrade the functioning of agencies responsible for planning, implementing, and evaluating efforts to improve justice systems.

"It is, therefore, the declared policy of the Congress to aid in strengthening and improving justice systems by providing assistance with maximum certainty and effectiveness and minimum delay and waste. It is the purpose of this title to authorize funds and technical assistance (1) to be used to strengthen justice systems; (2) to develop and fund new methods and programs to enhance the effectiveness of justice systems; (3) to support the development of National, State, and local priorities and programs to meet the problems confronting justice systems; (4) to reduce court congestion and trail delay; (5) to support community and neighorhood anti-crime efforts; (6) to improve and modernize correctional systems and encourage rehabilitation; (7) to encourage the undertaking of promising, innovative projects and programs to combat crime; (80 to encourage research directed toward the improvement of justice systems and new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; (9) to encourage the collection and analysis of statistical information concerning justice systems and the development and operation of justice information systems; (10) to develop and implement programs assisting victims, jurors, and witnesses; and (11) to support law enforcement-related personnel development and training efforts.

"It is further the policy of the Congress that the Federal assistance made available under this title not be utilized to reduce the amount of State and local financial support for justice activities below the level of such support prior to the availability of such assistance.".

OFFICE OF JUSTICE ASSISTANCE

SEC. 203. (a) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended in the heading to such part by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(b) Section 101 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711) is amended to read as follows:

"ESTABLISHMENT OF OFFICE OF JUSTICE ASSISTANCE

"SEC. 101. (a) There is established within the Department of Justice under the general authority of the Attorney General and Office of the Justice Assistance (hereinafter referred to in this part as the 'Office').

"(b) The Office shall be headed by a Director who shall be appointed by the Attorney General. The Director may appoint Deputy Directors to assist in the direction of the Office. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Office. The Director shall have primary authority over administrative function as may be necessary to carry out the provisions of

this title. The Director shall not engage in any employment other than that of serving as Director, nor shall the Director hold any office in, or in any capacity for, any organization, agency, or institution with which the Office makes any contract or other arrangement under this title.".

(c) Section 102 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3712) is amended—

(1) by striking out "Administrator" each place it appears and inserting in lieu thereof "Director",

(2) in paragraph (1) by striking out "and units of local government",

(3) by amending paragraph (2) to read as follows:

"(2) establish priorities for programs in accordance with part E, inform States, units of local government, and private nonprofit organizations of such priorities, and award and allocate funds and technical assistance in accordance with the criteria of part E and on terms and conditions determined by the Director to be consistent with part E;".

(4) in paragraph (4) by striking out "Administration" and inserting in lieu thereof "Office", and

(5) in the heading for such section by striking out "administrator" and inserting in lieu thereof "director".

(d) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended by striking out section 103.

NATIONAL INSTITUTE OF JUSTICE

SEC. 204. (a) Section 202 of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3722) is amended—

(1) by striking subsection (b) and inserting in lieu thereof the following:

"(b)(1) The Institute shall be headed by a Director who shall be appointed by the Attorney General. The Director shall have had experience in justice research.

"(2) The Director may appoint Deputy Directors to assist in the direction of the Institute. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Institute. The Director shall have primary authority over administrative functions as may be necessary to carry out the provisions of this title. The Director shall not engage in any employment other than that of serving as Director; nor shall the Director hold any office in, or act in any capacity for any organization, agency, or institution with which the Institute makes any contract or other arrangement under this title.",

(2) in subsection (c)—

(A) in paragraph (2)(A) by striking out ", including programs authorized by section 103 of this title", and

(B) in paragraph (10)—

(i) by striking out "national priority grants under part E and", and

(ii) by striking out "part F" and inserting in lieu thereof "part E", and

(C) by striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and", and

(D) by adding at the end of such subsection the following new paragraph:

"(12) provide financial assistance to encourage replication, coordination, and sharing among State and local justice agencies and public and private nonprofit organizations regarding successful programs or projects and useful information resulting from multiyear and short-term research and development activities authorized under this part.", and

(3) in subsection (d)(5) by striking out "part H" and inserting in lieu thereof "part G".

(b) Part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3724) is amended by striking out section 204.

BUREAU OF JUSTICE STATISTICS

SEC. 205. (a) Section 302 of Part C of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3732) is amended—

(1) in subsection (a) by inserting before "Bureau" the word "the", and

(2) by striking subsection (b) and inserting in lieu thereof the following:

"(b) The Bureau shall be headed by a Director who shall be appointed by the Attorney General. The Director shall be experienced in statistical programs. The Director may appoint Deputy Directors to assist in the direction of the Bureau. The Director shall have primary authority over all grants, cooperative agreements, and contracts awarded by the Bureau. The Director shall have primary authority over administrative functions as may be necessary to carry out the provisions of this title. The Director shall not engage in any employment other than that of serving as Director; nor shall the Director hold any office in, or in any capacity for, any organization, agency, or institution with which the Bureau makes any contract or other arrangement under this title.".

(b) Part C of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3731-3735) is amended—

(1) by striking out section 304, and

(2) by redesignating section 305 as section 304.

FORMULA GRANTS

SEC. 206. (a) Section 401 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741) is amended—

(1) in subsection (a)—

(A) by striking out "innovative programs" and all that follows through "success, or" and insert in lieu thereof "programs",

(B) by striking out "and units of local government" the second place it appears,

(C) by striking out "Administration" and inserting in lieu thereof "Office",

(D) by inserting "funding programs and projects that" after "purpose of",

(E) by amending paragraphs (1) through (23) to read as follows:

"(1) identify and process within justice systems persons with a history of serious criminal conduct;

"(2) provide programs that address the problems of serious and violent offenses committed by juveniles;

"(3) combat arson;

"(4) disrupt illicit commerce in stolen goods and property;

"(5) effectively investigate and bring to trial white-collar crime, organized crime, public corruption crimes and fraud against the Government;

"(6) provide community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime;

"(7) provide programs to speed the trial of criminal cases, reform sentencing practices and procedures, improve the efficiency of the jury system, and improve the processing of cases involving the mentally incompetent and pleas of mental incapacity;

"(8) provide training, management, and technical assistance to justice personnel;

"(9) provide assistance for the development and operation of justice information systems, including management information systems;

"(10) coordinate the activities of components of the criminal justice system;

"(11) develop and implement programs which provide assistance (other than compensation) to jurors, witnesses, and victims of crime;

"(12) provide programs which address offenses committed against the elderly;

"(13) provide programs which identify and meet the needs of drug-dependent offenders;

"(14) provide alternatives to pretrial detention, jail, and prison for persons who pose no danger to the community;

"(15) provide programs which alleviate prison and jail overcrowding;

"(16) provide programs that address critical problems of crime, such as drug trafficking, and have been certified by the Director of the Office, after consultation with the Director of the Institute, as having proven successful, based on available objective, empirical or statistical data, information, or evaluation; and

"(17) provide programs that are innovative and that are likely to prove successful after testing, demonstration, evaluation, and refinement.",

(2) in subsection (b)—

(A) by amending paragraph (1) to read as follows:

"(1) For any fiscal year ending after September 30, 1982, the federal portion of any grant made under this part shall be 50 per centum of the cost of programs and projects specified in the application for such grant, except that—

"(A) in the case of funds distributed for a program or project described in subsection (a)(17), the federal portion shall be 75 per centum of such cost; and

"(B) in the case of funds distributed to an Indian tribe which performs law enforcement functions (as determined by the Secretary of the Interior) for any program or project described in subsection (a), the Federal portion shall be 100 per centum of such cost.",

(B) in paragraph (2)—

(i) by striking out "(2)(A)" and inserting in lieu thereof "(2)", and

(ii) by striking out subparagraph (B),

(3) by striking out subsection (c), and

(4) by amending subsection (b)(3) to read as follows:

"(C) A grant recipient shall assume the cost of a current program or project funded under this part after a four-year period (including any period occurring before the effective date of this subsection) of Federal asistance.".

(b) Section 402 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3742) is amended to read as follows:

"ELIGIBILITY

"SEC. 402. The Office is authorized to make financial assistance under this part available to a State to enable it to carry out all or a substantial part of a program or project submitted and approved in accordance with the provisions of this part.".

(c) Section 403 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3743) is amended—

(1) in subsection (a)—

(A) by striking out "Administration" each place is appears and inserting in lieu thereof "Office",

(B) by striking out "three-year" and inserting in lieu thereof "two-year",

(C) in the first sentence by inserting ", designates which objective specified in section 401(a) each such program is intended to achieve, and identifies the State agency or unit of local government which will implement each such program" before the period,

(D) in paragraph (3) by striking out ", and to the council where the applicant is a State agency, the judicial coordinating committees, a nongovernmental grantee, or a unit or combination of units of local government",

(E) in paragraph (6)—

(i) by striking out "a provision for" and inserting in lieu thereof "an assurance that", and

(F) in paragraph (7)—

(ii) by inserting "will be provided" after "prescribe",

(i) by striking out "a provision for the maintenance of" and inserting in lieu thereof "an assurance that the State will maintain", and

(ii) by striking out "for the submission of" and inserting in lieu thereof "submit", (G) in paragraph (8)—

(i) by striking out "officer" the first place it appears, and

(ii) by striking out "and" at the end thereof,

(H) in paragraph (9) by striking out the period and inserting in lieu thereof a semicolon,

(I) by striking out paragraphs (1), (2), and (5),

(J) by redesignating paragraphs (3), (4), (6), (7), (8), and (9) as paragraphs (1), (2), (3), (4), (5), and (6), respectively, and

(K) by adding at the end thereof the following new paragraphs:

"(7) an assurance that not more than 10 per centum of the aggregate amount of funds received by a State under this part for a fiscal year will be distributed for programs and projects designated as intended to achieve the objective specified in section 401(a)(17); and

"(8) an assurance that not more than 5 per centum of the Federal assistance expended by any unit of government under this part for a fiscal year will be spent for purposes of section 401(a)(10)."; and

(2) by amending subsection (b) to read as follows:

"(b) The chief executive officer of a State shall submit the application described in subsection (a), and any amendment to such application, to the State legislature while in session, or to a body designated to act in behalf of the State legislature if the State legislature is not then in session, for review. For purposes of section 404, such application or amendment shall be deemed to be reviewed if the State legislature or such body does not review such application or amendment within the ninety-day period beginning on the day it is so submitted.".

(d) Section 404 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3744) is amended—

(1) in subsection (a)—

(A) in paragraph (2) by striking out "and" at the end thereof,

(B) in paragraph (3) by striking out the period and inserting in lieu thereof "; and",

(C) by inserting after paragraph (3) the following new paragraph:

"(4) prior to the approval of the application or amendment thereof the Office has made an affirmative finding in writing that the program or project has been reviewed in accordance with section 403(b).", and

(D) by inserting before the period at the end thereof "or the application or amendment has not been reviewed in accordance with section 403(b)",

(2) in subsection (b) by striking out "section 802(b)" each place it appears and inserting in lieu thereof "section 701(b)",

(3) in subsection (c)—

(A) by amending paragraph (1) to read as follows:

"(1) the purchase of equipment or hardware, or the payment of personnel costs, unless the cost of such purchases and payments is incurred as an incidental and necessary part of a program under section 401(a);", and

(B) in paragraph (4) by striking out "Law Enforcement Assistance Administration," and inserting in lieu thereof "Office of Justice Assistance,",

(4) in subsection (d)—

(A) by striking out "Administrator" and inserting in lieu thereof "Director", and

(B) by striking out "section 803" and inserting in lieu thereof "section 702", and

(5) by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(e) Section 405 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3745) is amended to read as follows:

"ALLOCATION AND DISTRIBUTION OF FUNDS

"SEC. 405. (a) Of the total amount appropriated for this part and part E in any fiscal year, 80 per centum shall be set aside for this part and allocated to States as follows:

"(1) One-fourth of 1 per centum of the amount set aside for this part, but not to exceed $250,000, shall be allocated to each of the participating States.

"(2) Of any funds remaining after the allocation under paragraph (1) is made, there shall be allocated to each State an amount which bears the same ratio to the amount of remaining funds described in this subparagraph as the population of such State bears to the population of all the States.

"(b)(1) Each State which receives funds under subsection (a) in a fiscal year shall distribute among units of local government, or combinations of units of local government, in such State for the purposes specified in section 401(a) that portion of such funds which bears the same ratio to the aggregate amount of such funds as the amount of funds expended by all units of local government for law enforcement in the preceding fiscal year bears to the aggregate amount of funds expended by the State and all units of local government in such State for law enforcement in such preceding fiscal year.

"(2) Any funds not distributed to units of local government under paragraph (1) shall be available for expenditure by the State involved.

"(3) For purposes of determining the distribution of funds under paragraph (1), the most accurate and complete data available for the fiscal year involved shall be used. If data for such fiscal year are not available, then the most accurate and complete data available for the most recent fiscal year preceding such fiscal year shall be used.

"(c) No funds allocated to a State under subsection (a) or received by a State for distribution under subsection (b) may be distributed by the Director or by the State involved for any program other than a program contained in an approved application.

"(d) If the Office determines, on the basis of information available to it during any fiscal year, that a portion of the funds allocated to a State for that fiscal year will not be required or that a State will be unable to qualify or receive funds under this part, then such portion shall be reallocated to the other participating States.".

(f) Part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741-3745) is amended by adding at the end thereof the following new section:

"STATE OFFICE

"SEC. 406. (a) Each participating State shall establish or designate by statute a State office for purposes of—

"(1) preparing an application to obtain funds under this part; and

"(2) administering funds received from the Office of Justice Assistance and its predecessor agency, including receipt, review, processing, monitoring, progress and financial report review, technical assistance, grant adjustments, accounting, auditing, and fund disbursements.

"(b) An office or agency performing other functions within the executive branch of a State may be designated to carry out the functions specified in subsection (a).".

NATIONAL PRIORITY GRANTS

SEC. 207. Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701 et seq.) is amended by striking out part E.

DISCRETIONARY GRANTS

SEC. 208. (a) Sections 601 and 602 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3762) are amended to read as follows:

"PURPOSE

"SEC. 501. The purpose of this part is to provide additional Federal financial assistance to States, units of local government, combinations of such units, and private nonprofit organizations for purposes of—

"(1) undertaking educational and traning programs for criminal justice personnel;

"(2) providing technical assistance to States and local units of governments;

"(3) undertaking projects which are national or multi-State in scope, which address the purposes specified in section 401, and which have not received sufficient funds under part D; and

"(4) providing financial assistance for demonstration programs which, in view of previous research or experience, are likely to be a success in more than one jurisdiction and are not likely to be funded with moneys from other sources.

"PERCENTAGE OF APPROPRIATION FOR DISCRETIONARY GRANT PROGRAM

"Sec. 502. Of the total amount appropriated for part D and this part in any fiscal year—

"(1) 10 per centum shall be reserved and set aside for this part in a special discretionary fund for use by the Office in making grants to carry out the purposes specified in paragraphs (1), (2), and (3) of section 501; and

"(2) 10 per centum shall be reserved and set aside for this part in a special discretionary fund for use by the Office in making grants to carry out the purpose specified in paragraph (4) of section 501.

The Director shall ensure that recipients of grants to carry out the purposes specified in paragraphs (1), (2), and (3) of section 501 include private nonprofit organizations. Grants under this part may be made for amounts up to 100 per centum of the costs of the programs or projects contained in the approved application. The National Insti-

tute of Justice shall review the types of programs described in section 501 of part E of this title for the purpose of identifying programs of proven success, and the Director of the National Institute of Justice shall consult with the Director of the * * *

(d) Section 605 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3765) is amended—

(1) by striking out "Administration" each place it appears and inserting in lieu thereof "Office",

(2) by striking out "Section 603" and inserting in lieu thereof "Section 503",

(3) by striking out the third sentence, and

(4) by striking out "type of section 402 eligible jurisdiction" and inserting in lieu thereof "State".

(e) Section 606 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3766) is amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(f) The heading for part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3766) is amended by striking out "Part F" and inserting in lieu thereof "Part E".

(g) Part E of title I, as so redesignated, is amended by redesignating sections 603, 604, 605, and 606 as sections 503, 504, 505, and 506, respectively.

TRAINING AND MANPOWER DEVELOPMENT

SEC. 209. (a) Part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-3775) is amended—

(1) by striking out sections 701, 702, and 703,

(2) in section 705 by striking out "Administration" each place it appears and inserting in lieu thereof "Office", and

(3) by redesignating sections 704 and 705 as sections 601 and 602, respectively.

(b) The heading for part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3771-3775) is amended by striking out "Part G" and inserting in lieu thereof "Part F".

ADMINISTRATIVE PROVISIONS

SEC. 210. (a) Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781 et seq.) is amended by striking out section 801 and inserting in lieu thereof the following:

ASSISTANT ATTORNEY GENERAL

"SEC. 801. (a) There is hereby authorized to be appointed within the Department of Justice an Assistant Attorney General for Justice Assistance who shall be appointed by the President by and with the advice and consent of the Senate.

"(b) The Assistant Attorney General for Justice Assistance shall have final authority over the activities of the Office of Justice Assistance, the National Institute of Justice, and the Bureau of Justice Statistics.".

(b) Section 802 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3782) is amended—

(1) in subsection (a) by striking out "The Office of Justice Assistance, Research, and Statistics, the Law Enforcement Assistance Administration," and inserting in lieu thereof, "The Office of Justice Assistance, the Office of Juvenile Justice and Delinquency Prevention,", and

(2) in subsection (b)—

(A) by striking out "Law Enforcement Assistance Administration" and "law Enforcement Assistance Administration" each place they appear and inserting in lieu thereof "Office of Justice Assistance",

(B) by inserting "the Office of Juvenile Justice and Delinquency Prevention," after "Bureau of Justice Statistics,",

(C) by striking out "parts D, E, and F" and inserting in lieu thereof "parts D and E",

(D) by striking out the second sentence,

(E) by amending the third sentence to read as follows: "In conducting evaluations described in this subsection, the Office of Justice Assistance, with the assistance and expertise of the National Institute of Justice, shall, when practical, compare the effectiveness programs conducted by similar applicants and different applicants.", and

(F) by striking out "administration" and inserting in lieu thereof "Office".

(c) Section 803 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3783) is amended—

(1) by striking out "Law Enforcement Assistance Administration" each place it appears and inserting in lieu thereof "Office of Justice Assistance",

(2) by inserting "the Office of Juvenile Justice and Delinquency Prevention," after "Bureau of Justice Statistics," each place it appears, and

(3) in subsection (c) by striking out "Administration," and inserting in lieu thereof "Office,".

(d) Section 804 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3784) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(e) Section 805 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3785) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistic, the Law Enforcement Assistance Administration," each place it appears and inserting in lieu thereof "Office of Justice Assistance,",

(2) by inserting "the Office of Juvenile Justice and Delinquency Prevention," before "or the National Institute of Justice" each place it appears,

(3) in subsection (a) by striking out "section 803, 804, or 815(c)(2)(G)" and inserting in lieu thereof "section 702, 703, or 712(c)(2)(G)", and

(4) in subsection (b) by inserting "the Office of Juvenile Justice and Delinquency Prevention" before "or the Bureau of Justice Statistics".

(f) Sections 806 and 807 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3786-3787) are each amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics,", and

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(g) Sections 810 and 811 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3788-3789) are amended—

(1) by striking out "Office of Justice Assistance, Research and Statistics," each place it appears,

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(h) Section 812 of Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789a) is amended by striking out "Director of the Office of Justice Assistance, Research, and Statistics, the Administrator of the Law Enforcement Assistance Administration," and inserting in lieu thereof "Director of the Office of Justice Assistance, the Administrator of the Office of Juvenile Justice and Delinquency Prevention,".

(i) Section 813 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789b) is amended in subsections (a) and (b)—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(j) Section 814 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3798c) is amended—

(1) in subsections (a) and (b)—

(A) by striking out "Office of Justice Assistance, Research, and Statistics," and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(B) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(2) in subsection (c) by striking out "Administration" and inserting in lieu thereof "Office".

(k) Section 815 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3739d) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance", and

(2) in subsection (b) by striking out "or the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, or the Office of Justice Assistance".

(l) Section 816 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e) is amended to read as follows:

"REPORT TO PRESIDENT AND CONGRESS

"SEC. 816. Not later than April 1 of each year, the Director of the Office of Justice Assistance, the Director of the National Institute of Justice, and the Director of the Bureau of Justice Statistics shall each submit a report to the President and to the Congress on their activities under this title during the preceding fiscal year.".

(m) Section 817 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789f) is amended—

(1) by striking out "Office of Justice, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance",

(2) in subsection (d) by striking out "section 815(c)" each place it appears and inserting in lieu thereof "section 712(c)", and

(1) by striking out "Office of Justice Assistance, Research, and Statistics," and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(p) Section 820(a) of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789i(a)) is amended by striking out "Administration" and inserting in lieu thereof "Office".

(q) Section 823 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789l) is amended by striking out "Administration" and inserting in lieu thereof "Office".

(r) Section 826 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789o) is amended—

(1) by striking out "council" each place it appears,

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(3) by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(s) The heading for part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781–3789o) is amended by striking out "Part H" and inserting in lieu thereof "Part G".

(t) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by redesignating sections 801, 802, 803, 804, 805, 806, 807, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, and 827 as sections 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, and 725 respectively.

(u) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781–3789c) is amended by striking out sections 808 and 809.

(v) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781–3789c) is amended by adding at the end thereof the following new sections:

"REPAYMENT

"SEC. 726. (a) If Federal financial assistance provided under this part is used by the recipient of such assistance for any purpose other than the purpose for which it is provided, then such recipient shall promptly repay to the United States an amount equal to the value of such assistance.

"(b) The Director shall bring a civil action in an appropriate United States district court to recover any amount required to be repaid under subsection (a).

"ESTABLISHMENT OF JUSTICE ASSISTANCE BOARD

"SEC. 727. (a) There is established a Justice Assistance Board (hereafter referred to as the 'Board'). The Board shall consist of—

"(1) fifteen voting members who shall be appointed by the President; and

"(2) the Director of the Office of Justice Assistance, the Director of the National Institute of Justice, the Director of the Bureau of Justice Statistics, and the Administrator of the Office of Juvenile Justice and Delinquency Prevention, who shall be nonvoting, ex officio members; and

"(3) two nonvoting, coordinating members from the National Advisory Committee for Juvenile Justice and Delinquency Prevention.

"(b) Members shall represent the public interest and shall be knowledgeable and experienced in the justice systems; such as law enforcement personnel, prosecutors, public and defense attorneys, judges, court administrators, probation and correctional personnel, researchers and scholars, representatives of public and private nonprofit and voluntary organizations, including those which offer programs of assistance to victims of crime, representatives of neighborhood and community-based groups and representatives of local and State governments. Five members shall be experienced in the types of programs and services provided by the Office of Justice Assistance; five members shall be experienced in the types of programs and services provided by the National Institute of Justice; and five members shall be experienced in the types of programs and services provided by the Bureau of Justice Statistics.

"(c)(1) Voting members of the Board shall be appointed for 3-year terms, except that in order to provide for continuity in its operations and to establish staggered groups of vacancies, five members of the initial Board shall be appointed for 4-year terms, five members of the initial Board shall be appointed for 3-year terms, and five members of the initial Board shall be appointed for 2-year terms.

"(2) The initial appointment of members shall be made not later than ninety days after the effective date of the Justice Assistance Act of 1982. Vacancies among Board members shall be filled within ninety days of the vacancy. Any member appointed to fill a vacancy occurring before the scheduled expiration of a term shall be appointed for the remainder of such term. Members shall be eligible for reappointment, but shall serve consecutively no more than two terms or six years, whichever is less. Members once appointed, may not be removed prior to the expiration of their term except for cause.

"(d) The Board shall elect from among its voting members a Chair and Vice Chair. The Board shall select from among its voting members two representatives to serve as nonvoting coordinating members on the National Advisory Committee of Juvenile Justice and Delinquency Prevention.

"(e) The Board shall meet at the call of the Chair, but not less frequently than quarterly. Notice of all Board meetings shall be published. Eight voting members of the Board shall constitute a quorum.

"(f) The Board shall—

"(1) recommend to the Assistant Attorney General for Justice Assistance and the Directors funding priorities and selection criteria to be used in determining the award and allocation of funds through the Office of Justice Assistance, the National Institute of Justice, and the Bureau of Justice Statistics;

"(2) recommend to the Assistant Attorney General for Justice Assistance and the Directors such policies and program priorities as it deems advisable;

"(3) review and evaluate the activities of the Office of Justice Assistance, the National Insititute of Justice, and the Bureau of Justice Statistics and make such recommendations to the Assistant Attorney General for Justice Assistance and the Directors as it considers necessary or appropriate;

"(4) in the event of a vacancy, recommend to the President at least three candidates for the position of Assistant Attorney General for Justice Assistance;

"(5) review and evaluate Federal policies and priorities in justice assistance, research, and statistics; and

"(6) coordinate its activites with the National Advisory Committee for Juvenile Justice and Delinquency Prevention and the Coordinating Council on Juvenile Justice and Delinquency Prevention.

"(g) Beginning January 1, 1983, the Board shall submit an annual report to the President and to the Congress not later than April 1 of each year and may submit such interim report as it considers advisable to the President and to the Congress. Each annual report shall describe the activities of the board during the preceding fiscal year and shall contain such findings and recomendations as the Board considers necessary or appropriate.

"(h) The head of each Federal agency shall make available to the Board such information and other assistance as it may require to carry out its responsibilities. The Board shall not have any authority to procure any temporary or intermittent services of any personnel under provision of law.

"(i)(1) Members of the Board shall, while engaged in the actual performance of the duties vested in the Board, be entitled to receive compensation at a rate not to exceed the daily rate specified for grade GS-18 of the General Schedule in section 5332 of title 5, United States Code, including traveltime.

"(2) Members of the Board shall be entitled to reimbursement for travel expenses, including per diem in lieu of subsistence, while serving away from their place of residence or regular place of business, in the same manner as the expenses are authorized by section 5703 of title 5, United States Code, for persons in the Federal Government service employed intermittently.".

DEFINITIONS

SEC. 211. (a) Section 901 of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "administration" each place it appears and inserting in lieu thereof "Office".

(b) Section 901(a)(4) of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791(a)(4)) is amended—

(1) by inserting "renovation, repairs, remodeling," after "acquisition,", and

(2) by striking out but does not include renovation, repairs, or remodeling".

(c) The heading for part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "Part I" and inserting in lieu thereof "Part H".

(d) Part H, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by redesignating section 901 as section 801.

FUNDING

SEC. 212. (a) Section 1001 of part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1001. (a) There is authorized to be appropriated to carry out the functions of the Office of Justice Assistance $170,000,000 for each of the fiscal years 1983 and 1984.

"(b) There is authorized to be appropriated to carry out the functions of the National Institute of Justice $25,000,000 for each of the fiscal years 1983 and 1984.

"(c) There is authorized to be appropriated to carry out the functions of the Bureau of Justice Statistics $25,000,000 for each of the fiscal years 1983 and 1984.

"(d) There are authorized to be appropriated for each of the fiscal years 1983 and 1984 such sums as may be necessary to carry out the purposes of part K of this title.".

(b) Part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out sections 1002 and 1003 and inserting in lieu thereof the following new section:

"PROHIBITION ON USE OF FUNDS

"SEC. 1002. Notwithstanding any other provision of law, no funds appropriated under this section for parts D and E of this title may be expended for programs or projects involving the resolution of civil disputes or may be transferred or reprogramed for carrying out any activity which is not authorized under such parts.".

(c) The heading for part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out "Part J" and inserting in lieu thereof "Part I".

(d) Part I, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by redesignating sections 1001 and 1002 as sections 901 and 902, respectively.

CRIMINAL PENALTIES

SEC. 213. (a) Section 1101 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(b) Section 1103 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(c) The heading for part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "Part K" and inserting in lieu thereof "Part H".

(d) Part H, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by redesignating sections 1101, 1102, and 1103 as sections 1001, 1002, and 1003, respectively.

PUBLIC SAFETY OFFICERS' DEATH BENEFITS

SEC. 214. (a) Sections 1201 and 1204 of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) are amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(b) The heading for part L of title of the Omnibus Crime Control and Safe Streets Act (42 U.S.C. 3797-3797c) is amended by striking out "Part L" and inserting in lieu thereof "Part K".

(c) Part K, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act (42 U.S.C. 3797-3797c) is amended by redesignating sections 1201, 1202, 1203, and 1204 as sections 1101, 1102, 1103, and 1104, respectively.

TRANSITION

SEC. 215. (a) Section 1301 of part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799(a)) is amended—

(1) by adding "(1)" after "(a)",

(2) by adding at the end of subsection (a) the following new paragraph:

"(2) All orders, determinations, rules, regulations, and instructions issued under this title which are in effect on the date of the enactment of the Justice Assistance Act of 1982 shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Attorney General, the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, the Administrator of the Office of Juvenile Justice and Delinquency Prevention, or the Director of the Office of Justice Assistance with respect to their functions under this title or by operation of law.".

(3) by striking out subsection (j), and

(4) by redesignating subsection (k) as subsection (j).

(b) The heading for part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by striking out "Part M" and inserting in lieu thereof "Part L".

(c) Part L, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by redesignating section 1301 as section 1201.

TABLE OF CONTENTS

SEC. 216. The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-3799) is amended—

(1) by amending the item relating to part A to read as follows:

"PART A—OFFICE OF JUSTICE ASSISTANCE"

(2) by striking out the item relating to section 103,

(3) by adding at the end of the items relating to part D the following new item:

"Sec. 406. State office.".

and

(4) by amending the items relating to parts E, F, G, H, I, J, L, and M, to read as follows:

REFERENCES IN OTHER LAWS

SEC. 217. (a) Any reference to the Law Enforcement Assistance Administration, or to the Administrator of the Law Enforcement Assistance Administration, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment of this Act are carried out by the Office of Justice Assistance shall be deemed to be a reference to the Office of Justice Assistance, or to the Director of the office of Justice Assistance, as the case may be.

(b) Any reference to the Office of Justice Assistance, Research, and Statistics, or to the Director of the Office of Justice Assistance, Research, and Statistics, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment

of this Act are carried out by the Office of Justice of Assistance, Bureau of Justice Statistics, the National Institute of Justice, or the Office of Juvenile Justice Delinquency Prevention shall be deemed to be a reference to the Office of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, or Office of Juvenile Justice Delinquency Prevention, Director of the Office of Justice Assistance or to the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, or the Administrator of the Office of Juvenile Justice and Delinquency Prevention, as the case may be.

TECHNICAL AMENDMENTS TO OTHER LAWS

SEC. 218. (a) Section 5314 of title 5, United States Code is amended by striking out "Director, Office of Justice Assistance, Research, and Statistics.".

(b) Section 5315 of title 5, United States Code, is amended—

(1) by striking out "Administrator of Law Enforcement Assistance.", and

(2) by adding at the end thereof the following new item:

"Director, Office of Justice Assistance.".

(c) Section 1761(c) of title 18, United States Code, is amended by striking out "Administrator of the Law Enforcement Assistance Administration" and inserting in lieu thereof "Director of the Office of Justice Assistance".

EFFECTIVE DATES

SEC. 219. (a) Except as provided in subsection (b), this part and the amendments made by this part shall take effect on the date of the enactment of this Act.

(b) Section 202(b)(1) of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968, as added by section 204(a)(1) of this Act, shall take effect on the date of the first occurrence, after the date of the enactment of this act, of a vacancy in the office of Director of the National Institute of Justice.

PART B—EMERGENCY FEDERAL LAW ENFORCEMENT ASSISTANCE

APPLICATION

SEC. 221. (a) In the event that a crime problem of serious and epidemic proportions exists throughout a State or a part of a State, a State (on behalf of itself or another appropriate unit of government) may submit an application under this section for Federal law enforcement assistance.

(b) An application for assistance under this section shall be submitted in writing by the chief executive office of the State to the Attorney General, in a form prescribed by rules issued by the Attorney General. The Attorney General shall, after consultation with appropriate members of the Federal law enforcement community, approved or disapprove such application not later than ten days after receiving such application.

(c) Federal law enforcement assistance may be provided if such assistance is necessary to provide an adequate response to a crime problem described in subsection (a). In determining whether to approve or disapprove an application for assistance under this section, the Attorney General shall consider—

(1) the nature and extent of the crime problem throughout a State or in any part of a State,

(2) the emergency or extraordinary circumstances which produced the problem,

(3) the availability of State and local criminal justice resources to resolve the problem,

(4) the cost associated with the increased Federal presence,

(5) the need to avoid unnecessary Federal involvement and intervention in matters primarily of State and local concern, and

(6) any assistance which the State or other appropriate unit of government has received, or could receive, under any provision of title I of the Omnibus Crime Control and Safe Streets Act of 1968.

DEFINITIONS

SEC. 222. For purposes of this part—

(1) the term "Federal law enforcement assistance" means funds, equipment, training, intelligence information, and personnel,

(2) the term "Federal law enforcement community" means the heads of the following departments or agencies:

(A) the Federal Bureau of Investigation,

(B) the Drug Enforcement Administrator,

(C) the Criminal Division of the Department of Justice,

(D) the Internal Revenue Service,

(E) the Customs Service,

(F) the Immigration and Naturalization Service,

(G) the United States Marshals Service,

(H) the National Park Service,

(I) the United States Postal Service,

(J) the Secret Service,

(K) the Coast Guard,

(L) the Bureau of Alcohol, Tobacco, and Firearms, and

(M) other Federal agencies with specific statutory authority to investigate violations of Federal criminal laws, and

(3) the term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Commonwealth of the Northern Mariana Islands.

LIMITATION ON AUTHORITY

SEC. 223. (a) Nothing in this part authorizes the use of Federal law enforcement personnel to investigate violations of criminal law other than violations with respect to which investigation is authorized by other provisions of law.

(b) Nothing in this part shall be construed to authorize the Attorney General or the Federal law enforcement community to exercise any direction, supervision, or control over any police force or other criminal justice agency of an applicant for Federal law enforcement assistance.

(c) No funds provided under this part may be used to supplant State or local funds that would otherwise be made available for such purposes.

(d) Nothing in this part shall be construed to limit any authority to provide emergency assistance otherwise provided by law.

PROHIBITION OF DISCRIMINATION

SEC. 224. (a) No person in any State shall, on the ground of race, color, religion, national origin, or sex, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with any activity for which Federal law enforcement assistance is provided under this title.

(b) Paragraph (3) and paragraph (4) of section 712(c) of part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (as so redesignated by section 209 of this Act) shall apply with respect to a violation of subsection (a), except that the terms "this section" and "paragraph (1)", as such terms appear in such paragraphs, shall be deemed to be references to subsection (a) of this section, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such paragraphs shall be deemed to be a reference to the Attorney General.

CONFIDENTIALITY OF INFORMATION

SEC. 225. Section 715 of part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (as so redesignated by section 209 of this Act) shall apply with respect to—

(1) information furnished under this part,

(2) criminal history information collected, stored, or disseminated with the support of Federal law enforcement assistance provided under this part, and

(3) criminal intelligence systems operating with the support of Federal law enforcement assistance provided under this part,

except that the terms "this title" and "this section", as such terms appear in such section 715, shall be deemed to be references to this part and this section, respectively, of this Act, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such section 715 shall be deemed to be a reference to the Attorney General.

PROHIBITION OF LAND ACQUISITION

SEC. 226. No funds provided under this part shall be used for land acquisition.

REPAYMENT

SEC. 227. (a) If Federal law enforcement assistance provided under this title is used by the recipient of such assistance in violation of section 224 or for any purpose other than the purpose for which it is provided, then such recipient shall promptly repay to the Attorney General an amount equal to the value of such assistance.

(b) The Attorney General may bring a civil action in an appropriate United States district court to recover any amount required to be repaid under subsection (a).

RECORDKEEPING REQUIREMENT

SEC. 208. (a) Each recipient of Federal law enforcement assistance provided under this part shall keep such records as the Attorney General may prescribe to facilitate an effective audit.

(b) The Attorney General and the Comptroller General of the United States shall have access, for the purpose of audit and examination, to any books, documents, and records of recipients of Federal law enforcement assistance provided under this part which, in the opinion of the Attorney General or the Comptroller General, are related to the receipt or use of such assistance.

REPORT TO CONGRESS

SEC. 229. Not later than April 1 of each year, the Attorney General shall submit to the President, and to the Congress a report describing Federal law enforcement assistance provided under this part during the preceding fiscal year.

LIMITATION ON CIVIL JUSTICE MATTERS

SEC. 230. Federal law enforcement assistance provided under this part may not be used with respect to civil justice matters except to the extent that such civil justice matters bear directly and substantially upon criminal justice matters or are inextricably intertwined with criminal justice matters.

ISSUANCE OF RULES

SEC. 231. The Attorney General, after consultation with appropriate members of the law enforcement community and with State

and local officials, shall issue rules to carry out this part.

AUTHORIZATION OF APPROPRIATIONS

SEC. 232. (a) There is authorized to be appropriated $20,000,000 for each fiscal year ending after September 30, 1982, to provide under this part Federal law enforcement assistance other than funds.

(b) There are authorized to be appropriated for each fiscal year ending after September 30, 1982, such sums as may be necessary to provide under this part Federal law enforcement assistance in the form of funds.

EFFECTIVE DATE

SEC. 233. This part shall take effect on the date of the enactment of this Act.

TITLE III—MISCELLANEOUS CRIMINAL JUSTICE IMPROVEMENTS

PART A

SEC. 301. That this Part may be cited as the "Federal Anti-Tampering Act."

SEC. 302. Chapter 65 of title 18 of the United States Code is amended by adding at the end of the following new section:

"§ 1365. Tampering with consumer products with intent to cause injury or death

"(a) Whoever, with intent to cause the death of or bodily injury to any individual, knowingly tampers with any food, drug, device, or cosmetic which—

"(1) at any time affects interstate commerce or foreign commerce; and

"(2) is produced or distributed for consumption or use by individuals;

and thereby causes the death of or bodily injury to any individual, or attempts to do so, shall be punished as is provided in subsection (b) of this section.

"(b) The punishment for an offense under subsection (a) of this section is—

"(1) in the case of an attempt, a fine of not more than $20,000 or imprisonment of not more than 5 years, or both;

"(2) in the case that serious bodily injury to or the death of any individual is caused, a fine of not more than $100,000 or imprisonment for any term of years or for life, or both; and

"(3) in any other case, a fine of not more than $100,000, or imprisonment for not more than 20 years, or both.

"(c) As used in this section—

"(1) the term 'food' has the definition given such term in section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)) and also includes 'meat food product' as such term is defined in section 2(j) of the Federal Meat Inspection Act (21 U.S.C. 601(j)), 'poultry' as such term is defined in section 4(d) of the Poultry Products Inspection Act (21 U.S.C. 453(e)), 'poultry product' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(f)), 'egg product' as such term is defined in section 4(f) of the Egg Products Inspection Act (21 U.S.C. 1033(f)), and 'egg' as such term is defined in section 4(g) of the Egg Products Inspection Act (21 U.S.C. 1033(g));

"(2) the term 'drug' has the definition given such term in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1));

"(3) the term 'device' has the definition given such term in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h));

"(4) the term 'cosmetic' has the definition given such term in section 201(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(i));

"(5) the term 'serious bodily injury' means bodily injury which involves—

"(A) a substantial risk of death;

"(B) extreme physical pain;

"(C) protracted and obvious disfigurement; or

"(D) protracted loss or impairment of the function of a bodily member, organ, or mental faculty; and

"(6) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of a function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary.".

SEC. 303. The table of sections at the beginnig of chapter 65 of title 18 of the United States Code is amended by adding at the end the following new item:

"1365. Tampering with consumer products with intent to cause injury or death.".

PART B

SEC. 304. That this part may be cited as the "Federal Intelligence Personnel Protection Act."

SEC. 305. Chapter 51 of title 13 of the United States Code, section 1114, is amended—

(a) by inserting "or attempts to kill" after "kills";

(b) by strikinkg out "while engaged in the performance of his official duties or on account of the performance of his official duties" and inserting in lieu thereof "or any officer or employee of any department or agency within the Intelligence Community (as defined in section 3.4(F) of Executive Order 12333, December 8, 1981, or successor orders) not already covered under the terms of this section"; and

(c) by inserting before the period at the end thereof a comma and the following: "except that any such person who is found guilty of attempted murder shall be imprisoned for not more than twenty years".

PART C

SEC. 306. Chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 2118. Armed Career Criminals

"(a) Any person who while he or any other participant in the offense is in possession of or has readily available any firearm or imitation thereof, commits, or conspires or attempts to commit robbery or burglary in violation of the felony statutes of the State in which such offense occurs or of the United States—

"(1) may be prosecuted for such offense in the courts of the United States if such person has previously been twice convicted of robbery or burglary, or an attempt or conspiracy to commit such an offense, in violation of the felony statutes of any State or of the United States; and

"(2) shall, if found guilty pursuant to this section, and upon proof of the requisite prior convictions to the court at or before sentencing, be sentenced to a term of imprisonment of not less than fifteen years nor more than life and may be fined not more than $10,000.

"(b) Notwithstanding any other provision of law: (1) any person charged pursuant to this section shall be admitted to bail pending trial or appeal as provided in section 3148 of title 18, United States Code; (2) the prior convictions of any person charged hereunder need not be alleged in the indictment nor shall proof thereof be required at trial to establish the jurisdiction of the court or the elements of the offense; (3) any person convicted under this section shall not be granted probation nor shall the term of imprisonment imposed under paragraph (a), or any portion thereof, be suspended; and (4) any person convicted under this section shall not be released on parole prior to the expiration of the full term of imprisonment imposed under paragraph (a).

"(c) For purposes of this section—

"(1) 'United States' includes the District of Columbia, the Commonwealth of Puerto Rico, and any other territory or possession of the United States;

"(2) 'felony' means any offense punishable by a term of imprisonment exceeding one year; and

"(3) 'firearm' has the meaning set forth in section 921 of title 18, United States Code.

"(d) Except as expressly provided herein, no provision of this section shall operate to the exclusion of any Federal, State, or local law, nor shall any provision be construed to invalidate any other provision of Federal, State, or local law.

"(e) Ordinarily the United States should defer to State and local prosecutions of armed robbery and armed burglary offenses. However, if after full consultation between the local prosecuting authority and the appropriate Federal prosecuting authority, the local prosecuting authority requests or concurs in Federal prosecution and the Attorney General or his designee approves such prosecution to be appropriate, then Federal prosecution may be initiated under this Act.".

SEC. 3. The table of sections for chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"2118. Armed Career Criminals.".

SEC. 4. (a) It is the intent of Congress that any person prosecuted pursuant to this Act be tried expeditiously and that any appeal arising from a prosecution under this Act be treated as an expedited appeal.

(b) This section shall not create any right enforceable at law or in equity in any person, nor shall the court have jurisdiction to determine whether or not any of the procedures or standards set forth in this section have been followed.

PART D

SEC. 307. (a) This section may be cited as the "National Narcotics Act of 1982".

(b)(1) The Congress hereby makes the following findings:

(A) The flow of illegal narcotics into the United States is a major and growing problem.

(B) The problem of illegal drug activity falls across the entire spectrum of Federal activities both nationally and internationally.

(C) Illegal drug trafficking is estimated by the General Accounting Office to be a $79,000,000,000 a year industry in the United States.

(D) The annual consumption of heroin in the United States is in the range of four metric tons, and annual domestic consumption of cocaine is estimated to be forty to forty-eight metric tons.

(E) Despite the efforts of the United States Government and other nations, the mechanisms for smuggling opium and other hard drugs into the United States remain virtually intact and United States agencies estimate that they are able to interdict no

more than 5 to 15 per centum of all hard drugs flowing into the country.

(F) Such significant indicators of the drug problem as drug-related deaths, emergency room visits, hospital admissions due to drug-related incidents, and addiction rates are soaring.

(G) Increased drug trafficking is strongly linked to violent, addiction-related crime and recent studies have shown that over 90 per centum of heroin users rely upon criminal activity as a means of income.

(H) Much of the drug trafficking is handled by syndicates which results in increased violence and criminal activity because of the competitive struggle for control of the domestic drug market.

(I) Controlling the supply of illicit drugs is a key to reducing the crime epidemic confronting every region of the country.

(J) The magnitude and scope of the problem requires a director of National and International Drug Operations and Policy with the responsibility for the coordination and direction of all Federal efforts by the numerous agencies.

(K) Such a director must have broad authority and responsibility for making management, policy, and budgetary decisions with respect to all Federal agencies involved in attacking this problem so that a unified and efficient effort can be made to eliminate the illegal drug problem.

(2) It is the purpose of this section to insure—

(A) the development of a national policy with respect to illegal drugs;

(B) the direction and coordination of all Federal agencies involved in the effort to implement such a policy; and

(C) that a single, competent, and responsible high-level official of the United States Government, who is appointed by the President, by and with the advice and consent of the Senate, and who is accountable to the Congress and the American people, will be charged with the responsibility of coordinating the overall direction of United States policy, resources, and operations with respect to the illegal drug problem.

(c) There is established in the executive branch of the Government an office to be known as the "Office of the Director of National and International Drug Operations and Policy" (hereinafter in this section referred to as the "Office of the Director"). There shall be at the head of the Office of the Director a Director of National and International Drug Operations and Policy (hereinafter in this section referred to as the "Director"). There shall be a Deputy Director of National and International Drug Operations and Policy (hereinafter in this section referrred to as the "Deputy Director") to assist the Director in carrying out the Director's functions under this section.

(d)(1) The Director and the Deputy Director shall be appointed by the President, by and with the advice and consent of the Senate. The Director and the Deputy Director shall each serve at the pleasure of the President. No person may serve as Director or Deputy Director for a period of more than four years unless such person is reappointed to that same office by the President, by and with the advice and consent of the Senate. The Director shall be entitled to the compensation provided for in section 5313, title 5, United States Code. The Deputy Director shall be entitled to the compensation provided for in section 5314, title 5, United States Code.

(2) The Director shall serve as the principal director and coordinator of United States operations and policy on illegal drugs.

(3) The Director shall have the responsibility, and is authorized to—

(A) develop, review, implement, and enforce United States Government policy with respect to illegal drugs;

(B) direct and coordinate all United States Government efforts to halt the flow into, and sale and use of illegal drugs within the United States;

(C) develop in concert with governmental entities budgetary priorities and budgetary allocations of entities of the United States Government with respect to illegal drugs; and

(D) coordinate the collection and dissemination of information necessary to implement United States policy with respect to illegal drugs.

(4) In carrying out his responsibilities under paragraph (3) the Director is authorized to—

(A) direct, with the concurrence of the head of the agency employing such personnel, the temporary reassignment of government personnel within the United States Government in order to implement United States policy with respect to illegal drugs;

(B) procure temporary and intermittent services under section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay payable for the grade of GS-18 of the General Schedule;

(C) accept and use donations of property from all government agencies; and

(D) use the mails in the same manner as any other department or agency of the executive branch.

(5) Notwithstanding any other provision of law, rule, or regulation to the contrary, the Director shall have the authority to direct each department or agency with responsibility for drug control to carry out the policies established by the Director consistent with the general authority of each agency or department.

(6) The Administrator of the General Services Administration shall provide to the Director on a reimbursable basis such administrative support services as the Director may request.

(e) The Director shall submit to the Congress, within nine months after enactment of this section, and annually thereafter, a full and complete report reflecting United States policy with respect to illegal drugs, plans proposed for the implementation of such policy, and, commencing with the submission of the second report, a full and complete report reflecting accomplishments with respect to the United States policy and plans theretofore submitted to the Congress.

(f) For the purpose of carrying out this section, there are authorized to be appropriated $500,000 for fiscal year 1983, and such sums as may be necessary for each of the four succeeding fiscal years, to be available until expended.

(g) This section shall be effective January 1, 1983.

The SPEAKER pro tempore. Is a second demanded?

Mr. SAWYER. Mr. Speaker, I demand a second.

Mr. SENSENBRENNER. Mr. Speaker, I object to unanimously ordering the second, and on that I demand tellers.

The SPEAKER pro tempore. The question is, Will a second be ordered?

Tellers were ordered, and the Speaker pro tempore appointed as tellers Mr. HUGHES and Mr. SENSENBRENNER.

The House divided, and the tellers reported that there were—yeas 21, nays 1.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant-at-Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 275, nays 15, not voting 143, as follows:

[Roll No. 484]

□ 1620

Mr. EDGAR changed his vote from "yea" to "nay."

Mr. WOLPE changed his vote from "nay" to "yea."

So a second was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. HUGHES) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. SAWYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey.

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, what we have before the House in this amendment is a substitute to a 240-page Senate amendment to our 14-line non-controversial bill. This complex Senate amendment contains numerous substantive issues involving various committee jurisdictions most of which have not been subject to any orderly procedures of this House. I believe in these waning hours that we should not entertain such a gargantuan endeavor. In lieu thereof, the House amendment now at hand would limit this bill to subjects that have been overwhelmingly approved by the Senate are within the jurisdiction of the Judiciary Committee and for which there is a strong House consensus.

Briefly I will explain the substance of these titles. The first title of this amendment is the Controlled Substances, Penalties, and Criminal Forfeiture Act.

This title is essentially H.R. 7140, the Comprehensive Drug Penalty Act of 1982, as passed by the House on the Suspension Calendar on September 28, 1982. It was cosponsored by the ranking minority member of the Subcommittee on Crime, Mr. SAWYER, and as far as I know, there is no opposition to it.

The following are the essential elements of this title:

First, it amends the present civil forfeiture law (21 U.S.C. 881) to permit the civil forfeiture of land and buildings used, or intended to be used, for holding or storage of dangerous drugs. Under existing law only "containers" could be forfeited.

Second, it changes certain venue authority to allow the Justice Department to bring civil forfeiture actions in the district where the defendant is found or where the criminal prosecution is brought.

Third, it sets aside up to $10 million in fiscal year 1984 and fiscal year 1985 from forfeiture dispositions into a fund to be used for drug law enforcement purposes. At the request of the Senate, this title now spells out more specifically the purposes of the drug enforcement fund. It also provides for deposits from forfeitures into the fund prior to October 1983, in order that the fund will have an initial funding.

Fourth, this title substantially increases the criminal fines in drug cases and establishes a new "alternative fine" concept under which drug offenders can be fined up to twice their gross profits or proceeds.

Fifth, it provides, for the first time, criminal forfeiture provisions for all felony drug cases.

Sixth, it outlines authority for courts to restrain the transfer of property which might be subject to forfeiture and to order the seizure of such property in order to insure its availability for a forfeiture proceeding. Remission and mitigation provisions are also provided in order to protect the interests of innocent property owners.

It also details procedures for allowing temporary restraining orders in ex parte hearings under extraordinary circumstances.

Seventh, this title also creates a permissive presumption in criminal forfeiture cases that all property acquired by drug offenders during the period of the violations or shortly thereafter, is subject to forfeiture if no other likely source for such property exists.

In this manner, this title as passed by the House attempts to address drug trafficking in a reasonable and practical fashion in order to develop effective tools for law enforcement agencies. At the same time, it balances this strong societal interest in eradicating illegal trafficking in drugs with the constitutional rights of our citizens. I am satisfied that a proper balance has been struck in this title.

In addition to this title as passed in this House, it includes an amendment dealing with the Customs Service, their procedures in regard to civil forfeitures and certain customs' law enforcement authority, which was attached to H.R. 7140 in the Senate by Senator BAKER. I have had numerous discussions with administration officials and fellow Members of Congress about it, all of whom recommend this amendment on its merits. Personally, I had several reservations as to the procedural aspects of attaching a customs amendment at this late date, but in conversations with the appropriate ways and means subcommittee, we agree to add the provision. The essence of this amendment would be to: First, increase the scope of what customs could "administratively forfeit"; that is, essentially a default judgment process in their civil forfeiture procedure, from $10,000 to $100,000 and facilitate other civil forfeiture procedures involving conveyances of contraband in default situations; second, set up a "Customs Forfeiture Fund"; third, allows customs to discontinue forfeiture on property in favor of similar proceedings by State and local agencies; and fourth, increase certain customs' law enforcement authority.

Mr. Speaker, section 201 of this amendment would amend section 607 of the Tariff Act by raising value of property which can be administratively forfeited to $100,000 except in the case of conveyances used to import,

export, or otherwise transport controlled substances, for which there would be no limit. Increased enforcement activities have led to a dramatic rise in the number of conveyances seized by Customs during the last few years. Many of the conveyances were used to smuggle multiton loads of controlled substances. Under present law, all property over $10,000 must be judicially forfeited. Thus, the increased number of seizures has led to crowded civil court dockets. However, many of the conveyances—particularly vessels—are not claimed by their owners who apparently write off the expenses as a cost of doing business. Thus, the 12-18 month delay in forfeiture in formal civil suits—from the date the complaint is filed—only results in a default judgment. Nonetheless, during this period, the Government must pay for the conveyances' storage and maintenance and the conveyances generally deteriorate tremendously in value. Keeping a large number of seizures also strains Customs resources making it difficult to properly maintain the property under seizure and to prevent vandalism. Increasing the administrative forfeiture limit will reduce costs by speeding up forfeitures. The provision of law permitting individuals desiring to contest forfeitures to obtain court review if they are willing to post a claim and cost bond is retained.

Section 202 would amend section 608 of the Tariff Act to increase the amount of the bond which must be posed in order to judicially contest the forfeiture of an article normally subject to administrative forfeiture. The present $250 cost bond has not been increased since 1844 when it was 2½ times the $100 value of property which could then be administratively forfeited. Although the administrative forfeiture amount has increased to $500, $1,000, $2,500, and $10,000, the cost bond has remained at $250. In order to keep the cost bond at a reasonable amount a $2,500 maximum is included. Under present Customs' procedures, poor persons may obtain judicial forfeiture proceedings without the bond if they complete and file an affidavit on financial inability. This procedure would remain unchanged.

Section 203 contains conforming amendments of section 609 of the Tariff Act.

Sections 204 and 205 contain conforming amendments to sections 610 and 612 to bring them into line with the proposed changes to section 607 of the Tariff Act.

Section 206 would amend section 613 of the Tariff Act to make it conform to new section 613a which makes it clear that the proceeds of sale after deducting expenses, would be deposited in the new Customs enforcement fund rather than the general fund of the Treasury, while at the same time preserving existing authority of other agencies to use the current Customs' proceeding.

Section 207 would establish a special Customs forfeiture fund. New section 613a would: First, remove certain contingency appropriations from the Customs budget, thereby resulting in budget savings; second, provide greater efficiency in the handling of seized and forfeited property; and third, eliminate the irony that the agencies' operating funds for enforcement actions are decreased by the amount of moneys expended on forfeitures, which has the net effect of reducing Customs funds for more direct law enforcement purposes. Under present law the costs in handling each seizure are deducted from the proceeds of that seizure, if any. The resulting net proceeds are then transferred to the general fund in the Treasury. But if the proceeds do not exceed the expenses, the agency must cover the expenses out of its regular budget. In other words, the net proceeds from the sale of one seizure cannot presently be used to offset the unrecouped costs of another seizure. The new fund would allow the agency to balance all proceeds against all expenses, with the over-all net proceeds being transferred to the General Fund of the Treasury. The agency would only maintain a balance of $10 million in the fund for operating expenses.

The current procedure requiring the agency to account separately for costs associated with each individual seizure is inefficient, both in costs to the appropriation and manpower, but would no longer be required under the proposed Customs forfeiture fund. The establishment of the social account would also encourage more efficient maintenance, storage, and inventory procedures that are feasible under current requirements, such as possible national inventory control through computerization.

The establishment of the fund would also give greater protection to innocent lienholders and it would also allow the agency to pay the costs of maintenance of the properties on a regular basis without regard to the sale or transfer date of the property and without the need of contracting for services on a contingency basis. The net effect would be to relieve the agency of the financial restrictions and complications of having to deal with each and every siezure on a separate basis, but would maintain the accountability on an over-all basis. The agency would be required to furnish a complete accounting of these deposits and expenditures to the Congress. The combined effect of 613a and the amendments to 607 is to increase revenue while reducing costs and overhead.

Section 208 would interest a new section 616 in the Tariff Act permitting the Secretary of the Treasury or the Attorney General to turn over property initially seized by the United States to States to permit those States with forfeiture laws to institute State forfeiture proceedings when appropriate.

In this situation, the Federal Government would cease to be liable once the property was turned over to the State agency. Subsection (b) and (c) contain the procedures to be followed when turnovers to State or local governments are contemplated and require that the Federal Government notify all known interested parties of the decision to turn the articles over to local officials.

Section 209 raises the maximum informant's award contained in section 619 of the Tariff Act from $50,000 to $250,000. The 25-percent award is only paid if the Government makes a tangible recovery of property from the information provided. Many informants take great risks in reporting violations of Federal law to the Federal Government. The $50,000 amount has not been raised since 1922.

Section 210 would make changes in existing law by adding a new section 589 to the Tariff Act to grant additional arrest authority to customs officers. Under existing law, a customs officer has authority to arrest without a warrant for violations of the narcotic drug and marihuana laws under section 7607 of the Internal Revenue Code and for violation of the navigation laws if committed in the officer's presence or laws providing for forefiture or any law respecting the revenue under section 581 of the Tariff Act of 1930 as amended (19 U.S.C. 1581), where the violation is committed in the officer's presence or where the officer has reason to believe that the person to be arrested has committed or is committing such violation. In addition, miscellaneous conservation, fisheries, and pollution on customs officers in various situations (16 U.S.C. 3405, 16 U.S.C. 772d, 916g, 959(b), and 33 U.S.C. 413).

Currently, court decisions require customs officers making arrests for export violations, assaults on customs officers and other Federal felony violations to rely on the various State laws conferring arrest authority on private persons—citizen's arrest—unless State law confers peace officer status on them. This reliance on 50 different State laws is both confusing and inconsistent with the authority conferred upon other Federal officers. *United States v. Swarovski*, 557 F.2d 40 (2d Cir. 1977); *United States* v. *Heliczer*, 373 F2d 241 (2d Cir. 1967) cert. den. 388 U.S. 917 (1967)).

Customs officers are now engaged in Federal enforcement programs where such limited authority has proven to be clearly inadequate and potentially compromises and hinders the Customs Service's present role in the efficient

enforcement of such Federal programs. For example, Customs officers involved in preventing the export of high technology must rely on State arrest laws see United States against Swarovski, supra. Also, fugitive felons and persons in possession of stolen property have been encountered entering the United States by Customs inspectors who have access to the National Crime Information Center. In both of these instances, Customs officers presently must call upon other law enforcement officers to make the arrest, or make a citizen's arrest, exposing them to a greater potential liability. In remote border areas and late at night, other law enforcement officers may be unavilable officers engaged in protecting Federal property and employees like those who participated in the Federal air security program and the so-called Cuban freedom flotilla program had to be sworn in as deputy U.S. marshals to enable them to carry out their duties. This procedure has proven to be inefficient, cumbersome, and inadequate.

The proposal would add a new section 589 to the Tariff Act which would grant additional arrest authority to officers of the customs as those officers are defined in section 401(i) of the Tariff Act of 1930, as amended (19 U.S.C. 1401). It would incorporate present authority contained in section 767 of the Internal Revenue Code of 1954 for customs officers to carry firearms, execute and serve search and arrest warrants, and serve subpenas, and would, in addition, authorize an officer of the Customs Service to make arrests without a warrant for any offense against the United States committed in the officer's presence, or outside the officer's presence if the officer has reasonable grounds to believe that the person to be arrested has committed, or is committing, a felony.

Enactment of subsection (2) would also make it clear that customs officers may serve search and arrest warrants for any Federal offense including drug offenses. This would eliminate the problem raised in *United States* v. *Harrington*, 520 F. Supp. 93 (1981) which although reversed on appeal No. 81-1672, ninth circuit on July 13, 1982, questioned customs authority to serve search warrants in joint DEA-Customs investigations away from the border.

The bill would also authorize customs officers to perform any other law enforcement duties that the Secretary of the Treasury designates. This provision would codify present practice and permit maximum utilization of customs personnel in other Treasury activities, such as protective details and inspector general investigations.

By approving the provisions establishing law enforcement authority for the U.S. Customs Service, the committee does not intend to greatly expand or diminish Customs Service jurisdiction over criminal offenses. Neither should these provisions be construed as an attempt to alter the terms of Reorganization Plan No. 2 of 1973. Executive Order 11727, "Establishing a Drug Enforcement Administration in the Department of Justice," which order defines the functions, jurisdictions, and authority of the Drug Enforcement Administration as the principal Federal narcotics enforcement agency. Rather, this section of the bill is an effort to clarify existing Customs Service authority and is supported by the Department of Justice as well as the Department of the Treasury.

Section 211 would amend various sections—602, 605, 606, 608, 609, 611, 613, 614, 615, 618, 619—of the Tariff Act as do some of the preceding sections of the bill, to include references to aircraft. Although aircraft are presently covered by such provisions, the coverage is indirect, appearing in 49 U.S.C. 1509 and Part 6 of 19 CFR, rather than in the Tariff Act. This amendment would merely incorporate the term "aircraft" into the text of the Tariff Act's administrative provisions.

I would also like to point out to the Members that both the DEA and custom's funds provided for in this bill will be authorized only for fiscal year 1984 and fiscal year 1985 at which time the Congress can assess the effectiveness of the procedures.

Title II of this amendment is the Justice Assistance Act which essentially is H.R. 4481 as passed by the House with some changes which were negotiated with the Senate and the Department of Justice.

The major feature of title II is a block grant program for criminal justice funds. Under the bill, the modest block grant pool of about $150 million will be distributed to the States and units of local government. The bill would abolish the bureaucratic nightmare of LEAA and replace it with a lean and scaled-down operation that would not impose Federal bureaucratic requirements on State and local recipients.

The major features of the legislation include a requirement that the States provide a 50-percent match before they receive any Federal funds; the elimination of the federally required State planning agencies and councils, and a narrower focus for the grants.

The proposed Office of Justice Assistance (OJA) would have limited discretion under the bill. Eighty percent of the money would be distributed directly to the States, with each State getting a minimum amount of $250,000 with the remainder to be distributed one-half on the basis of population and one-half based on the State's crime rate.

The justice assistance title provides 16 permissible categories of criminal justice programs which can be funded under this legislation. The 14 programmatic areas generally reflect those projects that have a proven record of effectiveness. The permissible categories include:

One. Community and policy anti-crime programs;

Two. Sting operations;

Three. Arson programs;

Four. White-collar crime and organized crime programs;

Five. Career criminal programs;

Six. Victim/witness programs;

Seven. Treatment alternatives to street crime (TASC); and

Eight. Prosecutor and police management information systems.

These program categories were chosen by the committee because they have been positively evaluated and had the support of the law enforcement community. In addition, a State may use up to 10 percent of its criminal justice grant for innovative or new criminal justice programs which address critical crime issues.

In addition to the block grant programs which are provided for in section 401 of the legislation, 20 percent of the funds are reserved for discretionary grants at the Federal level. Under the bill, the committee recognized that in order to move some new and worthwhile programs from the research to the implementation stage that some Federal money had to be made available for new programs. Under the bill, 10 percent of the total appropriation is authorized to be expended for innovative programs. Also under this section the Director of the Office of Justive Assistance is authorized to spend up to 10 percent of the appropriated funds for either: First, programs of the type which are fundable at the State level, but which are national or multistate in scope; or second, programs which are designed to provide technical assistance or training to criminal justice personnel.

The bill also provides for emergency grants to States and units of local government experiencing criminal justice crisis conditions.

Title III of this amendment includes four parts. Part A deal with tampering of food, drugs, and cosmetics; part B with protection of certain designated Federal employees; part C with career criminals; and part D creates an Office of the Director of National and International Drug Operation and Policy.

Part A of title III deals with tampering and provides for a Federal prohibition against tampering or attempting to tamper with food, drugs, cosmetics, and other devices that affect interstate commerce and that are designed for use by individuals. The bill is a response to the tragic recent deaths of seven people in the Chicago area and to the spate of copycat tamperings that followed.

This part prohibits tampering and attempts to tamper, and punishes such actions severely. Where serious bodily injury or death results, such actions are punishable by a fine of $100,000 and up to life in prison. In other cases, the bill provides for a $100,000 fine and 20 years in prison.

I think my amendment covers the essential issues in this emergency situation. If there are other, more tangential issues that should also be considered in this area, the Subcommittee on Crime will hold early hearings on them. I, therefore, urge your support of this part of title III.

Part B of this title adds attempts to kill certain designated Federal employees to the provisions of 18 U.S.C. § 114. Section 1114 currently covers only the completed act of killing. The bill provides a penalty for attempts to kill of a maximum of 20 years in prison. It also adds to the list of designated Federal employees "any officer or employee of any department or agency within the intelligence community * * * not already covered" by section 1114. Finally, the first section deletes repetitive language requiring that, for the Federal Government to prosecute the matter, a designated Federal employee must be killed "while engaged in the performance of his official duties or on account of the performance of his official duties." Since this requirement appears twice in section 1114, the first statement is stricken as repetitive.

This amendment to section 1114 is needed so that the Federal Government can prosecute if officers and employees of the CIA, the DIA, and other intelligence agencies, as a result of their official duties, are killed or if an attempt is made on their lives. Presently, such attacks are punished only under State law, which may be inconsistent and inadequate to fully deal with attacks on Federal employees. This language should, however, be construed narrowly so as not to include informers and others rendering similar kinds of assistance.

Part C of this title deals with career criminals. It makes a Federal offense for a defendant to commit a robbery or burglary with a firearm if such a defendant had been convicted two or more times previously of a robbery or burglary under either Federal or States laws.

This part also sets up a 15-year mandatory minimum sentence with no parole, probation, or suspension of sentence allowed, provides bail procedures for these defendants the same as those which are applied in capital and post-conviction cases under 18 U.S.C. 3148, and gives local prosecutors a veto over Federal prosecutions.

Part C is the same as S. 1688 which passed the Senate by a vote of 95 to 1 and in substance has been reported by the House Subcommittee on Crime.

Part D creates an Office of the Director of National and International Drug Operations and Policy. The Director, to be appointed by the President with the advice and consent of the Senate, would be the primary person in the executive branch to coordinate and direct the Nation's operations against drug trafficking. He shall have broad authority to develop U.S. policy and to direct all U.S. efforts necessary to carry out that policy. He will be given the authority to direct the redeployment of personnel in all agencies of the U.S. Government who are involved in, and necessary to, the attack and elimination of the illegal drug problem. The sum of $500,000 is authorized to be appropriated for this office for fiscal year 1983

□ 1630

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I am happy to yield to the gentleman from New Jersey.

Mr. RODINO. Mr. Speaker, I would like to explain for the record the rationale for my support to the amendments to H.R. 3963, the Contract Services Drug Dependent Federal Offenders Act Amendment of 1981.

The specific parts of the amendment stand on their own merit and I will discuss them later. At this juncture, however, I would like to explain why we brought up this amendment at this time and in this unusual manner. In the first place, our noncontroversial bill, H.R. 3963, was passed and sent to the Senate on October 27, 1981. This bill was a 14-line item which authorized urinalysis testing, treatment, and supervision of convicted Federal offenders who are addicted to drugs. The Senate on September 30, 1982, added their omnibus crime bill as a 240-page amendment to this bill and sent it back to the House just prior to our October adjournment. The Judiciary Committee, not willing to let H.R. 3963 expire, resisted the Senate amendment and sent back to the Senate H.R. 3963 as it was orginally passed by the House. When we returned to our postelection session, the Senate again returned to the House H.R. 3963 with their omnibus criminal bill as an amendment. Since many of the provisions of this omnibus crime amendment had not been subject to the normal and orderly procedure of the House and in fact included provisions that would properly be before at least four other committees, I initially resisted any conference as being too cumbersome. However, eventually I acceded to the personal request of the chairman of the Senate Judiciary Committee to see if there was some limited provisions in their omnibus package which we could agree upon. This however, was a monumental task, considering the time constraints—one week before scheduled adjournment—and the Senate conferees decided that there was not sufficient movement and dismissed their conferees and sent back to the House the original package—that is, H.R. 3963 plus their omnibus criminal bill.

It was at this point, over the weekend, that we again began negotiations with the Senate and agreed upon the package before the House today.

This package in essence contains three titles:

The first title is a combined criminal forfeiture and increased fines provisions for all drug felonies. Essentially, this title is H.R. 7140 which passed the House on suspension on September 28, 1982.

The second title is the Justice Assistance Act which authorizes a 2-year program of assistance to State and local anticrime efforts. This bill, essentially the Justice Assistance Act, is a compromise with the Senate and in substance had previously passed the House 289 to 73 and the Senate 95 to 1 in this Congress.

Title III of this bill is in four parts and would first, punish tampering with food, drugs, cosmetics, and devices that affect interstate commerce if those items are designed for individual use. This is an emergency response to the recent tragic deaths in Chicago by cyanide poisoned pain killers.

Second, the second part of this title merely makes it a Federal crime to attempt to kill a Federal intelligence agent. At present, section 1114 of title 18 punishes the killing of these employees.

Third, the third part involves a career criminal provision which makes it a Federal offense for a person to commit a robbery or burglary with a firearm if such a defendant has been convicted previously of a robbery or burglary under either Federal or State law. There is a mandatory minimum sentence—15 years—and no parole for such violation. The local district attorney however, would have veto power over Federal prosecution. This bill passed the Senate by 95 to 1 and had been reported by the House Subcommittee on Crime.

Fourth, the fourth part creates an Office of the Director of National and International Drug Operations and Policy to coordinate and direct all efforts of the U.S. Government to fight the illegal traffic in drugs.

This whole package is something which I could support on its own but in fact it was a compromise package which we worked out with the Senate. I must emphasize, however, that we were successful in cutting down the scope of this agreement to relatively noncontroversial bills and one which I am informed will be accepted by our Senate colleagues. It is on this basis that I agreed to this procedure and upon that basis, I support this bill on

the suspension procedure of the House.

□ 1640

Mr. HUGHES. Mr. Speaker, let me say to my colleagues in summary, this legislation has been worked out with the other body. It has the support of both sides of the aisle. It is a major anticrime bill. Many of the initiatives in this legislation were called for by the President, and we believe that it will make a difference in our effort to combat organized, violent, and drug-related crime.

I want to commend particularly my colleague, the gentleman from Michigan (Mr. SAWYER), the ranking minority member of our subcommittee.

This represents the work product of 2 years of our subcommittee's operations. We received testimony from hundreds of witnesses from all parts of the country. We have traveled overseas to examine the drug enforcement operations and to identify problem areas. It is our judgment that this particular package will make a difference in our effort to combat violent, drug-related and organized crime. It is not the final solution, for there is no single answer. But it will really help.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The Chair will state that the gentleman has used 16 minutes of his 20 minutes.

Mr. SAWYER. Mr. Speaker, I yield myself such time as I may consume.

First, let me say that if I have anything in opposition to this bill it is what is not in it, as opposed to what is in it.

The Senate amendments had included a bail reform provision allowing detention of prisoners who pose a danger to their community. It had a sentencing reform which is greatly needed in the federal system, and some other provisions, all of which I was strongly in favor of.

As a matter of fact, I was a conferee, and when we had a conference we had eight House conferees, and five of them were in favor of the bail reform amendment but the chairman would not allow a vote, so if I am for any reasons taking opposition to this, it would be one of irritation of the way it was handled.

But when you look at what is left in it, there is absolutely no basis to be opposed to it, and other than a kind of a dog-in-the-manger feeling about it, because the things I was in favor of and which could have carried had they been allowed to vote, were not.

At the urging of the gentleman from Wisconsin (Mr. KASTENMEIER) on the bail reform, and the gentleman from Michigan (Mr. CONYERS) on the criminal sentencing revision, both of whom made enough fuss, the chairman would not let those happen.

But having gotten over my own pique at being shabbily treated, and I consider that I was, I cannot oppose the amendments that are being taken. One is making tampering, in effect, a Federal crime, this Tylenol-type tampering with products; the handling of drug-dependent offenders so when they are out on bail they are required to submit to or take various tests to make sure they are not using drugs on bail; criminal forfeiture aimed at big drug dealers, making them forfeit, for use in the apprehension of other offenders, of assets in preventing their transfer having the kind of nice ring to it of using their own money to prosecute and apprehend their fellow dealers; justice assistance, which is subject to some controversy in that it takes what is the best or the proven items out of LEAA, and some other programs such as developing alternatives to imprisonment, reducing jail overcrowding, programs aimed at preventing crimes to the elderly as well as the well established things like Sting and career criminals that I think deserve our support.

Incidentally, for those of you who have some reservations about that, I might tell you that the chairman of the subcommittee and I went down and personally cleared these with the White House and they have Mr. Meese's blessing, and they gave us their OK on it, and the Senate got the same clearance.

So I may say that what we have left here, there is really nobody in good conscience, in my opinion, who can vote against these programs. They are all needed programs. They are all aimed at fighting crime. They have support on both sides of the aisle.

As I say, the only thing about the bill is that some of the things that were taken out should have been left in there, and that is my only bad feeling about it. I do, on two of those, have a commitment from the committee chairman that they will be processed in the full committee during the next year, which is better than nothing, anyway, even though we had to take them out of this.

Mr. GILMAN. Mr. Speaker, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

I rise in support of H.R. 3963 to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978, and I commend the gentleman from New Jersey (Mr. HUGHES), the chairman of the Subcommittee on Crime, and the ranking member from Michigan (Mr. SAWYER), for their wisdom, and hard work in bringing this legislation to the floor today. While I endorse all the anticrime provisions contained in this legislation, particularly the section dealing with mandatory sentencing and bail reform as it applies to career criminals, as a member of the Select Committee on Narcotics, I particularly support those provisions that bolster our fight against narcotics abuse and trafficking in our Nation.

Title I, which incorporates the substance of H.R. 7140, the Comprehensive Drug Penalty Act of 1982, which passed the House in September 1982, contains strong elements to assist law enforcement officials in bringing to justice those involved in drug trafficking and drug related crimes by allowing for the civil forfeiture of lands and buildings used or intended for use in holding or storing dangerous drugs. More importantly, the bill provides the mechanism and funding for the effective use of this forfeiture provision. It also broadens the utilization of forfeiture in cracking down on international drug trafficking by extending the current forfeiture provisions to the Customs Service. For the first time, criminal forfeiture is made possible for all felony drug cases. Another strong deterrent to drug related crime is the bill's provision for increased criminal fines and an alternative fine under which drug offenders can be forced to pay up to twice their gross profits or proceeds.

I strongly support the language contained in the bill, which calls for the appointment of a director of national and international drug operations and policy. Although currently there is a Director of the White House Drug Abuse Office, what we need, and what this legislation would accomplish, is the appointment of a highly visible director who could coordinate all aspects of our Federal efforts to control drug abuse in four major areas—law enforcement, treatment, rehabilitation, and prevention. At the present time, the Director of the White House Drug Abuse Office devotes his work to the drug treatment area, while the Associate Attorney General is focusing his efforts on developing the 12 regional drug task force programs proposed by the President on October 14, 1982.

If we truly mean what we say—that we are going to wage an all out war against drug abuse—then this issue must be elevated to the top level of Presidential priorities. Therefore, we need to create an office with the stature and accessibility to the President required to provide the personnel, resources, and expertise to help formulate, coordinate, and implement a comprehensive and highly visible Federal strategy. Accordingly, I urge my colleagues to support this language and this legislation.

Mr. SAWYER. I thank the gentleman.

Mr. Speaker, in summary, I know everybody is tired and everybody wants to go home and get this session over with, and I am certainly in accord with that.

I just want to wind up by urging your support for this bill and assuring you that the only things wrong with it are some of the things that were left out of it, and there is nothing bad about anything that is in it.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. SAWYER) has consumed 5 minutes.

Mr. HUGHES. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the legislation before us.

Before I came to Congress, I spent 8 years working with senior citizens as director of the Gray Panthers in my home State of Oregon.

During that time, I saw first hand how senior citizens and others are forced to become prisoners in their own homes, afraid that, if they venture out, they will be attacked on the street or their homes will be broken into and ransacked.

When I came to Congress 2 years ago, I vowed to do what ever I could to make the Federal Government a better partner in assisting local law enforcement officials in combating the unprecedented wave of street crimes that has engulfed our towns and cities in recent years.

Earlier this year, I introduced H.R. 6386, a bill that would permit Federal prosecution of an individual who, after being previously convicted of two or more felony robberies or burglaries in any jurisdiction, is charged with a third robbery or burglary involving the use of a firearm.

Conviction under this new section of the Federal Criminal Code would trigger a minimum 15-year sentence in a Federal penitentiary with no possibility of parole.

Mr. Speaker, the House Judiciary Subcommittee on Crime passed H.R. 6386 and the legislation before us treats career criminals in a manner that is almost identical to H.R. 6386.

I see this section as a small but solid step in the right direction, an opportunity for the Federal Government to lend a much-needed hand to beleaguered local criminal justice officials trying to grapple with this unprecedented crime wave.

It is no secret that local criminal justice resources are stretched to the limit—and beyond. Because of a limited number of prosecutors and investigators, a huge backlog of cases pending in our courts, and a severe shortage of jail space, our cities and States are rapidly losing the war on crime.

Local officials are forced to resort to excessive plea bargaining, too many probationary sentences and too early parole for many serious offenders.

The career criminal section of the legislation before us would expand Federal criminal jurisdiction narrowly by focusing on the worst habitual offenders. The number of crimes committed by career criminals is truly mind boggling. A leading study indicated that 50 percent of all crime and two-thirds of all violent crime is committed by just 6 percent of the criminal population.

Even with limited Federal prosecution and incarceration, I believe this provision could play a significant role in reducing the epidemic of armed robberies and burglaries.

If several hundred of the worst career criminals are sentenced to 15-year Federal prison terms, that in itself will prevent tens of thousands of robberies and burglaries.

More important, the existence of this sort of tough no-nonsense Federal statute should have a substantial deterrent effect.

The type of criminal this legislation seeks to stop is rational, calculating, and street smart.

In my opinion awareness of this new Federal statute will filter down to the street. Once a career criminal has been apprehended and convicted twice of robbery or burglary, they are more likely to think long and hard about doing it again.

A third conviction no longer will mean another trip through the revolving door of a severely overloaded local criminal justice system.

These people no longer will be back on the streets again in a matter of a few hours, weeks, or months—after pleading quilty to a reduced charge or after being paroled prematurely because the State penitentiary or county jail is overflowing.

Repeat offenders no longer will be able to assume that they can thumb their nose at the system and quickly return to a life of preying on the safety and property of innocent victims.

They instead will be faced with the very real possiblity of spending 15 years in a Federal penitentiary with no possibility of parole.

In conclusion, Mr. Speaker, I would like to commend my colleague from New Jersey, Mr. HUGHES, for his herculean efforts in guiding this legislation through his subcommittee and for the masterful work he has done on the justice assistance portion of the legislation before us. I would also like to commend the ranking minority member, Mr. SAWYER, for his cooperation and gracious assistance to me on this legislation.

Mr. Speaker, this is a good bill and a necessary bill and I urge my colleagues to support it. I yield back the balance of my time.

Mr. HUGHES. Mr. Speaker, I yield 1½ minutes to the gentleman from Michigan (Mr. CONYERS).

Mr. CONYERS. Mr. Speaker, I reluctantly rise in opposition to this measure. This measure comes before the House through probably the most disgraceful procedure that has ever been utilized with regard to the Federal Criminal Code.

I am extremely opposed to this rush to judgment and, accordingly, must separate myself from it. It is true that this measure is far more innocuous than the Senate amendment. The fact of the matter is, however, that this bill has been committed to conference, and the conferees have not been allowed to finish their work. The conferees have never met, a meeting has never been scheduled. Yet, incredibly, upon the motion of the chairman of the other body's Judiciary Committee, this bill was unilaterally removed from conference last Saturday evening. My staff reported to me that our Parliamentarian's Office told them that it was unable to find any precedent for removing a bill unilaterally from conference in this manner. Our body's rules amply protect against such irregular usurpation of the conference committee's responsibilities. House conferees can be discharged only if no agreement has been reached after 20 days. During the last 6 days of a session, the rules permit the conferees to be discharged after 36 hours if no agreement has been reached.

The other body has failed to display the respect due this House and its rules. This House should not condone such disrespect and irregularity by considering this measure under these circumstances.

This is especially true because the amendment of the other body—and, indeed, the pending amendment to that amendment—include many controversial matters that have been, and remain, the subject of careful study by a number of this body's committees and subcommittees. These matters deal with such fundamental questions as due process protections against the deprivation of one's property and the appropriate balance between Federal and State roles in law enforcement. These are matters that deserve, indeed demand, separate debate and meaningful deliberation. We must not allow the other body to extort from us significant concessions and hastily considered legislation.

I urge my colleagues to vote against the motion to suspend the rules so that the measure may be disposed of by procedures that will insure consideration pursuant to the normal legislative process.

Mr. SAWYER. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to rise in commendation of the gentleman from New Jersey (Mr. HUGHES) and the gen-

tleman from Michigan (Mr. SAWYER) for their hard work in putting together this bill.

The amendment that is before us has many good provisions relative to increasing penalties for drugs, criminal forfeiture provisions, increasing penalties for career criminals, the establishment of a drug czar, and penalties for criminal tampering so that the FBI can get involved in instances like the Tylenol tragedy a little bit earlier.

□ 1650

But I have to object strenuously to the procedure that this bill has been called under. As my colleague from Michigan (Mr. CONYERS) has stated, this bill was withdrawn from conference without a conference ever meeting, and there has been a great delay in even getting the machinery to even get this bill into conference. The Senate requested a conference on September 30, but it was not until December 9 that the House agreed to the conference.

Now, we come back with a motion to suspend the rules, which is nonamendable, that puts bail reform and sentencing reform down the drain in a way that none of us can get a vote, and resurrects the Law Enforcement Assistance Administration under another name with a $170 million a year authorization. We have been talking about ballooning budget deficits, and neither this body nor the other body included the Justice Assistance Act in this particular piece of legislation nor the nongermane amendment the other body attached on, but lo and behold, just like the phoenix rising from the ashes, LEAA is back with a $170 million authorization.

There is no way under a motion to suspend the rules that this can be taken out. Now, I had hoped that we would be able to take up the House amendment to the Senate amendment in a way so that a preferential motion to take LEAA out of what is being considered could at least be voted on on the floor, but we do not have that opportunity because the motion to suspend the rules is before us.

I would remind the membership that in a colloquy I had several hours ago with the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT), he assured us that there would be no motions to suspend the rules except on conference reports coming up today. But, we have one here now.

So, for all these reasons, I would urge a no vote on the motion to suspend the rules. We ought to take these matters up in the regular order, not with a hastily put together amendment that was not even drafted until this morning, and submitted.

Mr. SAWYER. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Speaker, I thank the gentleman for yielding. I rise in support of the motion that is pending. That support may be somewhat reluctant for the reasons cited by the gentleman from Michigan. In a time when crime, particularly of a violent nature, in drug trafficking, is rising every day as concerns in the minds of Americans, out of the Judiciary Committee and out of this Congress comes a pitiful dribble of legislation dealing with the problems of crime in this country.

Here we are on the last day, presumably, of the 97th Congress with this pitiful measure of criminal law, criminal legislative activity. But, here we are. And it is the best that there is to be offered at this point.

We have heard from a previous participant in this debate that this is an inappropriate procedure to be followed for such serious criminal legislative matters. For 2 years that same participant has sat on the Criminal Code effort. Nothing has happened there. The jurisdiction of the Subcommittee on Criminal Justice has been exercised only with hot air, nothing else.

No; the patience of the members of the Judiciary Committee has been sorely tried, just as the patience of the Members of the House has been sorely tried on many an occasion when a judiciary bill comes here, with often little results. No; it is time to take what action can be taken in this Congress in the way of legislation dealing with crime. It is time to do it now. It is not a perfect bill. It does not have all in it that ought to be in it. In fact, if my single will were to be exercised as against that of the House in general, I would rather see the whole criminal code effort right here today, any time, rather than the pitiful bit we have.

But, it is a movement in the right direction. It is something that has to be done, and I am not pleased with every jot and tittle in it.

The gentleman from Michigan (Mr. SAWYER) indicated that he is pleased with most of what is in it, and I share that. I am not certain that we could not do better under a different procedure, but this is what can be agreed upon between two Houses, as well as, I think, reasonably within this House.

It has been said that the procedure by which H.R. 3963 came back out of conference and was thrust upon us again by the Senate is unusual. Well, it is not so unusual. It happened in 1907; it happened in 1936. Why not today? And it is here. If the gentleman who is concerned about that procedure would like to take a look in his spare time for spare time reading, at volume 8 in Cannon's Precedents, section No. 3218, he would find a precedent for that procedure in it. In volume 5 of Hind's Precedents, in 6319, he will find a 1907 case. The Senate has done it before. They have done it to us before; they will do it to us again.

So, we are under an unusual situation, perhaps, but it is time for us to act to support what can be worked out by legislation dealing with serious crime problems in our country.

Mr. CONYERS. Mr. Speaker, would my colleague yield briefly?

Mr. KINDNESS. I yield.

Mr. CONYERS. I would just like him to know that the Subcommittee on Criminal Justice has reported out a criminal code, and it lays waiting in the clutches of the full Judiciary Committee—just for his information.

Mr. KINDNESS. Would the gentleman care to mention the date?

Mr. CONYERS. Yes; the date was rather recently.

Mr. KINDNESS. Yes.

Mr. CONYERS. But that speaks to the point that the subcommittee has not acted. I am sorry it was not early enough.

Mr. KINDNESS. The gentleman is quite correct, that something came out of the subcommittee after it was clear that there was to be no full committee meetings.

Mr. SAWYER. Mr. Speaker, I yield 3 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, as happens so many times in the House, the ideological extremes on issues seem to coalesce together, and they have on this bill to oppose it, but I would like to say that from my perspective this is a darn good managerie or collection of anticrime pieces of legislation that will do a lot, particularly in the area of organized crime; the bills on career criminals; on drug forfeitures, as well as the Justice Assistance Act, will have a dramatic effect on the reduction of organized crime. I would compliment both my colleague from Michigan (Mr. SAWYER) and my colleague from New Jersey (Mr. HUGHES), for taking the leadership on crime issues, which has been so much lacking this year.

I would like to ask my colleague from New Jersey a question regarding the Tylenol part of the legislation, the antitampering part of the legislation.

This bill does differ from the Senate-passed legislation in this area in that it does not include language which would make it a criminal offense for an individual to falsely claim to have purchased a tampered-with product or otherwise provide false information about a tampering. In that such false claims have led to costly recalls, not to mention a loss of consumer confidence in a number of products, I think that is an aspect of this problem that needs to be looked at carefully. I hope the subcommittee will look at this aspect in dealing with this next year.

Mr. HUGHES. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I yield.

Mr. HUGHES. Mr. Speaker, the gentleman has made an important point, and I can assure him that the subcommittee will make as a first order of business a hearing on the subject of hoaxes or threats to use, because this is a very serious matter. However, we have conducted no hearings, and no hearings were conducted on the Senate side. As the gentleman well knows, it is a very sensitive area of the criminal law and we just did not feel competent dealing with this issue at this time without hearings. But we intend to do so.

□ 1700

But what we have done is we have taken care of the major offense; that is, tampering or an attempt to tamper, which is the immediate problem.

Mr. GLICKMAN. Mr. Speaker, I thank my colleague, the gentleman from New Jersey (Mr. HUGHES). That is a satisfactory response to me. I think we do need to review the whole issue of tampering with consumer products next year. But I would repeat to my colleagues that this is a very important piece of anticrime legislation, and if Members want to exhibit their attitude about bringing particularly the organized elements of crime to a standstill the best way we can, I would urge that they give us a "yea" vote on this legislation.

Mr. SAWYER. Mr. Speaker, I yield myself such time as I have remaining.

The SPEAKER pro tempore. The Chair will state that the gentleman from Michigan (Mr. SAWYER) has 4 minutes remaining.

Mr. SAWYER. Mr. Chairman, I would just like to speak in a response to a couple of items. While it is true that the Subcommittee on Criminal Justice, chaired by the gentleman from Michigan (Mr. CONYERS) last week, I believe, finally passed out his version of a criminal justice bill, he was ordered to deliver one to the full committee by January 30 this year, so he is a little less than a year later, and he came out with a somewhat revised version.

I may say also in response to the question that we have not turned out any crime law that I think our Subcommittee on Crime has been one of the most active and productive in the Congress. We turned out the pretrial services bill dealing with reviewing and investigating suitability for bail and other items. We passed an exceedingly important bill repealing or modifying severely what is known as the doctrine of posse comitatus, which permits for the first time the military, and particularly the intelligence, to assist in the interdiction of drugs coming into the country, and that has worked fantastically well.

We passed the arson bill, the nuclear materials bill, the false identification bill, and others, all of which came from our subcommittee.

So I just do not want the impression left that we have not produced crime legislation. I have joined with the gentleman from Ohio in decrying the fact that one individual has succeeded in thwarting the production of a meaningful criminal code on which this House and even the full committee could work its will. I hope that will not happen in the next Congress.

Just to wind this up, Mr. Speaker, I want to say that great credit goes to our chairman, the gentleman from New Jersey, Mr. BILL HUGHES. He has worked diligently on this. He has really gone to the wall to try to save some of the provisions that were removed at the insistence of some other committee chairmen, to the point where he has probably temporarily alienated some of his own side of the aisle on the committee in trying to do that. But I want to say that I have totally enjoyed and appreciated working with the gentleman. He is a lawyer's lawyer and a real professional, and it has been a great pleasure.

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

The SPEAKER pro tempore. The Chair will state that the gentleman from New Jersey (Mr. HUGHES) has 1 minute and a half remaining.

Mr. HUGHES. Mr. Speaker, this is going to sound like a mutual admiration society and so be it. But I want to say that I could not have a better partner for the ranking minority member of the subcommittee. Combined we have about 15 years in law enforcement, and we have endeavored to bring that experience to bear in order to fashion the best anticrime package achieveable at this time.

I happen to support bail reform. I would like to have seen bail reform enacted in this session of Congress I would liked to have seen sentencing reform passed in this session. They are both long overdue.

We have talked in session after session about reforming our sentencing procedures. It is important that we act in the 98th Congress and I intend to work very closely with my colleague and, in fact, with the chairman of the full committee, who also, I might say, is deeply committed to sentence reform. I am optimistic that in the early days of the 98th session we will indeed have bail reform before our full committee, and that we will pass out of the full committee a sentence reform measure that will be enacted into law.

Mr. Speaker, it is a good bill. It is an anticrime package that I am very proud to bring to the House. It is a bill that has the support of Senators STROM THURMOND and TED KENNEDY in the other body. It has the support of Senator ARLEN SPECTER, the distinguished former district attorney of Philadelphia on one hand and Senator JOE BIDEN of Delaware on the other hand. It has the strong support of our chairman, PETER RODINO and most of the measures in this bill have the support of the White House.

Mr. Speaker, it is a bill that Members can point to with pride and truly say that they voted for a good anticrime measure. I urge my colleagues to support the package.

● Mr. SHAW. Mr. Speaker, I rise in enthusiastic support of this fine piece of legislation aimed at combating our Nation's most insidious menace—crime. I, too, applaud the diligent efforts of the chairman and the ranking member of the Subcommittee on Crime. If not for their hard work and dedication, we would have concluded this session of Congress without addressing this most important issue.

In my home State of Florida, drug trafficking has reached epidemic proportions. It is estimated that 80 percent of the marihuana entering this country in some way effects my State. Therefore, I support the "get-tough" approach encompassed in this legislation.

I was proud to have cosponsored the Justice Assistance Act contained in this bill. I believe that the block grant approach is the most effective approach in controlling our escalating crime problem. The State law enforcement community is on the front line in the battle against crime. They are in desperate need of reenforcement; this bill will meet this need.

I am also proud to have cosponsored the product antitampering bill which is contained in this anticrime package. We all learned through the recent tragedy in Chicago, of the void in our Federal statutes. If this legislation serves to deter even one of these murdering fanatics, then it will serve a noble cause.

Mr. Speaker, I am disappointed however, that the much needed bail reform provisions were deleted from this bill. The Attorney General of the United States, noting the serious deficiencies in our current bail laws, state the courts "should have the authority to deny bail to those persons who are found by facts established by clear and convincing evidence to present a danger to particular persons or the community." The lack of such a provision is an infuriating ridicule of justice. Because it has become evident that no amount of bail will assure appearance by a drug trafficker at a trial, I introduced H.R. 4705, a bail reform measure. I was pleased to gain the support of every member of the Florida delegation, as well as over 60 other well-intended Members of Congress. I intend to reintroduce this legislation at the earliest possible date.

Mr. Speaker, again I want to extend my congratulations to the members of this subcommittee for their diligent work.●

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentleman from New Jersey (Mr. HUGHES) that the House suspend the rules and recede from its disagreement to the Senate amendment and concur in the Senate amendment with an amendment.

The question was taken.

Mr. CONYERS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 271, nays 27, not voting 135, as follows:

Messrs. LATTA, BARNARD, EMERSON, GOODLING, GRAMM, SMITH of Alabama, DREIER, DANIEL B. CRANE, and PHILIP M. CRANE changed their votes from "nay" to "yea."

Mr. HANSEN of Idaho changed his vote from "yea" to "nay."

Mr. BROYHILL changed his vote from "present" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the House receded from its disagreement to the Senate amendment and concurred in the Senate amendment with an amendment.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO SENATE AMENDMENT TO H.R. 3963

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct section numbers, punctuation marks, and cross-references in the engrossment of the House amendment to the Senate amendment to H.R. 3963.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

RELATING TO PROCEDURES FOR SUBMISSION OF CERTAIN REPORTS AND ESTIMATES BY THE PRESIDENT

Mr. WRIGHT. Mr. Speaker, I call up the joint resolution (H.J. Res. 635) relating to procedures for submission of certain reports and estimates by the President, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 635

Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That (a) notwithstanding the provisions of section 1105 of title 31, United States Code, the President shall transmit to the Congress not later than January 31, 1983, the budget for the fiscal year 1984, and (b) notwithstanding

the provisions of section 3 of the Act of February 20, 1946, as amended (15 U.S.C. section 1022), the President shall transmit to the Congress not later than January 31, 1983, the Economic Report.

SEC. 2. That (a) notwithstanding the provisions of section 1109(a) of title 31, United States Code, the President shall submit to the Senate and the House of Representatives the estimates required to be submitted by said subsection for the fiscal year 1984 not later than the date on which the President transmits to the Congress the budget for the fiscal year 1984, and (b) notwithstanding the provisions of section 1109(b) of title 31, United States Code, the Joint Economic Committee shall submit to the Committees on the Budget of both Houses the evaluation required to be submitted by said subsection for the fiscal year 1984 not later than the date on which the report for the fiscal year 1984 pursuant to section 5(b)(3) of the Employment Act of 1946 (15 U.S.C. 1024b) is filed with the Senate and House of Representatives.

Mr. WRIGHT (during the reading). Mr. Speaker, I ask unanimous consent that the joint resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Speaker, this resolution, which has been cleared with the minority leadership, simply permits the President to have until January 31 to submit his budget. Otherwise he would be required to submit the budget on January 18.

I am advised that this additional amount of time will be useful to the executive branch, and it certainly is of no harm to the Congress in that we will not even be in session on January 18.

I know of no objection to the resolution.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for yielding.

Mr. Speaker, I see the chairman of the Budget Committee here. Check me if I am wrong. Is it not true that 15 days after the Congress convenes the President normally would be obliged to submit his budget. And because we would be in a period of recess at that time, that this would be accommodating to both executive and legislative branches?

Mr. WRIGHT. The gentleman is exactly correct.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that I may proceed out of order for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WRIGHT. Mr. Speaker, I do this so I may yield to my friend, the gentleman from Texas (Mr. BROOKS).

BANKRUPTCY LEGISLATION

Mr. BROOKS. Mr. Speaker, there has been considerable discussion about bankruptcy courts in this country and here in Congress. I wondered what the procedure was we were going to follow, just what the leadership had in mind on this rather controversial issue.

Mr. WRIGHT. It is the plan of the leadership that this legislation will not be considered in this Congress. We do hope that it may be considered early in the next Congress.

There is, as the gentleman knows, as many of the Members, an order from the Supreme Court declaring the manner in which bankruptcy judges have been chosen to be unconstitutinal. It is necessary for some rectification to be made of that.

An extension already has been accorded by the Court to the Congress, and given the controversial nature of the legislation, Members have requested of the majority leader that it not be taken up at this time, but that it be taken up after we reconvene next year.

Mr. BROOKS. I thank the gentleman.

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New Jersey (Mr. RODINO), my distinguished friend, the chairman of the Committee on the Judiciary.

Mr. RODINO. I certainly appreciate the majority leader yielding to me.

Mr. Speaker, I must state, I regret that the leadership has advised the House that it will not take action on what I consider to be the most important measure that the House could consider. We have a deadline date of December 24 which the Supreme Court mandated. It stayed the order until that date based on a request that was made by the Solicitor General on the representation that we would act in this lameduck session.

□ 1730

I want this House to know that the Judiciary Committee, recognizing its responsibility, proceeded with the consideration of this matter. We believe that there is but one single issue, and that is the establishment of a constitutional system of bankruptcy.

The Judiciary Committee reported out a bill from its subcommittee and then out of the full committee with bipartisan support. I believe it behooves this House to have taken action.

I regret this very much, because I believe it is a reflection on the integrity of this institution to fail to act. Experts in constitutional law and on the question of bankruptcy feel that there could be an economic disruption because of the failure of our courts to be able to hand down decisions that are constitutional.

For this reason, I have requested that the leadership consider this. I know that there were other matters that might have been in controversy regarding bankruptcy as a whole; but I had pledged that since those matters were so complex and so varied to deal with, that we could have dealt with those matters in the 98th Congress.

I must say, with all respect to the majority leader and to the leadership of this House, that this is a matter that really, in my judgment, is something on which we are going to be found sorely wanting.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman.

I think all of us have enormous respect and great appreciation for the gentleman from New Jersey for his diligence, for his statesmanship and for the leadership he provides always for the Committee on the Judiciary.

I think all of us appreciate the comments he has made today and are on notice that it is necessary for the House and the Congress to take some action in the reasonably near future to resolve the problem.

I simply would report, without attempting to pass judgment on the merits of the issues, that many Members, not a few, but many Members have come to the majority leader and have complained that this is a highly controversial matter, that the bill as drafted by the committee and proposed to be forwarded has been opposed officially by the Judicial Conference.

They report that it is opposed by the Chief Justice of the Supreme Court.

They report that it has been officially acted against by the Trial Lawyers Association.

They report that it would result in the creation of some 230 additional judgeships bearing title chapter III jurisdiction and that this would dilute the judiciary.

They report, therefore, that in view of all these controversial characteristics of the legislation, they would be constrained to want to get a rule, if it were to come forward, and debate it fully with opportunities to amend. That, of course, could not be accomplished under a suspension of the rules, and all those things being considered, the lateness of the hour being considered, the desires of most Members to get about our business and go home without undertaking any additional controversies that are not necessary being considered, the leadership decided that we would postpone action until next year.

Mr. RODINO. Mr. Speaker, will the majority leader yield further?

Mr. WRIGHT. Of course, I yield to my friend.

Mr. RODINO. I again appreciate the gentleman yielding.

I merely want to state that we are aware of the fact that the Judicial Conference has another opinion regarding this matter and so has the Chief Justice. I respect both the Judicial Conference and the Chief Justice of the Supreme Court; but the Judicial Conference cannot be substituted, nor can it substitute its opinion for the legislature, and the Chief Justice was in the dissent of those who passed upon this measure.

I would add that the hearings before our committee reflected that the wide spectrum of those who are constitutional lawyers and those who are experts in bankruptcy law all stated that there was one single issue that was not in controversy and that was to establish article III courts so that we might have a constitutional system where there would be no challenge.

Among those the committee has heard from in support are the following:

Department of Justice.
American Council of Life Insurance.
American Bankers Association.
Los Angeles County Bar Association, Commercial Law & Bankruptcy.
Bar Association of the Seventh Federal Circuit, Chicago, Ill.
Iowa State Bar Association Board of Governors.
The Association of the Bar of the City of New York.
The Bar Association of the District of Columbia.
Knoxville Bar Association Board of Governors.
Maine State Bar Association, Bankruptcy and Reorganization Section.
Washington State Bar.
Bankruptcy Lawyers Bar Association, New York, N.Y.
Chattanooga Bar Association.
Federal Bar Association, Council on Federal Litigation.
The Cuyahoga County Bar Association, Cleveland, Ohio.
The Bar Association of Greater Cleveland.
The Association of the Federal Bar of the State of New Jersey.
The Equitable Life Assurance Society of the United States.
The National Bankruptcy Conference.
The Commercial Law League of America.
National Association of Credit Management.
New England Association of Credit Executives.
Wells Fargo Bank.
Union 76.
Ashland Oil, Inc.
TRW.
Georgia Pacific Corporation.
General Electric.
Delta Steel, Inc.
All States Steel Corporation.

Mr. BUTLER. Mr. Speaker, will the majority leader yield?

Mr. WRIGHT. I believe the gentleman from Virigina was on his feet first and I will yield to him and then, of course, I will yield to my friend, the gentleman from Ohio.

Mr. BUTLER. Mr. Speaker, I thank the gentleman for yielding.

I must tell this House how disappointed I am that we cannot find 40 minutes to discuss this very significant piece of legislation.

Twice within the last 2 weeks the Attorney General of the United States has written to the Speaker of this House and told him the chaos that will result if we do not act by December 24.

Twice the Attorney General has told the Speaker of this House that it is imperative that we take some action before the December 24 deadline which the Supreme Court has set.

After December 24, the bankruptcy courts of the United States will be virtually unable to act in a great portion of all the litigation that comes before them; 600,000 cases are pending in the bankruptcy courts of the United States. Without jurisdiction to determine these controversies, the whole load will fall upon the district courts of the United States, the already overburdened and overcrowded district courts. Every case, every issue, will be resolved over does this court have jurisdiction, without ever getting to the substantive issues that will come before the court.

How do you decide whether you are going to sell an asset or not? How do you decide whether you are going to hold it or not? All these things will be chaotic.

In this time of more bankruptcies than ever before in this time in which the Supreme Court has given us two extensions until December 24, for this Congress not to act is the height of irresponsibility.

The chaos that will result, I say to the majority leader, the chaos that will result is blood that will be on our hands. It will be our fault and there is no excuse for not assigning 40 minutes to this issue.

Mr. WRIGHT. With great respect for the gentleman and his opinions, I should simply like to report that the Attorney General has written not only to the Speaker in that vein, but also twice has written to the majority leader in the Senate and I am advised that the Senate has no intention of taking action on this legislation this year.

Therefore, we would do nothing but waste our time and perhaps the patience of some of the Members by taking it up at this time. For that reason, we would postpone it until next year.

Mr. BUTLER. Well, Mr. Speaker, if the gentleman will yield further, it seems to me that the body has spent as much time as we have on domestic content, as much time as we have spent on immigration, as much time as we have spent on those endless roads that are going nowhere, could spare 40 minutes for this controversial piece of legislation, this significant piece of legislation which I assure the gentleman if it passes this body, the Senate will act on it, because they have every intention of following the lead that we have in this body.

Mr. WRIGHT. Mr. Speaker, may I say to my distinguished friend that the litany of those things on which this House has frittered away time might be endless ad infinitum and as mindful as I am of those words written by Kipling when he spoke of old men and he said;

They peck out, dissect and extrude to the mind the flaccid tissues of long dead issues offensive to God and mankind, like vultures over an ox that the Army has left behind.

DIRECTING COMPLETION OF VIETNAM VETERANS MEMORIAL IN WEST POTOMAC PARK IN THE DISTRICT OF COLUMBIA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 636) directing the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia, and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro temopre. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 636

Whereas many Vietnam veterans and veterans' organizations have expressed great concern that the design of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia as dedicated on November 13, 1982, honor and recognize appropriately the service and sacrifice of the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war;

Whereas many individual veterans and veterans' organizations expressing such concern met with the Vietnam Veterans Memorial Fund, Inc. (the organization authorized by Public Law 96-297 to carry out the design and construction of the memorial), and reached an agreement in October 1982, concerning the memorial's final design;

Whereas the final design agreed upon and recommended by the Vietnam Veterans Memorial Fund, Inc. and the various veterans' organizations and other interested parties would provide for the placement of an American flag with an inscription at the point that is pointed at by the V-shape of the two intersecting walls of the memorial and is 40 feet from the apex of the walls on a line bisecting the apex and equidistant from the end of each wall and for the placement of a statute by Frederick Hart of three American servicemen of the Vietnam war on the same line at a point 170 feet from the apex of the walls of the memorial and facing into the V-shape formed by the walls; and

Whereas these two elements of the design complete the memorial as a fitting commemoration to the men and women of the

Armed Forces of the United States who served in Southeast Asia during the Vietnam war: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, the Commission of Fine Arts, the National Capital Planning Commission, and other pertinent parties shall follow the clear wishes of Vietnam-era veterans of the United States, veterans' service organizations, the Vietnam Veterans Memorial Fund, Inc., and other interested persons and parties and approve the Vietnam Veterans memorial in West Potomac Park in the District of Columbia to include the flag and inscription and the statue as agreed upon, submitted, and recommended in October 1982 by these organizations and interested persons and parties.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1740

EXPRESSING THE SENSE OF CONGRESS CONCERNING THE COMPLETION OF THE VIETNAM VETERANS MEMORIAL IN WEST POTOMAC PARK IN THE DISTRICT OF COLUMBIA

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the concurrent resolution (H. Con. Res. 437) expressing the sense of Congress concerning the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia, and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 437

Whereas many Vietnam veterans and veterans' organizations have expressed great concern that the design of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia as dedicated on November 13, 1982, honor and recognize appropriately the service and sacrifice of the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war;

Whereas many individual veterans and veterans' organizations expressing such concern met with the Vietnam Veterans Memorial Fund, Inc. (the organization authorized by Public Law 96-297 to carry out the design and construction of the memorial), and reached an agreement in October 1982, concerning the memorial's final design;

Whereas the final design agreed upon and recommended by the Vietnam Veterans Memorial Fund, Inc. and the various veterans' organizations and other interested parties would provide for the placement of an American flag with an inscription at the point that is pointed at by the V-shape of the two intersecting walls of the memorial and is 40 feet from the apex of the walls on a line bisecting the apex and equidistant from the end of each wall and for the placement of a statue by Frederick Hart of three American servicemen of the Vietnam war on the same line at a point 170 feet from the apex of the walls of the memorial and facing into the V-shape formed by the walls; and

Whereas these two elements of the design complete the memorial as a fitting commemoration to the men and women of the Armed Forces of the United States who served in Southeast Asia during the Vietnam war: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the Secretary of the Interior, the Commission of Fine Arts, the National Capital Planning Commission, and other pertinent parties should follow the clear wishes of Vietnam veterans of the United States, veterans' service organizations, the Vietnam Veterans Memorial Fund, Inc., and other interested persons and parties and approve the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia to include the flag and inscription and the statue as agreed upon, submitted, and recommended in October 1982 by these organizations and interested persons and parties.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

NATIONAL CLOSE-CAPTIONED TELEVISION MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 258) to authorize and request the President to designate the month of December 1982 as "National Close-Captioned Television Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. DERWINSKI. Mr. Speaker, reserving the right to object, I do so to request the distinguished chairman of the subcommittee to explain this measure.

Mr. GARCIA. If the gentleman will yield, I would like to yield to the sponsor of the legislation, the gentleman from Iowa (Mr. HARKIN).

Mr. DERWINSKI. I yield to the gentleman from Iowa.

Mr. HARKIN. I thank the gentleman for yielding.

As a matter of explanation, this joint resolution has already been passed by the Senate. It designates December of this year as the "National Close-Captioned Television Month." This is a bill jointly cosponsored by myself and the gentleman from Michigan (Mr. VANDER JAGT) earlier on in the session.

Basically, this just recognizes the tremendous contribution that close-captioning has made to the deaf and hard of hearing in our society. It recognizes that it has been a tremendous success.

As the resolution states, over $17 million has been invested by deaf and hearing-impaired persons in the United States to purchase these close-captioned devices and put them on their television sets. It recognizes the fact that President Reagan mentioned this in his inaugural address; that he was the first President to so speak to those millions of deaf and hearing-impaired. What this resolution does is permit the President to designate December of this year as "National Close-Captioned Television Month."

Mr. Speaker, I want to thank the gentleman from New York (Mr. GARCIA) for bringing this resolution to the floor. I thank the gentleman from Illinois (Mr. DERWINSKI) for his support, and I urge its passage.

Mr. DERWINSKI. Mr. Speaker, the gentleman's explanation is very proper, factual, and impressive.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 258

Whereas the Congress has officially proclaimed 1982 as the National Year of Disabled Persons;

Whereas hearing-handicapped Americans of all ages traditionally have suffered isolation from society and too often have unwillingly ended up as burdens to society rather than participating citizens;

Whereas the recent telecommunications breakthrough of "closed captioning" now enables these people to read on the television screen what they cannot hear and thus share—for the first time in history—that wealth of information, entertainment, and language so abundantly absorbed by the general public;

Whereas the innovative service, provided through the nonprofit and tax-exempt National Captioning Institute (NCI), represents the culmination of almost ten years of technological research and development, market exploration, and cooperation between government, industry, and community;

Whereas the nationwide service which began in March 1980 on ABC, NBC, and PBS is already proving to open up new educational horizons and new avenues toward equal opportunity for this severely disadvantaged population, particularly its children and youth;

Whereas hearing-impaired citizens have personally invested over $17,000,000 to date for purchase of decoding devices;

Whereas many Members of the Congress have long been actively supporting development, implementation, and expansion of the closed-captioned television service which is the first of its kind anywhere in the world; and

Whereas President Reagan, referring to the closed captioning of his inaugural ceremonies and televised addresses to the

Nation, has stated: "I feel very honored to be the first President in history to have spoken directly to people who had never before experienced this historic tradition": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is authorized and requested to issue a proclamation designating the month of December 1982 as "National Closed-Captioned Television Month" in recognition of this invaluable new service for deaf and hard-of-hearing American citizens, and calling on the people of the United States to observe the month with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

VACATING PROCEEDINGS ON SENATE BILL S. 3081

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent to vacate the proceedings that occurred on Saturday, December 18, 1982, with respect to the passage of the Senate bill (S. 3081) to modify the judicial districts of West Virginia, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. BUTLER. Mr. Speaker, reserving the right to object, and ask the gentleman from Wisconsin, and yield to him for that purpose, why it is necessary to vacate this and what is the purpose, and is this the last trip to the well?

Mr. KASTENMEIER. If the gentleman from Virginia will yield, I am chagrined to suggest that on Friday we attempted to take the bill S. 3105, dealing with the same subject, up and it was objected to on the grounds that it was not germane to the subject of the bill.

Saturday, inadvertently, this gentleman referred to, to take up a bill dealing with the same subject, S. 3081, which had passed the Senate earlier but had an error in the county designation only and to correct that I have asked that we vacate the proceedings relating to S. 3081 and I intend to ask that we unanimously consent to proceed with S. 3105 again.

Mr. BUTLER. Mr. Speaker, I withdraw my reservation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MODIFYING WEST VIRGINIA FEDERAL JUDICIAL DISTRICTS

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3105) to modify the judicial districts of West Virginia, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. BUTLER. Mr. Speaker, reserving the right to object, I ask the gentleman to explain the intent of this bill.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I am happy to yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding.

Mr. Speaker, this bill has been explained twice before, on Friday and on Saturday. The explanation is the same.

Incidentally, the bill has the complete support of all Members in this body and in the other body of the West Virginia delegation. There is no opposition whatsoever that I can determine.

The bill merely shifts two districts from the northern district to the southern district, and three districts from the southern district to the northern district, and the places of holding court, correspondingly.

It also shifts the two swing judges, one into each district.

It has no cost and has the complete support, as I say, of the West Virginia delegation. There is no reason not to agree, to my knowledge, to my request.

Mr. BUTLER. Further reserving the right to object, I would like to observe, Mr. Speaker, that we have now taken on this piece of legislation approximately 25 percent of the time it would have taken us to discuss the bankruptcy bill on this floor. I do not understand how we can always find time for these sorts of things when we cannot take time to support important legislation like the bankruptcy bill.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

The Clerk read the Senate bill, as follows:

S. 3105

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 129 of title 28, United States Code, is amended—

(1) in subsection (a) by—

(A) striking out ", Wirt, and Wood";

(B) inserting "Braxton," after "Berkeley,";

(C) inserting "Pocahontas," after "Pleasants,";

(D) inserting "Webster, and" after "Upshur"; and

(F) by striking out "Parkersburg," and

(2) in subsection (b) by—

(A) striking out "Braxton,", "Pocahontas," and "Webster,"; and

(B) inserting "Wirt, Wood," after "Wayne,"; and

(C) striking out "and Lewisburg." and inserting in lieu thereof "Lewisburg, and Parkersburg.".

SEC. 2. (a) The existing district judgeship for the Southern District of West Virginia, authorized by section 2 of the Act entitled "An Act to provide for the appointment of additional district and circuit judges and for other purposes", approved October 20, 1978, (92 Stat. 1632; 28 U.S.C. 133 note) shall, as of the date of enactment of this Act, be authorized under section 133 of title 28 of the United States Code as a district judgeship for the Northerm District of West Virginia, and the incumbent of that office shall henceforth hold office under section 133, as amended by this Act.

(b) The existing district judgeship for the Northern and Southern Districts of West Virginia shall be authorized as the district judgeship for the Southern District.

SEC. 3. The table in section 133 of title 28, United States Code, is amended by striking out the following:

"West Virginia:

"Northern	1
"Southern	3
"Northern and Southern	1",

and inserting in lieu thereof the following:

"West Virginia

"Northern	2
"Southern	4".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON H.R. 3420, PIPELINE SAFETY AUTHORIZATION ACT OF 1981

Mr. FLORIO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3420) to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes, with Senate amendments thereto, concur in the Senate amendments with amendments, and that the House insist on its amendments and request a conference with the Senate thereon.

The Clerk read the title of the bill.

The Clerk proceeded to read the Senate amendments and the House amendments to the Senate amendments.

Mr. FLORIO (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. LENT. Mr. Speaker, reserving the right to object, this is a bill which the minority on the Committee on Energy and Commerce has reviewed and it is in accordance with our wishes that the bill be passed.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LENT. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, do we have any money involved in this bill?

Mr. LENT. There are funds in the bill, but these funds are consistent with the funds that have been approved by representatives of the administration. It is, I believe, consistent with the budget.

Mr. WALKER. It is within the budget?

Mr. LENT. That is my understanding.

Mr. WALKER. I thank the gentleman.

Mr. LENT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey to dispense with the reading?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New Jersey?

Mr. KAZEN. Mr. Speaker, reserving the right to object, is the gentleman not going to explain the amendment we are offering?

□ 1750

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. KAZEN. Mr. Speaker, reserving the right to object, I do so only for the purpose of understanding what we are doing.

Mr. FLORIO. Will the gentleman yield?

Mr. KAZEN. I would be delighted to yield.

Mr. FLORIO. We are attempting to go to conference on the basic bill and two pieces of legislation which have passed this House. One is the Railroad Safety Act, and the other is the Shipping Reform Act, which passed by overhelming majorities. Both these pieces of legislation passed the House and we are attempting to go to conference. Both are supported by the administration.

Mr. KAZEN. I understood the gentleman to say that the Senate had amended it, and he is asking to take it up with House amendments.

Mr. FLORIO. The House amendments embody and consist of the House position. The House amendments involve the bodies of the House bills.

Mr. KAZEN. I thank the gentleman for his explanation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey? The Chair hears none, and without objection appoints the following conferees: Title I, Messrs. JONES of North Carolina, BIAGGI, RODINO, SNYDER, and MCCLOSKEY; for title II through title VIII of the House amendment and modifications committee to conference, Messrs. DINGELL, FLORIO, and LENT.

A CALL FOR ATLANTIC UNION

(Mr. FINDLEY asked and was given permission to address the House for 1 minute.

Mr. FINDLEY. Mr. Speaker, the devastation of two world wars produced the greatest incentive for the union of democratic peoples in the 20th century. World War I inspired Woodrow Wilson to formulate his Fourteen Principles and led to the creation of the League of Nations.

World War II yielded more—and more successful—attempts at union: the North Atlantic Treaty Organization, and the European Community. The post-1945 success is accountable in part because of the bitter fruits of disunity in the post World War I era—the failure of the League of Nations, the disintegration of the European political fabric, and the isolationism of the United States. These fragmenting events contributed greatly to the outbreak of war in 1939.

The destructive power of nuclear weapons may not again, however, permit the international community to reshape itself after a world war. Today's efforts to improve the well-being and security of the democratic nations through greater cohesion must, therefore, precede and help to deter conflict rather than emerge from it.

Though world war III is not imminent, we are, nonetheless, witnessing growing divisions in the Western World whose implications for peace and security are disturbing. The United States and its allies differ on the nature of the Soviet threat and the necessary efforts to meet that threat. Defense spending, East-West arms limitation, and technology transfer controls are areas that provoke sharp intra-Alliance debate. A new Greek Government suggests that it may close down U.S. bases in Greece and even withdraw Greece from NATO which would be a devastating blow to Alliance solidarity. Perceptions about the Middle East, Africa, and other regions of the Third World often are sharply at variance among NATO member States. While it would be tragic to overemphasize United States-European differences and foolish to predict the end of Atlantic cooperation, divisions among the Western partners are, nevertheless, serious and to be taken seriously.

It is critical to bridge these differences before they become deeper yet.

The United States should, therefore, take the lead in building a Union of Western Democracies, a federal union which would enhance the security of all peoples of the federation by more effectively pooling their resources toward a common defense and other common needs.

I speak here of an organic political union on the order of the union which successfully united the Thirteen Original United States. It would be a federation, not a confederation. It would be a government, not just an alliance. The basic unit of sovereignty, as in the United States, would be the individual citizen—not the nation-States which would form the union. The authority established in the new federation would be exercised by democratic institutions based on majority rule and protection of individual rights. Other authority would be reserved to the lower levels of government.

The United States and Europe already recognize that their security interests are intertwined. The destruction of either continent would mean the destruction of both.

However, each side of the Atlantic fears that the other is lacking the resolve to defend its common interests. We have witnessed these fears expressed in an acrimonious transatlantic debate over NATO nuclear strategy, commitments to target levels of defense spending and what to do about the crisis in Poland.

A Union of the Atlantic Democracies would dispel these fears because it would establish a system through which Europe, the United States, and Canada would establish common policy on defense obligations and other matters of external policy. Each would have a greater incentive because the United States, Canada, and Europe could be certain that the burden was equally shared, fairly divided, and directed toward an effort that involved a joint commitment.

A Union of Western Democracies should be more realizable today than in the immediate aftermath of World War II. International communications including television, education, and travel have brought the citizens of the Western democracies closer together and made their separate cultures more familiar, better understood, and more compatible.

Moreover, there is no longer a gap between the standard of living in the United States and that in Europe. Indeed, U.S. per capita gross domestic product ranks only sixth among the NATO partners after Denmark, West

Germany, Luxembourg, the Netherlands, and Belgium.

Another factor which makes Atlantic Union more realizable today, ironically, is the greater appreciation in the United States and in European capitals such as Paris and Brussels of the need to permit the decentralization of government and greater local control over many of the decisions that affect the daily lives of all citizens. This is very much in keeping with a basic premise of Atlantic Union which stresses the decentralization of decisionmaking in all but foreign policy and defense and places highest priority upon the right of individuals to control their own lives.

Moreover, Europe has had its own considerable experience with union through its efforts to coordinate economic policies and political decisions in the European Community. This experience has demonstrated the importance of making the burgeoning federation in Europe a trans-Atlantic endeavor at the earliest possible date.

Today, when the Soviet threat challenges the West and totalitarianism defies democratic hopes and aspirations everywhere, it is critical for the West to pool its energies and resources through effective union. A union of free people will strengthen the democratic community of nations, and at the same time quicken the promise of democracy in other nations which would later seek to join.

Atlantic union offers the best hope the world can finally emerge from the costly and dangerous nuclear arms, race. With the vast resources of the western world united behind a common external policy, the Soviet Union, even the blindest of its leaders, would see the futility of nuclear blackmail.

A would be aggressor would no longer be able to divide and conquer—to play one part of the community of free peoples off against another. He would know he must engage the military might of the entire union if he engaged any part of it.

Finally, after all these years, the burden of armaments could be lifted safely and wisely from the taxpayers.

And it would also relieve anxieties within the Soviet system. Twice in recent history Russia has been invaded through Poland, and this memory is bound to cause anxieties in Soviet leadership. The political union of western Europe with the United States and Canada would reduce to zero the danger to Russia of renewed invasion.

Dwight D. Eisenhower once told me, "Atlantic union would solve almost all of our Nation's problems."

A dream world proposal? Hopelessly visionary?

The great union of the free which began its business on this continent in 1789 was the product of men of vision who had wisdom to see the need for political union of the free and the courage to act.

We, today, surely can see the need for a new broader political union of the free—Atlantic union. Do we have the courage to act?

It is my fervent hope that in the new Congress will be Members willing to pick up the torch of Atlantic union and carry it. Public understanding is needed. Each Congressman has what Teddy Roosevelt would call "a bully pulpit." Each can help create public understanding.

One of the primary motivations that led me to seek election to Congress years ago was the desire to create support for the Atlantic union idea. My dream was to get elected, secure membership on the Foreign Affairs Committee and from that position elicit support from my colleagues for legislative initiatives moving toward the goal of union.

I received broad support for several years although never quite enough votes to emerge successfully from the legislative process. A resolution I sponsored called the Atlantic union resolution came within 18 votes of majority approval one day on the floor of this body. Joining me as chief sponsors were the gentleman from Texas, now the majority leader, and the gentleman from Arizona, Mr. UDALL.

The experience demonstrated the need for broader public understanding of the federal principle. That need still exists.

My membership in this body will end in a few hours, closing an exciting and rewarding experience of 22 years. Wherever I am in the future I will seek ways to further the goal of Atlantic union, because I believe it is not only desirable but a necessity. It must some day come into being. The only question is whether it will happen in desperate circumstances in the wake of some engulfing international calamity—economic or military—or whether it will come into being soon enough to prevent such calamity.

I invite all my colleagues of the present, and those who will serve in the next Congress, to help prevent a calamity by pressing for Atlantic union.

TRIBUTE TO DEPARTING REPUBLICAN MEMBERS OF CONGRESS

(Mr. HYDE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HYDE. Mr. Speaker, I cannot let the waning hours of the 97th Congress dwindle into the record books without commenting that Republicans are supposed to be drab, stuffy, colorless individuals, and Democrats are supposed to be bright, effervescent, quotable, and where all the fun is. I suggest that in the taking leave from this body of ROBERT DORNAN of California, MILLICENT FENWICK of New Jersey, and EDWARD DERWINSKI of Illinois, a lot of color, a lot of excitement, a lot of rhetorical ability, and a lot of integrity is leaving, and this body will be somewhat the less for their absence.

ED DERWINSKI contributed a rare sense of humor leavened with an uncommon practicality to the vital issues we must deal with.

MILLICENT FENWICK brought an elegant sincerity to the many issues in which she took an interest.

BOB DORNAN brought a fierce commitment to his tireless work in this body—a sense of patriotism and total devotion to "the permanent things."

I cannot mention the litany of colorful, contributing people and leave out the name of JOHN ROUSSELOT, who has been known for many a fiery speech, and through the sheer force of his personality exercising great influence.

But these people and many, many others have contributed so much to this body. America has been well served by them all. We have all learned from them. We have all been illuminated by them. Yes, we have often been entertained by them, and this body will be the less for their leaving. Most of us can be replaced, but they shall each leave a place that cannot be easily filled. I regret their leaving, but the memory does linger on.

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House of December 17, 1982, the Chair declares a recess subject to the call of the Chair. Bells will be rung 15 minuutes prior to the reconvening of the House.

Accordingly (at 5 o'clock and 56 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 2130

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. NATCHER) at 9 o'clock and 35 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and a concurrent resolution of the House of the following titles:

H.R. 2520. An act for the relief of Emanuel F. Lenkersdorf;

H.R. 5858. An act for the relief of Mocatta & Goldsmid, Ltd., Sharps, Pixley & Co., and Primary Metal & Mineral Corp.;

H.R. 6120. An act to reauthorize the Deep Seabed Hard Mineral Resources Act for fiscal years 1983 and 1984;

H.R. 6254. An act to amend title 3, United States Code, to clarify the function of the U.S. Secret Service Uniformed Division with respect to certain foreign diplomatic missions in the United States, and for other purposes;

H.R. 6419. An act to direct the Secretary of the Interior to release certain conditions contained in a patent concerning certain land conveyed by the United States to Eastern Washington University;

H.R. 6993. An act to revise, codify, and enact without substantive change certain general and permanent laws related to transportation as subtitle I and chapter 31 of subtitle II of title 49, United States Code, "Transportation";

H.R. 7377. An act to designate the Lakeview Lake project, Mountain Creek, Texas, as the "Joe Pool Lake";

H.R. 7378. An act to codify without substantive change recent laws related to money and finance and to improve the United States Code;

H.R. 7423. An act to recognize the organization known as Former Members of Congress; and

H. Con. Res. 436. Concurrent resolution relating to the enrollment of House Joint Resolution 631.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 631) entitled "Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes."

The message also announced that the Senate further insists upon its amendments to the bill (H.R. 5002) entitled "An act to improve fishery conservation and management" disagreed to by the House, agrees to the further conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PACKWOOD, Mr. GORTON, Mr. STEVENS, Mr. HOLLINGS, and Mr. INOUYE, to be the conferees on the part of the Senate.

MAKING IN ORDER CONSIDERATION OF SENATE AMENDMENT OR AMENDMENTS TO H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that it shall be in order, any rule of the House to the contrary notwithstanding, to consider, without intervening motion, a motion, if offered by Representative ROSTENKOWSKI of Illinios, to take from the Speaker's table the bill, H.R. 6211, to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, with the Senate amendment or amendments thereto, and to concur in the Senate amendment or amendments with an amendment or amendments, all points of order against the Senate amendment or amendments and against the motion are hereby waived, the Senate amendment or amendments and the motion shall be considered as having been read, and the previous question shall be considered as ordered on the motion to final adoption without intervening motion.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. MICHEL. Mr. Speaker, reserving the right to object, I wonder if the chairman of the committee would tell us precisely what he is asking here.

Mr. ROSTENKOWSKI. Mr. Speaker, if the gentleman will yield, the chairman of the Ways and Means Committee is moving in a direction which is consistent with the Senate agreement, that we can conclude what has already been passed by the House of Representatives, known as the gas tax bill, without as much controversy as has been evidenced in the last 24 hours.

Mr. MICHEL. Is this similar to the unanimous-consent request that we had adopted for consideration of the continuing resolution?

Mr. ROSTENKOWSKI. Similar to it, yes, it is.

Mr. MICHEL. And if the gentleman does not get unanimous consent, would it be the gentleman's intention to get a rule?

Mr. ROSTENKOWSKI. The chairman of the Committee on Ways and Means or the conference would be constrained to get a rule, yes.

Mr. WALKER. Mr. Speaker, will the gentleman yield under his reservation?

Mr. MICHEL. I am happy to yield.

Mr. WALKER. Mr. Speaker, the language seemed to cover a pretty broad swath, amendment or amendments. Do we have any idea as to what the subject areas are that might be included in some of those amendments that would be coming over in the bill?

I think we are all familiar with the gas tax argument. What about several other things that might have been adopted? I do not think we are necessarily familiar with some of those.

Mr. MICHEL. The gentleman is saying that the request is rather broad sweeping, that amendments and all amendments thereto, that that being rather loose, could the gentleman from Illinois enlighten the gentleman from Pennsylvania a little bit more specifically?

Mr. ROSTENKOWSKI. Mr. Speaker, if the gentleman will yield, as my colleague is aware, this is an amendment to the public works provisions. It has the jurisdiction of both the Public Works Committee and the Ways and Means Committee.

One understands, certainly, that germaneness in the other body is not as confined as it is here in the House of Representatives.

One would understand, as chairman of the conference representing the House, the gentleman from Illinois would protect the prerogatives of the House.

Mr. MICHEL. Do I gather from what the gentleman says that the other body having no rule of germaneness, that the gentleman would intend to clean up some of the very loose language of the other body to more conform to what we would like to see embodied in this measure?

□ 2140

Mr. ROSTENKOWSKI. If the gentleman from Illinois would yield, it would be the intention of the chairman of the Committee on Ways and Means to protect the legislation as passed by the House of Representatives and to, if necessary, clean up what the other body has done.

Mr. MICHEL. I would have to say to the gentleman that I have, personally, no objection, but under my reservation, I would be happy to yield to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, the only thing I am concerned about is that I understood a couple dozen amendments have been added by the Senate in this bill. I am seeking whether or not we are going to have that come back in that form or, if I understand the gentleman from Illinois, he is going to try to remove some of those in conference before he brings it back here so we are not faced with a couple dozen amendments on rather important subjects in voting on it in the House.

Mr. ROSTENKOWSKI. If the gentleman from Illinois would yield further, I think a commitment has been made in debate originally on the provisions of this legislation to protect the position of the House and as consistent with his policy will try in every way to refrain from adopting any amendments, whether mischievous or not, in the conference.

Mr. WALKER. I thank the gentleman for yielding.

Mr. MICHEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ATOMIC ENERGY ACT AMENDMENTS OF 1981

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. 97-983) on the resolution (H. Res. 636) providing for the consideration of the bill (H.R. 3809) to pro-

vide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes, and the Senate amendment thereto, which was referred to the House Calendar and ordered to be printed.

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 636 and ask for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 636

Resolved, That immediately upon adoption of this resolution, the bill, H.R. 3809, to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes, together with the Senate amendment thereto be, and the same is hereby taken from the Speaker's table to the end that the Senate amendment be and the same is hereby agreed to.

The SPEAKER pro tempore. The gentleman from Massachusetts, Mr. MOAKLEY, is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio (Mr. LATTA) and pending that I yield myself such time as I may consume.

GENERAL LEAVE

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the pending resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MOAKLEY. Mr. Speaker, the resolution (H.R. Res. 636) provides for the consideration of the House-Senate agreement on the bill (H.R. 3809), the nuclear waste disposal legislation.

Mr. Speaker, this is an unusual rule and I should explain the parliamentary situation. The Senate passed a nuclear waste bill (S. 1662) on April 29.

Three House bills, however, were initially referred to four committees and sequentially to four other committees. The bills were involved in considerable controversy because of differing interests of the large number of committees and the concerns of Members representing candidate States for nuclear waste facilities. The House was unable to finally pass the bill (H.R. 3809) until December 2.

Even after passage, the House was faced with additional difficulties. Since the Senate bill contained a provision (S. 1662, section 603) clearly within the jurisdiction of the Committee on Ways and Means for revenue measures, the Committee on Rules properly could not provide for a motion to go to conference on the Senate bill. Likewise, even if a conference could have been fashioned within the constitutional constraints, the legitimate jurisdictional claims of eight House committees and three Senate committees would have made it impossible for a conference committee to act, within the timeframe of the impending adjurnment of the Congress.

Faced with these difficulties, the managers for the two bodies have negotiated an agreement that protects the positions of each House. They have worked in close consultation with Members and committees who have vital interests in the bill.

In virtually every important respect, the process by which the matter is placed before the House today represents the full equivalent of a conference report. The Senate amendment is a prenegotiated text. The Senate has included nothing which was not accepted by House managers. The rule takes up that text and concurs, clearing the compromise for the President.

Neither I, nor the Members who have managed this measure for the House are completely satisfied with every provision.

But, Mr. Speaker, it must be recognized that it would be impossible to deal with such a complicated and controversial bill without dissent. Certainly the agreement does not meet all of my personal preference for a sound nuclear waste policy.

However, I wish to point out that the negotiators have agreed to restore the Rules Committee amendments. The amendments guarantee that a State can object to the siting of an away-from-reactor—AFR—facility or to the siting of a repository. A State objection would be absolute unless overturned by action of both Houses of Congress.

This amendment significantly strengthens the bill. If the Department of Energy, or any successor organization which may be established, develops a sound and fair siting process and a State objection is clearly political, there is little doubt that Congress would vote to permit construction.

But, equally, it is clear that Congress will not intervene if an inadeaquate or unfair program is established.

A strong State veto insures a comprehensive, fair, and responsible siting process. The strength of the State veto proposed here places an enormous responsibility on the Department to seek, and on the Congress to enact, any legislative improvements suggested by our early experience with the nuclear waste program.

Mr. Speaker, I do not want to claim that the Rules Committee amendments are the total solution to the nuclear waste issue. But I do believe their acceptance balances any structural problems in the bill by insuring a high degree of protection against mismanagement or unfairness in the program.

I wish to explain the parliamentary situation clearly before concluding. The rule inself adopts the agreement. No other motion or debate is provided and the matter is cleared by the adoption of the rule. Therefore, the managers for the committee will yield for debate on the merits of the measure and for any necessary colloquy. The committee is eager to accommodate Members in this regard because of the problem posed, in relation to legislative history, by the highly expedited handling of this matter in the other body.

The committee is aware that the Senate substitute was handled on the floor under a 15-minute time agreement. The managers for the Senate attempted to resolve the difficult matter of establishing a legislative history by submitting statements and colloquies for subsequent printing in the RECORD. For this reason, the committee proposes to be as generous as possible with its time to accommodate Members in establishing clearer legislative history.

Mr. Speaker, the rule provides a fair and orderly procedure for dealing with a complex matter. I urge the adoption of the resolution and reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I would respond to a few of the points that have been made during debate on the resolution.

The most difficult issue to respond to is that raised by my friend and colleague from Massachusetts (Mr. MARKEY) because I find myself in general agreement with him on his amendment. In fact, it was clear that it enjoyed the support of a majority of my committee.

But the committee, with some reluctance has not recommended opening the bill to amendment, and I find it painful to be in disagreement with the gentlemen, for whom I have the highest regard and affection. But, if any change, no matter how meritorious, is made, the bill will die for this session. And, frankly, if the bill dies now, I would be surprised to see any nuclear waste bill in the next Congress.

Mr. Speaker, if this country fails to enact a comprehensive waste policy soon, the issue of waste disposal will have been decided. And that policy will be the abandonment of buried spent waste at scores of reactors around the country as reactors begin to decommission in the later part of this century.

None of the alternatives for a waste program, Mr. Speaker, is worse than that. I would also stress that the strong State review provisions in this

legislation will force the administration and Congress to monitor and improve the program.

And, on that point of State review, I wish to review the history of the congressional review provisions of this legislation. The distinguished gentleman from New York (Mr. STRATTON) argues strongly for a one-House sustain procedure. But I wish to point out that the Committee on Armed Services, of which the gentleman is a ranking and respected member, reported to the House on the subject recommending a two-House vote to overturn a State objection. The same position was taken by the Committee on Interior and Insular Affairs and the Committee on Rules. The Committee on Energy and Commerce proposed a one-House sustain procedure.

The Rules Committee compromise resolved the issue in a fair manner. We proposed a two-House veto of a State objection but required that both the House and Senate must vote within a short timeframe. So long as a vote is guaranteed, the procedures are identical as a political and parliamentary matter. For a State to win under the one-House language, it needs only the support of one House to pass a resolution sustaining its objection. For a State to win under the two-House language, it needs only the support of one House to defeat a resolution overturning its objection.

Mr. Speaker, based on previous House and Senate votes, I am aware that many Members share the concern of the gentleman from New York and do not agree that the procedure is identical. I am also aware, that I have been successful in getting my amendment put back in this agreement only because of the parliamentary situation now in force, and that it is unlikely that the two-House procedure would be in a future nuclear waste bill.

Mr. Speaker, I do not endorse every provision of the agreement. As I listen to my friend from Massachusetts, I am concerned that many of the legitimate issues he raises need to be addressed in the future. But I see no reasonable alternative at the present and I move the previous question on the resolution.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Speaker, let me say I listened very closely to what the gentleman from Massachusetts said about this rule and I concur 100 percent.

Very simple, upon the adoption of this resolution, H.R. 3809 and the Senate amendment thereto are taken from the Speaker's table and agreed to by the House. As he indicated, this procedure does not allow for amendment. The Committee on Rules did not provide for that, but it did provide for agreeing to the Senate amendments.

This bill represents years of work in both Houses on this nuclear waste problem. We do have a serious problem with nuclear waste in the United States. There are people who believe that this is not the perfect bill, but it is the most perfect piece of legislation on this subject that this House has before it and that this Congress can pass before adjournment.

With that, Mr. Speaker, I would like to yield 5 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to urge my colleagues to vote for this rule tonight. It is vital that we do pass this rule and send this bill to the President for signature.

□ 2150

This is the third Congress that I have worked in on this legislation and this subject matter. The last Congress, I recall that we failed at the last moment, just like this, to pass a bill. I would urge my colleagues not to let that happen again.

This legislation has been endorsed by three House committees; has had not only hours upon hours and days and weeks of consideration in this Congress, but also in prior Congresses as well. Members will recall that this bill is to establish the procedures, the schedule for the selection of a final repository for nuclear waste. So far as generation in this country, we have had the technology, the know-how, to deal with this problem of where nuclear waste will be sited, but we have lacked the political will to do something about it. At the same time, other nations in the world are far ahead of us in putting that kind of technology to work, and have come up with their own solutions while we have done nothing. Let us not let that happen again.

This bill is essentially the House bill. The other body worked from the House bill in drafting and crafting their amendments to it. Yes, there have been some changes, but I would say in only a few instances have those changes been substantive. I think that these changes that have been made improve the bill, improve the workability, of the selection process that will take place.

One of the amendments in this bill is one which I had to give up on, about which Members felt strongly, and that was the amendment providing for a State veto of the final site selection at the end of the process. I felt strongly that we should not adopt the Markey amendment, the amendment that was proposed in the House by Mr. MARKEY, that would give the Governors a State veto. However, we compromised on this and we agreed to the amendment that he offered in the House providing that there would be expedited procedures, consideration here in the House and the other body, if that should ever take place.

So, all through this bill that we are asking the Members to support we find compromises, workable compromises that assure, in my opinion, broad support of this legislation.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. CORCORAN).

Mr. CORCORAN. Mr. Speaker, I rise in support of H.R. 3809 as amended by the Senate, but I do so with some dismay regarding one provision which, unlike the version approved by the House, now provides for a two-House veto of the Presidential selection of a permanent repository site for final storage of nuclear waste.

In December 1980 the House approved the "one-House sustain" approach, as did the Senate in its consideration of nuclear waste disposal legislation in April of this year. On December 2, the House reaffirmed its recorded vote of November 29 in support of this mechanism. The siting veto provision in the bill as it was returned to us by the Senate thus clearly goes beyond the scope of previous deliberations.

The significance of the two-House veto is that it makes it much more difficult, and indeed unduly difficult, to serve the national public interest by creating a permanent repository. To that extent, the likelihood is increased that use of interim spent nuclear fuel storage facilities will persist and that pressures will continue to grow for Federal takeover of private away-from-reactor storage facilities such as the one in my district near Morris, Ill., which is generally viewed as potentially most attractive in that context. Establishment of a permanent repository, by eliminating any need for interim storage away from reactors, reduces transportation of spent fuel as well.

This aspect of the bill before us is not in the interest of the Illinoisans I represent. From our standpoint, this amendment by the Senate to the House-passed bill is a weakening one. In our State, as I noted in House debate recently, six reactors are projected to lack storage capacity in 1993, and two by the end of this decade, even assuming at-reactor storage is maximized beyond present conditions. Other States have even worse problems in this respect, putting even greater pressure on the AFR facility at Morris. Without resorting to away-from-reactor storage beyond a utility's service area and with no change in present storage capacity, problems are anticipated as soon as mid-decade in our country. Certainly, we must not induce the shut-down of reactors upon

89-059 O-86-27 (Pt. 24)

which so many Illinoisans and other Americans depend for lack of spent fuel storage space, yet without timely operation of a permanent repository the only alternative to that is away-from-reactor storage.

As the need for capacity grows increasingly over the coming years should a permanent disposal facility not be available, the interim storage provisions of this legislation, which I offered in significantly the same form as they appear at this hour, may well be inadequate because of this new Senate provision. That situation would again prompt consideration of granting the Secretary of Energy the authority to "construct, acquire or lease one or more away-from-reactor facilities" which was proposed to Congress in 1980 by former President Carter and which was contained in the bill passed by the Senate in April. It was to eliminate that broad power that so concerns my constituents that I suggested the compromise which remains largely intact.

As I said in a letter dated December 2, to my Illinois colleagues in the House, Mr. Speaker, on the permanent disposal matter "the one-house language represents a compromise approach that carefully balances our desire to build and put into service a permanent repository with the desire of States to have a role in the selection of repository sites." Though we appear to be on the verge of finally surmounting the political obstacles that have for so long impeded attaining a nuclear waste disposal program, for which I have worked over the last several years in the context of my committee assignment, it is unfortunate that the Senate has insisted on putting my citizens in a threatened position by the adoption of this ill-advised two-House veto on permanent disposal repository sites for nuclear wastes. With that substantial reservation, I urge the approval of the bill with the Senate amendments.

Mr. MOAKLEY. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. STRATTON) for the purpose of debate only.

Mr. STRATTON. Mr. Speaker, I know what happened to King Canute when he tried to keep the waves and the tide from coming in, and I know, having been here a few years in the House of Representatives, probably nothing is more futile than to try to take on the distinguished Committee on Rules, but I think at least the Members, before we vote on this unfortunate rule, should at least realize what is going on.

In the first place, Members may recall that this morning when we came in, the question was asked of the chairman of the Rules Committee as to whether there were any bills waiting for rules, and the majority leader said he knew of no bills that were waiting for rules.

□ 2200

The bill on which we have the rule now—and it was a rule that was cooked up just about 20 minutes ago without any notice whatsoever to the membership—is a rule that is designed to thwart the procedures which we have been operating under during most of these final days of the lame-duck session, namely, unanimous consent. Somebody found out that the gentleman from New York was going to refuse unanimous consent, so suddenly we get the Rules Committee to come out with a rule.

But let me tell the Members what is even worse about this rule. I find it difficult to see how the gentleman from North Carolina, who fought very violently, and with my support and with the support of the House on two occasions, for a one-House sustained arrangement on the legislation, could now say that there is nothing really in the bill that he does not like, but the Senator from Wisconsin succeeded in putting in the two-House veto arrangement which actually guts the basic purpose of the bill.

This bill does only two things. It is designed to create interim storage, and it is designed to create permanent repositories eventually for nuclear waste. If we are going to have a two-House veto, obviously no State is ever going to accept any repository, either interim or permanent.

Why the Rules Committee should go into a surreptitious session to come out with a rule that violates what the House of Representatives voted on two occasions when we had the bill before us, is hard for me to understand. What we are doing here is a charade because we are not going to get this kind of a repository with this kind of legislation, and I think it is a disgrace that we should allow one Senator to do this.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. LATTA. Mr. Speaker, I yield 1 additional minute to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, I think it is unfortunate that one Senator should be able to hold up the whole House on this operation. If we have a two-House sustaining requirement or override requirement, along with the President, we have seen in the last few days what one Senator can do in tying up the Congress, and if we have two Senators from each State, they will be able to tie it up even more, so we will not really have what this is intended or designed to do.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, I appreciate everything the gentleman is saying, and we did fight together here.

Mr. STRATTON. But the gentleman gave up too easily, and that is exactly what happens when we do not have anybody who is willing to stand up for nuclear power.

Mr. BROYHILL. Mr. Speaker, the gentleman knows that——

Mr. STRATTON. The gentleman from Illinois says that this is all right and it is going to work out, but he knows the sustaining arrangement will not work.

Mr. CORCORAN. Mr. Speaker, will the gentleman yield to me?

Mr. BROYHILL. Mr. Speaker, will the gentleman yield to me to point this out?

Mr. CORCORAN. Mr. Speaker, could we have 1 additional minute?

Mr. Speaker, I appreciate what the gentleman said.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. LATTA. Mr. Speaker, I yield 1 additional minute to the gentleman from New York (Mr. STRATTON).

Mr. CORCORAN. Mr. Speaker, will the gentleman yield to me?

Mr. STRATTON. I will be glad to yield to the gentleman from New York. I think we ought to tell the story as it is, and I think the gentleman wants to do that.

Mr. CORCORAN. Mr. Speaker, I certainly do want to tell the story as it is, and I appreciate what the gentleman says about the unfortunate circumstance where the Senator from Wisconsin has had this impact.

What would be even worse would be if one Member from this body would have the occasion to hold up the passage of this monumental legislation. I do not like what is in here, but I certainly understand that we have to move forward on nuclear waste management.

Mr. STRATTON. Mr. Speaker, let me reclaim my time. It is not going to be monumental legislation with a two-House override.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MOAKLEY) for yielding me this time.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield to me for just about 20 seconds?

Mr. MONTGOMERY. I yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, I want to point out to the Members that when we agreed to this, we did agree

to it on the proviso that we have what is called expedited procedures, and I have this in my hand—and Members have seen this so often—and it says that these matters move expeditiously, the motions are highly privileged, they are not debatable, they are not subject to amendment, and they are not subject to motions to postpone, or motions to proceed to consideration of other business.

In other words, there is written into this procedure the ways these matters are considered, so what the gentleman is concerned about is groundless and there will not be endless delay.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from North Carolina (Mr. BROYHILL) for that explanation, but I really do not like that provision. I like the two-House veto to be strong as possible to give States a fighting chance.

I would like to give the Governors more protection, and I think when it does come up to a two-House veto, there is going to be a tendency to gang up on that one State. The Governor needs all the protection he can get, so the two-House veto will help.

Mr. Speaker, I rise in support of the rule. I do have some reservations, and I would like to ask the gentleman from North Carolina this question, In regard to the two-House veto containing the same procedures in the commercial nuclear waste disposal, does that apply to the military also?

Mr. BROYHILL. Mr. Speaker, if the gentleman will yield, that amendment was put into this bill by the gentleman in the well, the gentleman from Mississippi (Mr. MONTGOMERY), and the same procedures would apply in the case of a military repository as in a civilian repository.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman from North Carolina (Mr. BROYHILL).

I say to my colleagues that the bottom line is that we need a nuclear waste bill. We might disagree with some of the provisions, but I hope that we will support this rule.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. HUCKABY).

Mr. HUCKABY. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. MOAKLEY) for yielding this time to me.

Mr. Speaker, during these unusual negotiations that have been going on in the last few days—it really has been for the last few months—there have been what I consider significant changes made in the permanent site selection process of how the Secretary goes through this process, and if I might I would like to engage the chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona (Mr. UDALL), in a brief colloquy so that perhaps we could clarify the intentions of both the House and the Senate as to how this process would work.

Mr. Speaker, I would like to clarify what is intended to be the intent of both the Senate and the House amendments to the nuclear waste bill. Is it the gentleman's understanding that the Secretary might proceed as far as site selection is concerned to fulfill the various responsibilities imposed by this act simultaneously? That is, may the Secretary develop the guidelines, nominate the candidate site, and prepare the environmental assessments required by section 112 as the information becomes available?

Is there intent to impose an order on the execution of these duties?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, there is no intent to impose an order on the execution of these duties.

Mr. HUCKABY. Mr. Speaker, I thank the gentleman.

Further, is it the gentleman's understanding that if the Secretary has accomplished all the requirements that are outlined in this section 112, he might proceed to nominate the five sites and then narrow the five sites to three sites, as required, as soon as the information is available, and that this may occur prior to the January 1, 1985, deadline established in the bill, even as early as January 1, 1984?

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the chairman of the committee.

Mr. UDALL. Mr. Speaker, as long as the Secretary has fulfilled the responsibilities established in this act, the Secretary is only required to have the three sites selected by no later than January 1, 1985.

Mr. HUCKABY. Mr. Speaker, I thank the gentleman.

Mr. MOAKLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona (Mr. UDALL) for purposes of debate only.

Mr. UDALL. Mr. Speaker, this country has been generating nuclear waste since the dawn of the nuclear age, about 44 years ago. Tomorrow more nuclear waste will be generated both in our electric utility companies and in the military uses of nuclear.

We have yet to dispose or set up a system which will lead to the disposal of a single pound of this great volume of nuclear waste, and for the first time in the years I have been associated with this issue, we are near the point where we might get something done on this matter. As was pointed out by the gentleman from North Carolina (Mr. BROYHILL), just 2 years ago about this same time the House had passed a bill and the Senate had passed a bill and we were on the verge of accomplishing something, but we were unable to get it over that last 2 or 3 yards to the goal line.

□ 2210

Here we are tonight with a chance to break this impasse.

I have heard since I have been involved in all of this that we do not have a technical problem, we know how to dispose of nuclear wastes. We have a political problem and I guess there is something to be said for that.

But the political will, the political innovation, the political ability of all of us to resolve these problems has never been more fully tested than in this legislation.

It was referred in due course to seven different committees with legislative jurisdiction. We had all kinds of formal and informal conferences. We just finished today a series of conferences that I doubted would come to fruition, but they finally did.

So I think we have a bill here that does not have a lot of things I want in it. It has a lot of things in it I object to. But this is a bill that industry can live with, a bill the environmentalists can live with. This is a bill that the people for nuclear power or against nuclear power can live with. Because if you dumped all of the nuclear wastes out in the ocean tomorrow morning and dumped all of the rods from all the nuclear power facilities the next day you would still have on your hands a 40-year accumulation of junk.

You talk about toxic wastes; this is the most toxic of all.

We have a schedule set up here so this country will have in the early 1990's a licensed, safe nuclear repository.

I would urge my colleagues to support this legislation and get this job done this year. My friend and colleague from Massachusetts, Mr. MARKEY, will be telling you in a few minutes that this bill that has come back from the other body sets up a whole new agency of Government. What we are doing with nuclear waste management is to put it in charge of somebody and that somebody is the Department of Energy. So in the bill we say within the Department of Energy there shall be a waste management section.

So this is no new department. It is not a new agency. It will take some doing. It has some responsibilities. But it is a part of a sound approach to this overall problem.

So I strongly urge my colleagues to support this legislation tonight and finish the job. We are so close now that it would be a shame to put it off yet another year, yet another Congress.

Mr. MOAKLEY. Mr. Speaker, at this time I yield 10 minutes to the gentleman from Massachusetts, (Mr. MARKEY) for purposes of debate only.

Mr. MARKEY. I thank the gentleman for yielding.

I am kind of embarrassed at the way in which this bill has come to the floor this evening. We have worked on this bill for 5 years now. It is a bill which has great significance. It will dispose for the next 20,000 years of all of the nuclear wastes generated in our society.

Seven committees in the House have worked on this bill long, hard hours, thousands of hours, thousands of hours put in by dozens of Members to put together the best possible piece of legislation to deal with this, the single most important environmental issue that we will vote upon in this Congress.

We passed this bill out of this body 18 days ago. In 18 days we had no conference committee with the other body, no conference committee, none.

The problem is that what we are dealing with is a bill which has basically been constructed in the past day by the U.S. Senate. This is where I get into some problems.

I have a book here entitled "How Our Laws Are Made." Let me read one passage that we try to teach our eighth graders:

> Unlike some other parliamentary body, both the Senate and the House of Representatives have equal, equal legislative functions and powers, and the designation of one as the upper house and the other as the lower house is not appropriate.

Well, this afternoon, with 15 minutes of debate, evenly divided, the other body passed 16 amendments, 12 colloquys, none of them printed, and sent them over to the House.

We at that point, at 4 o'clock this afternoon, were told by the other body, "If you reject any, any of these amendments, the bill is dead."

Now, in an expeditious fashion, all of the relevant Energy Committee members have tried as best they could to decipher what has been put into all of these amendments, what all of these colloguys mean.

I can assure my colleagues that as good as our staffs are it is well nigh impossible to decipher what 18 amendments, of a very complicated nature, have as implication for the waste policies of this country in 3 hours.

Now, at 8 o'clock I go before the Rules Committee, because we had to have a rule to get this bill out on the floor. I asked the Rules Committee for one amendment, one amendment, please, Rules Committee. Let me bring one amendment on one portion of all of the amendments that the other body has given to us on a take it or leave it basis.

Do you know what our Rules Committee said? The Rules Committee said, "We cannot do that to the other body. They have just given us 18 amendments. If we send them back one amendment they will kill the bill. They will kill the bill."

That is the position that the House, the equal Chamber, not the lower Chamber, but the equal branch of the Congress has said.

We have a rule here for 1 hour of debate. When this debate is ended the vote will be up or down. There are no other votes after that.

If we pass this rule the House of Representatives has signed off on the nuclear waste bill.

My argument is this: that at a minimum, to have some self-respect as an institution, so that our procedural processes are not trampled upon by the U.S. Senate, we ought to thave the courage, the courage to reject this bill, to set up a confernece committee to meet for the next 3 or 4 hours, and to perhaps have then again meet for 15 minutes on the Senate floor and maybe to pass through a measure which pays some respect to the concerns of the House, gives us some opportunity to examine the amendments which they have sent over to us.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. MARKEY. I would like to finish my statement.

Mr. STRATTON. I just want to agree with the gentleman, remarkably.

Mr. MARKEY. I thank the gentleman.

This is an historic moment.

The amendment that I asked for was a modest amendment. What we are going to set up in this bill is a new Federal Transportaiton Agency for Nuclear Wastes, we are just going to hire a couple of hundred people to transport these nuclear wastes from the nuclear reactors to the repositories all around the country.

Let me ask my colleagues this: Do you think once we set up this Federal agency that we are going to abolish it in 3 or 4 or 5 years?

The minimum we are going to do is double and triple the personnel, since every utility in the country will be trying to get on the gravy train of trying to have the Federal Government transport this stuff off their property.

What do we do in the process? We just kind of run roughshod over the Federal Authorities Claims Act, and the Price-Anderson Act, and over any sense of understanding of the ways in which the Federal bureaucracy functions, and we are going to create a brand new system that takes the burden off the private utilities to deal with this problem.

In addition to all of the rest of the things that are wrong with this bill that we have discussed in the past, we still do not deal with military wastes, 90 percent of the problem. We still do not deal with the problems of transporting these wastes from the repositories at the away-from-reactor facility to a monitorable, retrievable storage facility, and finally perhaps in another couple of hundred years to the permanent repository, because that is how long it will take to build this new repository, the permanent repository, once we pass this piece of legislation.

We are going to have nuclear wastes transported up and down every major highway of this country for the next couple of decades as these utilities try to get this problem off their hands. That is what we are talking about here.

What we are talking about is a bad bill, but a bad bill made worse by a process, a process which has violated the fundamental equality of the House in insuring that their prerogatives, their interests are protected, as are those of the other body.

So they have played a game with us and here is what they have said: "Here are all of our changes. Here is everything we want. Here is our wish list. We give it to you at the last minute. We ask you to accept it or reject it on a take it or leave it basis."

□ 2220

I recommended to this House that we leave it, that we leave it, that we not accept their gun-at-our-head proposal that says to us, "You and we will not sit down again if you reject one of our amendments."

I ask to have in order one amendment to deal with that new Federal bureaucracy. I ask that at a minimum you reject this rule so we can sit down in a real conference with the Senate. It has not yet occurred. From day 1 we have yet to have a conference with the Senate on this most important of all nuclear waste bills. Any activity which has taken place has transpired behind closed doors in a clandestine atmosphere that has given preeminence to the interest of the Senate staffers. There is not a Senator who could tell us what is in this bill. Fifteen minutes of debate for 18 amendments. They do not know what is in this bill. Eight or ten Senate staffers have drafted a nuclear waste bill that they have handed us on a take-it or leave-it basis. That is where we are today. That is the moment we have in this House of Representatives. Do we have the courage to reject a bill which has no business being on our floor because it totally violates the processes that this House has to expect in order to formulate good solid strong legislation?

A major problem. Monitored retrievable storage facilities. What does that mean. Let me tell my colleagues. There are many people in this country and in this body who do not want to see constructed a permanent waste repository in this country. What this bill does is it begins a process that will allow for the construction of a huge above-ground mausoleum that will have the capacity of dealing with all of the surplus spent fuel in our country for the next 200 years. That will alleviate the pressures put upon Utah,

Nevada, upon Mississippi, Louisiana, upon Washington State, upon every State in this Union that feels as though it might be victimized by the placing of the permanent repository in their State.

As we pass this bill, what we are doing through the away from reactor storage facilities, through the monitored retrievable facilities is we are guaranteeing that we will never see the day in which a permanent repository is built.

In addition, by not including military wastes in this bill, what we are guaranteeing is that this Congress and no subsequent Congress for at least a decade will ever return to the question as to whether or not the 90 percent of the nuclear wastes in this country which is indistinguishable in the minds of the average citizens in this country that have been demanding a comprehensive nuclear waste bill will never be dealt with, because the pressure for this bill comes from the utilities. They have been handcuffed by the referenda which are passed across this country saying no new nuclear powerplants can be constructed until a nuclear waste bill is found.

But in the minds of the American public, military and civilian waste is indistinguishable.

I would ask for a "no" vote on this rule.

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

Let me say that the gentleman went to great length to point out that he wanted the Rules Committee to give him the authority to offer one amendment. We had testimony by the gentleman from Arizona (Mr. UDALL), who referred to the gentleman from Michigan (Mr. DINGELL), the gentleman from North Carolina (Mr. BROYHILL), and the gentleman from Florida (Mr. FUQUA), noting that they were unanimously agreed that the amendment if adopted would kill the bill. We did not want to see the bill killed. So we granted this type of rule.

Mr. Speaker, I yield 5 minutes to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Speaker, I rise in support of the rule on the waste bill. The bill will finally resolve the log jam blocking the siting, construction, and operation of a waste repository for civilian nuclear waste in this country. It is essential to and will facilitate the basic objective and important national purpose of the Atomic Energy Act to develop the energy technology in this country to foster nuclear energy as a safe, clean, and environmentally desirable alternative for meeting our electrical needs.

I note that the waste repositories authorized by this bill will be subject to pervasive and comprehensive Federal regulation by the Nuclear Regulatory Commission and by the Environmental Protection Agency.

I believe that an exchange of letters with the Department of Energy, which I will include in another section of the RECORD, gives valuable guidance and direction to the action on how to carry out that regulation in a reasonable and nonarbitrary fashion under the Atomic Energy Act, and this legislation in order to assure that the public health and safety and the environment are responsibly protected.

Mr. Speaker, in the interest of time I also have an attachment with additional remarks:

[Attachment]

REMARKS BY THE HONORABLE MANUAL LUJAN ON HIGH LEVEL WASTE BILL

Mr. Speaker, I am pleased to support adoption of the pending legislation. I wish to comment briefly on section 121 of the bill, the section providing for EPA standards and NRC regulations pertaining to nuclear waste repositories. We clearly intend thorough and adequate federal regulations of repositories to protect the public health and safety and the environment under this section. However, some further comment on how this should be accomplished is in order.

Mr. Speaker, there is no such thing as a zero-risk technology. This is especially true in the case of atomic energy technology, because radiation, which is toxic at high dosages, is usually assumed for regulatory purposes to be proportionately toxic even at minute dosages, despite a lack of affirmative evidence to establish that fact. Given the usual employment of this conservative "linear non-threshold" assumption, the only means to guarantee zero-risk is to eliminate all radiation exposures, no matter how small. This exercise would be incredibly expensive not only in terms of the direct cost of accomplishment but also in terms of foregone benefits from allowing wider use of atomic energy technology on less restrictive terms.

Since zero-risk is simply not feasible, standards and the regulations must be set through some kind of comparitive analysis and balancing. Unless this is done, the regulatory requirements will be totally arbitrary. The three most useful tools for achieving supportable and non-arbitrary requirements are comparative risk analysis, balancing of costs and benefits, and cost-effectiveness analysis.

Comparative risk analysis basically entails placing risk in perspective. This has three dimensions. First, the risks should be compared to the risks which we commonly and ordinarily incur. For example, it makes no sense to concern ourselves with risks so remote that they will occur, if at all, only as frequently as the risk of being struck by lightning or of encountering other natural catastrophes. Many experts believe that risks in the neighborhood of 1 in 100,000 or even greater are essentially *de minimis*. Second, the risks should be compared to the risks which we incur from laternative technologies. Obviously it makes no sense to regulate one technology so stringently that people are forced to rely on an alternative but more risky technology. Any such action would be counterproductive and would increase rather than decrease overall societal risk. Third, in the case of radiation, which is always present in our environment, the risk should be evaluated against the risks attributable to other sources of exposure, including natural background. It serves no purpose to further minimize a source of exposure if that source is a relatively minor increment against background or other sources. In short, regulatory agencies must employ comparative risk analysis in setting their standards and requirements in order to fashion supportable, non-arbitrary and meaningful regulations.

Balancing of costs and benefits has varying degrees of refinement, ranging from full-scale cost-benefit analysis and optimization to efforts to assure that the costs imposed by regulations bear a reasonable relationship to the benefits derived. Some form of balancing is clearly in order to prevent the imposition of requirements whose costs are so great in comparison to their expected benefits that they are totally arbitrary. For example, it makes no sense to require an expenditure of $10,000,000 to address a remote risk of, say 1 in 100,000 per person. If we spent this amount on such remote risks, we would quickly run out of money and have nothing to show for it. Indeed, we would be worse off because of the lower standard of living caused by the unsupported diversion of funds. In sum, regulatory agencies must engage in some balancing in setting their requirements lest society wind up the loser. Ideally, the balancing in question should take the form of a rigorous cost-benefit approach. However, in some instances this may not be possible and, in such cases, a less stringent analysis designed to assure a reasonable relationship is appropriate.

Cost-effectiveness analysis is generally employed once basic regulatory goals have been set. Basically it is used to determine the least expensive means to attain a goal—a goal which should have been set on the basis of comparative risk and balancing of costs. Choosing the least expensive path to a particular goal makes obvious sense because it guards against a clear and needless waste of society's efforts and resources. I know of a no valid argument in opposition to general use of the cost-effectiveness approach.

It is worth emphasizing that balancing of costs and benefits and cost-effectiveness analysis should be distinguished from cost-feasibility analysis. A cost-feasibility analysis, in essence asks only whether money is available to pay for a requirement without bankrupting the government or an industry. Although clearly an agency bears a heavy and almost always insurmountable burden in justifying economically infeasible requirements, a determination of cost feasibility is no substitute for, and no excuse for failure to engage in, a proper analysis of costs and benefits and a proper determination of the least cost approach to attain a particular goal.

Mr. Speaker, comparative risk analysis, balancing, and cost-effectiveness analysis should all be used in the context of formulating regulations for the nuclear waste repositories authorized under this bill, just as they should be for other Atomic Energy Act activities. Failure to employ these three tools will result in imposition of arbitrary regulations to the detriment of taxpayers. Utility ratepayers and the health and safety of the public. In sum, EPA and NRC should employ these approaches in discharging their duties under this legislation and under the Atomic Energy Act. Such is my intent in sponsoring and in voting for this bill.

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 15, 1982.
Hon. HERMAN E. ROSER,
Assistant Secretary for Defense Programs (DP-1), U.S. Department of Energy, Washington, D.C.

Dear MR. ROSER: As you know, final action by Congress on the nuclear waste bill is expected in the next few days. The bill provides a framework for siting, constructing and operating nuclear waste, repositories. As part of that framework, the bill porvides for issuance of standards by the Environmental Protection Agency and more detailed requirements by the Nuclear Regulatory Commission. I would appreciate your personal views concerning the factors the agencies ought to consider or the approaches which they ought to employ in discharging their obligations in this regard.

Sincerely,

MANUEL LUJAN, Jr.

DEPARTMENT OF ENERGY,
Washington, D.C., December 16, 1982.
Hon. MANUEL LUJAN, Jr.,
House of Representatives, Washington, D.C.

DEAR MR. LUJAN: Thank you for your letter of December 15, 1982, requesting my views concerning the factors which should be considered and the approaches which should be employed in devising standards and requirements for nuclear waste repositories.

As you know, the Department of Energy (DOE), the Nuclear Regulatory Commission (NRC) and the Environmental Protection Agency (EPA) all operate under the basic guidance of the Atomic Energy Act that atomic energy activities should be so conducted and so regulated to protect the public health and safety. We are operating our facilities safely and effectively under this authority. Future high-level waste repositories are subject to regulation as provided by law. Regulatory requirements should be directed to the basic goal: protection of public health and safety. We firmly believe that nuclear waste facilities, can be sited, constructed, and operated in a fashion which is safe, efficient, and fully protects the public health and safety and the environment from all significant hazards, whether radiological or non-radiological.

It is useful, however, to briefly clarify the basic approaches which should be employed in arriving at standards and requirements. First, we believe that regulatory goals should be set through appropriate use of comparative risk analysis. As we stated to the General Accounting Office (GAO) with respect to the development of radiation standards for decommissioning activities. Federal standards and requirements should be "realistic and balanced with consideration of risks and costs accepted by society for non-nuclear activities." The GAO agreed with that assessment (GAO). Cleaning Up Nuclear Facilities—An Aggressive and Unified Federal Program Is Needed 65-66, 1982). We also believe that the risks associated with radiation from atomic energy activities should be evaluated against the risks associated with exposure to natural background radiation. It makes no sense to impose costly controls to minimize an incremental exposure which is trivial in comparison to natural background.

Second, we feel that EPA and NRC regulations should be cost justified. If the risk is slight, so should be the cost of complying with regulations addressing it. This is supported by the federal chartered National Council on Radiation Protection and Measurment (NCRP) which declared, in its Report No. 43, that:

". . . numerical estimates of radiation-related risks, even when realistic, are of little use in a vacuum, i.e., without comparable numerical estimates of associate benefits, and of risks and benefits for alternative means to achieve the desired end."

Finally, we believe that the agencies should select the most cost-effective, alternative to attain particular goals in order to avoid unnecessary expenditure of taxpayers' money.

We also believe that regulatory risk assessments should be based on the best available scientific information and should be realistic. We take notice of NCRP's admonition in Report No. 43 in which NCRP stated that it:

". . . wished to caution governmental policy-making agencies of the unreasonableness of interpreting or assuming "upper limit" estimates of carcinogenic risks at low radiation levels, by linear extrapolation from data obtained at high doses and dose rates, as actual risks, and of basing unduly restrictive policies on such an interpretation or assumption. The NCRP has always endeavored to insure public awareness of the hazards of ionizing radiation, but it has been equally determined to insure that such hazards are not greatly overestimated. Undue concern, as well as carelessness with regard to radiation hazards, is considered detrimental to the public interest."

Again, we appreciate this opportunity to express our views.

Sincerely,

HERMAN E. ROSER,
Assistant Secretary for Defense Programs.

I would like to, however, point to a couple of statements that have been made this evening. I think they are probably exaggerations. And that is being very mild about it.

First of all, it is said on this floor that we accepted all of what the Senate sent to us without any question.

Let me point out to this House that 95 percent of what is in this bill was drafted by the House of Representatives.

It is also said that in the case of the transportation that we will have to form a new Federal agency. Nothing could be further from the truth.

The section of the bill that gives rise to this type of talk is a section that says instead of, as was in the original bill, the Federal Government accepting the responsibility, accepting title to nuclear waste at the repository site, we should accept it at the reactor site.

Now, that conjures up all kinds of ideas that because we are going to accept title to the waste at the reactor site, that we must form a Federal agency. That is how some people think we can or we should.

However, it would be no different, the same people that would transport it for the private utilities, if they owned it, would be the same people that could transport it for the Federal Government. We do all kinds of jobs on a contract basis.

As a matter of fact, it would be a lot better to take title to it at the reactor site because at least we have someone to take a look at it. Instead of having—we have 70 reactors—having 70 trucking companies all over the country delivering waste from one place to the other.

Third, we talk we are going to build a monitored retrievable storage system.

Nothing could be further from the truth. The bill calls for a 2½ year study on whether that is a good technology or whether it is not.

If at the end of those 2½ years, or however long it takes, it is recommended that we use monitored retrievable storage, then and only then will the Congress have the opportunity to authorize such a storage facility if the Congress sees fit to do so.

And so, Mr. Speaker, I ask my colleagues to support this legislation.

Mr. CORCORAN. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Illinois.

Mr. CORCORAN. I thank the gentleman for yielding.

The previous speaker, at least one of the previous speakers, our good friend from Massachusetts (Mr. MARKEY) has indicated that the House has caved in on all of the major issues.

Well, as the speaker knows and our friend from New Mexico knows, there are two major issues. One is the interim storage program, and two, probably more important, is the permanent repository. In fact what has happened in the negotiations between the House of Representatives and the other body is that the other body has caved in on the question of interim storage, because the other body wanted to have a permanent authority for the Federal Government in the person of the Department of Energy to purchase, acquire or lease an interim privately owned away-from-reactor storage program.

What this legislation does is prohibit that, Mr. Speaker.

I urge its passage.

The SPEAKER pro tempore. The time of the gentleman from New Mexico (Mr. LUJAN) has expired.

Mr. LATTA. I yield 1 additional minute to the gentleman from New Mexico.

Mr. HANCE. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Texas.

Mr. HANCE. Mr. Speaker, it is my understanding the other body passed in their language that the waste would be transferred to the Federal Government, the ownership would be transferred at the time it left the facility.

Mr. LUJAN. That is correct.

Mr. HANCE. And then you would have the limited liability under the Federal tort law?

Mr. LUJAN. That is correct. The important question in this was who was going to pay for it. That is what we were considering at the time. It was decided, regardless of who kept the title to it, that out of the waste fund we were going to charge 1 cent per kilowatt-hour, that out of that fund would be paid.

□ 2230

Now, the whole question was who should retain title to it. I feel perhaps it would be better if the Federal Government returns title to it at the reactor site because then at least you have some structured system in which to move the waste.

Mr. HANCE. But in effect, the utilities were able to absolve themselves of any liability whatsoever by taking the language of the other body.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD. Mr. Speaker, I rise in support of this legislation.

We have been struggling over a nuclear waste bill for many Congresses. The time has come when we must act. It is clear that comprehensive nuclear waste disposal must provide not only for long-term problems of permanent disposal of nuclear waste, but it must also alleviate the short-term problem of lack of interim storage capacity for spent nuclear fuel.

A June report in 1982, prepared by the Nuclear Regulatory Commission, told us that as many as 39 nuclear powerplants in 19 States would run out of on-site storage by 1990.

We cannot afford to wait any longer. There are provisions in this bill that every Member of this Congress could find fault with, but we must compromise with the Senate and with our other fellow Members of Congress if we are going to come to a conclusion. No one ever gets his total way.

We have a good bill, one that will adopt a permanent policy for this country and one which I think will work.

I ask for an "aye" vote.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. If I could have the attention of the distinguished chairman of the Committee on Energy and Commerce, the gentleman from Michigan, Mr. DINGELL, I know that he has been very involved in the development of this legislation.

It is my understanding that H.R. 3809 precludes Federal use or acquisition of any of the three privately owned facilities that are capable of storing high level spent nuclear fuel. As the gentleman knows, these facilities are located in Morris, Ill., Barnwell, S.C., and West Valley, N.Y. It is further my understanding that any last resort Federal interim storage of spent fuel that occurs as a result of this legislation will be at facilities owned today by the Federal Government. I just want to confirm that this is also the understanding of the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I would be happy to yield.

Mr. DINGELL. Mr. Speaker, the gentleman is correct. In addition, any Federal storage that does occur can only be as a last resort when a utility cannot increase on-site storage by reracking, dry storage or construction of new on-site storage facilities, and when the potential for transshipment is also exhausted.

Mr. UDALL. Mr. Speaker, would the gentleman yield to me?

Mr. MADIGAN. I am happy to yield to the gentleman from Arizona.

Mr. UDALL. I too would like to give my assurances to the gentleman. After many years of work on nuclear waste legislation, we have been able to achieve a consensus bill that includes carefully drawn limited away-from-reactor storage provisions. These provisions preclude Federal acquisition or use of private facilities in Morris, Barnwell, and West Valley for the limited away-from-reactor storage program authorized by the bill.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I am happy to yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Speaker, the gentleman certainly has my assurances. We have worked on this for some time and we have drawn a very limited away-from-reactor storage program. It does not contain any authorization for the use of private storage facilities, such as Morris, Barnwell, or West Valley.

Mr. MADIGAN. I thank the gentleman. As you well know, the compromise that has been reached on away-from-reactor storage is delicate, and I appreciate the work that the gentleman from Michigan, the gentleman from Arizona, and the gentleman from North Carolina have done to protect the communities surrounding Morris, Barnwell, and West Valley.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. MORRISON).

Mr. MORRISON. Mr. Speaker, I thank the gentleman for yielding.

I would like to commend my colleagues who worked so diligently on this legislation.

The nuclear waste issue is indeed controversial and it is a credit to this Congress that we were able to finally pass this legislation subject to the rule now under discussion.

As a representative of what could possibly be the Nation's first permanent repository site, I am satsified with both the environmental safeguards contained in the bill, as well as the economic compensation provided to the State and local governments.

Mr. Speaker, there has been criticism of the procedures bringing this bill before us this evening. This gentleman must indicate that there has been more open communication, more give and take between Senate Members, the staff, House committee chairmen, and ranking Members on this nuclear waste package, than on any conference committee I have observed.

Again, I commend my colleagues on their efforts and urge passage of this rule and this vital legislation.

Mr. MOAKLEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. FOLEY).

(By unanimous consent, Mr. FOLEY was allowed to proceed out of order.)

ADJOURNMENT SINE DIE OF THE HOUSE AND SENATE

Mr. FOLEY. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 438) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 438

Resolved by the House of Representatives (the Senate concurring), that the House of Representatives shall adjourn Monday, December 20, 1982, or on Tuesday, December 21, 1982, pursuant to a motion made by the majority leader, or his designee, in accordance with this resolution, and that when it adjourns on said day, it stand adjourned sine die; and be it further

Resolved, That the consent of the House of Representatives is hereby given to an adjournment sine die of the Senate at any time prior to January 3, 1983, when the Senate shall so determine; and that pending such sine die adjournment, the Senate may adjourn or recess for such period or periods in excess of 3 days as it may determine.

Mr. FOLEY. Mr. Speaker, just in order that the Members not believe that this adjournment resolution indicates any imminent action on the part of the leadership to move adjournment sine die, it is done for the purpose of referring it to the other body.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. MOAKLEY. Mr. Speaker, to accommodate a request for colloquies and because of the uniqueness of the parliamentary situation we find ourselves in, I ask unanimous consent for 10 additional minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Speaker, I rise in support of this rule and in support of the legislation encompassed in this bill.

I would like to ask the gentleman from Arizona to clarify that the Senate amendments which modify section 114 with regard to a repository site pursuant to the Environmental Policy Act include all sites that are suitable for development, based upon all reasonable information obtained by the Secretary.

Is it the understanding of the gentleman from Arizona that the site will be considered through this point in the site selection process?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, the answer to his question is "yes." The Secretary must consider alternative sites that meet both criteria. The Secretary must have completed characterization of the site and he must make a preliminary finding under guidelines in section 112 after having completed those activities that the site is suitable for subsequent development as a repository.

□ 2240

Mr. LUNDINE. I thank the gentleman, and I yield back the balance of my time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. MOAKLEY).

Mr. KAZEN. Mr. Speaker, will the gentleman from Massachusetts yield for a question?

Mr. MOAKLEY. I would be glad to yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Speaker, is it my understanding that under the rule there will not be a vote on the conference report itself but, rather, on the rule, and that upon adoption of the rule the conference report will have been deemed to have been adopted?

Mr. MOAKLEY. The gentleman is correct. There is no other vote. It will be just a vote on the rule.

Mr. KAZEN. I thank the gentleman.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. SWIFT).

Mr. SWIFT. I thank the gentleman for yielding.

Mr. Speaker, I would like to engage the gentleman from Arizona (Mr. UDALL) in a colloquy.

The Senate amendments also lengthen the schedule for site selection by extending the time for nominating the first five sites by January 1, 1985, and nominating a second set of five sites for a second repository not later than July 1, 1989. These changes obviously crowd other decision points in the site selection and licensing schedule especially the requirement that NRC act upon the repository license applications by a date certain—January 1, 1989, for the first repository and January 1, 1992, for the second. In light of this new schedule for NRC review, can I be assured that this schedule will remain consistent with the NRC's predominant goal for protecting the public health and safety.

Mr. UDALL. The gentleman's concerns are well founded. By setting dates in this bill for DOE and NRC decisions we are setting statutory goals for the repository activities authorized in this legislation. Nothing in this bill, including the establishment of decision dates, is inconsistent with the statutory responsibilities of the Nuclear Regulatory Commission to protect the public health and safety and the environment.

Mr. SWIFT. I thank the gentleman for his assurance.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in order to enter into a brief colloquy with the distinguished chairman of the Committee on Energy and Commerce. I have several concerns with reference to this bill, but first I want to ask the question relative to the operation of section 112.

As I understand it, the bill requires public hearings in the vicinity of any site of a proposed nomination. Am I correct that the bill requires just one set of hearings at each of the nominated sites?

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. TAUZIN. I yield to the gentleman from Michigan.

Mr. DINGELL. That is correct. Although further hearings are required for the three sites which are recommended for characterization, there would be no further hearings required at the two sites which are not recommended. These further hearings would be held only after the three sites are recommended.

Mr. TAUZIN. I thank the gentleman for that clarification, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, how much time does this side have remaining?

The SPEAKER pro tempore. The gentleman from Massachusetts has 10 minutes remaining, and the gentleman from Ohio has 5½ minutes remaining.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, I rise to comment on an interpretation that concerns section 302(a)(3), which requires the Secretary to establish a one-time fee which will cover the costs of previously generated spent fuel and high-level radioactive waste. I am concerned that this may lead to an ambiguity as to the date of collection of the fees. The House passed bill assumed that payment of these fees would be phased in over the coming years. There was a similar intent in the Senate bill. It is our intention that the current section 302(a)(3) also require a similar phasein of payments. The Secretary should take special care in the collection of such fees, using a phasein schedule, to take into account the financial health of the utilities and the impact upon rate payers. The Secretary could, however, begin collection of these fees prior to delivery of the spent fuel.

Mr. MOAKLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Michigan, (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, what has happened here is very simple. The Senate passed the bill. The House did not like it. The House did not take it.

The House, with seven committees working together, Rules, Energy and Commerce, the Committee on Interior and Insular Affairs, the Committee on Merchant Marine and Fisheries, and a number of other committees here passed a bill which was bipartisan in character. It had so little controversy attached to it that it passed this body by a voice vote.

The leadership on this side said we would not take the Senate bill. We found it unacceptable and we found that it was impossible to have a conference which would bring us a bill as good as that which we have. The House leaders on this side refused to accept the Senate language.

Then the Senate sent out some further proposals. We refused those proposals. We insisted they be changed, and they were changed.

This bill before us now, with minor changes in language, is the House-passed bill. It is a good bill and its adoption, and the adoption of the rule which the able members of the Committee on Rules have put together, is the only way we will get a nuclear waste bill during this session of the Congress.

Now, what are the changes? The significant changes in the earlier House-passed bill are as follows:

A two-House override is required to override a State veto. That is a tougher bill insofar as overriding the veto than was passed by the House earlier. So if you were opposed to nuclear waste storage or you are concerned about State prerogatives, this is a better bill in that particular.

The restrictions on the duration of interim spent fuel storage at Federal facilities are stricter.

The compromise with regard to monitored retrievable storage program endorsed by all contains only a 2½-

year study and there will be no construction unless subsequently authorized by the Congress. The monitored retrievable storage facility is subject to all environmental reviews and NRC licensing.

The repository selection schedule has been pushed back to January 1 in the first round in 1985 and 1989 in the second round, as opposed to July 1, 1984, and 1987 in the House bill. More time is given.

The last change of any significance here is that the Federal Government will manage transportation of spent fuel and waste from the powerplant gate to the repository and AFR, but that will be financed by private user fees, will rely on private carriers, will remain subject to full licensing by the Federal Government, and control. Title will pass at the powerplant gate in order to assure full tracking, and in order to assure that Federal laws and Federal controls are fully maintained, but Federal, State, and local laws are expressly maintained, as under current law.

This compromise nuclear waste bill is endorsed by the leadership in the House and Senate. It is endorsed by the administration. It is endorsed by the Edison Electric Institute, by the AFL-CIO Building Trades Department. It is a bipartisan bill. It had the support of seven committees in the House and the leadership on both sides support the bill.

I urge my colleagues to understand: The only way we are going to get a nuclear waste storage bill this year is by adoption of this bill. Had we gone to conference, we would have gotten no bill or we would have gotten a worse bill.

I would urge my colleagues to join me in ending this controversy. Let us vote for the bill. Let us pass this bill. Let us adopt the rule and I believe the public interest will be served.

Mrs. BYRON. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentlewoman from Maryland.

Mrs. BYRON. I thank the gentleman for yielding.

Mr. Speaker, I am in favor of the bill, but could the gentleman clarify?

At what type of a timeframe is he talking about for finally having a repository available? What time in this bill is the gentleman talking about finally?

Mr. DINGELL. We think that the repositories will be in operation by about 1998.

Mrs. BYRON. 1998? The year 2000, in other words.

Mr. DINGELL. That is the anticipated date, 1998.

● Mr. ROEMER. Mr. Speaker, I rise to admit that the question of where and how to store nuclear waste in a permanent repository is a difficult one.

This bill as amended by the Senate is certainly an improvement in protection for the citizens of Louisiana. Although the number of candidate sites remains at five, once a site meets preliminary selection but does not become a permanent candidate, then the site is excluded from round two.

In addition, the bill provides for a two-House veto which is clearly superior in protecting the rights of Louisiana than the provisions in the original House bill.

This bill does not guarantee that Louisiana will escape permanent site designation, but it limits our risk. This fact is evident in listening to the debate tonight, wherein the only objections to the bill stem from those Members who feel that we have gone too far in protecting States rights.

I honestly feel that we have not gone far enough, but it is a significant improvement over the original House bill.●

● Mr. SKEEN. Mr. Speaker, I strongly support adoption of the nuclear waste bill. One cannot emphasize enough the importance of getting on with the job of constructing and operating a nuclear waste respository. The public is tired of waiting for resolution of the political hangups preventing fruition of a waste disposal program. This legislation will provide a complete regulatory structure and time schedule for this end. I believe that it is important that we adhere to this regime. Given the provisions for comprehensive Federal regulation of the repository under the Atomic Energy Act and this legislation, and given the ample provision for State participation in the siting of the repository provided in this legislation, there is no question but that the public health and safety and the environment will be fully protected and that all legitimate State interests will be responsibly taken into account in the process provided in this bill. There is no need for additional, duplicative, or conflicting regulation by yet more agencies or at some other level or under yet other statutes. There is no need for further equivocation and hand wringing. In short, the provisions for Federal regulation in this bill fully and adequately occupy the field. Thankfully, the public can honestly be assured of no further unnecessary and frustrating delays. We will have safe and efficient nuclear waste facilities when they are needed.

I am holding an attachment in the interest of time.

STATEMENT OF HON. JOE SKEEN IN SUPPORT OF NUCLEAR WASTE BILL

Mr. Chairman, there is a widespread fear of any exposure to radiation associated with nuclear power activities. This fear has spawned widespread litigation against the Department of Energy and private companies. In these lawsuits, people assert that they have incurred an increased risk of cancer as a result of low levels of exposure. They ask for milions of dollars in damages from taxpayers and private industry. The fear of radiation has also resulted in the imposition of a myriad of legal obstacles to continued development of nuclear power in this country. Indeed, we have had no new reactor orders since 1978. Instead, there have been dozens of reactor concellations. NRC has imposed more and more retrofit requirements, driving up the cost of, and delaying, other reactors. We have been unable to site or prorate a nuclear waste repository. The fear, the litigation, and the legal obstacles are impeding our ability to carry out the basic purpose of the Atomic Energy Act to develop atomic energy technology in this country.

Mr. Chairman, the fear that has precipitated all this does not appear to be supported by the facts. Although high levels of radiation are unquestionably hazardous, the situation is far less clear with respect to exposures to low levels of radiation—exposures at the rate of one to two rem per year or lower. There is no evidence that demonstates that exposures to radiation at these levels is hazardous at all. The hazard is purely hypothetical. Regulartory agencies assume that low levels of radiation are hazardous in proportion to the hazard at high levels. The assumption is solely based on policy; it is certainly not scientifically or logically compelled. The policy reason for the assumption is to be conservative for regulatory purposes. The fact that the assumption is made in no way means that low-level radiation is in fact hazardous.

This linear, non-threshold assumption is not intuitively obvious. Too much oxygen can blind or kill, but at least some oxygen is essential to life. Similarly, too much selenium, or too much of many other trace elements, will result in toxicity, but in smaller amounts these elements are essential to human health.[1] It is relatively common to find that small amounts or otherwise toxic material are biologically stimulatory, a phenomenon known as "hormesis."

Mr. Chairman, there is a considerable body of evidence that, contrary to the conventional wisdom, low levels of radiation may not be harmful and may in fact be beneficial. This is known as radiation hormesis.[2]

Epidemiological studies exposed to elevated levels of natural background radiation fail to detect any adverse health effects and in fact correlate increased exposure to radiation with better health and lower cancer rates.[3] In a recent, letter to the editor of the

[1] See, for example, *Selenium in the Heart of China.* The Lancet 889-90 (Oct. 27, 1979); Keshan Disease Research Group, *Observations of Effect of Sodium Selenite in Preventing Keshan Disease,* Chinese Med. J. 92(7):471 (1979); Keshan Disease Research Group, *Epidemiologic Studies on the Relationship of Sekntinum and Keshan Disease,* Chinese Med. J. 92(7): 477 (1979); Collipp, et al., *Cardiomyopathy and Selenium Deficiency in a Two-Year-Old Girl,* N. Eng. J. Med. 304:1304 (1981). Ironically, EPA has adopted stringent regulations limiting selenium in water to very low levels on the theory that it might be carcinogcnic. Instead, selenium appears to be anti-carcinogenic. Shamberger, *Relationship of Selenium to Cancer. I. Inhibitory Effect of Selenium is Carcinogenesis,* J. Nat'l Cancer Inst. 44:931 (1970). Given the unfortunate permanence of many regulatory standards. EPA may never catch up with science on this issue.

[2] See, for example, Luckey, Hormesis with Ionizing Radiation, (CRC Press 1980); Luckey, *Hormesis,* Nuclear News 48 (Dec. 1981).

[3] See, for example, Hickey, et al., *Low Level Ionizing Radiation and Human Mortality; Multiregional Epidemiological Studies,* Health Physics 40:626-41 (1981); (ARIP). I. Frigerio, et al. The Argonne Radiological Impact Program Carcinogenic Hazard from Low-Level, Low-Rate Radiation (1973).

New England Journal of Medicine, two statisticians from The Wharton School explained that:

"There have been literally hundreds of reports over the past century demonstrating that ecologically realistic low levels of ionizing radiation are usually stimulatory and beneficial to a wide variety of life forms, including human life. . . . Studies on the population of U.S. states showed that mean background-radiation levels and mortality rates for several cancer categories were generally negatively correlated. . . . [T]he prevalence of mortality from cancer was lower, on average, in urban areas with higher background radiation than in areas with low background radiation." [4]

Evidence such as this not only totally undercuts the litigation against the nuclear power industry and refutes the misdirected fear of low-level radiation but also throws into serious doubt the basic assumptions on which regulatory agencies are basing their standards and requirements relating to the nuclear fuel cycle. In the words of The Wharton School statisticians.

"The extensive evidence in support of hormesis casts doubt on dose-response models that represent the health effects of low levels of ionizing radiation in terms of monotonically decreasing functions extrapolated from the observed effects of high levels." [5]

Clearly we would all do well to heed the warning by the National Council on Radiation Protection against over-reaction to the purported hazards of low-level radiation.[6] It may well be that there is absolutely no hazard at all, or that the beneficial effects outweigh the adverse ones. This point is especially important because essentially all the hypothesized adverse health effects from the nuclear fuel cycle, including those from nuclear reactors and high level waste, are based on assumed adverse effects from low levels of exposure.

Under the circumstances, it seems particularly ridiculous to shun nuclear power as a major source of our electrical energy. Indeed, the basis for any such action amounts to nothing more than a kind of Lysendoism,[7] the net effect of which will be to erode our country's scientific and technological leadership and the welfare of our citizens, Nuclear power is a clean, cheap, and for all practical purposes, risk-free source for our electrical needs.

The attack on nuclear power should be recognized for what it is, anti-environmental and fundamentally irrational and anti-scientific. To the extent that the nuclear waste legislation removes one of the obstacles to further use of nuclear energy, I strongly support it. We all should.●

● Mr. LOWERY of California. Mr. Speaker, I rise in support of the nuclear waste bill. It is an important although belated milestone in the continued development of atomic energy in this country. It provides a detailed framework for our national program to site, construct, and operate repositories for civilian nuclear waste. This program will be subject to comprehensive Federal regulation to assure that the public health and safety and the environmment are protected. It is pertinent to say a few words about this regulation. The bill provides for general EPA standards and more detailed NRC regulations and requirements. In either case, the regulations must be adequate to protect the public health and safety as under the Atomic Energy Act. It is also important to emphasize, however, that the regulations must be reasonable and not arbitrary. We do not intend to confer authority on the regulatory agencies to insist on unnecessary requirements the primary function of which is to escalate the user fees for the repositories in question. Standards and requirements should be designed to address only those risks which are significant in comparison to other risks. If the risk is slight, regulations designed to address that risk should impose commensurate costs. Once regulatory objectives are set, the regulations should permit the least expensive means of meeting those objectives. These rules are consistent with the approach long recommended by groups such as ICRP and NCRP. I expect the agencies to adopt these approaches in the regulation of nuclear facilities, including the waste facilities provided under this bill.

I am pleased to see that the legislation before us provides for thorough and complete Federal regulation of nuclear repositories. It is my understanding that this will be accomplished on a reasonable and cost-effective basis and that, consistent with the Atomic Energy Act and cases under it, duplicative or contrary regulatory regimes and requirements will be displaced. I wish to compliment the other supporters of this legislation and the many committees involved for their hard work which has fortunately culminated in this bill.●

Mr. LATTA. Mr. Speaker, I have no further requests for time.

□ 2250

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MARKEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 256, nays 32, not voting 145, as follows:

[Roll No. 486]

□ 2300

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The text of the Senate amendment to H.R. 3809 is as follows:

Strike out all after the enacting clause and insert:

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Nuclear Waste Policy Act of 1982".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Definitions.
Sec. 3. Separability.
Sec. 4. Territories and possessions.
Sec. 5. Ocean disposal.
Sec. 6. Limitation on spending authority.
Sec. 7. Protection of classified national security information.
Sec. 8. Applicability.
Sec. 9. Applicability.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

Sec. 101. State and affected Indian tribe participation in development of proposed repositories for defense waste.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 111. Findings and purposes.
Sec. 112. Recommendation of candidate sites for site characterization.
Sec. 113. Site characterization.
Sec. 114. Site approval and construction authorization.
Sec. 115. Review of repository site selection.
Sec. 116. Participation of States.
Sec. 117. Consultation with States and Indian tribes.
Sec. 118. Participation of Indian tribes.
Sec. 119. Judicial review of agency actions.
Sec. 120. Expedited authorizations.
Sec. 121. Certain standards and criteria.
Sec. 122. Disposal of spent nuclear fuel.
Sec. 123. Title to material.
Sec. 124. Consideration of effect of acquisition of water rights.
Sec. 125. Termination of certain provisions.

SUBTITLE B—INTERIM STORAGE PROGRAM

Sec. 131. Findings and purposes.
Sec. 132. Available capacity for interim storage of spent nuclear fuel.
Sec. 133. Interim at-reactor storage.
Sec. 134. Licensing of facility expansions and transshipments.
Sec. 135. Storage of spent nuclear fuel.
Sec. 136. Interim Storage Fund.
Sec. 137. Transportation.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

Sec. 141. Monitored retrievable storage.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

Sec. 151. Financial arrangements for site closure.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

Sec. 211. Purpose.
Sec. 212. Applicability.
Sec. 213. Identification of sites.
Sec. 214. Siting research and related activities.
Sec. 215. Test and evaluation facility siting review and reports.
Sec. 216. Federal agency actions.
Sec. 217. Research and development on disposal of high-level radioactive waste.
Sec. 218. Research and development on spent nuclear fuel.
Sec. 219. Payments to States and affected Indian tribes.
Sec. 220. Study of research and development needs for monitored retrievable storage proposal.
Sec. 221. Judicial review.
Sec. 222. Research on alternatives for the permanent disposal of high-level radioactive waste.
Sec. 223. Technical assistance to non-nuclear weapons states in the field of spent fuel storage and disposal.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

Sec. 301. Mission plan.
Sec. 302. Nuclear Waste Fund.
Sec. 303. Alternate means of financing.
Sec. 304. Office of Civilian Radioactive Waste Management.
Sec. 305. Location of test and evaluation facility.
Sec. 306. Nuclear Regulatory Commission training authorization.

DEFINITIONS

SEC. 2. For purposes of this Act:

(1) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) The term "affected Indian tribe" means any Indian tribe—

(A) within whose reservation boundaries a monitored retrievable storage facility, test and evaluation facility, or a repository for high-level radioactive waste or spent fuel is proposed to be located;

(B) whose federally defined possessory or usage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties may be substantially and adversely affected by the locating of such a facility: Provided, That the Secretary of the Interior finds, upon the petition of the appropriate governmental officials of the tribe, that such effects are both substantial and adverse to the tribe;

(3) The term "atomic energy defense activity" means any activity of the Secretary performed in whole or in part in carrying out any of the following functions:

(A) naval reactors development;

(B) weapons activities including defense inertial confinement fusion;

(C) verification and control technology;

(D) defense nuclear materials production;

(E) defense nuclear waste and materials byproducts management;

(F) defense nuclear materials security and safeguards and security investigations; and

(G) defense research and development.

(4) The term "candidate site" means an area, within a geologic and hydrologic system, that is recommended by the Secretary under section 112 for site characterization, approved by the President under section 112 for site characterization, or undergoing site characterization under section 113.

(5) The term "civilian nuclear activity" means any atomic energy activity other than an atomic energy defense activity.

(6) The term "civilian nuclear power reactor" means a civilian nuclear powerplant required to be licensed under section 103 or 104 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134(b)).

(7) The term "Commission" means the Nuclear Regulatory Commission.

(8) The term "Department" means the Department of Energy.

(9) The term "disposal" means the emplacement in a repository of high-level radioactive waste, spent nuclear fuel, or other highly radioactive material with no foreseeable intent of recovery, whether or not such emplacement permits the recovery of such waste.

(10) The terms "disposal package" and "package" mean the primary container that holds, and is in contact with, solidified high-level radioactive waste, spent nuclear fuel, or other radioactive materials, and any overpacks that are emplaced at a repository.

(11) The term "engineered barriers" means manmade components of a disposal system designed to prevent the release of radionuclides into the geologic medium involved. Such term includes the high-level radioactive waste form, high-level radioactive waste canisters, and other materials placed over and around such canisters.

(12) The term "high-level radioactive waste" means—

(A) the highly radioactive material resulting from the reprocessing of spent nuclear fuel, including liquid waste produced direct-

ly in reprocessing and any solid material derived from such liquid waste that contains fission products in sufficient concentrations; and

(B) other highly radioactive material that the Commission, consistent with existing law, determines by rule requires permanent isolation.

(13) The term "Federal agency" means any Executive agency, as defined in section 105 of title 5, United States Code.

(14) The term "Governor" means the chief executive officer of a State.

(15) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community of Indians recognized as eligible for the services provided to Indians by the Secretary of the Interior because of their status as Indians, including any Alaska Native village, as defined in section 3(c) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(c)).

(16) The term "low-level radioactive waste" means radioactive material that—

(A) is not high-level radioactive waste, spent nuclear fuel, transuranic waste, or byproduct material as defined in section 11e(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2014(e)(2)); and

(B) the Commission, consistent with existing law, classifies as low-level radioactive waste.

(17) The term "Office" means the Office of Civilian Radioactive Waste Management established in section 305.

(18) The term "repository" means any system licensed by the Commission that is intended to be used for, or may be used for, the permanent deep geologic disposal of high-level radioactive waste and spent nuclear fuel, whether or not such system is designed to permit the recovery, for a limited period during initial operation, of any materials placed in such system. Such term includes both surface and subsurface areas at which high-level radioactive waste and spent nuclear fuel handling activities are conducted.

(19) The term "reservation" means—

(A) any Indian reservation or dependent Indian community referred to in clause (a) or (b) of section 1151 of title 18, United States Code; or

(B) any land selected by an Alaska Native village or regional corporation under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

(20) The term "Secretary" means the Secretary of Energy.

(21) The term "site characterization" means—

(A) siting research activities with respect to a test and evaluation facility at a candidate site; and

(B) activities, whether in the laboratory or in the field, undertaken to establish the geologic condition and the ranges of the parameters of a candidate site relevant to the location of a repository, including borings, surface excavations, excavations of exploratory shafts, limited subsurface lateral excavations and borings, and in situ testing needed to evaluate the suitability of a candidate site for the location of a repository, but not including preliminary borings and geophysical testing needed to assess whether site characterization should be undertaken.

(22) The term "siting research" means activities, including borings, surface excavations, shaft excavations, subsurface lateral excavations and borings, and in situ testing, to determine the suitability of a site for a test and evaluation facility.

(23) The term "spent nuclear fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, the constituent elements of which have not been separated by reprocessing.

(24) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

(25) The term "storage" means retention of high-level radioactive waste, spent nuclear fuel, or transuranic waste with the intent to recover such waste or fuel for subsequent use, processing, or disposal.

(26) The term "Storage Fund" means the Interim Storage Fund established in section 137(c).

(27) The term "test and evaluation facility" means an at-depth, prototypic, underground cavity with subsurface lateral excavations extending from a central shaft that is used for research and development purposes, including the development of data and experience for the safe handling and disposal of solidified high-level radioactive waste, transuranic waste, or spent nuclear fuel.

(28) The term "unit of general local government" means any borough, city, county, parish, town, township, village, or other general purpose political subdivision of a State.

(29) The term "Waste Fund" means the Nuclear Waste Fund established in section 302(c).

SEPARABILITY

SEC. 3. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

TERRITORIES AND POSSESSIONS

SEC. 4. Nothing in this Act shall be deemed to repeal, modify, or amend the provisions of section 605 of the Act of March 12, 1980 (48 U.S.C. 1491).

OCEAN DISPOSAL

SEC. 5. Nothing in this Act shall be deemed to affect the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.).

LIMITATION ON SPENDING AUTHORITY

SEC. 6. The authority under this Act to incur indebtedness, or enter into contracts, obligating amounts to be expended by the Federal Government shall be effective for any fiscal year only to such extent or in such amounts as are provided in advance by appropriation Acts.

PROTECTION OF CLASSIFIED NATIONAL SECURITY INFORMATION

SEC. 7. Nothing in this Act shall require the release or disclosure to any person or to the Commission of any classified national security information.

APPLICABILITY

SEC. 8. (a) ATOMIC ENERGY DEFENSE ACTIVITIES.—Subject to the provisions of subsection (c), the provisions of this Act shall not apply with respect to any atomic energy defense activity or to any facility used in connection with any such activity.

(b) EVALUATION BY PRESIDENT.—(1) Not later than 2 years after the date of the enactment of this Act, the President shall evaluate the use of disposal capacity at one or more repositories to be developed under subtitle A of title I for the disposal of high-level radioactive waste resulting from atomic energy defense activities. Such evaluation shall take into consideration factors relating to cost efficiency, health and safety, regulation, transportation, public acceptability, and national security.

(2) Unless the President finds, after conducting the evaluation required in paragraph (1), that the development of a repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only is required, taking into account all of the factors described in such subsection, the Secretary shall proceed promptly with arrangement for the use of one or more of the repositories to be developed under subtitle A of title I for the disposal of such waste. Such arrangements shall include the allocation of costs of developing, constructing, and operating this repository or repositories. The costs resulting from permanent disposal of high-level radioactive waste from atomic energy defense activities shall be paid by the Federal Government, into the special account established under section 302.

(3) Any repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only shall (A) be subject to licensing under section 202 of the Energy Reorganization Act of 1973 (42 U.S.C. 5842); and (B) comply with all requirements of the Commission for the siting, development, construction, and operation of a repository.

(c) APPLICABILITY TO CERTAIN REPOSITORIES.—The provisions of this Act shall apply with respect to any repository not used exclusively for the disposal of high-level radioactive waste or spent nuclear fuel resulting from atomic energy defense activities, research and development activities of the Secretary, or both.

APPLICABILITY

SEC. 9. TRANSPORTATION.—Nothing in this Act shall be construed to affect federal, state or local laws pertaining to the transportation of spent nuclear fuel or high-level radioactive waste.

TITLE I—DISPOSAL AND STORAGE OF HIGH-LEVEL RADIOACTIVE WASTE, SPENT NUCLEAR FUEL, AND LOW-LEVEL RADIOACTIVE WASTE

STATE AND AFFECTED INDIAN TRIBE PARTICIPATION IN DEVELOPMENT OF PROPOSED REPOSITORIES FOR DEFENSE WASTE

SEC. 101. (a) NOTIFICATION TO STATES AND AFFECTED INDIAN TRIBES.—Notwithstanding the provisions of section 8, upon any decision by the Secretary or the President to develop a repository for the disposal of high-level radioactive waste or spent nuclear fuel resulting exclusively from atomic energy defense activities, research and development activities of the Secretary, or both, and before proceeding with any site-specific investigations with respect to such repository, the Secretary shall notify the Governor and legislature of the State in which such repository is proposed to be located, or the governing body of the affected Indian tribe on whose reservation such repository is proposed to be located, as the case may be, of such decision.

(b) PARTICIPATION OF STATES AND AFFECTED INDIAN TRIBES.—Following the receipt of any notification under subsection (a), the State or Indian tribe involved shall be entitled, with respect to the proposed repository involved, to rights of participation and consultation identical to those provided in sections 115 through 118, except that any financial assistance authorized to be provid-

ed to such State or affected Indian tribe under section 116(c) or 118(b) shall be made from amounts appropriated to the Secretary for purposes of carrying out this section.

SUBTITLE A—REPOSITORIES FOR DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

FINDINGS AND PURPOSES

SEC. 111. (a) FINDINGS.—The Congress finds that—

(1) radioactive waste creates potential risks and requires safe and environmentally acceptable methods of disposal;

(2) a national problem has been created by the accumulation of (A) spent nuclear fuel from nuclear reactors; and (B) radioactive waste from (i) reprocessing of spent nuclear fuel; (ii) activities related to medical research, diagnosis, and treatment; and (iii) other sources;

(3) Federal efforts during the past 30 years to devise a permanent solution to the problems of civilian radioactive waste disposal have not been adequate;

(4) while the Federal Government has the responsibility to provide for the permanent disposal of high-level radioactive waste and such spent nuclear fuel as may be disposed of in order to protect the public health and safety and the environment, the costs of such disposal should be the responsibility of the generators and owners of such waste and spent fuel;

(5) the generators and owners of high-level radioactive waste and spent nuclear fuel have the primary responsibility to provide for, and the responsibility to pay the costs of, the interim storage of such waste and spent fuel until such waste and spent fuel is accepted by the Secretary of Energy in accordance with the provisions of this Act;

(6) State and public participation in the planning and development of repositories is essential in order to promote public confidence in the safety of disposal of such waste and spent fuel; and

(7) high-level radioactive waste and spent nuclear fuel have become major subjects of public concern, and appropriate precautions must be taken to ensure that such waste and spent fuel do not adversely affect the public health and safety and the environment for this or future generations.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to establish a schedule for the siting, construction, and operation of repositories that will provide a reasonable assurance that the public and the environment will be adequately protected from the hazards posed by high-level radioactive waste and such spent nuclear fuel as may be disposed of in a repository;

(2) to establish the Federal responsibility, and a definite Federal policy, for the disposal of such waste and spent fuel;

(3) to define the relationship between the Federal Government and the State governments with respect to the disposal of such waste and spent fuel; and

(4) to establish a Nuclear Waste Fund, composed of payments made by the generators and owners of such waste and spent fuel, that will ensure that the costs of carrying out activities relating to the disposal of such waste and spent fuel will be borne by the persons responsible for generating such waste and spent fuel.

RECOMMENDATION OF CANDIDATE SITES FOR SITE CHARACTERIZATION

SEC. 112. (a) GUIDELINES.—Not later than 180 days after the date of the enactment of this Act, the Secretary, following consultation with the Council on Environmental Quality, the Administrator of the Environmental Protection Agency, the Director of the Geological Survey, and interested Governors, and the concurrence of the Commission shall issue general guidelines for the recommendation of sites for repositories. Such guidelines shall specify detailed geologic considerations that shall be primary criteria for the selection of sites in various geologic media. Such guidelines shall specify factors that qualify or disqualify any site from development as a repository, including factors pertaining to the location of valuable natural resources, hydrology, geophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall take into consideration the proximity to sites where high-level radioactive waste and spent nuclear fuel is generated or temporarily stored and the transportation and safety factors involved in moving such waste to a repository. Such guidelines shall specify population factors that will disqualify any site from development as a repository if any surface facility of such repository would be located (1) in a highly populated area; (2) adjacent to an area 1 mile by 1 mile having a population of not less than 1,000 individuals. Such guidelines also shall require the Secretary to consider the cost and impact of transporting to the repository site the solidified high-level radioactive waste and spent fuel to be disposed of in the repository and the advantages of regional distribution in the siting of repositories. Such guidelines shall require the Secretary to consider the various geologic media in which sites for repositories may be located and, to the extent practicable, to recommend sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering candidate sites for recommendation under subsection (b). The Secretary may revise such guidelines from time to time, consistent with the provisions of this subsection.

(b) RECOMMENDATION BY SECRETARY TO THE PRESIDENT.—(1)(A) Following the issuance of guidelines under subsection (a) and consultation with the Governors of affected States, the Secretary shall nominate at least 5 sites that he determines suitable for site characterization for selection of the first repository site.

(B) Subsequent to such information, the Secretary shall recommend to the President three of the nominated sites not later than January 1, 1985 for characterization as candidate sites.

(C) Not later than July 1, 1989, the Secretary shall nominate five sites, which shall include at least three additional sites not nominated under subparagraph (A), and recommend by such date to the President from such five nominated sites three candidate sites the Secretary determines suitable for site characterization for selection of the second repository. The Secretary may not nominate any site previously nominated under subparagraph (A), that was not recommended as a candidate site under subparagraph (B).

(D) Such recommendations under subparagraphs (B) and (C) shall be consistent with the provisions of section 305.

(E) Each nomination of a site under this subsection shall be accompanied by an environmental assessment, which shall include a detailed statement of the basis for such recommendation and of the probable impacts of the site characterization activities planned for such site, and a discussion of alternative activities relating to site characterization that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an evaluation by the Secretary as to whether such site is suitable for site characterization under the guidelines established under subsection (a);

(ii) an evaluation by the Secretary as to whether such site is suitable for development as a repository under each such guideline that does not require site characterization as a prerequisite for application of such guideline;

(iii) an evaluation by the Secretary of the effects of the site characterization activities at such site on the public health and safety and the environment;

(iv) a reasonable comparative evaluation by the Secretary of such site with other sites and locations that have been considered;

(v) a description of the decision process by which such site was recommended; and

(vi) an assessment of the regional and local impacts of locating the proposed repository at such site.

(F)(i) the issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119. Such judicial review shall be limited to the sufficiency of such environmental assessment with respect to the items described in clauses (i) through (vi) of subparagraph (E).

(G) Each environmental assessment prepared under this paragraph shall be made available to the public.

(H) Before nominating a site, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such nomination and the basis for such nomination.

(2) Before nominating any site the Secretary shall hold public hearings in the vicinity of such site to inform the residents of the area in which such site is located of the proposed nomination of such site and to receive their comments. At such hearings, the Secretary shall also solicit and receive any recommendations of such residents with respect to issues that should be addressed in the environmental assessment described in paragraph (1) and the site characterization plan described in section 113(b)(1).

(3) In evaluating the sites nominated under this section prior to any decision to recommend a site as a candidate site, the Secretary shall use available geophysical, geological, geochemical and hydrologic, and other information and shall not conduct any preliminary borings or excavations at a site unless (i) such preliminary boring or excavation activities were in progress upon the date of enactment of this Act or (ii) the Secretary certifies that such available information from other sources, in the absence of preliminary borings or excavations, will not be adequate to satisfy applicable requirements of this Act or any other law: Provided, That preliminary boring or excavations under this section shall not exceed a diameter of six inches.

(c) PRESIDENTIAL REVIEW OF RECOMMENDED CANDIDATE SITES.—(1) The President shall review each candidate site recommendation

made by the Secretary under subsection (b). Not later than 60 days after the submission by the Secretary of a recommendation of a candidate site, the President, in his discretion, may either approve or disapprove such candidate site, and shall transmit any such decision to the Secretary and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be. If, during such 60-day period, the President fails to approve or disapprove such candidate site, or fails to invoke his authority under paragraph (2) to delay his decision, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(2) The President may delay for not more than 6 months his decision under paragraph (1) to approve or disapprove a candidate site, upon determining that the information provided with the recommendation of the Secretary is insufficient to permit a decision within the 60-day period referred to in paragraph (1). The President may invoke his authority under this paragraph by submitting written notice to the Congress, within such 60-day period, of his intent to invoke such authority. If the President invokes such authority, but fails to approve or disapprove the candidate site involved by the end of such 6-month period, such candidate site shall be considered to be approved, and the Secretary shall notify such Governor and legislature, or governing body of the affected Indian tribe, of the approval of such candidate site by reason of the inaction of the President.

(d) CONTINUATION OF CANDIDATE SITE SCREENING.—After the required recommendation of candidate sites under subsection (b), the Secretary may continue, as he determines necessary, to identify and study other sites to determine their suitability for recommendation for site characterization, in accordance with the procedures described in this section.

(e) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this section, each activity of the President or the Secretary under this section shall be considered to be a preliminary decisionmaking activity. No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(f) TIMELY SITE CHARACTERIZATION.—Nothing in this section may be construed as prohibiting the Secretary from continuing ongoing or presently planned site characterization at any stie on Department of Energy land for which the location of the principal borehole has been approved by the Secretary by August 1, 1982, except that (1) the environmental assessment described in subsection (b)(1) shall be prepared and made available to the public before proceeding to sink shafts at any such site; and (2) the Secretary shall not continue site characterization at any such site unless such site is among the candidate sites recommended by the Secretary under the first sentence of subsection (b) for site characterization and approved by the President under subsection (c); and (3) the Secretary shall conduct public hearings under 113(b)(2) and comply with requirements under section 117 of this Act within 1 year of the date of enactment.

SITE CHARACTERIZATION

SEC. 113. (a) IN GENERAL.—The Secretary shall carry out, in accordance with the provisions of this section, appropriate site characterization activities beginning with the candidate sites that have been approved under section 112 and are located in various geologic media. The Secretary shall consider fully the comments received under subsection (b)(2) and section 112(b)(2) and shall, to the maximum extent practicable and in consultation with the Governor of the State involved or the governing body of the affected Indian tribe involved, conduct site characterization activities in a manner that minimizes any significant adverse environmental impacts identified in such comments or in the environmental assessment submitted under subsection (b)(1).

(b) COMMISSION AND STATES.—(1) Before proceeding to sink shafts at any candidate site, the Secretary shall submit for such candidate site to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe on whose reservation such candidate site is located, as the case may be, for their review and comment—

(A) a general plan for site characterization activities to be conducted at such candidate site, which plan shall include—

(i) a description of such candidate site;

(ii) a description of such site characterization activities, including the following: the extent of planned excavations, plans for any onsite testing with radioactive or nonradioactive material, plans for any investigation activities that may affect the capability of such candidate site to isolate high-level radioactive waste and spent nuclear fuel, and plans to control any adverse, safety-related impacts from such site characterization activities;

(iii) plans for the decontamination and decommissioning of such candidate site, and for the mitigation of any significant adverse environmental impacts caused by site characterization activities if it is determined unsuitable for application for a construction authorization for a repository;

(iv) criteria to be used to determine the suitability of such candidate site for the location of a repository, developed pursuant to section 112(a); and

(v) any other information required by the Commission;

(B) a description of the possible form or packaging for the high-level radioactive waste and spent nuclear fuel to be emplaced in such repository, a description, to the extent practicable, of the relationship between such waste form or packaging and the geologic medium of such site, and a description of the activities being conducted by the Secretary with respect to such possible waste form or packaging or such relationship; and

(C) a conceptual repository design that takes into account likely site-specific requirements.

(2) Before proceeding to sink shafts at any candidate site, the Secretary shall (A) make available to the public the site characterization plan described in paragraph (1); and (B) hold public hearings in the vicinity of such candidate site to inform the residents of the area in which such candidate site is located of such plan, and to receive their comments.

(3) During the conduct of site characterization activities at a candidate site, the Secretary shall report not less than once every 6 months to the Commission and to either the Governor and legislature of the State in which such candidate site is located, or the governing body of the affected Indian tribe where such candidate site is located, as the case may be, on the nature and extent of such activities and the information developed from such activities.

(c) RESTRICTIONS.—(1) The Secretary may conduct at any candidate site only such site characterization activities as the Secretary considers necessary to provide the data required for evaluation of the suitability of such candidate site for an application to be submitted to the Commission for a construction authorization for a repository at such candidate site, and for compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(2) In conducting site characterization activities—

(A) the Secretary may not use any radioactive material at a candidate site unless the Commission concurs that such use is necessary to provide data for the preparation of the required environmental reports and an application for a construction authorization for a repository at such candidate site; and

(B) if any radioactive material is used at a candidate site—

(i) the Secretary shall use the minimum quantity necessary to determine the suitability of such candidate site for a repository, but in no event more than the curie equivalent of 10 metric tons of spent nuclear fuel; and

(ii) such radioactive material shall be fully retrievable.

(3) If site characterization activities are terminated at a candidate site for any reason, the Secretary shall (A) notify the Congress, the Governors and legislatures of all States in which candidate sites are located, and the governing bodies of all affected Indian tribes where candidate sites are located, of such termination and the reasons for such termination; and (B) remove any high-level radioactive waste, spent nuclear fuel, or other radioactive materials at or in such candidate site as promptly as practicable.

(4) If a site is determined to be unsuitable for application for a construction authorization for a repository, the Secretary shall take reasonable and necessary steps to reclaim the site and to mitigate any significant adverse environmental impacts caused by site characterization activities.

(d) PRELIMINARY ACTIVITIES.—Each activity of the Secretary under this section that is in compliance with the provisions of subsection (c) shall be considered a preliminary decisionmaking activity. No such activity shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

SITE APPROVAL AND CONSTRUCTION AUTHORIZATION

SEC. 114. (a) HEARINGS AND PRESIDENTIAL RECOMMENDATION.—(1) The Secretary shall hold public hearings in the vicinity of each site under consideration for recommendation to the President under this paragraph as a site for the development of a repository, for the purposes of informing the residents of the area in which such site is located of such consideration and receiving their comments regarding the possible recommendation of such site. If, upon completion of such hearings and completion of site character-

ization activities at not less than 3 candidate sites for the first proposed repository, or from all of the characterized sites for the development of subsequent respositories, under section 113, the Secretary decides to recommend approval of such site to the President, the Secretary shall notify the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, of such decision. No sooner than the expiration of the 30-day period following such notification, the Secretary shall submit to the President a recommendation that the President approve such site for the development of a repository. Any such recommendation by the Secretary shall be based on the record of information developed by the Secretary under section 113 and this section, including the information described in subparagraph (A) through subparagraph (G). In making site recommendations and approvals subsequent to the first site recommendation, the Secretary and the President, respectively, shall also consider the need for regional distribution of repositories and the need to minimize, to the extent practicable, the impacts and cost of transporting spent fuel and solidified high-level radioactive waste. Together with any recommendation of a site under this paragraph, the Secretary shall make available to the public, and submit to the President, a comprehensive statement of the basis of such recommendation, including the following:

(A) a description of the proposed repository, including preliminary engineering specifications for the facility;

(B) a description of the waste form or packaging proposed for use at such repository, and an explanation of the relationship between such waste form or packaging and the geologic medium of such site;

(C) a discussion of data, obtained in site characterization activities, relating to the safety of such site;

(D) a final environmental impact statement prepared pursuant to subsection (f) and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), including an analysis of the consideration given by the Secretary to not less than 3 candidate sites for the first proposed respository or to all of the characterized sites for the development of subsequent repositories, with respect to which site characterization is completed under section 113, together with comments made concerning such environmental impact statement by the Secretary of the Interior, the Council on Environmental Quality, the Administrator, and the Commission, except that any such environmental impact statement concerning the first repository to be developed under this Act shall not be required to consider the need for a repository or the alternatives to geologic disposal;

(E) preliminary comments of the Commission concerning the extent to which the at-depth site characterization analysis and the waste form proposal for such site seem to be sufficient for inclusion in any application to be submitted by the Secretary for licensing of such site as a repository;

(F) the views and comments of the Governor and legislature of any State, or the governing body of any affected Indian tribe, as determined by the Secretary, together with the response of the Secretary to such views;

(G) such other information as the Secretary considers appropriate; and

(H) any impact report submitted under section 116(c)(2)(B) by the State in which such site is located, or under section 118(b)(3)(B) by the affected Indian tribe where such site is located, as the case may be.

(2)(A) Not later than March 31, 1987, the President shall submit to the Congress a recommendation of one site from the three sites initially characterized that the President considers qualified for application for a construction authorization for a repository. Not later than March 31, 1990, the President shall submit to the Congress a recommendation of a second site from any sites already characterized that the President considers qualified for a construction authorization for a second repository. The President shall submit with such recommendation a copy of the report for such site prepared by the Secretary under paragraph (1). After submission of the second such recommendation, the President may submit to the Congress recommendations for other sites, in accordance with the provisions of this subtitle.

(B) The President may extend the deadlines described in subparagraph (A) by not more than 12 months if, before March 31, 1986, for the first site, and March 31, 1989, for the second site, (i) the President determines that such extension is necessary; and (ii) transmits to the Congress a report setting forth the reasons for such extension.

(3) If approval of any such site recommendation does not take effect as a result of a disapproval by the Governor or legislature of a State under section 116 or the governing body of an affected Indian tribe under section 118, the President shall submit to the Congress, not later than 1 year after the disapproval of such recommendation, a recommendation of another site for the first or subsequent repository.

(4)(A) The President may not recommend the approval of any site under this subsection unless the Secretary has recommended to the President under paragraph (1) approval of such site and has submitted to the President a report for such site as required under such paragraph.

(B) No recommendation of a site by the President under this subsection shall require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

(b) SUBMISSION OF APPLICATION.—If the President recommends to the Congress a site for a repository under subsection (a) and the site designation is permitted to take effect under section 115, the Secretary shall submit to the Commission an application for a construction authorization for a repository at such site not later than 90 days after the date on which the recommendation of the site designation is effective under such section and shall provide to the Governor and legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, a copy of such application.

(c) STATUS REPORT ON APPLICATION.—Not later than 1 year after the date on which an application for a construction authorization is submitted under subsection (b), and annually thereafter until the date on which such authorization is granted, the Commission shall submit a report to the Congress describing the proceedings undertaken through the date of such report with regard to such application, including a description of—

(1) any major unresolved safety issues, and the explanation of the Secretary with respect to design and operation plans for resolving such issues;

(2) any matters of contention regarding such application; and

(3) any Commission actions regarding the granting or denial of such authorization.

(d) COMMISSION ACTION.—The Commission shall consider an application for a construction authorization for all or part of a repository in accordance with the laws applicable to such applications, except that the Commission shall issue a final decision approving or disapproving the issuance of a construction authorization not later than—

(1) January 1, 1989, for the first such application, and January 1, 1992, for the second such application; or

(2) the expiration of 3 years after the date of the submission of such application, except that the Commission may extend such deadline by not more than 12 months if, not less than 30 days before such deadline, the Commission complies with the reporting requirements established in subsection (e)(2);

whichever occurs later. The Commission decision approving the first such application shall prohibit the emplacement in the first repository of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of such a quantity of spent fuel until such time as a second repository is in operation. In the event that a monitored retrievable storage facility, approved pursuant to subtitle C of this Act, shall be located, or is planned to be located, within 50 miles of the first repository, then the Commission decision approving the first such application shall prohibit the emplacement of a quantity of spent fuel containing in excess of 70,000 metric tons of heavy metal or a quantity of solidified high-level radioactive waste resulting from the reprocessing of spent fuel in both the repository and monitored retrievable storage facility until such time as a second repository is in operation.

(e) PROJECT DECISION SCHEDULE.—(1) The Secretary shall prepare and update, as appropriate, in cooperation with all affected Federal agencies, a project decision schedule that portrays the optimum way to attain the operation of the repository involved, within the time periods specified in this subtitle. Such schedule shall include a description of objectives and a sequence of deadlines for all Federal agencies required to take action, including an identification of the activities in which a delay in the start, or completion, of such activities will cause a delay in beginning repository operation.

(2) Any Federal agency that determines that it cannot comply with any deadline in the project decision schedule, or fails to so comply, shall submit to the Secretary and to the Congress a written report explaining the reason for its failure or expected failure to meet such deadline, the reason why such agency could not reach an agreement with the Secretary, the estimated time for completion of the activity or activities involved, the associated effect on its other deadlines in the project decision schedule, and any recommendations it may have or actions it intends to take regarding any improvements in its operation or organization, or changes to its statutory directives or authority, so that it will be able to mitigate the delay involved. The Secretary, within 30 days after receiving any such report, shall file with the Congress his response to such report, including the reasons why the Secretary could not amend the project decision schedule to accommodate the Federal agency involved.

(f) ENVIRONMENTAL IMPACT STATEMENT.—Any recommendation made by the Secretary under this section shall be considered a major Federal action significantly affecting the quality of the human environment for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). A final environmental impact statement prepared by the Secretary under such Act shall accompany any recommendation to the President to approve a site for a repository. With respect to the requirements imposed by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), compliance with the procedures and requirements of this Act shall be deemed adequate consideration of the need for a repository, the time of the initial availability of a repository, and all alternatives to the isolation of high-level radioactive waste and spent nuclear fuel in a repository. For purposes of complying with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 1321 et seq.) and this section, the Secretary shall consider as alternate sites for the first repository to be developed under this subtitle 3 candidate sites with respect to which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination that such sites are suitable for development as repositories consistent with the guidelines promulgated under section 112(a). The Secretary shall consider as alternative sites for subsequent repositories at least three of the remaining sites recommended by the Secretary by January 1, 1985, and by July 1, 1989, pursuant to section 112(b) and approved by the President for site characterization pursuant to section 112(c) for which (1) site characterization has been completed under section 113; and (2) the Secretary has made a preliminary determination that such sites are suitable for development as repositories consistent with the guidelines promulgated under section 112(a). Any environmental impact statement prepared in connection with a repository proposed to be constructed by the Secretary under this subtitle shall, to the extent practicable, be adopted by the Commission in connection with the issuance by the Commission of a construction authorization and license for such repository. To the extent such statement is adopted by the Commission, such adoption shall be deemed to also satisfy the responsibilities of the Commission under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and no further consideration shall be required, except that nothing in this subsection shall affect any independent responsibilities of the Commission to protect the public health and safety under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.). Nothing in this Act shall be construed to amend or otherwise detract from the licensing requirements of the Nuclear Regulatory Commission as established in title II of the Energy Reorganization Act of 1974 (Public Law 93-438). In any such statement prepared with respect to the first repository to be constructed under this subtitle, the need for a repository or nongeologic alternatives to the site of such repository shall not be considered.

REVIEW OF REPOSITORY SITE SELECTION

SEC. 115. (a) DEFINITION.—For purposes of this section, the term "resolution of repository siting approval" means a joint resolution of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the site at for a repository, with respect to which a notice of disapproval was submitted by on .". The first blank space in such resolution shall be filled with the name of the geographic location of the proposed site of the repository to which such resolution pertains; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or Indian tribe governing body submitting the notice of disapproval to which such resolution pertains; and the last blank space in such resolution shall be filled with the date of such submission.

(b) STATE OR INDIAN TRIBE PETITIONS.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor and legislature of the State in which such site is located, or the governing body of an Indian tribe on whose reservation such site is located, as the case may be, has submitted to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval has been submitted, the designation of such site shall not be effective except as provided under subsection (c).

(c) CONGRESSIONAL REVIEW OF PETITIONS.—If any notice of disapproval of a repository site designation has been submitted to the Congress under section 116 or 118 after a recommendation for approval of such site is made by the President under section 114, such site shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress after the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution of repository siting approval in accordance with this subsection approving such site, and such resolution thereafter becomes law.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions of repository siting approval, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118, a resolution of repository siting approval, shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution of repository siting approval, be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution of repository siting approval, with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(3) If any committee to which is referred a resolution approval introduced under paragraph (2)(A), or, in the absence of such a resolution, any other resolution of siting approval introduced with respect to the site involved, has not reported such resolution at the end of 60 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution of siting approval has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution of siting approval, and on all debatable motions and appeals in connection with such resolution shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution of siting approval, and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution of siting approval shall be decided without debate.

(5) If the Senate receives from the House a resolution of repository siting approval with respect to any site, then the following procedure shall apply:

(A) The resolution of the House with respect to such site shall not be referred to a committee.

(B) With respect to the resolution of the Senate with respect to such site—

(i) the procedure with respect to that or other resolutions of the Senate with respect to such site shall be the same as if no resolution from the House with respect to such site had been received; but

(ii) on any vote on final passage of a resolution of the Senate with respect to such site, a resolution from the House with respect to such site where the text is identical shall be automatically substituted for the resolution of the Senate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress.—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions of repository siting approval, and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 60 days of continuous session after the introduction of the first resolution of repository siting approval with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution of repository siting approval after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution to adoption without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(5) If the House receives from the Senate a resolution of repository siting approval with respect to any site, then the following procedure shall apply:

(A) The resolution of the Senate with respect to such site shall not be referred to a committee.

(B) With respect to the resolution of the House with respect to such site—

(i) the procedure with respect to that or other resolutions of the House with respect to such site shall be the same as if no resolution from the Senate with respect to such site had been received; but

(ii) on any vote on final passage of a resolution of the House with respect to such site, a resolution from the Senate with respect to such site where the text is identical shall be automatically substituted for the resolution of the House.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 60-day period referred to in subsections (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considering any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of such comments by the Commission shall not be construed as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

PARTICIPATION OF STATES

SEC. 116. (a) NOTIFICATION OF STATES AND AFFECTED TRIBES.—The Secretary shall identify the States with one or more potentially acceptable sites for a repository within 90 days after the date of enactment of this Act. Within 90 days of such identification, the Secretary shall notify the Governor, the State legislature, and the tribal council of any affected Indian tribe in any State of the potentially acceptable sites within such State. For the purposes of this title, the term "potentially acceptable site" means any site at which, after geologic studies and field mapping but before detailed geologic data gathering, the Department undertakes preliminary drilling and geophysical testing for the definition of site location.

(b) STATE PARTICIPATION IN REPOSITORY SITING DECISIONS.—(1) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under paragraph (2). In any case in which State law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(2) Upon the submission by the President to the Congress of a recommendation of a site for a repository, the Governor or legislature of the State in which such site is located may disapprove the site designation and submit to the Congress a notice of disapproval. Such Governor or legislature may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why such Governor or legislature disapproved the recommended repository site involved.

(3) The authority of the Governor or legislature of each State under this subsection shall not be applicable with respect to any site located on a reservation.

(c) FINANCIAL ASSISTANCE.—(1)(A) The Secretary shall make grants to each State notified under subsection (a) for the purpose of participating in activities required by sections 116 and 117 or authorized by written agreement entered into pursuant to subsection 117(c). Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(B) The Secretary shall make grants to each State in which a candidate site for a repository is approved under section 112(c). Such grants may be made to each such State only for purposes of enabling such State—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the State and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to its residents regarding any activities of such State, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(C) Any salary or travel expense that would ordinarily be incurred by such State, or by any political subdivision of such State, may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall provide financial and technical assistance to any State requesting such assistance in which there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such State of the development of such repository. Such assistance to such State shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any State desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a repository at a site in such State. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the State involved setting forth the amount of assistance to be provided to such State under this paragraph and the procedures to be followed in providing such assistance.

(3) The Secretary shall also grant to each State and unit of general local government in which a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such State and unit of general local government, respectively, would receive were they authorized to tax site characterization activities at such site, and the development and operation of such repository, as such State and unit of general local government tax the other real property and industrial activities occurring within such State and unit of general local government. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(4)(A) A State may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies the Governor and legislature of the State involved of the termination of site characterization activities at the candidate site involved in such State;

(ii) the date on which the site in such State is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site in the State approved under section 112(c) with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) A State may not receive any further assistance under paragraph (2) with respect to a site if repository construction activities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginning on the effective date of any license to receive and possess for a repository in a State, no Federal funds shall be made available to such State under paragraph (1) or (2), except for—

(i) such funds as may be necessary to support State activities related to any other repository located in, or proposed to be located in, such State, and for which a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support State activities pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such State with the Secretary during such 2-year period.

(5) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

(d) ADDITIONAL NOTIFICATION AND CONSULTATION.—Whenever the Secretary is required under any provision of this Act to notify or consult with the governing body of an affected Indian tribe where a site is located, the Secretary shall also notify or consult with, as the case may be, the Governor of the State in which such reservation is located.

CONSULTATION WITH STATES AND AFFECTED INDIAN TRIBES

SEC. 117. (a) PROVISION OF INFORMATION.—(1) The Secretary, the Commission, and other agencies involved in the construction, operation, or regulation of any aspect of a repository in a State shall provide to the Governor and legislature of such State, and to the governing body of any affected Indian tribe, timely and complete information regarding determinations or plans made with respect to the site characterization siting, development, design, licensing, construction, operation, regulation, or decommissioning of such repository.

(2) Upon written request for such information by the Governor or legislature of such State, or by the governing body of any affected Indian tribe, as the case may be, the Secretary shall provide a written response to such request within 30 days of the receipt of such request. Such response shall provide the information requested or, in the alternative, the reasons why the information cannot be so provided. If the Secretary fails to so respond within such 30 days, the Governor or legislature of such State, or the governing body of any affected Indian tribe, as the case may be, may transmit a formal written objection to such failure to respond to the President. If the President or Secretary fails to respond to such written request within 30 days of the receipt by the President of such formal written objection, the Secretary shall immediately suspend all activities in such State authorized by this subtitle, and shall not renew such activities until the Governor or legislature of such State, or the governing body of any affected Indian tribe, as the case may be, has received the written response to such written request required by this subsection.

(b) CONSULTATION AND COOPERATION.—In performing any study of an area within a State for the purpose of determining the suitability of such area for a repository pursuant to section 112(c), and in subsequently developing and loading any repository within such State, the Secretary shall consult and cooperate with the Governor and legislature of such State and the governing body of any affected Indian tribe in an effort to resolve the concerns of such State and any affected Indian tribe regarding the public health and safety, environmental, and economic impacts of any such repository. In carrying out his duties under this subtitle, the Secretary shall take such concerns into account to the maximum extent feasible and as specified in written agreements entered into under subsection (c).

(c) WRITTEN AGREEMENT.—Not later than 60 days after (1) the approval of a site for site characterization for such a repository under section 112(c), or (2) the written request of the State or Indian tribe in any affected State notified under section 116(a) to the Secretary, whichever, first occurs, the Secretary shall seek to enter into a binding written agreement, and shall begin negotiations, with such State and, where appropriate, to enter into a separate binding agreement with the governing body of any affected Indian tribe, setting forth (but not limited to) the procedures under which the requirements of subsections (a) and (b), and the provisions of such written agreement, shall be carried out. Any such written agreement shall not affect the authority of the Commission under existing law. Each such written agreement shall, to the maximum extent feasible, be completed not later than 6 months after such notification. If such written agreement is not completed within such period, the Secretary shall report to the Congress in writing within 30 days on the status of negotiations to develop such agreement and the reasons why such agreement has not been completed. Prior to submission of such report to the Congress, the Secretary shall transmit such report to the Governor of such State or the governing body of such affected Indian tribe, as the case may be, for their review and comments. Such comments shall be included in such report prior to submission to the Congress. Such written agreement shall specify procedures—

(1) by which such State or governing body of an affected Indian tribe, as the case may be, may study, determine, comment on, and make recommendations with regard to the possible public health and safety, environmental, social, and economic impacts of any such repository;

(2) by which the Secretary shall consider and respond to comments and recommendations made by such State or governing body of an affected Indian tribe, including the period in which the Secretary shall so respond;

(3) by which the Secretary and such State or governing body of an affected Indian tribe may review or modify the agreement periodically;

(4) by which such State or governing body of an affected Indian tribe is to submit an impact report and request for impact assistance under section 116(c) or section 118(b), as the case may be;

(5) by which the Secretary shall assist such State, and the units of general local government in the vicinity of the repository site, in resolving the offsite concerns of such State and units of general local government, including, but not limited to, questions of State liability arising from accidents, necessary road upgrading and access to the site, ongoing emergency preparedness and emergency response, monitoring of transportation of high-level radioactive waste and spent nuclear fuel through such State, conduct of baseline health studies of inhabitants in neighboring communities near the repository site and reasonable periodic monitoring thereafter, and monitoring of the repository site upon any decommissioning and decontamination;

(6) by which the Secretary shall consult and cooperate with such State on a regular, ongoing basis and provide for an orderly process and timely schedule for State review and evaluation, including identification in the agreement of key events, milestones, and decision points in the activities of the Secretary at the potential repository site;

(7) by which the Secretary shall notify such State prior to the transportation of any high-level radioactive waste and spent nuclear fuel into such State for disposal at the repository site;

(8) by which such State may conduct reasonable independent monitoring and testing of activities on the repository site, except that such monitoring and testing shall not unreasonably interfere with or delay onsite activities;

(9) for sharing, in accordance with applicable law, of all technical and licensing information, the utilization of available expertise, the facilitating of permit procedures, joint project review, and the formulation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws;

(10) for public notification of the procedures specified under the preceding paragraphs; and

(11) for resolving objections of a State and affected Indian tribes at any stage of the planning, siting, development, construction, operation, or closure of such a facility within such State through negotiation, arbitration, or other appropriate mechanisms.

PARTICIPATION OF INDIAN TRIBES

SEC. 118. (a) PARTICIPATION OF INDIAN TRIBES IN REPOSITORY SITING DECISIONS.—Upon the submission by the President to the Congress of a recommendation of a site for a repository located on the reservation of an affected Indian tribe, the governing body of such Indian tribe may disapprove the site designation and submit to the Congress a notice of disapproval. The governing body of such Indian tribe may submit such a notice of disapproval to the Congress not later than the 60 days after the date that the President recommends such site to the Congress under section 114. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the governing body of such Indian tribe disapproved the recommended repository site involved.

(b) FINANCIAL ASSISTANCE.—(1) The Secretary shall make grants to each affected tribe notified under section 116(a) for the purpose of participating in activities required by section 117 or authorized by written agreement entered into pursuant to section 117(c). Any salary or travel expense that would ordinarily be incurred by such tribe,

may not be considered eligible for funding under this paragraph.

(2)(A) The Secretary shall make grants to each affected Indian tribe where a candidate site for a repository is approved under section 112(c). Such grants may be made to each such Indian tribe only for purposes of enabling such Indian tribe—

(i) to review activities taken under this subtitle with respect to such site for purposes of determining any potential economic, social, public health and safety, and environmental impacts of such repository on the reservation and its residents;

(ii) to develop a request for impact assistance under paragraph (2);

(iii) to engage in any monitoring, testing, or evaluation activities with respect to site characterization programs with regard to such site;

(iv) to provide information to the residents of its reservation regarding any activities of such Indian tribe, the Secretary, or the Commission with respect to such site; and

(v) to request information from, and make comments and recommendations to, the Secretary regarding any activities taken under this subtitle with respect to such site.

(B) The amount of funds provided to any affected Indian tribe under this paragraph in any fiscal year may not exceed 100 percent of the costs incurred by such Indian tribe with respect to the activities described in clauses (i) through (v) of subparagraph (A). Any salary or travel expense that would ordinarily be incurred by such Indian tribe may not be considered eligible for funding under this paragraph.

(3)(A) The Secretary shall provide financial and technical assistance to any affected Indian tribe requesting such assistance and where there is a site with respect to which the Commission has authorized construction of a repository. Such assistance shall be designed to mitigate the impact on such Indian tribe of the development of such repository. Such assistance to such Indian tribe shall commence within 6 months following the granting by the Commission of a construction authorization for such repository and following the initiation of construction activities at such site.

(B) Any affected Indian tribe desiring assistance under this paragraph shall prepare and submit to the Secretary a report on any economic, social, public health and safety, and environmental impacts that are likely as a result of the development of a repository at a site on the reservation of such Indian tribe. Such report shall be submitted to the Secretary following the completion of site characterization activities at such site and before the recommendation of such site to the President by the Secretary for application for a construction authorization for a repository. As soon as practicable following the granting of a construction authorization for such repository, the Secretary shall seek to enter into a binding agreement with the Indian tribe involved setting forth the amount of assistance to be provided to such Indian tribe under this paragraph and the procedures to be followed in providing such assistance.

(4) The Secretary shall grant to each affected Indian tribe where a site for a repository is approved under section 112(c) an amount each fiscal year equal to the amount such Indian tribe would receive were it authorized to tax site characterization activities at such site, and the development and operation of such repository, as such Indian tribe taxes the other commercial activities occurring on such reservation. Such grants shall continue until such time as all such activities, development, and operation are terminated at such site.

(5) An affected Indian tribe may not receive any grant under paragraph (1) after the expiration of the 1-year period following—

(i) the date on which the Secretary notifies such Indian tribe of the termination of site characterization activities at the candidate site involved on the reservation of such Indian tribe;

(ii) the date on which such site is disapproved under section 115; or

(iii) the date on which the Commission disapproves an application for a construction authorization for a repository at such site;

whichever occurs first, unless there is another candidate site on the reservation of such Indian tribe that is approved under section 112(c) and with respect to which the actions described in clauses (i), (ii), and (iii) have not been taken.

(B) An affected Indian tribe may not receive any further assistance under paragraph (2) with respect to a site if repository construction activities at such site are terminated by the Secretary or if such activities are permanently enjoined by any court.

(C) At the end of the 2-year period beginning on the effective date of any license to receive and possess for a repository at a site on the reservation of an affected Indian tribe, no Federal funds shall be made available under paragraph (1) or (2) to such Indian tribe, except for—

(i) such funds as may be necessary to support activities of such Indian tribe related to any other repository where a license to receive and possess has not been in effect for more than 1 year; and

(ii) such funds as may be necessary to support activities of such Indian tribe pursuant to agreements or contracts for impact assistance entered into, under paragraph (2), by such Indian tribe with the Secretary during such 2-year period.

(6) Financial assistance authorized in this subsection shall be made out of amounts held in the Nuclear Waste Fund established in section 302.

JUDICIAL REVIEW OF AGENCY ACTIONS

SEC. 119. (a) JURISDICTION OF UNITED STATES COURTS OF APPEALS.—(1) Except for review in the Supreme Court of the United States, the United States courts of appeals shall have original and exclusive jurisdiction over any civil action—

(A) for review of any final decision or action of the Secretary, the President, or the Commission under this subtitle;

(B) alleging the failure of the Secretary, the President, or the Commission to make any decision, or take any action, required under this subtitle;

(C) challenging the constitutionality of any decision made, or action taken, under any provision of this subtitle;

(D) for review of any environmental impact statement prepared pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to any action under this subtitle, or as required under section 135(c)(1), or alleging a failure to prepare such statement with respect to any such action;

(E) for review of any environmental assessment prepared under section 112(b)(1) or 135(c)(2); or

(F) for review of any research and development activity under title II.

(2) The venue of any proceeding under this section shall be in the judicial circuit in which the petitioner involved resides or has its principal office, or in the United States Court of Appeals for the District of Columbia.

(c) DEADLINE FOR COMMENCING ACTION.—A civil action for judicial review described under subsection (a)(1) may be brought not later than the 180th day after the date of the decision or action or failure to act involved, as the case may be, except that if a party shows that he did not know of the decision or action complained of (or of the failure to act), and that a reasonable person acting under the circumstances would not have known, such party may bring a civil action not later than the 180th day after the date such party acquired actual or constructive knowledge of such decision, action, or failure to act.

EXPEDITED AUTHORIZATIONS

SEC. 120. (a) ISSUANCE OF AUTHORIZATIONS.—(1) To the extent that the taking of any action related to the site characterization of a site or the construction or initial operation of a repository under this subtitle requires a certificate, right-of-way, permit, lease, or other authorization from a Federal agency or officer, such agency or officer shall issue or grant any such authorization at the earliest practicable date, to the extent permitted by the applicable provisions of law administered by such agency or officer. All actions of a Federal agency or officer with respect to consideration of applications or requests for the issuance or grant of any such authorization shall be expedited, and any such application or request shall take precedence over any similar applications or requests not related to such repositories.

(2) The provisions of paragraph (1) shall not apply to any certificate, right-of-way, permit, lease, or other authorization issued or granted by, or requested from, the Commission.

(b) TERMS OF AUTHORIZATIONS.—Any authorization issued or granted pursuant to subsection (a) shall include such terms and conditions as may be required by law, and may include terms and conditions permitted by law.

CERTAIN STANDARDS AND CRITERIA

SEC. 121. (a) ENVIRONMENTAL PROTECTION AGENCY STANDARDS.—Not later than 1 year after the date of the enactment of this Act, the Administrator, pursuant to authority under other provisions of law, shall, by rule, promulgate generally applicable standards for protection of the general environment from offsite releases from radioactive material in repositories.

(b) COMMISSION REQUIREMENTS AND CRITERIA.—(1)(A) Not later than January 1, 1984, the Commission, pursuant to authority under other provisions of law, shall, by rule, promulgate technical requirements and criteria that it will apply, under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) and the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.), in approving or disapproving—

(i) applications for authorization to construct repositories;

(ii) applications for licenses to receive and possess spent nuclear fuel and high-level radioactive waste in such repositories; and

(iii) applications for authorization for closure and decommissioning of such repositories.

(B) Such criteria shall provide for the use of a system of multiple barriers in the design

of the repository and shall include such restrictions on the retrievability of the solidified high-level radioactive waste and spent fuel emplaced in the repository as the Commission deems appropriate.

(C) Such requirements and criteria shall not be inconsistent with any comparable standards promulgated by the Administrator under subsection (a).

(2) For purposes of this Act, nothing in this section shall be construed to prohibit the Commission from promulgating requirements and criteria under paragraph (1) before the Administrator promulgates standards under subsection (a). If the Administrator promulgates standards under subsection (a) after requirements and criteria are promulgated by the Commission under paragraph (1), such requirements and criteria shall be revised by the Commission if necessary to comply with paragraph (1)(C).

(c) ENVIRONMENTAL IMPACT STATEMENT.—The promulgation of standards or criteria in accordance with the provisions of this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

DISPOSAL OF SPENT NUCLEAR FUEL

SEC. 122. Notwithstanding any other provision of this subtitle, any repository constructed on a site approved under this subtitle shall be designed and constructed to permit the retrieval of any spent nuclear fuel placed in such repository, during an appropriate period of operation of the facility, for any reason pertaining to the public health and safety, or the environment, or for the purpose of permitting the recovery of the economically valuable contents of such spent fuel. The Secretary shall specify the appropriate period of retrievability with respect to any repository at the time of design of such repository, and such aspect of such repository shall be subject to approval or disapproval by the Commission as part of the construction authorization process under subsections (b) through (d) of section 114.

TITLE TO MATERIAL

SEC. 123. Delivery, and acceptance by the Secretary, of any high-level radioactive waste or spent nuclear fuel for a repository constructed under this subtitle shall constitute a transfer to the Secretary of title to such waste or spent fuel.

CONSIDERATION OF EFFECT OF ACQUISITION OF WATER RIGHTS

SEC. 124. The Secretary shall give full consideration to whether the development, construction, and operation of a repository may require any purchase or other acquisition of water rights that will have a significant adverse effect on the present or future development of the area in which such repository is located. The Secretary shall mitigate any such adverse effects to the maximum extent practicable.

TERMINATION OF CERTAIN PROVISIONS

SEC. 125. Sections 119 and 120 shall cease to have effect at such time as a repository developed under this subtitle is licensed to receive and possess high-level radioactive waste and spent nuclear fuel.

SUBTITLE B—INTERIM STORAGE PROGRAM

FINDINGS AND PURPOSES

SEC. 131. (a) FINDINGS.—The Congress finds that—

(1) the persons owning and operating civilian nuclear power reactors have the primary responsibility for providing interim storage of spent nuclear fuel from such reactors, by maximizing, to the extent practical, the effective use of existing storage facilities at the site of each civilian nuclear power reactor, and by adding new onsite storage capacity in a timely manner where practical;

(2) the Federal Government has the responsibility to encourage and expedite the effective use of existing storage facilities and the addition of needed new storage capacity at the site of each civilian nuclear power reactor; and

(3) the Federal Government has the responsibility to provide, in accordance with the provisions of this subtitle, not more than 1,900 metric tons of capacity for interim storage of spent nuclear fuel for civilian nuclear power reactors that cannot reasonably provide adequate storage capacity at the sites of such reactors when needed to assure the continued, orderly operation of such reactors.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to provide for the utilization of available spent nuclear fuel pools at the site of each civilian nuclear power reactor to the extent practical and the addition of new spent nuclear fuel storage capacity where practical at the site of such reactor; and

(2) to provide, in accordance with the provisions of this subtitle, for the establishment of a federally owned and operated system for the interim storage of spent nuclear fuel at one or more facilities owned by the Federal Government with not more than 1,900 metric tons of capacity to prevent disruptions in the orderly operation of any civilian nuclear power reactor that cannot reasonably provide adequate spent nuclear fuel storage capacity at the site of such reactor when needed.

AVAILABLE CAPACITY FOR INTERIM STORAGE OF SPENT NUCLEAR FUEL

SEC. 132. The Secretary, the Commission, and other authorized Federal officials shall each take such actions as such official considers necessary to encourage and expedite the effective use of available storage, and necessary additional storage, at the site of each civilian nuclear power reactor consistent with—

(1) the protection of the public health and safety, and the environment;

(2) economic considerations;

(3) continued operation of such reactor;

(4) any applicable provisions of law; and

(5) the views of the population surrounding such reactor.

INTERIM AT REACTOR STORAGE

SEC. 133. The Commission shall, by rule, establish procedures for the licensing of any technology approved by the Commission under section 219(a) for use at the site of any civilian nuclear power reactor. The establishment of such procedures shall not preclude the licensing, under any applicable procedures or rules of the Commission in effect prior to such establishment, of any technology for the storage of civilian spent nuclear fuel at the site of any civilian nuclear power reactor.

LICENSING OF FACILITY EXPANSIONS AND TRANSSHIPMENTS

SEC. 134. (a) ORAL ARGUMENT.—In any Commission hearing under section 189 of the Atomic Energy Act of 1954 (42 U.S.C. 2239) on an application for a license, or for an amendment to an existing license, filed after the date of the enactment of this Act, to expand the spent nuclear fuel storage capacity at the site of a civilian nuclear power reactor, through the use of high-density fuel storage racks, fuel rod compaction, the transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, the construction of additional spent nuclear fuel pool capacity or dry storage capacity, or by other means, the Commission shall, at the request of any party, provide an opportunity for oral argument with respect to any matter which the Commission determines to be in controversy among the parties. The oral argument shall be preceded by such discovery procedures as the rules of the Commission shall provide. The Commission shall require each party, including the Commission staff, to submit in written form, at the time of the oral argument, a summary of the facts, data, and arguments upon which such party proposes to rely that are known at such time to such party. Only facts and data in the form of sworn testimony or written submission may be relied upon by the parties during oral argument. Of the materials that may be submitted by the parties during oral argument, the Commission shall only consider those facts and data that are submitted in the form of sworn testimony or written submission.

(b) ADJUDICATORY HEARING.—(1) At the conclusion of any oral argument under subsection (a), the Commission shall designate any disputed question of fact, together with any remaining questions of law, for resolution in an adjudicatory hearing only if it determines that—

(A) there is a genuine and substantial dispute of fact which can only be resolved with sufficient accuracy by the introduction of evidence in an adjudicatory hearing; and

(B) the decision of the Commission is likely to depend in whole or in part on the resolution of such dispute.

(2) In making a determination under this subsection, the Commission—

(A) shall designate in writing the specific facts that are in genuine and substantial dispute, the reason why the decision of the agency is likely to depend on the resolution of such facts, and the reason why an adjudicatory hearing is likely to resolve the dispute; and

(B) shall not consider—

(i) any issue relating to the design, construction, or operation of any civilian nuclear power reactor already licensed to operate at such site, or any civilian nuclear power reactor for which a construction permit has been granted at such site, unless the Commission determines that any such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered; or

(ii) any siting or design issue fully considered and decided by the Commission in connection with the issuance of a construction permit or operating license for a civilian nuclear power reactor at such site, unless (I) such issue results from any revision of siting or design criteria by the Commission following such decision; and (II) the Commission determines that such issue substantially affects the design, construction, or operation of the facility or activity for which such license application, authorization, or amendment is being considered.

(3) The provisions of paragraph (2)(B) shall apply only with respect to licenses, authorizations, or amendments to licenses or authorizations, applied for under the

Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) before December 31, 2005.

(4) The provisions of this section shall not apply to the first application for a license or license amendment received by the Commission to expand onsite spent fuel storage capacity by the use of a new technology not previously approved for use at any nuclear powerplant by the Commission.

(c) JUDICIAL REVIEW.—No court shall hold unlawful or set aside a decision of the Commission in any proceeding described in subsection (a) because of a failure by the Commission to use a particular procedure pursuant to this section unless—

(1) an objection to the procedure used was presented to the Commission in a timely fashion or there are extraordinary circumstances that excuse the failure to present a timely objection; and

(2) the court finds that such failure has precluded a fair consideration and informed resolution of a significant issue of the proceeding taken as a whole.

STORAGE OF SPENT NUCLEAR FUEL

SEC. 135. (a) STORAGE CAPACITY.—(1) Subject to section 8, the Secretary shall provide, in accordance with paragraph (5), not more than 1,900 metric tons of capacity for the storage of spent nuclear fuel from civilian nuclear power reactors. Such storage capacity shall be provided through any one or more of the following methods, used in any combination determined by the Secretary to be appropriate:

(A) use of available capacity at one or more facilities owned by the Federal Government on the date of the enactment of this Act, including the modification and expansion of any such facilities, if the Commission determines that such use will adequately protect the public health and safety, except that such use shall not—

(i) render such facilities subject to licensing under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) or the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.); or

(ii) except as provided in subsection (c) require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), such facility is already being used, or has previously been used, for such storage or for any similar purpose.

(B) acquisition of any modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, and provision of such equipment, to any person generating or holding title to spent nuclear fuel, at the site of any civilian nuclear power reactor operated by such person or at any site owned by the Federal Government on the date of enactment of this Act;

(C) construction of storage capacity at any site of a civilian nuclear power reactor.

(2) Storage capacity authorized by paragraph (1) shall not be provided at any Federal or non-Federal site within which there is a candidate site for a repository. The restriction in the preceding sentence shall only apply until such time as the Secretary decides that such candidate site is no longer a condidate site under consideration for development as a repository.

(3) In selecting methods of providing storage capacity under paragraph (1), the Secretary shall consider the timeliness of the availability of each such method and shall seek to minimize the transportation of spent nuclear fuel, the public health and safety impacts, and the costs of providing such storage capacity.

(4) In providing storage capacity through any method described in paragraph (1), the Secretary shall comply with any applicable requirements for licensing or authorization of such method, except as provided in paragraph (1)(A)(i).

(5) The Secretary shall ensure that storage capacity is made available under paragraph (1) when needed, as determined on the basis of the storage needs specified in contracts entered into under section 136(a), and shall accept upon request any spent nuclear fuel as covered under such contracts.

(6) For purposes of paragraph (1)(A), the term "facility" means any building or structure.

(b) CONTRACTS.—(1) Subject to the capacity limitation established in subsections (a)(1) and (d), the Secretary shall offer to enter into, and may enter into, contracts under section 136(a) with any person generating or owning spent nuclear fuel for purposes of providing storage capacity for such spent fuel under this section only if the Commission determines that—

(A) adequate storage capacity to ensure the continued orderly operation of the civilian nuclear power reactor at which such spent nuclear fuel is generated cannot reasonably be provided by the person owning and operating such reactor at such site, or at the site of any other civilian nuclear power reactor operated by such person, and such capacity cannot be made available in a timely manner through any method described in subparagraph (B); and

(B) such person is diligently pursuing licensed alternatives to the use of Federal storage capacity for the storage of spent nuclear fuel expected to be generated by such person in the future, including—

(i) expansion of storage facilities at the site of any civilian nuclear power reactor operated by such person;

(ii) construction of new or additional storage facilities at the site of any civilian nuclear power reactor operated by such person;

(iii) acquisition of modular or mobile spent nuclear fuel storage equipment, including spent nuclear fuel storage casks, for use at the site of any civilian nuclear power reactor operated by such person; and

(iv) transshipment to another civilian nuclear power reactor owned by such person.

(2) In making the determination described in paragraph (1)(A), the Commission shall ensure maintenance of a full core reserve storage capability at the site of the civilian nuclear power reactor involved unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor.

(3) The Commission shall complete the determinations required in paragraph (1) with respect to any request for storage capacity not later than 6 months after receipt of such request by the Commission.

(c) ENVIRONMENTAL REVIEW.—(1) The provision of 300 or more metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) shall be considered to be a major Federal action requiring preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

(2)(A) The Secretary shall prepare, and make available to the public, an environmental assessment of the probable impacts of any provision of less than 300 metric tons of storage capacity at any one Federal site under subsection (a)(1)(A) that requires the modification or expansion of any facility at site, and a discussion of alternative activities that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(i) an estimate of the amount of storage capacity to be made available at such site;

(ii) an evaluation as to whether the facilities to be used at such site are suitable for the provision of such storage capacity;

(iii) a description of activities planned by the Secretary with respect to the modification or expansion of the facilities to be used at such site;

(iv) an evaluation of the effects of the provision of such storage capacity at such site on the public health and safety, and the environment;

(v) a reasonable comparative evaluation of current information with respect to such site and facilities and other sites and facilities available for the provision of such storage capacity;

(vi) a description of any other sites and facilities that have been considered by the Secretary for the provision of such storage capacity; and

(vii) an assessment of the regional and local impacts of providing such storage capacity at such site, including the impacts on transportation.

(B) The issuance of any environmental assessment under this paragraph shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code. Such judicial review shall be limited to the sufficiency of such assessment with respect to the items described in clauses (i) through (vii) of subparagraph (A).

(3) Judicial review of any environmental impact statement or environmental assessment prepared pursuant to this subsection shall be conducted in accordance with the provisions of section 119.

(d) REVIEW OF SITES AND STATE PARTICIPATION.—(1) In carrying out the provisions of this subtitle with regard to any interim storage of spent fuel from civilian nuclear power reactors which the Secretary is authorized by section 135 to provide, the Secretary shall, as soon as practicable, notify, in writing, the Governor and the State legislature of any State and the Tribal Council of any affected Indian tribe in such State in which is located a potentially acceptable site or facility for such interim storage of spent fuel of his intention to investigate that site or facility.

(2) During the course of investigation of such site or facility, the Secretary shall keep the Governor, State legislature, and affected Tribal Council currently informed of the progress of the work, and results of the investigation. At the time of selection by the Secretary of any site or existing facility, but prior to undertaking any site-specific work or alterations, the Secretary shall promptly notify the Governor, the legislature, and any affected Tribal Council in writing of such selection, and subject to the provisions of paragraph (6) of this subsection, shall promptly enter into negotiations with such State and affected Tribal Council to establish a cooperative agreement under which such State and Council shall have the right to participate in a process of consultation and cooperation, based on public health and safety and environmental concerns, in all stages of the planning, development, modification, expansion, operation, and closure of storage capacity at a site or facility within such State for the interim storage and spent fuel from civilian nuclear power reactors. Public participation in the negotiation of such an agreement shall be provided for and encouraged by the Secretary, the State, and the affected Tribal Council. The Secretary, in cooperation with the States and Indian

tribes, shall develop and publish minimum guidelines for public participation in such negotiations, but the adequacy of such guidelines or any failure to comply with such guidelines shall not be a basis for judicial review.

(3) The cooperative agreement shall include, but need not be limited to, the sharing in accordance with applicable law of all technical and licensing information, the utilization of available expertise, the facilitating of permitting procedures, joint project review, and the formulation of joint surveillance and monitoring arrangements to carry out applicable Federal and State laws. The cooperative agreement also shall include a detailed plan or schedule of milestones, decision points and opportunities for State or eligible Tribal Council review and objection. Such cooperative agreement shall provide procedures for negotiating and resolving objections of the State and affected Tribal Council in any stage of planning, development, modification, expansion, operation, or closure of storage capacity at a site or facility within such State. The terms of any cooperative agreement shall not affect the authority of the Nuclear Regulatory Commission under existing law.

(4) For the purpose of this subsection, "process of consultation and cooperation" means a methodology by which the Secretary (A) keeps the State and eligible Tribal Council fully and currently informed about the aspects of the project related to any potential impact on the public health and safety and environment; (B) solicits, receives, and evaluates concerns and objections of such State and Council with regard to such aspects of the project on an ongoing basis; and (C) works diligently and cooperatively to resolve, through arbitration or other appropriate mechanisms, such concerns and objections. The process of consultation and cooperation shall not include the grant of a right to any State or Tribal Council to exercise an absolute veto of any aspect of the planning, development, modification, expansion, or operation of the project.

(5) The Secretary and the State and affected Tribal Council shall seek to conclude the agreement required by paragraph (2) as soon as practicable, but not later than 180 days following the date of notification of the selection under paragraph (2). The Secretary shall periodically report to the Congress thereafter on the status of the agreements approved under paragraph (3). Any report to the Congress on the status of negotiations of such agreement by the Secretary shall be accompanied by comments solicited by the Secretary from the State and eligible Tribal Council.

(6)(A) Upon deciding to provide an aggregate of 300 or more metric tons of storage capacity under subsection (a)(1) at any one site, the Secretary shall notify the Governor and legislature of the State where such site is located, or the governing body of the Indian tribe in whose reservation such site is located, as the case may be, of such decision.

During the 60-day period following receipt of notification by the Secretary of his decision to provide an aggregate of 300 or more metric tons of storage capacity at any one site, the Governor or legislature of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, as the case may be, may disapprove the provision of 300 or more metric tons of storage capacity at the site involved and submit to the Congress a notice of such disapproval. A notice of disapproval shall be considered to be submitted to the Congress on the date of the transmittal of such notice of disapproval to the Speaker of the House and the President pro tempore of the Senate. Such notice of disapproval shall be accompanied by a statement of reasons explaining why the provision of such storage capacity at such site was disapproved by such Governor or legislature or the governing body of such Indian tribe.

(B) Unless otherwise provided by State law, the Governor or legislature of each State shall have authority to submit a notice of disapproval to the Congress under subparagraph (A). In any case in which state law provides for submission of any such notice of disapproval by any other person or entity, any reference in this subtitle to the Governor or legislature of such State shall be considered to refer instead to such other person or entity.

(C) The authority of the Governor and legislature of each State under this paragraph shall not be applicable with respect to any site located on a reservation.

(D) If any notice of disapproval is submitted to the Congress under subparagraph (A), the proposed provision of 300 or more metric tons of storage capacity at the site involved shall be disapproved unless, during the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval, the Congress passes a resolution approving such proposed provision of storage capacity in accordance with the procedures established in this paragraph and subsections (d) through (f) of section 115 and such resolution thereafter becomes law. For purposes of this paragraph, the term "resolution" means a joint resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That there hereby is approved the provision of 300 or more metric tons of spent nuclear fuel storage capacity at the site located at , with respect to which a notice of disapproval was submitted by on .". The first blank space in such resolution shall be filled with the geographic location of the site involved; the second blank space in such resolution shall be filled with the designation of the State Governor and legislature or affected Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the date of submission of such notice of disapproval.

(E) For purposes of the consideration of any resolution described in subparagraph (D), each reference in subsections (d) and (e) of section 115 to a resolution of repository siting approval shall be considered to refer to the resolution described in such subparagraph.

(7) As used in this section, the term "affected Tribal Council" means the governing body of any Indian tribe within whose reservation boundaries there is located a potentially acceptable site for interim storage capacity of spent nuclear fuel from civilian nuclear power reactors, or within whose boundaries a site for such capacity is selected by the Secretary, or whose federally defined possessory or usage rights to other lands outside of the reservation's boundaries arising out of congressionally ratified treaties, as determined by the Secretary of the Interior pursuant to a petition filed with him by the appropriate governmental officials of such tribe, may be substantially and adversely affected by the establishment of any such storage capacity.

(e) LIMITATIONS.—Any spent nuclear fuel stored under this section shall be removed from the storage site or facility involved as soon as practicable, but in any event not later than three years following the date on which a repository or monitored retrievable storage facility developed under this Act is available for disposal of such spent nuclear fuel.

(f) REPORT.—The Secretary shall annually prepare and submit to the Congress a report on any plans of the Secretary for providing storage capacity under this section. Such report shall include a description of the specific manner of providing such storage selected by the Secretary, if any. The Secretary shall prepare and submit the first such report not later than 1 year after the date of the enactment of this Act.

(g) CRITERIA FOR DETERMINING ADEQUACY OF AVAILABLE STORAGE CAPACITY.—Not later than 90 days after the date of the enactment of this Act, the Commission pursuant to section 553 of the Administrative Procedures Act, shall propose, by rule, procedures and criteria for making the determination required by subsection (b) that a person owning and operating a civilian nuclear power reactor cannot reasonably provide adequate spent nuclear fuel storage capacity at the civilian nuclear power reactor site when needed to ensure the continued orderly operation of such reactor. Such criteria shall ensure the maintenance of a full core reserve storage capability at the site of such reactor unless the Commission determines that maintenance of such capability is not necessary for the continued orderly operation of such reactor. Such criteria shall identify the feasibility of reasonably providing such adequate spent nuclear fuel storage capacity, taking into account economic, technical, regulatory, and public health and safety factors, through the use of high-density fuel storage racks, fuel rod compaction, transshipment of spent nuclear fuel to another civilian nuclear power reactor within the same utility system, construction of additional spent nuclear fuel pool capacity, or such other technologies as may be approved by the Commission.

(h) APPLICATION.—Notwithstanding any other provision of law, nothing in this Act shall be construed to encourage, authorize, or require the private or Federal use, purchase, lease, or other acquisition of any storage facility located away from the site of any civilian nuclear power reactor and not owned by the Federal Government on the date of the enactment of this Act.

(i) COORDINATION WITH RESEARCH AND DEVELOPMENT PROGRAM.—To the extent available, and consistent with the provisions of this section, the Secretary shall provide spent nuclear fuel for the research and development program authorized in section 217 from spent nuclear fuel received by the Secretary for storage under this section. Such spent nuclear fuel shall not be subject to the provisions of subsection (e).

INTERIM STORAGE FUND

SEC. 136. (a) CONTRACTS.—(1) During the period following the date of the enactment of this Act, but not later than January 1, 1990, the Secretary is authorized to enter into contracts with persons who generate or own spent nuclear fuel resulting from civilian nuclear activities for the storage of such spent nuclear fuel in any storage capacity provided under this subtitle: Provided, however, That the Secretary shall not enter into contracts for spent nuclear fuel in amounts in excess of the available storage capacity

specified in section 135(a). Those contracts shall provide that the Federal Government will (1) take title at the civilian nuclear power reactor site, to such amounts of spent nuclear fuel from the civilian nuclear power reactor as the Commission determines cannot be stored onsite, (2) transport the spent nuclear fuel to a federally owned and operated interim away-from-reactor storage facility, and (3) store such fuel in the facility pending further processing, storage, or disposal. Each such contract shall (A) provide for payment to the Secretary of fees determined in accordance with the provisions of this section; and (B) specify the amount of storage capacity to be provided for the person involved.

(2) The Secretary shall undertake a study and, not later than 180 days after the date of the enactment of this Act, submit to the Congress a report, establishing payment charges that shall be calculated on an annual basis, commencing on or before January 1, 1984. Such payment charges and the calculation thereof shall be published in the Federal Register, and shall become effective not less than 30 days after publication. Each payment charge published in the Federal Register under this paragraph shall remain effective for a period of 12 months from the effective date as the charge for the cost of the interim storage of any spent nuclear fuel. The report of the Secretary shall specify the method and manner of collection (including the rates and manner of payment) and any legislative recommendations determined by the Secretary to be appropriate.

(3) Fees for storage under this subtitle shall be established on a nondiscriminatory basis. The fees to be paid by each person entering into a contract with the Secretary under this subsection shall be based upon an estimate of the pro rata costs of storage and related activities under this subtitle with respect to such person, including the acquisition, construction, operation, and maintenance of any facilities under this subtitle.

(4) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such storage services shall be made available.

(5) Except as provided in sections 137, nothing in this or any other Act requires the Secretary, in carrying out the responsibilities of this section, to obtain a license or permit to possess or own spent nuclear fuel.

(b) LIMITATION.—No spent nuclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code may be stored by the Secretary in any storage capacity provided under this subtitle unless such department transfers to the Secretary, for deposit in the Interim Storage Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such spent nuclear fuel were generated by any other person.

(c) ESTABLISHMENT OF INTERIM STORAGE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Interim Storage Fund. The Storage Fund shall consist of—

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsections (a), (b), and (e), which shall be deposited in the Storage Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Storage Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the interim storage of civilian spent nuclear fuel, which shall automatically be transferred to the Storage Fund on such date.

(d) USE OF STORAGE FUND.—The Secretary may make expenditures from the Storage Fund, subject to subsection (e), for any purpose necessary or appropriate to the conduct of the functions and activities of the Secretary, or the provision or anticipated provision of services, under this subtitle, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any interim storage facility provided under this subtitle;

(2) the administrative cost of the interim storage program;

(3) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at an interim storage site, consistent with the restrictions in section 135;

(4) the cost of transportation of spent nuclear fuel; and

(5) impact assistance as described in subsection (e).

(e) IMPACT ASSISTANCE.—(1) Beginning the first fiscal year which commences after the date of the enactment of this Act, the Secretary shall make annual impact assistance payments to a State or appropriate unit of local government, or both, in order to mitigate social or economic impacts occasioned by the establishment and subsequent operation of any interim storage capacity within the jurisdictional boundaries of such government or governments and authorized under this subtitle: Provided, however, That such impact assistance payments shall not exceed (A) ten per centum of the costs incurred in paragraphs (1) and (2), or (B) $15 per kilogram of spent fuel, whichever is less;

(2) Payments made available to States and units of local government pursuant to this section shall be—

(A) allocated in a fair and equitable manner with a priority to those States or units of local government suffering the most severe impacts; and

(B) utilized by States or units of local governments only for (i) planning, (ii) construction and maintenance of public services, (iii) provision of public services related to the providing of such interim storage authorized under this title, and (iv) compensation for loss of taxable property equivalent to that if the storage had been provided under private ownership.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines necessary to ensure that the purposes of this subsection shall be achieved. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Payments under this subsection shall be made available solely from the fees determined under subsection (a).

(5) The Secretary is authorized to consult with States and appropriate units of local government in advance of commencement of establishment of storage capacity authorized under this subtitle in an effort to determine the level of the payment such government would be eligible to receive pursuant to this subsection.

(6) As used in this subsection, the term "unit of local government" means a country, parish, township, municipality, and shall include a borough existing in the State of Alaska on the date of the enactment of this subsection, and any other unit of government below the State level which is a unit of general government as determined by the Secretary.

(f) ADMINISTRATION OF STORAGE FUND.—(1) The Secretary of the Treasury shall hold the Storage Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Storage Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Storage Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Storage Fund shall consist of estimates made by the Secretary of expenditures from the Storage Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Storage Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Storage Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Storage Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Storage Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Storage Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Storage Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purposes for which securities may

be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Storage Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumulative amount of appropriations available to the Storage Fund, less the average undisbursed cash balance in the Storage Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

SEC. 137. (a) TRANSPORTATION.—(1) Transportation of spent nuclear fuel under section 136(a) shall be subject to licensing and regulation by the Commission and by the Secretary of Transportation as provided for transportation of commercial spent nuclear fuel under existing law.

(2) The Secretary, in providing for the transportation of spent nuclear fuel under this Act, shall utilize by contract private industry to the fullest extent possible in each aspect of such transportation. The Secretary shall use direct Federal services for such transportation only upon a determination of the Secretary of Transportation, in consultation with the Secretary, that private industry is unable or unwilling to provide such transportation services at reasonable cost.

SUBTITLE C—MONITORED RETRIEVABLE STORAGE

MONITORED RETRIEVABLE STORAGE

SEC. 141. (a) FINDINGS.—The Congress finds that—

(1) long-term storage of high-level radioactive waste or spent nuclear fuel in monitored retrievable storage facilities is an option for providing safe and reliable management of such waste or spent fuel;

(2) the executive branch and the Congress should proceed as expeditiously as possible to consider fully a proposal for construction of one or more monitored retrievable storage facilities to provide such long-term storage;

(3) the Federal Government has the responsibility to ensure that site-specific designs for such facilities are available as provided in this section;

(4) the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities have responsibility to pay the costs of the long-term storage of such waste and spent fuel; and

(5) disposal of high-level radioactive waste and spent nuclear fuel in a repository developed under this Act should proceed regardless of any construction of a monitored retrievable storage facility pursuant to this section.

(b) SUBMISSION OF PROPOSAL BY SECRETARY.—(1) On or before June 1, 1985, the Secretary shall complete a detailed study of the need for and feasibility of, and shall submit to the Congress a proposal for, the construction of one or more monitored retrievable storage facilities for high-level radioactive waste and spent nuclear fuel. Each such facility shall be designed—

(A) to accommodate spent nuclear fuel and high-level radioactive waste resulting from civilian nuclear activities;

(B) to permit continuous monitoring, management, and maintenance of such spent fuel and waste for the foreseeable future;

(C) to provide for the ready retrieval of such spent fuel and waste for further processing or disposal; and

(D) to safely store such spent fuel and waste as long as may be necessary by maintaining such facility through appropriate means, including any required replacement of such facility.

(2) Such proposal shall include—

(A) the establishment of a Federal program for the siting, development, construction, and operation of facilities capable of safely storing high-level radioactive waste and spent nuclear fuel, which facilities are to be licensed by the Commission;

(B) a plan for the funding of the construction and operation of such facilities, which plan shall provide that the costs of such activities shall be borne by the generators and owners of the high-level radioactive waste and spent nuclear fuel to be stored in such facilities;

(C) site-specific designs, specifications, and cost estimates sufficient to (i) solicit bids for the construction of the first such facility; (ii) support congressional authorization of the construction of such facility; and (iii) enable completion and operation of such facility as soon as practicable following congressional authorization of such facility; and

(D) a plan for integrating facilities constructed pursuant to this section with other storage and disposal facilities authorized in this Act.

(3) In formulating such proposal, the Secretary shall consult with the Commission and the Administrator, and shall submit their comments on such proposal to the Congress at the time such proposal is submitted.

(4) The proposal shall include, for the first such facility, at least three alternative sites and at least five alternative combinations of such proposed sites and facility designs consistent with the criteria of paragraph (b)(1). The Secretary shall recommend the combination among the alternatives that the Secretary deems preferable. The environmental assessment under subsection (c) shall include a full such analysis of the relative advantages and disadvantages of all five such alternative combinations of proposed sites and proposed facility designs.

(c) ENVIRONMENTAL IMPACT STATEMENTS.—(1) Preparation and submission to the Congress of the proposal required in this section shall not require the preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The Secretary shall prepare, in accordance with regulations issued by the Secretary implementing such Act, an environmental assessment with respect to such proposal. Such environmental assessment shall be based upon available information regarding alternative technologies for the storage of spent nuclear fuel and high-level radioactive waste. The Secretary shall submit such environmental assessment to the Congress at the time such proposal is submitted.

(2) If the Congress by law, after review of the proposal submitted by the Secretary under subsection (b), specifically authorizes construction of a monitored retrievable storage facility, the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall apply with respect to construction of such facility, except that any environmental impact statement prepared with respect to such facility shall not be required to consider the need for such facility, alternate sites for such facility, or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(d) LICENSING.—Any facility authorized pursuant to this section shall be subject to licensing under section 202(3) of the Energy Reorganization Act of 1974 (42 U.S.C. 5842(3)). In reviewing the application filed by the Secretary for licensing of the first such facility, the Commission may not consider the need for such facility or any alternative to the design criteria for such facility set forth in subsection (b)(1).

(e) CLARIFICATION.—Nothing in this section limits the consideration of alternative facility designs consistent with the criteria of paragraph (b)(1) in any environmental impact statement, or in any licensing procedure of the Commission, with respect to any monitored, retrievable facility authorized pursuant to this section.

(f) IMPACT ASSISTANCE.—(1) Upon receipt by the Secretary of congressional authorization to construct a facility described in subsection (b), the Secretary shall commence making annual impact aid payments to appropriate units of general local government in order to mitigate any social or economic impacts resulting from the construction and subsequent operation of any such facility within the jurisdictional boundaries of any such unit.

(2) Payments made available to units of general local government under this subsection shall be—

(A) allocated in a fair and equitable manner, with priority given to units of general local government determined by the Secretary to be most severely affected; and

(B) utilized by units of general local government only for planning, construction, maintenance, and provision of public services related to the siting of such facility.

(3) Such payments shall be subject to such terms and conditions as the Secretary determines are necessary to ensure achievement of the purposes of this subsection. The Secretary shall issue such regulations as may be necessary to carry out the provisions of this subsection.

(4) Such payments shall be made available entirely from funds held in the Nuclear Waste Fund established in section 302(c) and shall be available only to the extent provided in advance in appropriation Acts.

(5) The Secretary may consult with appropriate units of general local government in advance of commencement of construction of any such facility in an effort to determine the level of payments each such unit is eligible to receive under this subsection.

(g) LIMITATION.—No monitored retrievable storage facility developed pursuant to this section may be constructed in any State in which there is located any site approved for site characterization under section 112. The restriction in the preceding sentence shall only apply until such time as the Secretary decides that such candidate site is no longer a candidate site under consideration for development as a repository. Such restriction shall continue to apply to any site selected for construction as a repository".

(h) PARTICIPATION OF STATES AND INDIAN TRIBES.—Any facility authorized pursuant to

this section shall be subject to the provisions of sections 115, 116(a), 116(b), 116(d), 117, and 118. For purposes of carrying out the provisions of this subsection, any reference in sections 115 through 118 to a repository shall be considered to refer to a monitored retrievable storage facility.

SUBTITLE D—LOW-LEVEL RADIOACTIVE WASTE

FINANCIAL ARRANGEMENTS FOR LOW-LEVEL RADIOACTIVE WASTE SITE CLOSURE

SEC. 151. (a) FINANCIAL ARRANGEMENTS.—(1) The Commission shall establish by rule, regulation, or order, after public notice, and in accordance with section 181 of the Atomic Energy Act of 1954 (42 U.S.C. 2231), such standards and instructions as the Commission may deem necessary or desirable to ensure in the case of each license for the disposal of low-level radioactive waste that an adequate bond, surety, or other financial arrangement (as determined by the Commission) will be provided by a licensee to permit completion of all requirements established by the Commission for the decontamination, decommissioning, site closure, and reclamation of sites, structures, and equipment used in conjunction with such low-level radioactive waste. Such financial arrangements shall be provided and approved by the Commission, or, in the case of sites within the boundaries of any agreement State under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021), by the appropriate State or State entity, prior to issuance of licenses for low-level radioactive waste disposal or, in the case of licenses in effect on the date of the enactment of this Act, prior to termination of such licenses.

(2) If the Commission determines that any long-term maintenance or monitoring, or both, will be necessary at a site described in paragraph (1), the Commission shall ensure before termination of the license involved that the licensee has made available such bonding, surety, or other financial arrangements as may be necessary to ensure that any necessary long-term maintenance or monitoring needed for such site will be carried out by the person having title and custody for such site following license termination.

(b) TITLE AND CUSTODY.—(1) The Secretary shall have authority to assume title and custody of low-level radioactive waste and the land on which such waste is disposed of, upon request of the owner of such waste and land and following termination of the license issued by the Commission for such disposal, if the Commission determines that—

(A) the requirements of the Commission for site closure, decommissioning, and decontamination have been met by the licensee involved and that such licensee is in compliance with the provisions of subsection (a);

(B) such title and custody will be transferred to the Secretary without cost to the Federal Government; and

(C) Federal ownership and management of such site is necessary or desirable in order to protect the public health and safety, and the environment.

(2) If the Secretary assumes title and custody of any such waste and land under this subsection, the Secretary shall maintain such waste and land in a manner that will protect the public health and safety, and the environment.

(c) SPECIAL SITES.—If the low-level radioactive waste involved is the result of a licensed activity to recover zirconium, hafnium, and rare earths from source material, the Secretary, upon request of the owner of the site involved, shall assume title and custody of such waste and the land on which it is disposed when such site has been decontaminated and stabilized in accordance with the requirements established by the Commission and when such owner has made adequate financial arrangements approved by the Commission for the long-term maintenance and monitoring of such site.

TITLE II—RESEARCH, DEVELOPMENT, AND DEMONSTRATION REGARDING DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE AND SPENT NUCLEAR FUEL

PURPOSE

SEC. 211. It is the purpose of this title—

(1) to provide direction to the Secretary with respect to the disposal of high-level radioactive waste and spent nuclear fuel;

(2) to authorize the Secretary, pursuant to this title—

(A) to provide for the construction, operation, and maintenance of a deep geologic test and evaluation facility; and

(B) to provide for a focused and integrated high-level radioactive waste and spent nuclear fuel research and development program, including the development of a test and evaluation facility to carry out research and provide an integrated demonstration of the technology for deep geologic disposal of high-level radioactive waste, and the development of the facilities to demonstrate dry storage of spent nuclear fuel; and

(3) to provide for an improved cooperative role between the Federal Government and States, affected Indian tribes, and units of general local government in the siting of a test and evaluation facility.

APPLICABILITY

SEC. 212. The provisions of this title are subject to section 8 and shall not apply to facilities that are used for the disposal of high-level radioactive waste, low-level radioactive waste transuranic waste, or spent nuclear fuel resulting from atomic energy defense activities.

IDENTIFICATION OF SITES

SEC. 213. (a) GUIDELINES.—Not later than 6 months after the date of the enactment of this Act and notwithstanding the failure of other agencies to promulgate standards pursuant to applicable law, the Secretary, in consultation with the Commission, the Director of the Geological Survey, the Administrator, the Council on Environmental Quality, and such other Federal agencies as the Secretary considers appropriate, is authorized to issue, pursuant to section 553 of title 5, United States Code, general guidelines for the selection of a site for a test and evaluation facility. Under such guidelines the Secretary shall specify factors that qualify or disqualify a site for development as a test and evaluation facility, including factors pertaining to the location of valuable natural resources, hydrogeophysics, seismic activity, and atomic energy defense activities, proximity to water supplies, proximity to populations, the effect upon the rights of users of water, and proximity to components of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, the National Wilderness Preservation System, or National Forest Lands. Such guidelines shall require the Secretary to consider the various geologic media in which the site for a test and evaluation facility may be located and, to the extent practicable, to identify sites in different geologic media. The Secretary shall use guidelines established under this subsection in considering and selecting sites under this title.

(b) SITE IDENTIFICATION BY THE SECRETARY.—(1) Not later than 1 year after the date of the enactment of this Act, and following promulgation of guidelines under subsection (a), the Secretary is authorized to identify 3 or more sites, at least 2 of which shall be in different geologic media in the continental United States, and at least 1 of which shall be in media other than salt. Subject to Commission requirements, the Secretary shall give preference to sites for the test and evaluation facility in media possessing geochemical characteristics that retard aqueous transport of radionuclides. In order to provide a greater possible protection of public health and safety as operating experience is gained at the test and evaluation facility, and with the exception of the primary areas under review by the Secretary on the date of the enactment of this Act for the location of a test and evaluation facility or repository, all sites identified under this subsection shall be more than 15 statute miles from towns having a population of greater than 1,000 persons as determined by the most recent census unless such sites contain high-level radioactive waste prior to identification under this title. Each identification of a site shall be supported by an environmental assessment, which shall include a detailed statement of the basis for such identification and of the probable impacts of the siting research activities planned for such site, and a discussion of alternative activities relating to siting research that may be undertaken to avoid such impacts. Such environmental assessment shall include—

(A) an evaluation by the Secretary as to whether such site is suitable for siting research under the guidelines established under subsection (a);

(B) an evaluation by the Secretary of the effects of the siting research activities at such site on the public health and safety and the environment;

(C) a reasonable comparative evaluation by the Secretary of such site with other sites and locations that have been considered;

(D) a description of the decision process by which such site was recommended; and

(E) an assessment of the regional and local impacts of locating the proposed test and evaluation facility at such site.

(2) When the Secretary identifies a site, the Secretary shall as soon as possible notify the Governor of the State in which such site is located, or the governing body of the affected Indian tribe where such site is located, of such identification and the basis of such identification. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be identified after such 1 year period, following the same procedure as if such sites had been identified within such period.

SITING RESEARCH AND RELATED ACTIVITIES

SEC. 214. (a) IN GENERAL.—Not later than 30 months after the date on which the Secretary completes the identification of sites under section 213, the Secretary is authorized to complete sufficient evaluation of 3 sites to select a site for expanded siting research activities and for other activities under section 218. The Secretary is authorized to conduct such preconstruction activities relative to such site selection for the test and evaluation facility as he deems appropriate. Additional sites for the location of the test and evaluation facility authorized in section 302(d) may be evaluated after such 30-month period, following the same procedures as if such sites were to be evaluated within such period.

(b) PUBLIC MEETINGS AND ENVIRONMENTAL ASSESSMENT.—Not later than 6 months after the date on which the Secretary completes the identification of sites under section 213, and before beginning siting research activities, the Secretary shall hold at least 1 public meeting in the vicinity of each site to inform the residents of the area of the activities to be conducted at such site and to receive their views.

(c) RESTRICTIONS.—Except as provided in section 218 with respect to a test and evaluation facility, in conducting siting research activities pursuant to subsection (a)—

(1) the Secretary shall use the minimum quantity of high-level radioactive waste or other radioactive materials, if any, necessary to achieve the test or research objectives;

(2) the Secretary shall ensure that any radioactive material used or placed on a site shall be fully retrievable; and

(3) upon termination of siting research activities at a site for any reason, the Secretary shall remove any radioactive material at or in the site as promptly as practicable.

(d) TITLE TO MATERIAL.—The Secretary may take title, in the name of the Federal Government, to the high-level radioactive waste, spent nuclear fuel, or other radioactive material emplaced in a test and evaluation facility. If the Secretary takes title to any such material, the Secretary shall enter into the appropriate financial arrangements described in subsections (a) or (b) of section 302 for the disposal of such material.

TEST AND EVALUATION FACILITY SITING REVIEW AND REPORTS

SEC. 215. (a) CONSULTATION AND COOPERATION.—The Governor of a State, or the governing body of an affected Indian tribe, notified of a site identification under section 213 shall have the right to participate in a process of consultation and cooperation as soon as the site involved has been identified pursuant to such section and throughout the life of the test and evaluation facility. For purposes of this section, the term "process of consultation and cooperation" means a methodology—

(1) by which the Secretary—

(A) keeps the Governor or governing body involved fully and currently informed about any potential economic or public health and safety impacts in all stages of the siting, development, construction, and operation of a test and evaluation facility;

(B) solicits, receives, and evaluates concerns and objections of such Governor or governing body with regard to such test and evaluation facility on an ongoing basis; and

(C) works diligently and cooperatively to resolve such concerns and objections; and

(2) by which the State or affected Indian tribe involved can exercise reasonable independent monitoring and testing of onsite activities related to all stages of the siting, development, construction and operation of the test and evaluation facility, except that any such monitoring and testing shall not unreasonably interfere with onsite activities.

(b) WRITTEN AGREEMENTS.—The Secretary shall enter into written agreements with the Governor of the State in which an identified site is located or with the governing body of any affected Indian tribe where an identified site is located in order to expedite the consultation and cooperation process. Any such written agreement shall specify—

(1) procedures by which such Governor or governing body may study, determine, comment on, and make recommendations with regard to the possible health, safety, and economic impacts of the test and evaluation facility;

(2) procedures by which the Secretary shall consider and respond to comments and recommendations made by such Governor or governing body, including the period in which the Secretary shall so respond;

(3) the documents the Department is to submit to such Governor or governing body, the timing for such submissions, the timing for such Governor or governing body to identify public health and safety concerns and the process to be followed to try to eliminate those concerns;

(4) procedures by which the Secretary and either such Governor or governing body may review or modify the agreement periodically; and

(5) procedures for public notification of the procedures specified under subparagraphs (A) through (D).

(c) LIMITATION.—Except as specifically provided in this section, nothing in this title is intended to grant any State or affected Indian tribe any authority with respect to the siting, development, or loading of the test and evaluation facility.

FEDERAL AGENCY ACTIONS

SEC. 216. (a) COOPERATION AND COORDINATION.—Federal agencies shall assist the Secretary by cooperating and coordinating with the Secretary in the preparation of any necessary reports under this title and the mission plan under section 301.

(b) ENVIRONMENTAL REVIEW.—(1) No action of the Secretary or any other Federal agency required by this title or section 301 with respect to a test and evaluation facility to be taken prior to the initiation of onsite construction of a test and evaluation facility shall require the preparation of an environmental impact statement under section 102(2)(C) of the Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require the preparation of environmental reports, except as otherwise specifically provided for in this title.

(2) The Secretary and the heads of all other Federal agencies shall, to the maximum extent possible, avoid duplication of efforts in the preparation of reports under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

RESEARCH AND DEVELOPMENT ON DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE

SEC. 217. (a) PURPOSE.—Not later than 64 months after the date of the enactment of this Act, the Secretary is authorized to, to the extent practicable, begin at a site evaluated under section 214, as part of and as an extension of siting research activities of such site under such section, the mining and construction of a test and evaluation facility. Prior to the mining and construction of such facility, the Secretary shall prepare an environmental assessment. The purpose of such facility shall be—

(1) to supplement and focus the repository site characterization process;

(2) to provide the conditions under which known technological components can be integrated to demonstrate a functioning repository-like system;

(3) to provide a means of identifying, evaluating, and resolving potential repository licensing issues that could not be resolved during the siting research program conducted under section 212;

(4) to validate, under actual conditions, the scientific models used in the design of a repository;

(5) to refine the design and engineering of repository components and systems and to confirm the predicted behavior of such components and systems;

(6) to supplement the siting data, the generic and specific geological characteristics developed under section 214 relating to isolating disposal materials in the physical environment of a repository;

(7) to evaluate the design concepts for packaging, handling, and emplacement of high-level radioactive waste and spent nuclear fuel at the design rate; and

(8) to establish operating capability without exposing workers to excessive radiation.

(b) DESIGN.—The Secretary shall design each test and evaluation facility—

(1) to be capable of receiving not more than 100 full-sized canisters of solidified high-level radioactive waste (which canisters shall not exceed an aggregate weight of 100 metric tons), except that spent nuclear fuel may be used instead of such waste if such waste cannot be obtained under reasonable conditions;

(2) to permit full retrieval of solidified high-level radioactive waste, or other radioactive material used by the Secretary for testing, upon completion of the technology demonstration activities; and

(3) based upon the principle that the high-level radioactive waste, spent nuclear fuel, or other radioactive material involved shall be isolated from the biosphere in such a way that the initial isolation is provided by engineered barriers functioning as a system with the geologic environment.

(c) OPERATION.—(1) Not later than 88 months after the date of the enactment of this Act, the Secretary shall begin an in situ testing program at the test and evaluation facility in accordance with the mission plan developed under section 301, for purposes of—

(A) conducting in situ tests of bore hole sealing, geologic media fracture sealing, and room closure to establish the techniques and performance for isolation of high-level radioactive waste, spent nuclear fuel, or other radioactive materials from the biosphere;

(B) conducting in situ tests with radioactive sources and materials to evaluate and improve reliable models for radionuclide migration, absorption, and containment within the engineered barriers and geologic media involved, if the Secretary finds there is reasonable assurance that such radioactive sources and materials will not threaten the use of such site as a repository;

(C) conducting in situ tests to evaluate and improve models for ground water or brine flow through fractured geologic media;

(D) conducting in situ tests under conditions representing the real time and the accelerated time behavior of the engineered barriers within the geologic environment involved;

(E) conducting in situ tests to evaluate the effects of heat and pressure on the geologic media involved, on the hydrology of the surrounding area, and on the integrity of the disposal packages;

(F) conducting in situ tests under both normal and abnormal repository conditions to establish safe design limits for disposal packages and to determine the effects of the gross release of radionuclides into surroundings, and the effects of various credible failure modes, including—

(i) seismic events leading to the coupling of aquifers through the test and evaluation facility;

(ii) thermal pulses significantly greater than the maximum calculated; and

(iii) human intrusion creating a direct pathway to the biosphere; and

(G) conducting such other research and development activities as the Secretary considers appropriate, including such activities necessary to obtain the use of high-level radioactive waste, spent nuclear fuel, or other radioactive materials (such as any highly radioactive material from the Three Mile Island nuclear powerplant or from the West Valley Demonstration Project) for test and evaluation purposes, if such other activities are reasonably necessary to support the repository program and if there is reasonable assurance that the radioactive sources involved will not threaten the use of such site as a repository.

(2) The in situ testing authorized in this subsection shall be designed to ensure that the suitability of the site involved for licensing by the Commission as a repository will not be adversely affected.

(d) USE OF EXISTING DEPARTMENT FACILITIES.—During the conducting of siting research activities under section 214 and for such period thereafter as the Secretary considers appropriate, the Secretary shall use Department facilities owned by the Federal Government on the date of the enactment of this Act for the conducting of generically applicable tests regarding packaging, handling, and emplacement technology for solidified high-level radioactive waste and spent nuclear fuel from civilian nuclear activities.

(e) ENGINEERED BARRIERS.—The system of engineered barriers and selected geology used in a test and evaluation facility shall have a design life at least as long as that which the Commission requires by regulations issued under this Act, or under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.), for repositories.

(f) ROLE OF COMMISSION.—(1)(A) Not later than 1 year after the date of the enactment of this Act, the Secretary and the Commission shall reach a written understanding establishing the procedures for review, consultation, and coordination in the planning, construction, and operation of the test and evaluation facility under this section. Such understanding shall establish a schedule, consistent with the deadlines set forth in this subtitle, for submission by the Secretary of, and review by the Commission of and necessary action on—

(i) the mission plan prepared under section 301; and

(ii) such reports and other information as the Commission may reasonably require to evaluate any health and safety impacts of the test and evaluation facility.

(B) Such understanding shall also establish the conditions under which the Commission may have access to the test and evaluation facility for the purpose of assessing any public health and safety concerns that it may have. No shafts may be excavated for the test and evaluation until the Secretary and the Commission enter into such understanding.

(2) Subject to section 305, the test and evaluation facility, and the facilities authorized in section 217, shall be constructed and operated as research, development, and demonstration facilities, and shall not be subject to licensing under section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842).

(3)(A) The Commission shall carry out a continuing analysis of the activities undertaken under this section to evaluate the adequacy of the consideration of public health and safety issues.

(B) The Commission shall report to the President, the Secretary, and the Congress as the Commission considers appropriate with respect to the conduct of activities under this section.

(g) ENVIRONMENTAL REVIEW.—The Secretary shall prepare an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) prior to conducting tests with radioactive materials at the test and evaluation facility. Such environmental impact statement shall incorporate, to the extent practicable, the environmental assessment prepared under seciion 217(a). Nothing in this subsection may be construed to limit siting research activities conducted under section 214. This subsection shall apply only to activities performed exclusively for a test and evaluation facility.

(h) LIMITATIONS.—(1) If the test and evaluation facility is not located at the site of a repository, the Secretary shall obtain the concurrence of the Commission with respect to the decontamination and decommissioning of such facility.

(2) If the test and evaluation facility is not located at a candidate site or repository site, the Secretary shall conduct only the portion of the in situ testing program required in subsection (c) determined by the Secretary to be useful in carrying out the purposes of this Act.

(3) The operation of the test and evaluation facility shall terminate not later than—

(A) 5 years after the date on which the initial repository begins operation; or

(B) at such time as the Secretary determines that the continued operation of a test and evaluation facility is not necessary for research, development, and demonstration purposes;

whichever occurs sooner.

(4) Notwithstanding any other provisions of this subsection, as soon as practicable following any determination by the Secretary, with the concurrence of the Commission, that the test and evaluation facility is unsuitable for continued operation, the Secretary shall take such actions as are necessary to remove from such site any radioactive material placed on such site as a result of testing and evaluation activities conducted under this section. Such requirement may be waived if the Secretary, with the concurrence of the Commission, finds that short-term testing and evaluation activities using radioactive material will not endanger the public health and safety.

RESEARCH AND DEVELOPMENT ON SPENT NUCLEAR FUEL

SEC. 218. (a) DEMONSTRATION AND COOPERATIVE PROGRAMS.—The Secretary shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission. Not later than 1 year after the date of the enactment of this Act, the Secretary shall select at least 1, but not more than 3, sites evaluated under section 214 at such power reactors. In selecting such site or sites, the Secretary shall give preference to civilian nuclear power reactors that will soon have a shortage of interim storage capacity for spent nuclear fuel. Subject to reaching agreement as provided in subsection (b), the Secretary shall undertake activities to assist such power reactors with demonstration projects at such sites, which may use one of the following types of alternate storage technologies: spent nuclear fuel storage casks, caissons, or silos. The Secretary shall also undertake a cooperative program with civilian nuclear power reactors to encourage the development of the technology for spent nuclear fuel rod consolidation in existing power reactor water storage basins.

(b) COOPERATIVE AGREEMENTS.—To carry out the programs described in subsection (a), the Secretary shall enter into a cooperative agreement with each utility involved that specifies, at a minimum, that—

(1) such utility shall select the alternate storage technique to be used, make the land and spent nuclear fuel available for the dry storage demonstration, submit and provide site-specific documentation for a license application to the Commission, obtain a license relating to the facility involved, construct such facility, operate such facility after licensing, pay the costs required to construct such facility, and pay all costs associated with the operation and maintenance of such facility;

(2) the Secretary shall provide, on a cost-sharing basis, consultative and technical assistance, including design support and generic licensing documentation, to assist such utility in obtaining the construction authorization and appropriate license from the Commission; and

(3) the Secretary shall provide generic research and development of alternative spent nuclear fuel storage techniques to enhance utility-provided, at-reactor storage capabilities, if authorized in any other provision of this Act or in any other provision of law.

(c) DRY STORAGE RESEARCH AND DEVELOPMENT.—(1) The consultative and technical assistance referred to in subsection (b)(2) may include, but shall not be limited to, the establishment of a research and development program for the dry storage of not more than 300 metric tons of spent nuclear fuel at facilities owned by the Federal Government on the date of the enactment of this Act. The purpose of such program shall be to collect necessary data to assist the utilities involved in the licensing process.

(2) To the extent available, and consistent with the provisions of section 135, the Secretary shall provide spent nuclear fuel for the research and development program authorized in this subsection from spent nuclear fuel received by the Secretary for storage under section 135. Such spent nuclear fuel shall not be subject to the provisions of section 135(e).

(d) FUNDING.—The total contribution from the Secretary from Federal funds and the use of Federal facilities or services shall not exceed 25 percent of the total costs of the demonstration program authorized in subsection (a), as estimated by the Secretary. All remaining costs of such program shall be paid by the utilities involved or shall be provided by the Secretary from the Interim Storage Fund established in section 136.

(e) RELATION TO SPENT NUCLEAR FUEL STORAGE PROGRAM.—The spent nuclear fuel storage program authorized in section 135 shall not be construed to authorize the use of research development or demonstration facilities owned by the Department unless—

(1) a period of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) has passed after the Secretary has transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a writ-

ten report containing a full and complete statement concerning (A) the facility involved; (B) any necessary modifications; (C) the cost thereof; and (D) the impact on the authorized research and development program; or

(2) each such committee, before the expiration of such period, has transmitted to the Secretary a written notice to the effect that such committee has no objection to the proposed use of such facility.

PAYMENTS TO STATES AND INDIAN TRIBES

SEC. 219. (a) PAYMENTS.—Subject to subsection (b), the Secretary shall make payments to each State or affected Indian tribe that has entered into an agreement pursuant to section 215. The Secretary shall pay an amount equal to 100 percent of the expenses incurred by such State or Indian tribe in engaging in any monitoring, testing, evaluation, or other consultation and cooperation activity under section 215 with respect to any site. The amount paid by the Secretary under this paragraph shall not exceed $3,000,000 per year from the date on which the site involved was identified to the date on which the decontamination and decommission of the facility is complete pursuant to section 217(h). Any such payment may only be made to a State in which a potential site for a test and evaluation facility has been identified under section 213, or to an affected Indian tribe where the potential site has been identified under such section.

(b) LIMITATION.—The Secretary shall make any payment to a State under subsection (a) only if such State agrees to provide, to each unit of general local government within the jurisdictional boundaries of which the potential site or effectively selected site involved is located, at least one-tenth of the payments made by the Secretary to such State under such subsection. A State or affected Indian tribe receiving any payment under subsection (a) shall otherwise have discretion to use such payment for whatever purpose it deems necessary, including the State or tribal activities pursuant to agreements entered into in accordance with section 215. Annual payments shall be prorated on a 365-day basis to the specified dates.

STUDY OF RESEARCH AND DEVELOPMENT NEEDS FOR MONITORED RETRIEVABLE STORAGE PROPOSAL

SEC. 220. Not later than 6 months after the date of the enactment of this Act, the Secretary shall submit to the Congress a report describing the research and development activities the Secretary considers necessary to develop the proposal required in section 141(b) with respect to a monitored retrievable storage facility.

JUDICIAL REVIEW

SEC. 221. Judicial review of research and development activities under this title shall be in accordance with the provisions of section 119.

SEC. 222. RESEARCH ON ALTERNATIVES FOR THE PERMANENT DISPOSAL OF HIGH-LEVEL RADIOACTIVE WASTE.—The Secretary shall continue and accelerate a program of research, development, and investigation of alternative means and technologies for the permanent disposal of high-level radioactive waste from civilian nuclear activities and Federal research and development activities except that funding shall be made from amounts appropriated to the Secretary for purposes of carrying out this section. Such program shall include examination of various waste disposal options.

TECHNICAL ASSISTANCE TO NON-NUCLEAR WEAPON STATES IN THE FIELD OF SPENT FUEL STORAGE AND DISPOSAL

SEC. 223. (a) It shall be the policy of the United States to cooperate with and provide technical assistance to non-nuclear weapon states in the field of spent fuel storage and disposal.

(b)(1) Within 90 days of enactment of this Act, the Secretary and the Commission shall publish a joint notice in the Federal Register stating that the United States is prepared to cooperate with and provide technical assistance to non-nuclear weapon states in the fields of at-reactor spent fuel storage; away-from-reactor spent fuel storage; monitored, retrievable spnt fuel storage; geologic disposal of spent fuel; and the health, safety, and environmental regulation of such activities. The notice shall summarize the resources that can be made available for international cooperation and assistance in these fields through existing programs of the Department and the Commission, including the availability of: (i) data from past or ongoing research and development projects; (ii) consultations with expert Department or Commission personnel or contractors; and (iii) liaison with private business entities and organizations working in these fields.

(2) The joint notice described in the preceding subparagraph shall be updated and reissued annually for 5 succeeding years.

(c) Following publication of the annual joint notice referred to in paragraph (2), the Secretary of State shall inform the governments of non-nuclear weapon states and, as feasible, the organizations operating nuclear powerplants in such states, that the United States is prepared to cooperate with and provide technical assistance to non-nuclear weapon states in the fields of spent fuel storage and disposal, as set forth in the joint notice. The Secretary of State shall also solicit expressions of interest from non-nuclear weapon state governments and non-nuclear weapon state nuclear power reactor operators concerning their participation in expanded United States cooperation and technical assistance programs in these fields. The Secretary of State shall transmit any such expressions of interest to the Department and the Commission.

(d) With his budget presentation materials for the Department and the Commission for fiscal years 1984 through 1989, the President shall include funding requests for an expanded program of cooperation and technical assistance with non-nuclear weapon states in the fields of spent fuel storage and disposal as appropriate in light of expressions of interest in such cooperation and assistance on the part of non-nuclear weapon state governments and non-nuclear weapon state nuclear power reactor operators.

(e) For the purposes of this subsection, the term "non-nuclear weapon state" shall have the same meaning as that set forth in article IX of the Treaty on the Non-Proliferation of Nuclear Weapons (21 U.S.C. 438).

(f) Nothing in this subsection shall authorize the Department or the Commission to take any action not authorized under existing law.

TITLE III—OTHER PROVISIONS RELATING TO RADIOACTIVE WASTE

MISSION PLAN

SEC. 301. (a) CONTENTS OF MISSION PLAN.—The Secretary shall prepare a comprehensive report, to be known as the mission plan, which shall provide an informational basis sufficient to permit informed decisions to be made in carrying out the repository program and the research, development, and demonstration programs required under this Act. The mission plan shall include—

(1) an identification of the primary scientific, engineering, and technical information, including any necessary demonstration of engineering or systems integration, with respect to the siting and construction of a test and evaluation facility and repositories;

(2) an identification of any information described in paragraph (1) that is not available because of any unresolved scientific, engineering, or technical questions, or undemonstrated engineering or systems integration, a schedule including specific major milestones for the research, development, and technology demonstration program required under this Act and any additional activities to be undertaken to provide such information, a schedule for the activities necessary to achieve important programmatic milestones, and an estimate of the costs required to carry out such research, development, and demonstration programs;

(3) an evaluation of financial, political, legal, or institutional problems that may impede the implementation of this Act, the plans of the Secretary to resolve such problems, and recommendations for any necessary legislation to resolve such problems;

(4) any comments of the Secretary with respect to the purpose and program of the test and evaluation facility;

(5) a discussion of the significant results of research and development programs conducted and the implications for each of the different geologic media under consideration for the siting of repositories, and, on the basis of such information, a comparison of the advantages and disadvantages associated with the use of such media for repository sites;

(6) the guidelines issued under section 112(a);

(7) a description of known sites at which site characterization activities should be undertaken, a description of such siting characterization activities, including the extent of planned excavations, plans for onsite testing with radioactive or nonradioactive material, plans for any investigations activities which may affect the capability of any such site to isolate high-level radioactive waste or spent nuclear fuel, plans to control any adverse, safety-related impacts from such site characterization activities, and plans for the decontamination and decommissioning of such site if it is determined unsuitable for licensing as a repository;

(8) an identification of the process for solidifying high-level radioactive waste or packaging spent nuclear fuel, including a summary and analysis of the data to support the selection of the solidification process and packaging techniques, an analysis of the requirements for the number of solidification packaging facilities needed, a description of the state of the art for the materials proposed to be used in packaging such waste or spent fuel and the availability of such materials including impacts on strategic supplies and any requirements for new or reactivated facilities to produce any such materials needed, and a description of a plan, and the schedule for implementing such plan, for an aggressive research and development program to provide when needed a high-integrity disposal package at a reasonable price;

(9) an estimate of (A) the total repository capacity required to safely accommodate the disposal of all high-level radioactive waste

and spent nuclear fuel expected to be generated through December 31, 2020, in the event that no commercial reprocessing of spent nuclear fuel occurs, as well as the repository capacity that will be required if such reprocessing does occur; (B) the number and type of repositories required to be constructed to provide such disposal capacity; (C) a schedule for the construction of such repositories; and (D) an estimate of the period during which each repository listed in such schedule will be accepting high-level radioactive waste or spent nuclear fuel for disposal;

(10) an estimate, on an annual basis, of the costs required (A) to construct and operate the repositories anticipated to be needed under paragraph (9) based on each of the assumptions referred to in such paragraph; (B) to construct and operate a test and evaluation facility, or any other facilities, other than repositories described in subparagraph (A), determined to be necessary; and (C) to carry out any other activities under this Act; and

(11) an identification of the possible adverse economic and other impacts to the State or Indian tribe involved that may arise from the development of a test and evaluation facility or repository at a site.

(b) SUBMISSION OF MISSION PLAN.—(1) Not later than 15 months after the date of the enactment of this Act, the Secretary shall submit a draft mission plan to the States, the affected Indian tribes, the Commission, and other Government agencies as the Secretary deems appropriate for their comments.

(2) In preparing any comments on the mission plan, such agencies shall specify with precision any objections that they may have. Upon submission of the mission plan to such agencies, the Secretary shall publish a notice in the Federal Register of the submission of the mission plan and of its availability for public inspection, and, upon receipt of any comments of such agencies respecting the mission plan, the Secretary shall publish a notice in the Federal Register of the receipt of comments and of the availability of the comments for public inspection. If the Secretary does not revise the mission plan to meet objections specified in such comments, the Secretary shall publish in the Federal Register a detailed statement for not so revising the mission plan.

(3) The Secretary, after reviewing any other comments made by such agencies and revising the mission plan to the extent that the Secretary may consider to be appropriate, shall submit the mission plan to the appropriate committees of the Congress not later than 17 months after the date of the enactment of this Act. The mission plan shall be used by the Secretary at the end of the first period of 30 calendar days (not including any day on which either House of Congress is not in session because of adjournment of more than 3 calendar days to a day certain) following receipt of the mission plan by the Congress.

NUCLEAR WASTE FUND

SEC. 302. (a) CONTRACTS.—(1) In the performance of his functions under this Act, the Secretary is authorized to enter into contracts with any person who generates or holds title to high-level radioactive waste, or spent nuclear fuel, of domestic origin for the acceptance of title, subsequent transportation, and disposal of such waste or spent fuel. Such contracts shall provide for payment to the Secretary of fees pursuant to paragraphs (2) and (3) sufficient to offset expenditures described in subsection (d).

(2) For electricity generated by a civilian nuclear power reactor and sold on or after the date 90 days after the date of enactment of this Act, the fee under paragraph (1) shall be equal to 1.0 mil per kilowatt-hour.

(3) For spent nuclear fuel, or solidified high-level radioactive waste derived from spent nuclear fuel, which fuel was used to generate electricity in a civilian nuclear power reactor prior to the application of the fee under paragraph (2) to such reactor, the Secretary shall, not later than 90 days after the date of enactment of this Act, establish a 1 time fee per kilogram of heavy metal in spent nuclear fuel, or in solidified high-level radioactive waste. Such fee shall be in an amount equivalent to an average charge of 1.0 mil per kilowatt-hour for electricity generated by such spent nuclear fuel, or such solidified high-level waste derived therefrom, to be collected from any person delivering such spent nuclear fuel or high-level waste, pursuant to section 123, to the Federal Government. Such fee shall be paid to the Treasury of the United States and shall be deposited in the seperate fund established by subsection (c) 126(b). In paying such a fee, the person delivering spent fuel, or solidified high-level radioactive wastes derived therefrom, to the Federal Government shall have no further financial obligation to the Federal Government for the long-term storage and permanent disposal of such spent fuel, or the solidified high-level radioactive waste derived therefrom.

(4) Not later than one hundred eighty days after the date of enactment of this Act, the Secretary shall establish procedures for the collection and payment of the fees established by subsection (2) and paragraph (3). The Secretary shall annually review the amount of the fees established by paragraphs (2) and (3) above to evaluate whether collection of the fee will provide sufficient revenues to offset the costs as defined in subsection (d) herein. In the event the Secretary determines that either insufficient or excess revenues are being collected, in order to recover the costs incurred by the Federal Government that are specified in section (d), the Secretary shall propose an adjustment to the fee to insure full cost recovery. The Secretary shall immediately transmit this proposal for such an adjustment to Congress. The adjusted fee proposed by the Secretary shall be effective after a period of ninety days of continuous session have elapsed following the receipt of such transmittal unless during such ninety-day period either House of Congress adopts a resolution disapproving the Secretary's proposed adjustment in accordance with the procedures set forth for congressional review of an energy action under section 551 of the Energy Policy and Conservation Act.

(5) Contracts entered into under this section shall provide that—

(A) following commencement of operation of a repository, the Secretary shall take title to the high-level radioactive waster or spent nuclear fuel involved as expeditiously as practicable upon the request of the generator or owner of such waste of spent fuel; and

(B) in return for the payment of fees established by this section, the Secretary, beginning not later than January 31, 1998, will dispose of the high-level radioactive waste or spent nuclear fuel involved as provided in this subtitle.

(6) The Secretary shall establish in writing criteria setting forth the terms and conditions under which such disposal services shall be made available.

(b) ADVANCE CONTRACTING REQUIREMENT.—(1)(A) The Commission shall not issue or renew a license to any person to use a utilization or production facility under the authority of section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) unless—

(i) such person has entered into a contract with the Secretary under this section; or

(ii) the Secretary affirms in writing that such person is actively and in good faith negotiating with the Secretary for a contract under this section.

(B) The Commission, as it deems necessary or appropriate, may require as a precondition to the issuance or renewal of a license under section 103 or 104 of the Atomic Energy Act of 1954 (42 U.S.C. 2133, 2134) that the applicant for such license shall have entered into an agreement with the Secretary for the disposal of high-level radioactive waste and spent nuclear fuel that may result from the use of such license.

(2) Except as provided in paragraph (1), no spent nuclear fuel or high-level radioactive waste generated or owned by any person (other than a department of the United States referred to in section 101 or 102 of title 5, United States Code) may be disposed of by the Secretary in any repository constructed under this Act unless the generator or owner of such spent fuel or waste has entered into a contract with the Secretary under this section by not later than—

(A) June 30, 1983; or

(B) the date on which such generator or owner commences generation of, or takes title to, such spent fuel or waste;

whichever occurs later.

(3) The rights and duties of a party to a contract entered into under this section may be assignable with transfer of title to the spent nuclear fuel or high-level radioactive waste involved.

(4) No high-level radioactive waste or spent nuclear fuel generated or owned by any department of the United States referred to in section 101 or 102 of title 5, United States Code, may be disposed of by the Secretary in any repository constructed under this Act unless such department transfers to the Secretary, for deposit in the Nuclear Waste Fund, amounts equivalent to the fees that would be paid to the Secretary under the contracts referred to in this section if such waste or spent fuel were generated by any other person.

(c) ESTABLISHMENT OF NUCLEAR WASTE FUND.—There hereby is established in the Treasury of the United States a separate fund, to be known as the Nuclear Waste Fund. The Waste Fund shall consist of—

(1) all receipts, proceeds, and recoveries realized by the Secretary under subsections (a), (b), and (e), which shall be deposited in the Waste Fund immediately upon their realization;

(2) any appropriations made by the Congress to the Waste Fund; and

(3) any unexpended balances available on the date of the enactment of this Act for functions or activities necessary or incident to the disposal of civilian high-level radioactive waste or civilian spent nuclear fuel, which shall automatically be transferred to the Waste Fund on such date.

(d) USE OF WASTE FUND.—The Secretary may make expenditures from the Waste Fund, subject to subsection (e), only for purposes of radioactive waste disposal activities under titles I and II, including—

(1) the identification, development, licensing, construction, operation, decommissioning, and post-decommissioning maintenance and monitoring of any repository, monitored, retrievable storage facility or

test and evaluation facility constructed under this Act;

(2) the conducting of nongeneric research, development, and demonstration activities under this Act;

(3) the administrative cost of the radioactive waste disposal program;

(4) any costs that may be incurred by the Secretary in connection with the transportation, treating, or packaging of spent nuclear fuel or high-level radioactive waste to be disposed of in a repository, to be stored in a monitored, retrievable storage site or to be used in a test and evaluation facility;

(5) the costs associated with acquisition, design, modification, replacement, operation, and construction of facilities at a repository site, a monitored, retrievable storage site or a test and evaluation facility site and necessary or incident to such repository, monitored, retrievable storage facility or test and evaluation facility; and

(6) the provision of assistance to States, units of general local government, and Indian tribes under sections 116, 118, and 219.

No amount may be expended by the Secretary under this subtitle for the construction or expansion of any facility unless such construction or expansion is expressly authorized by this or subsequent legislation. The Secretary hereby is authorized to construct one repository and one test and evaluation facility.

(e) ADMINISTRATION OF WASTE FUND.—(1) The Secretary of the Treasury shall hold the Waste Fund and, after consultation with the Secretary, annually report to the Congress on the financial condition and operations of the Waste Fund during the preceding fiscal year.

(2) The Secretary shall submit the budget of the Waste Fund to the Office of Management and Budget triennially along with the budget of the Department of Energy submitted at such time in accordance with chapter 11 of title 31, United States Code. The budget of the Waste Fund shall consist of the estimates made by the Secretary of expenditures from the Waste Fund and other relevant financial matters for the succeeding 3 fiscal years, and shall be included in the Budget of the United States Government. The Secretary may make expenditures from the Waste Fund, subject to appropriations which shall remain available until expended. Appropriations shall be subject to triennial authorization.

(3) If the Secretary determines that the Waste Fund contains at any time amounts in excess of current needs, the Secretary may request the Secretary of the Treasury to invest such amounts, or any portion of such amounts as the Secretary determines to be appropriate, in obligations of the United States—

(A) having maturities determined by the Secretary of the Treasury to be appropriate to the needs of the Waste Fund; and

(B) bearing interest at rates determined to be appropriate by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the maturities of such investments, except that the interest rate on such investments shall not exceed the average interest rate applicable to existing borrowings.

(4) Receipts, proceeds, and recoveries realized by the Secretary under this section, and expenditures of amounts from the Waste Fund, shall be exempt from annual apportionment under the provisions of subchapter II of chapter 15 of title 31, United States Code.

(5) If at any time the moneys available in the Waste Fund are insufficient to enable the Secretary to discharge his responsibilities under this subtitle, the Secretary shall issue to the Secretary of the Treasury obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be agreed to by the Secretary and the Secretary of the Treasury. The total of such obligations shall not exceed amounts provided in appropriation Acts. Redemption of such obligations shall be made by the Secretary from moneys available in the Waste Fund. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, which shall be not less than a rate determined by taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the obligations under this paragraph. The Secretary of the Treasury shall purchase any issued obligations, and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under chapter 31 of title 31, United States Code, and the purposes for which securities may be issued under such Act are extended to include any purchase of such obligations. The Secretary of the Treasury may at any time sell any of the obligations acquired by him under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of obligations under this paragraph shall be treated as public debt transactions of the United States.

(6) Any appropriations made available to the Waste Fund for any purpose described in subsection (d) shall be repaid into the general fund of the Treasury, together with interest from the date of availability of the appropriations until the date of repayment. Such interest shall be paid on the cumulative amount of appropriations available to the Waste Fund, less the average undisbursed cash balance in the Waste Fund account during the fiscal year involved. The rate of such interest shall be determined by the Secretary of the Treasury taking into consideration the average market yield during the month preceding each fiscal year on outstanding marketable obligations of the United States of comparable maturity. Interest payments may be deferred with the approval of the Secretary of the Treasury, but any interest payments so deferred shall themselves bear interest.

ALTERNATIVE MEANS OF FINANCING

SEC. 303. The Secretary shall undertake a study with respect to alternative approaches to managing the construction and operation of all civilian radioactive waste management facilities, including the feasibility of establishing a private corporation for such purposes. In conducting such study, the Secretary shall consult with the Director of the Office of Management and Budget, the Chairman of the Commission, and such other Federal agency representatives as may be appropriate. Such study shall be completed, and a report containing the results of such study shall be submitted to the Congress, within 1 year after the date of the enactment of this Act.

OFFICE OF CIVILIAN RADIOACTIVE WASTE MANAGEMENT

SEC. 304. (a) ESTABLISHMENT.—There hereby is established within the Department of Energy an Office of Civilian Radioactive Waste Management. The Office shall be headed by a Director, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall be compensated at the rate payable for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(b) FUNCTIONS OF DIRECTOR.—The Director of the Office shall be responsible for carrying out the functions of the Secretary under this Act, subject to the general supervision of the Secretary. The Director of the Office shall be directly responsible to the Secretary.

(c) ANNUAL REPORT TO CONGRESS.—The Director of the Office shall annually prepare and submit to the Congress a comprehensive report on the activities and expenditures of the Office.

(d) ANNUAL AUDIT BY COMPTROLLER GENERAL.—The Comptroller General of the United States shall annually make an audit of the Office, in accordance with such regulations as the Comptroller General may prescribe. The Comptroller General shall have access to such books, records, accounts, and other materials of the Office as the Comptroller General determines to be necessary for the preparation of such audit. The Comptroller General shall submit to the Congress a report on the results of each audit conducted under this section.

LOCATION OF TEST AND EVALUATION FACILITY

SEC. 305. (a) REPORT TO CONGRESS.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report setting forth whether the Secretary plans to locate the test and evaluation facility at the site of a repository.

(b) PROCEDURES.—(1) If the test and evaluation facility is to be located at any candidate site or repository site (A) site selection and development of such facility shall be conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of repositories; and (B) the Secretary may not commence construction of any surface facility for such test and evaluation facility prior to issuance by the Commission of a construction authorization for a repository at the site involved.

(2) No test and evaluation facility may be converted into a repository unless site selection and development of such facility was conducted in accordance with the procedures and requirements established in title I with respect to the site selection and development of respositories.

(3) The Secretary may not commence construction of a test and evaluation facility at a candidate site or site recommended as the location for a repository prior to the date on which the designation of such site is effective under section 115.

NUCLEAR REGULATORY COMMISSION TRAINING AUTHORIZATION

SEC. 306. NUCLEAR REGULATORY COMMISSION TRAINING AUTHORIZATION.—The Nuclear Regulatory Commisison is authorized and directed to promulgate regulations, or other appropriate Commission regulatory guidance, for the training and qualifications of civilian nuclear powerplant operators, supervisors, technicians and other appropriate operating personnel. Such regulations or guidance shall establish simulator training requirements for applicants for civilian nuclear powerplant operator licenses and for operator requalification programs; requirements governing NRC administration of requalification examinations; requirements for operating tests at civilian nuclear pow-

erplant simulators, and instructional requirements for civilian nuclear powerplant licensee personnel training programs. Such regulations or other regulatory guidance shall be promulgated by the Commission within the 12-month period following enactment of this Act, and the Commission within the 12-month period following enactment of this Act shall submit a report to Congress setting forth the actions the Commission has taken with respect to fulfilling its obligations under this section.

CONFERENCE REPORT ON H.R. 5002, FISHERY CONSERVATION AND MANAGEMENT IMPROVEMENT

Mr. BREAUX. Mr. Speaker, pursuant to the order of the House of December 17, 1982, I call up the conference report on the bill (H.R. 5002), to improve fishery conservation and management, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the order of the House of December 17, 1982, the conference report is considered as having been read.

(For conference report and statement, see prior proceedings of the House of today, December 20, 1982.)

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. BREAUX) will be recognized for 30 minutes, and the gentleman from Washington (Mr. PRITCHARD) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5002 amends the Fishery Conservation and Management Act (FCMA), which was signed into law on April 13, 1976. The FCMA was enacted to provide conservation and management authority over valuable fishery resources found within 200 miles of the U.S. coast. These resources, which account for approximately 20 percent of the world total, had been heavily overfished by foreign fishermen, leading to the virtual demise of 10 U.S. fisheries and losses in excess of half a billion dollars by 1974.

Under the FCMA, eight regional fishery management councils were created and charged with the responsibility of developing fishery management plans (FMP's) for fisheries in need of protection within their geographical areas of authority. The Department of Commerce was granted authority to review, and finally approve, the plans developed by the councils.

During the 96th and 97th Congresses, the Merchant Marine and Fisheries Committee conducted nine oversight hearings which illustrated the need for amendments to further insure the smooth operation of the domestic regulatory regime and strengthen the U.S. negotiating position with foreign nations participating in the harvest of U.S. fishery resources in the fishery conservation zone (FCZ). In combination with the American Fisheries Promotion Act (Public Law 96-561), H.R. 5002 concludes the first comprehensive review of the FCMA.

The basic elements of H.R. 5002:

First, streamline the process for the implementation of fishery management plans (FMP's) and the necessary regulations. The system set forth in H.R. 5002 will insure that FMP's are reviewed and adopted within 95 days of their submission by the regional councils and that Federal regulations will be in effect within 110 days of such plan submissions;

Second, provide a mechanism for allowing foreign vessels to participate in the recreational harvest of U.S. fishery resources; and

Third, strengthen what has come to be known as the U.S. "fish and chips" policy, designed to maximize the benefits for U.S. fishermen of foreign participation in the harvest of fishery resources in the U.S. fishery conservation zone.

The original House bill contained a provision which would have amended existing law so as to insure the State of California two additional obligatory seats on the Pacific Fishery Management Council. Unfortunately, the House was not able to hold this provision in the conference committee and the deletion of this provision is the sole difference between the conference report and the bill which passed the House unanimously last week. I would point out, however, that existing law guarantees California two seats on that council and, thus, that State is guaranteed no fewer seats than any other.

Mr. Speaker, although, as I have just said, the House could not prevail upon the Senate to accept this change to existing law, this bill contains many provisions as I have outlined above that will provide tremendous benefits to the entire U.S. fishing industry and I urge its adoption by the House.

□ 2310

Mr. Speaker, I reserve the balance of my time.

Mr. PRITCHARD. Mr. Speaker, I yield myself such time as I may consume.

This is a good bill. We had a small controversy and I think we have worked that out.

The President and the administration support this legislation. It was, I think, explained adequately by the chairman of the subcommittee and it went through this House without any dissenting votes.

I hope my colleagues will support it.

Mr. BREAUX. Mr. Speaker, I yield such time as he may consume to the chairman of the committee, the gentleman from North Carolina (Mr. JONES).

Mr. JONES of North Carolina. Mr. Speaker, I rise in support of conference report H.R. 5002, a bill to improve fishery conservation and management.

Among other things, this bill will provide for:

First, greater utilization of our fishery resources by U.S. fishermen;

Second, improved conservation and management of our fishery resources; and

Third, greater cooperation between United States and foreign fishermen, which will benefit our fishermen.

The House supported the addition of two California seats on the Pacific Marine Fisheries Council as in the original bill; however, the Senate conferees were unbending in their opposition to the additional seats, and no compromise was possible.

Although the extra California seats are not included in this conference report, this bill as now reported is a step in the direction of better management and conservation of our fishery resources, and is of vital importance to America's fishing industry.

I urge my colleagues to join me in voting for its passage.

Mr. BREAUX. Mr. Speaker, I have no further requests of time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

1981 TAX YEAR CORPORATE TAX STUDY

(Mr. PEASE asked and was given permission to extend his remarks at this point in the RECORD AND TO INCLUDE EXTRANEOUS MATTER.)

Mr. PEASE. Mr. Speaker, I am today inserting in th CONGRESSIONAL RECORD a corporate tax study done for myself and Congressman BYRON DORGAN by the Joint Committee on Taxation and the General Accounting Office.

Congressman DORGAN and I initiated this study for an important reason. We think it is crucial that the long-term trends of corporate taxation be monitored. Other studies similar to this one have been done—notably by our former House colleague, Congressman Charles Vanik—and are currently being done (by Tax Analysts, a private tax study group). Together, these and other studies, with their different approaches in methodology, can show the public and the Congress the effects of longterm trends in corporate taxes. Do corporate taxpayers shoulder their share of the responsiblity for raising the revenues necessary to operate our country? Are tax cuts or tax increases actually achieving their in-

tended purposes? Do particular sectors of corporate taxpayers pay more or less in Federal income taxes, and why?

Mr. Speaker, other corporate tax studies have concentrated on the effective corporate tax rates of individual companies. This study has taken a different approach and instead presents computed tax rates for 22 different industry sectors representing 179 Fortune 500 companies—from petroleum refining to retailing to electronics. Looking at a single isolated tax year of an individual company can sometime lead to misleading conclusions. Transitory economic factors, poor profit levels, or plain bad management are just some of the factors that may skew a company's tax rates. We are interested in long-term corporate and sectoral trends.

This study accomplishes that by grouping like companies together. While individual companies that make up an industry sector are identified, their income, taxes and tax rate figures are not. Rather, figures are presented for each group of compaines.

The Study is intended to be only the first of a series of similar studies that we hope will show the long-term direction of corporate taxation.

To begin to analyze these computations, readers should look first at table III, Federal Government receipts from 1950 to 1981. Personal income taxes as a percentage of total Federal receipts have climbed from 39.2 percent in 1950 to 47.7 percent last year. However, corporate income tax receipts have plunged from 28.3 percent in 1950 to 11.4 percent last year. For every 2 percentage points that corporate tax receipts have declined, individual tax receipts have gone up 1 point. This basic decline in corporate taxes is important to remember as other parts of the figures are examined.

In 1981, the Congress passed President Reagan's Economic Recovery Tax Act (ERTA). It contained huge supply side tax incentives for corporate taxpayers, most in the form of radically accelerated depreciation provisions for new equipment purchases.

The drastic nature of the corporate provisions was emphasized during hearings on corporate tax cuts before the House Ways and Means Committee. A panel of business witnesses was asked whether they would prefer that the corporate income tax be eliminated completely or the supply side tax incentives enacted. Each member of the four or five member corporate panel indicated they would prefer the tax cut package rather than an end to Federal income taxes. They did not do so out of the goodness of their hearts or charity, but because they stood to actually be taxed at negative rates—meaning Government would end up owing them money.

Because the corporate tax rate is a flat 46 percent over $100,000, inflation and bracket creep do not force large corporations into higher tax brackets. There is no automatic adjustment that serves to increase corporate revenues as individual tax revenues increase—although indexing in 1985 will end bracket creep for individuals. The result is that corporate taxes must be raised by specific intent of the Congress to keep businesses' contributions to Government stable as a precentage of Federal receipts.

After enactment of the supply side tax cut it became clear even to its supporters that the bill had gone too far. In particular, the accelerated depreciation provisions, including the now infamous leasing provisions, were straining the Federal budget. On one hand the provisions forgave billions of dollars in Federal income taxes. But at the same time the promise of improved business investment and productivity did not materialize. Together with other factors, the result was a sharply increased Federal deficit—far in excess of projections by supporters of the tax cut.

In order to raise revenue to slow the increasing deficit, the administration and the Senate Finance Committee proposed and the Congress eventually approved the Tax Equity and Fiscal Responsibility Act (TEFRA) this year. One-half to one-third of the large reductions in corporate revenues enacted in 1981 were offset or at least limited.

Although the effective dates of the changes vary, the tax cut of 1981 and the tax equity legislation of 1982 add up to a chance for those studying corporate taxes to look at 1980's pretax cut figures, the year of large corporate tax cuts—1981—and a third year where excesses were removed—1982. This study is only the first of what we hope will be a long series of studies that will show corporatewide trends and specific sector rates. Taken by itself, this study is no earthshaker; while it confirms the continuing decline in corporate taxes and shows how little some corporate sectors are paying in taxes, it must be set in the context of consecutive tax studies—especially in light of the limitations on corporate taxes enacted just this year. Next year and the years after will show us the effects of the major tax acts of 1981 and 1982.

Mr. Speaker, table I contains the aggregate income and tax data for each of the 22 sectors. While raw numbers are of little interest by themselves, tracking their year-to-year changes in future tax studies will allow us to see growth or decline of industries and their tax contributions to the operation of our country.

In looking at table I tax rates, it should be kept in mind that the basic U.S. Federal corporate income tax rate is a flat 46 percent over $100,000. However, only 4 out of 22 industry sectors in the study paid more than 30 percent in U.S. Federal income taxes on U.S. income.

Table II shows tax rates for tax years 1980 and 1981 for each of the 22 industry groups. While 2 consecutive years does not amount to a long-term trend, one of the most striking findings of this study is the wide disparity across industries in the effective tax rate. It hardly seems fair that some industries are able to escape virtually all their obligation to contribute to the cost of Government, while others are saddled with a relatively heavy burden. What these disparities also show is that the tax system creates much more favorable opportunities for investment in some industries than in others. As a result capital has moved out of some industries and into others simply because of the structure of our current corporate income tax.

It is possible that those induced changes in the allocation of capital are designed to serve some social purpose. It is more likely, however, as many economists argue, that these shifts in the deployment of capital are in fact distortions and misallocations which hinder economic growth and prevent the economy from making the best and most productive use of available resources.

Companies are able to reduce or defer their taxes through entirely legitimate and allowable tax provisions that have been made law by past Congresses and Presidents. They range from special credits for the purchase of equipment or the hiring of disadvantaged employees to more arcane and sophisticated exemptions or deductions that hope to stimulate certain business activities such as the construction of low-income housing or exports of American products.

The Tax Code also includes many special tax provisions meant to aid clearly social aims such as reducing air and water pollution, conserving energy, or encouraging charitable contributions.

Mr. Speaker, while taxes are fundamentally meant to raise money to operate our country, the system has come to contain special provisions that are an entitlement program that every special interest group wants to use to its advantage. Because tax provisions are not subject to the usual annual authorization and appropriations cycle which gives scrutiny to almost every other Federal program, they can be enacted and practically forgotten—except for their continuing drain on the revenues that our income tax system otherwise collects. Programs, too often, remain law that long ago may have outlived their original purpose.

Mr. Speaker, there has long been a philosophical debate over the redistribution of income—meaning that Federal policies have either deliberately

or inadvertently led to a shifting of our country's wealth. The shifts can occur within either corporate or individual groups or between the two groups.

In the last several years, redistribution of income has come to have a negative connotation—it is a euphemism used to indicate that Federal policy has enriched individuals at the expense of business. This study shows that the real redistribution is occurring in the opposite direction—individuals are paying more and more for the costs of operating our country while corporate taxpayers, particularly large ones like those in this study, are reducing their tax contributions substantially.

Mr. Speaker, the figures from this study form the base for a series of corporate tax studies that Congress can use to determine the relative balance of corporate and individual Federal income taxation. It is fairly clear that corporate contributions to Federal receipts are continuing to decline while individuals' contributions are going up. How far they will decline and what the Congress should do must be addressed in future tax legislation. We hope this resource can help in that debate.

The tax study follows:

STUDY OF THE 1981 INCOME TAX EXPENSE REPORTED BY SELECTED LARGE U.S. CORPORATIONS

INTRODUCTION

This study presents calculations, from corporation's financial statements, comparing income tax liability and income. A tax rate, the ratio of "taxes paid" to income before tax, is computed for each company studied, and average tax rates by industry are presented.

In annual financial statements corporations disclose net income before tax, income tax expense and net income after tax. The provision for taxes, or income tax expense, is separated into two parts—current and deferred. Current income tax expense represents taxes currently payable on "book" income. Deferred tax expense represents a liability for taxes which will be payable in some future year, or years, although it is treated as a current year's expense for financial reporting purposes. Deferred taxes generally result from differences in the timing of income recognition or deductions allowed under the rules for computing book income and those for computing taxable income (the total amounts ultimately allowed are equal under the two sets of rules). Cost recovery deductions for equipment are an example of such an item.

In this study, tax rates are compiled by comparing reported current income tax expense with net income before tax. This approach differs from other studies which compute effective tax rates by matching, generally by using tax return data, the taxes paid with the income on which the tax is imposed. The difference between these approaches arises because income, and the taxes imposed on that income, are not necessarily reported in the same period. Because this study compares current tax expense with net income before tax as reported to shareholders, it does not address the complex theoretical, and factual, problems inherent in an effective tax rate computation for which taxes paid are matched with the income on which the tax is imposed.

Current tax expense, rather than the total provision for taxes, is used to measure taxes paid because, for many corporations, during a period of growth or a period of inflation, deferred taxes roll over from one year to the next and are, in fact, never paid or paid in the distant future. The present value of each dollar of deferred tax liability is less than the present value of each dollar of current tax liability. Depending upon the period of deferral and prevailing interest rates, it is possibly considerably less. In effect, by assuming that deferred taxes represent zero tax liability, these estimates are a lower bound for the tax rate calculation. Primarily because of this treatment of deferred taxes, the tax rates in this study differ from those in corporate financial statements or other studies of effective tax rates computed from published data which exclude no, or only a portion, of deferred taxes from the measure of taxes used to compute the tax rate.

Where data are available to separate foreign and domestic earnings, a foreign tax rate on foreign income and a U.S. rate on U.S. income is computed in addition to the worldwide rate on worldwide income.

This report covers 179 companies selected from the Fortune 500 industrials and the Fortune 50's non-industrials. Industrials are grouped by the Standard Industrial Classification Code numbers (SIC Codes). Each company is included in the industry group which represents the greatest volume of industrial sales for that company. The corporations (listed in Appendix B) are grouped as follows:

Aerospace, Beverages, Chemicals, Commercial Banks, Crude Oil Production, Diversified Financials, Diversified Services, Electronics, Appliances, Food Processors, Industrial & Farm Equipment, Metal Manufacturing, Motor Vehicles, Office Equipment, Oil and Refining, Paper and Wood Products, Pharmaceuticals, Retailing, Tobacco, Transportation—Airlines, Railroads, Trucking, and Utilities.

METHODOLOGY

In general, this study compares current income tax expense with net income before taxes as reported in financial statements. However, to provide a better basis for comparing the tax rates of different industries, as well as the trend in tax rates over a period of time, some adjustments, outlined below, are made to reported income and income tax expense. A technical discussion of the methodology is included in Appendix A.

Adjustments

1. Consolidation of subsidiaries: Net income per financial statements is adjusted to include the income or loss attributable to minority interests.

2. Equity accounting for investments in affiliates and joint ventures: Typically, the parent corporation's provision for income taxes does not include the tax attributable to the parent's equity in the net income or loss of the affiliate or joint venture. In this case, the equity income or loss is eliminated from the net income of the parent.

3. Extraordinary items and discontinued operations: The profit or loss from extraordinary items and discontinued operations, which is reported separately, is excluded from income. Similarly, the current tax expense, or savings, attributable to such extraordinary items or discontinued operations is excluded from total current tax expense.

4. Securities transactions (banks only): Net income or loss is adjusted to reflect the profit or loss on securities transactions, which is reported separately. The current income taxes attributable to the profit or loss on securities transactions are aggregated with current taxes on normal operations.

5. State taxes: Income is reduced by the current portion of state or local income tax expense. The current income tax expense is adjusted to eliminate the current portion of state or local income tax expense.

Computation of tax rates

Tax rates are computed by dividing the adjusted worldwide, foreign and U.S. current income tax expense by adjusted worldwide, foreign and U.S. income before tax, respectively.

For those companies which do not disclose foreign earnings, only the rate of worldwide tax on worldwide income is determinable. Companies with losses are eliminated.

APPENDIX A

TECHNICAL DISCUSSION OF METHODOLOGY

CONSOLIDATION OF SUBSIDIARIES

For financial statement purposes, companies generally consolidate subsidiaries that are more than 50 percent owned, including foreign subsidiaries. For Federal income tax purposes, however, generaly only 80 percent or more owned domestic subsidiaries are eligible to be included in a consolidated income tax return. Thus, the "taxable entity" and the "financial statement entity" upon which this study is based may not be the same.

In financial statements, the entire Federal income tax expense of all consolidated subsidiaries is reported as though it were an income tax or refund wholy attributable to the majority interest of the consolidated group. However, the minority interest in the subsidiaries' income or loss (perhaps as much as 49 percent) is eliminated net of tax. Thus, the consolidated financial statements often show the total tax expense of even 51 percent owned subsidiaries while eliminating the after-tax income attributable to the minority interest.

To compensate for this, the net income per financial statement is adjusted to reverse the elimination of the income or loss attributable to the minority interest. (See also worldwide, U.S. and foreign income.)

Equity accounting for investments in affiliates and joint ventures: Generally, investments in affiliates (20 to 50 percent owned companies) and joint ventures are accounted for by the equity method. This method, which is sometimes called a one line consolidation, produces the same net income as does the consolidation method, but through a different technique. Under the equity method, the parent corporation's proportionate share of the "after tax" earnings of the affiliate or joint venture is shown on one line in the income statement. In a consolidation, on the other hand, all income and expense accounts of the subsidiary are combined with those of the parent, and the minority interest is eliminated as a single item.

Under the equity method the parent corporation's provision for income taxes generally does not include the tax attributable to the parent's equity in the net income or loss of the affiliate or joint venture. If the equity earnings are reported in this manner, an adjustment is made to eliminate the

equity income or loss from net income of the parent.

In some instances, equity earnings are shown "broad" in the financial statements, which means that the pre-tax equity income is included in income of the parent and the related taxes are included in the parent's tax provision. This occurs usually where the parent owns more than an 80 percent interest in the equity company, but is not consolidating it for some other reason. If equity earnings are reported in this manner, no adjustment is deemed necessary.

"Overstating" the provisions for Federal income taxes: Corporations may "overstate" the accrued Federal income tax liability, and thus overstate the provision to provide a "cushion" for potential increases in tax liability resulting from Internal Revenue Service examinations. Corporations "book" this "overstatement" because of the tendency to resolve doubtful items in the corporate favor while realizing that they may result in tax deficiencies on examination by the Internal Revenue Service. Because the amount of this "overstatement" of the provision for Federal income taxes cannot be determined from public information sources, no attempt is made in this study to adjust for this amount in arriving at the estimated current Federal income tax expense.

DEFERRED TAXES

If generally accepted accounting principles and tax accounting rules were exactly the same, then all corporations would show an effective rate of tax equal to the statutory rate before credits. The differences between tax and financial accounting rules account for the variances in effective tax rates. Some of these differences are "timing differences" which will reverse in future periods, while others are "permanent differences" which will not reverse. Examples of timing differences include accelerated depreciation, completed contract method of accounting for long-term contracts, installment sale reporting, amortization of investment tax credit and provision for losses on discontinued operations. Examples of permanent differences include the 85 percent dividends received deduction and non-taxable municipal bond interest.

Interperiod tax allocation is an accounting concept that is based on the assumption that the vagaries of the tax law that result merely in timing differences should not affect the overall reported tax expense of the company in a given year. The concept provides in essence that the total tax expense for the period should be the statutory rate times income before tax (after allowing for permanent differences). Some portion of this expense will be due currently under the tax law while the rest will be due (or perhaps refundable) in the future. The portion that is due currently is termed "current tax expense" and the portion that is due (or refundable) in the future is termed "deferred tax expense."

It is sometimes difficult to determine whether a particular difference should be classified as a permanent difference or a timing difference. Realization of timing differences in the future may depend on the level of future profits or may be affected by the level of investment in plant assets or other factors. Subjective determinations are often required. No attempt was made to reclassify the companies' determinations.

INTRAPERIOD TAX ALLOCATION

This accounting technique results in showing the effect of taxes on the various sections of the income statement. For example, the tax expense or savings attributable to extraordinary items or discontinued operations is shown separately from that which is attributable to normal operations. Similarly, for banks, securities transactions are generally shown separately. Occasionally the extraordinary item is recognized for financial statement purposes in a period different than for tax purposes, which causes interperiod and intraperiod tax allocation rules to operate together.

For purposes of this study, the profit or loss from extraordinary items and discontinued operations which is reported separately is excluded from income and the related tax is excluded from tax expense. However, the current portion of other intraperiod taxes, such as those which relate to securities transactions for banks, is aggregated with the current tax expense which relates to normal operations.

INVESTMENT TAX CREDIT

Investment tax credits pertaining to lease financing are frequently recognized over the recovery period of the lease investment and are amortized to lease income. For purposes of computing the tax rates, income should be reduced by the amortized investment tax credit and current tax expense should also be reduced. However, the amount of investment tax credit amortized to lease income is not always disclosed. Therefore, for consistency purposes, no adjustment is made to income or tax expense for these amounts. Generally, this would result in a slightly higher tax rate than if the adjustment were made.

CURRENT INCOME TAX EXPENSE

Adjustments to prior years' estimates: Current worldwide tax expense is comprised of the current portion of the Federal and foreign income taxes reported for financial accounting purposes. Generally, financial accounting rules require that the income taxes currently payable be stated separately from those payable in the future. The taxes payable currently in most cases represent the tax estimated to be shown on the return to be filled. However, the current provision for each year is adjusted by the over- or under-estimation of the prior year's current provision. To the extent of the current and prior years errors in estimation, the current income tax provision does not represent the actual current tax expense as it would be calculated on a strict accrual basis.

Carryovers from prior years: Net operating losses and tax credits, such as the investment tax credit, may be carried over from prior years into the current year. Similarly, losses and credits from the current year may be carried back to prior years. Current income tax expense is not adjusted to eliminate the effect of these carryovers.

WORLDWIDE, U.S. AND FOREIGN INCOME TAXES

Consolidation of subsidiaries: Worldwide income before tax is comprised of income before Federal and foreign income taxes, adjusted to eliminate the equity in earnings or losses of unconsolidated subsidiaries. In several instances the adjustment for equity in earnings of an unconsolidated subsidiary is not made because the parent has at least 80 percent ownership of the subsidiary and the subsidiary's income taxes are separately disclosed. In these circumstances it is likely that the subsidiary is consolidated with the parent for tax purposes, even though it is not for financial statement purposes.

Allocation of income between U.S. and foreign sources: The allocation of income between U.S. and foreign sources is based on information voluntarily disclosed in the companies' financial statements. Effective for fiscal years beginning after December 15, 1976, Financial Accounting Standards Board Statement No. 14 requires certain disclosures relating to foreign operations. The SEC also requires similar information to be disclosed.

Uniform methods of allocating income between U.S. and foreign sources have not been developed; and corporate administrative, capital and product development costs are subject to arbitrary allocation methods. However, the information provided, subject to the accuracy of the allocations, provides information useful in analyzing the effective income tax burden of multinational corporations.

Most companies allocate unrealized foreign currency exchange gains and losses recognized under FASB Statement No. 8 to foreign source income. Net exchange gains decrease the current effective tax rate and net exchange losses increase the effective tax rate. Some companies report high effective foreign tax rates (perhaps in excess of 100 percent) because of the recognition of such losses for financial reporting purposes.

Under FASB Statement No. 52, some foreign currency translation adjustments are not included in net income. Although FASB Statement No. 52 is effective for fiscal years beginning on or after December 15, 1982, some companies adopted this treatment of foreign currency gains and losses in 1981. In this study no attempt has been made to evaluate the effect on tax rates of this change in the accounting rules.

Allocation of income taxes between U.S. and foreign sources: The allocation of current income taxes between U.S. and foreign expense is required by the SEC. In some instances, where the amount involved is not material, State or foreign income taxes may be included with U.S. income taxes. Thus, companies that do not separately state U.S. and foreign earnings must at least separately state U.S. and foreign income taxes allocated between current and deferred, when they are material.

Potential overstatement of U.S. tax on U.S. income: The estimated rate of U.S. tax on U.S. income may be overstated to the extent that some portion of the U.S. tax is actually attributable to foreign earnings. This will occur when the foreign tax paid on foreign earnings is less than the U.S. tax on those earnings, so that even after utilization of the foreign tax as a credit against U.S. tax, an incremental U.S. tax is payable on the foreign earnings. It is not possible to adjust accurately for this occurrence on the basis of publicly available information.

APPENDIX B

Aerospace (SIC Code No. 41): United Technologies, McDonnell Douglas, Rockwell International, Lockheed, General Dynamics, Boeing.

Beverages (SIC Code No. 49): PepsiCo, Coca-Cola, Anheuser-Busch, Consolidated Foods, Heublein.

Chemicals (SIC Code No. 28): E. I. du Pont de Nemours, Dow Chemical, Union Carbide, Monsanto, W. R. Grace, Allied.

Commercial Banks: BankAmerica Corp., Citicorp, Chase Manhattan Corp., Manufacturers Hanover Corp., J. P. Morgan & Co., Continental Illinois Corp., Chemical New York Corp., First Interstate Bancorp., Bankers Trust New York Corp., First Chicago Corp., Security Pacific Corp., Wells Fargo & Co., Crocker National Corp., Marine Midland Banks, Mellon National Corp., Irving

Bank Corp., Interfirst Corp., First National Boston Corp., Northwest Bancorp, First Bank System.

Crude Oil Production (SIC Code No. 10): Occidental Petroleum, MAPCO, Superior Oil, Natomas, Louisiana Land & Exploration.

Deversified Financials: Federal National Mortgage Assn., Aetna Life & Casualty, American Express, Travelers, Merrrill Lynch & Co., H. F. Ahmanson, INA Great Western Financial, First Boston, Loews.

Diversified Services: Phibro, Halliburton, Fluor, Super Valu Stores, Foremost-McKesson, CBS, Fleming Companies, Tesoro Petroleum, AGRI Industries, American Hospital Supply.

Electronics, Appliances (SIC Code No. 36): General Electric, International Telephone & Telegraph, Western Electric, Westinghouse Electric, RCA, Raytheon, Litton Industries, Texas Instruments.

Food Processors (SIC Code No. 20): Dart & Kraft, Beatrice Foods, General Foods, Nabisco Brands, United Brands, Ralston Purina, General Mills, Greyhound, Borden, CPC International, IC Industries.

Industrial & Farm Equipment (SIC Code No. 45): Caterpillar Tractor, Dresser Industries, Deere, Combustion Engineering, FMC.

Metal Maufacturing (SIC Code No. 33): United States Steel, LTV, Bethlehem Steel, Armco, Aluminum Co. of America, Republic Steel, National Steel.

Motor Vehicles (SIC Code No. 40): General Motors, Ford Motor, Chrysler, International Harvester, Signal Companies, TRW, Bendix.

Office Equipment (SIC Code No. 44): International Business Machines, Sperry, Honeywell, NCR, Burroughs.

Oil and Refining (SIC Code No. 29): Exxon, Mobil, Texaco, Standard Oil of California, Standard Oil (Indiana), Gulf Oil, Atlantic Richfield, Shell Oil, Phillips Petroleum, Tenneco, Sun, Standard Oil (Ohio), Getty Oil, Union Oil of California, Amerada Hess, Ashland Oil, Marathon Oil, Cities Service, Union Pacific, Charter, Coastal, Farmland Industries, Agway.

Paper and Wood Products (SIC Code No. 26): Georgia-Pacific, International Paper, Weyerhaeuser, Champion International, Crown Zellerbach.

Pharmaceuticals (SIC Code No. 42): Johnson & Johnson, American Home Products, Bristol-Myers, Warner-Lambert Pfizer.

Retailing: Sears Roebuck, Safeway Stores, K mart, J. C. Penney, Kroger, F. W. Woolworth, Lucky Stores, American Stores, Federated Department Stores, Great Atlantic & Pacific Tea.

Tobacco (SIC Code No. 21): R. J. Reynolds Industries, Phillip Morris, American Brands, BATUS, Universal Leaf Tobacco.

Transportation—Airlines: Trans World, UAL, American Airlines, Pan American World Airways, Eastern Air Lines, Delta Air Lines.

Transportation—Railroads: CSX, Burlington Northern, Santa Fe Industries, Southern Pacific, Missouri Pacific.

Transportation—Trucking: United Parcel Service, Consolidated Freightways, Roadway Express, Leaseway Transportation, Yellow Freight System.

Utilities: American Telephone & Telegraph, General Telephone and Electronics, Southern Company, Pacific Gas & Electric, American Electric Power, Commowealth Edison, Southern California Edison, Middle South Utilities, Consolidated Edison, Texas Utilities.

TABLE I.—FEDERAL INCOME TAX RATES BY SECTOR, 1981

	Thousands of dollars						Percent of tax rate on—		
	Income before tax			Current tax expense			U.S. income	Foreign income [1]	Worldwide income [2]
	United States	Foreign [1]	Worldwide [2]	United States	Foreign [1]	Worldwide			
Aerospace	2,282,317	473,541	2,755,858	155,291	172,943	339,834	6.8	36.5	12.3

Trucking	796,654	10,826	795,395	367,550	5,183	372,733	46.1	47.9	46.9
Utilities	15,375,821	204,521	16,202,651	1,417,224	83,024	1,514,037	9.2	40.6	9.3

[1] Foreign income as disclosed in the financial statements may be divided between foreign and domestic income in a manner consistent with U.S. tax rules. Current foreign tax expense may include amounts which are not creditable foreign taxes for purposes of the foreign tax credit under the applicable U.S. tax rules. For this and other reasons (such as foreign currency translation gains and losses) the foreign tax rate may not be comparable with the U.S. tax rate.
[2] Worldwide income is not necessarily the total of U.S. income and foreign income because some companies do not disclose foreign earnings and because losses are excluded from group totals. Thus, the worldwide tax rate does not necessarily fall between the U.S. and foreign tax rates.

TABLE II.—COMPARISON OF FEDERAL INCOME TAX RATES FOR 1980 AND 1981 (PERCENT)

	U.S. tax rate on U.S. income		Foreign tax rate on foreign income [1]		Worldwide tax rate on worldwide income [2]	
	1981	1980	1981	1980	1981	1980
Aerospace	6.8	16.4	36.5	41.1	12.3	20.3

FAIR PRACTICES IN AUTOMOTIVE PRODUCTS ACT

(Mr. FRENZEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FRENZEL. Mr. Speaker, again I would like to reiterate my support for the Fenwick amendment to H.R. 5133. This amendment would insure that the provisions of H.R. 5133 cannot be implemented should they violate any treaty, international convention or agreement on tariffs and trade to which the United States is a party. Since the bill quite clearly does violate articles III, IV, and XI of the General Agreement on Tariffs and Trade and, in addition, the United States-Canadian Automotive Products Agreements Act and several of our treaties of friendship, commerce, and navigation, it is obvious to me that inclusion of the Fenwick amendment into H.R. 5133 would preclude the implementation of any section of the bill, H.R. 5133.

It is important that we live up to our international agreements to provide some order in what would otherwise be haphazard and chaotic relationships with other countries. Passage of H.R. 5133 without this amendment would mean a serious breach in commitments we have signed and promised to uphold. The Fenwick amendment would provide the assurance we need that the provisions of this bill will never be implemented.

NUCLEAR NONPROLIFERATION: AGENDA FOR THE 98TH CONGRESS

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, on December 16, I introduced a bill to strengthen U.S. policy aimed at preventing the spread of nuclear weapons. This legislation had been approved and ordered reported favorably the day before by the full Committee on Foreign Affairs. There was not, however, time in the 97th Congress to file a report, or to bring this important legislation before the House as a whole. I have introduced the bill in its final form to make these proposals a matter of record in the hope that they will provide a clear and precise agenda for enactment of legislation in this area early in the 98th Congress. The bill number is H.R. 7430; it was cosponsored by Mr. OTTINGER, Mr. UDALL, Mr. FASCELL, Mr. WOLPE, Mr. SHAMANSKY, Mr. BONKER, Mr. ECKART, Mr. BARNES, Mr. STUDDS, Mr. EDGAR, Mr. GEJDENSON, Mr. SEIBERLING, and Mr. MARKEY.

Basic policy and procedures for the export by the United States of nuclear materials and technology which could be diverted to use in nuclear weapons is set forth in the Nuclear Nonproliferation Act of 1978 which was passed in the House by a vote of 411 to 0. The essence of that legislation is the requirement that nations which wish to obtain U.S. nuclear materials and technology must adhere strictly to internationally verified safeguards on all of their nuclear facilities. The Nuclear Regulatory Commission and the State Department are charged with the responsibility of making sure that that important standard is met prior to any U.S. nuclear export.

Extensive oversight hearings and activities by the Subcommittee on International Economic Policy and Trade, which I have had the honor to chair, and the Subcommittee on International Security and Scientific Affairs, revealed certain gaps in the coverage of the Nuclear Nonproliferation Act. Some categories of technology which have potential nuclear applications are licensed for export by the Energy and Commerce Departments without any requirement for State Department or NRC review. Those exports, therefore, have not been subject to the standards set forth in the Nuclear Nonproliferation Act. As a result, some exports and transfers of U.S. nuclear related items have been approved to countries like South Africa and Argentina which do not adhere to full-scope safeguards.

The legislation approved by the committee and introduced as a clean bill today would close those gaps by making full-scope safeguards the criterion for all nuclear exports, regardless of the reviewing or licensing agency. (Titles I and VI.)

Our oversight hearings and investigations over the past several years have also demonstrated the need to scale back as much as possible our exports of highly enriched uranium, which is widely used in research reactors, but is also useable for weapons. This legislation mandates continuation of highly enriched uranium to pledge to convert to such alternative fuels as soon as they become available as a condition of continued access in the meantime to highly enriched uranium from the United States (title II).

Mr. Speaker, this bill also gives the Secretary of Defense a more formal role in nuclear export licensing decisions in light of the national security implications of such exports, title IV, sets standards for the programmatic approval of transfers for reprocessing or other purposes of U.S.-origin nuclear materials by foreign countries (title III) and prohibits the export of reprocessing technology (title V).

Perseverence and continued vigilence by the United States are crucial to avoid the nightmare of widespread nuclear weapons proliferation. A clear, consistent, and carefully implemented nuclear export policy is the key to such vigilence. The legislation I am introducing today would extend the policy and procedures set forth in the Nuclear Nonproliferation Act and thereby increase the effectiveness of that Act as a deterrent to nuclear proliferation. I commend this legislation to my colleagues who have been elected to the 98th Congress. I hope they will follow the lead of the Foreign Affairs Committee in reporting out this legislation yesterday, and enact it into law early in 1983.

I proceed now to a more detailed fuller summary discussion of the bill's various provisions, and the reasons therefor.

TITLE I: AUTHORIZATION BY THE SECRETARY OF ENERGY FOR CERTAIN ACTIVITIES OUTSIDE THE UNITED STATES

BACKGROUND

The Nuclear Non-Proliferation Act of 1978 (NNPA) delegated authority to the Department of Energy (DOE) to grant authorizations for firms and individuals to engage directly or indirectly in the production of special nuclear material, such as plutonium and enriched uranium, outside the United States. Activities typically included in these authorizations are training, provision of designs and specialized research equipment with nuclear applications, assistance managing nuclear facilities, and transfer of nuclear equipment and fuel from third countries.

Such activities can contribute as much to proliferation as the direct export of nuclear fuel and equipment from the United States. Yet, while the direct export of nuclear fuel and equipment licensed by the Nuclear Regulatory Commission (NRC) is governed by a tough set of restrictions, DOE authorizations are not. Notwithstanding DOE's recent revision of its authorization procedures, activities can still be authorized to take place in a country that has not accepted full-scope safeguard inspections of all its nuclear facilities by the International Atomic Energy Agency (IAEA). Even if a nonnuclear weapons state acquired and detonated a bomb, it would still be eligible for DOE authorized activities. Moreover, as testimony submitted to the Subcommittee on International Economic Policy and Trade has confirmed, DOE continues to make these authorizations without public or congressional notice, as well as, without NRC concurrence or the possibility of a congressional veto by concurrent resolution. The GAO has concluded that DOE's administration of these authorizations "provides too many opportunities for arbitrary executive branch decisions."

Recent events have dramatized this weakness in the NNPA. Press accounts reveal that Westinghouse Corp. is contemplating an arrangement that would permit the sale of a nuclear power reactor to Pakistan through a third country. Pakistan has not agreed to full-scope safeguards and substantial evidence exists that it is on the road to making its own nuclear weapons. In a similar incident, DOE approved the export to Switzerland last year of a process control system for end use in an Argentinian heavy-water production facility. Argentina, like Pakistan, is not eligible under the NNPA for NRC licenses for fuel or equipment because it has not agreed to full-scope safeguards.

THE AMENDMENT

The amendment strengthens the statutory requirements governing DOE authorizations. First, it requires that all authorizations issued by the Secretary of Energy be published in the Federal Register and that the Secretary report annually on all activities carried out under DOE authorizations. Second, the amendment prohibits DOE authorizations for activities in a nonnuclear weapons state that does not accept full-scope nuclear safeguards or otherwise fails to meet criteria for direct nuclear exports licensed by the NRC. Likewise, the bill would require termination of authorizations to nations engaging in activities such as denotation of a nuclear devise by a nonnuclear weapons state, that could lead to a halt of exports licensed by the NRC. A Presidential waiver of these requirements and a congressional veto of this waiver by concurrent resolution is provided for under provisions already contained in the NNPA for NRC licensed exports.

TITLE II: HIGHLY ENRICHED URANIUM

BACKGROUND

Title II involves the export of highly enriched uranium (HEU). HEU, uranium highly enriched in the isotope-235, is used chiefly for nuclear research. But it is also capable of providing the explosive for a nuclear device. The United States, China, the Soviet Union, Great Britain, and France have all denotated bombs with HEU.

The United States can play an important leadership role in restricting commerce in this dangerous substance. For one thing, the DOE is by far the largest world exporter of HEU. For another, it is currently undertaking a program to develop an alternative fuel that does not pose the proliferation risks of HEU. Unfortunately, however, funding that does not pose the proliferation risks of HEU. Unfortunately, however, funding for this program has been below originally projected needs, as was substantiated by a GAO report published in August 1982, which also noted that the so-called reduced enrichment program is one of the few concrete U.S. nonproliferation policy initiatives to gain widespread international support. Inadequate funding has necessitated cutbacks in the development of an alternative fuel and set back the day when an alternative fuel can be put into use. At one point last year, it even appeared that the program might be scrapped altogether.

THE AMENDMENT

The bill provides stiffer criteria for the export of HEU. Specifically no license could be granted by the NRC for the export of HEU to a foreign reactor that can use an available alternative fuel. If no alternative fuel is available, the license could not be issued unless that recipient gives assurances that it shall use an alternative fuel when it becomes available and the NRC finds that the executive branch is taking steps to develop an alternative fuel.

The NRC, together with the Secretary of State, would be required to determine a kilogram limit on the amount of U.S.-origin HEU that could be stored at each foreign reactor. The bill also requires efforts to support improvement of physical security for HEU exports. Finally, the President would be required to submit a plan to Congress for the "development and use in foreign reactors of alternative nuclear reactor fuel."

These provisions relating to HEU are intended to encourage the executive branch to develop aggressively an alternative fuel to insure that the fuel is introduced into commerce as soon as possible. In the meantime, HEU exports, which go to some of our closest allies, can continue. The bill also recognizes that an alternative fuel, once developed may not work adequately in all reactors that now use HEU. In reactors where HEU is still the only workable fuel, HEU exports will continue, though the bill strives to keep the enrichment levels of exported uranium as low as possible while still meeting reactor requirements.

TITLE III: ARRANGEMENTS INVOLVING REPROCESSING

Title III involves approvals called subsequent arrangements to allow the processing of U.S.-exported fuel or its retransfer for that purpose. Reprocessing creates plutonium, a substance even more dangerous than HEU. Not only is plutonium capable of serving as an explosive but it is the most toxic substance known to man. Moreover, two Directors General of the International Atomic Energy Agency and the current head of the Nuclear Regulatory Commission, appointed by President Reagan, have said that technical mechanisms do not exist for adequately safeguarding that material so as to detect a diversion.

Yet, the institutional checks on the executive branch decisions to grant subsequent arrangements for reprocessing are weaker than on exports of far less dangerous substances. Both the executive branch and the independent NRC must agree that a license should be issued before any fuel, including low enriched uranium, is exported. But once the fuel is abroad, the executive branch—primarily the Departments of Energy and State—has the sole responsibility for granting approvals for countries to reprocess the fuel. NRC concurrence is not required. And while the executive branch must notify the Congress of its decision, there is no provision for a congressional veto.

An additional concern over subsequent arrangements has surfaced in connection with a recently announced administration policy regarding reprocessing abroad. Rather than toughen restrictions on subsequent arrangements, the administration proposes to ease them for select countries by providing long-term, programmatic

approvals for reprocessing that would not require standard case-by-case review through subsequent arrangements. While the administration has yet to indicate precisely how it would make such approvals in light of the restrictions already existing in the NNPA, the concept of programmatic approval clearly conflicts with the case-by-case approach anticipated in the act and, in addition, would make it increasingly difficult to discourage countries from engaging in the separation of plutonium. Moreover, while programmatic approvals would constitute major policy concessions on the part of the United States, the administration has not indicated how it will use these concessions to win greater allied cooperation in nuclear nonproliferation efforts.

THE AMENDMENT

Title III would require NRC concurrence before the United States could grant a subsequent arrangement for reprocessing. This replaces the original provision in H.R. 6032, which allowed for a congressional veto by concurrent resolution of subsequent arrangements for reprocessing.

Title III would permit the administration to grant programmatic approvals for reprocessing through new or amended agreements for cooperation. As a condition for such approvals, however, the country for which the approval is made must have established export policies of its own prohibiting nuclear sales to those countries that do not permit full-scope IAEA safeguards. This is in keeping with our own export restrictions that do not permit NRC licenses for exports to countries not subject to full-scope IAEA safeguards. The NNPA, as currently written, provides for a congressional veto over agreements for cooperation.

For the purpose of this legislation, the term programmatic approval for reprocessing is defined as any approval governing the reprocessing and retransfer of spent fuel in excess of 31 metric tons or of plutonium in excess of 240 kilograms. A large nuclear power reactor produces 31 metric tons of spent fuel annually. The reprocessing of this fuel produced 240 kilograms of plutonium.

TITLE IV: SPECIFIC FUNCTIONS OF THE SECRETARY OF DEFENSE IN NUCLEAR NONPROLIFERATION MATTERS

BACKGROUND

Title IV addresses the role of the Secretary of Defense in executive branch nuclear nonproliferation decisionmaking. Above all, nuclear nonproliferation—the spread of nuclear weapons—is a national defense problem. For this reason, the NNPA prohibits export licenses for nuclear fuel or equipment unless the executive branch believes the sale is "not inimical to the common defense and security." Nevertheless, the Secretary of Defense is peripheral to most of our international nuclear decisions: He has only a consultative role in decisions to grant export licenses and to permit subsequent arrangments. He has no formal say whatsoever concerning agreements for cooperation, except in the few cases where such agreements relate to military partnerships.

This lack of formal DOD involvement in U.S. commercial nuclear decisions is particularly troublesome today, when a number of countries on the brink of confrontation might well seek to acquire a nuclear bomb. The United States, for example, could easily become embroiled in any conflict that erupted in the Middle East. Just the fear that a country might build a bomb can cause hostilities, as happened last year when Israel carried out a preemptive strike against an Iraqi nuclear facility, which could have created bomb-grade material. In the midst of this tension it is critical that the Department of Defense's national security perspective play a large role in our export decisions.

THE AMENDMENT

This bill gives a stronger role to the Secretary of Defense in nuclear decisionmaking. The Secretary would have a de facto veto over agreements for nuclear cooperation, nuclear export licenses, and subsequent arrangements. This veto would stem from requirements that the Secretary of Defense make favorable findings and judgments before final decisions are reached in these areas by the executive branch. The bill would also increase DOD's influence over decisions in the sensitive area of subsequent arrangements for reprocessing.

TITLE V: EXPORTS OF REPROCESSING COMPONENTS AND TECHNOLOGY PROHIBITION

BACKGROUND

The administration has recently announced that it will permit the export of reprocessing technology. This marks a major shift from the policies of previous Republican and Democratic administrations which not only blocked the export of reprocessing technology but declared a moratorium on reprocessing in the United States. This previous export ban was imposed because it was considered neither safe nor economical to recover plutonium through reprocessing and therefore, reprocessing should not be encouraged. Witnesses appearing before the Subcommittees on International Security and Scientific Affairs and on International Economic Policy and Trade testified in August that reprocessing facilities still cannot be adequately safeguarded and that as reprocessing increases so do the risks of diversions by nations or subnational groups. In addition, witnesses pointed out that plutonium certainly will not be economical until the price of uranium triples. With improvements in reactor efficiency the price of uranium would have to increase seven times. Moreover, reprocessing plants abroad have compiled dismal operating records, which further challenge economic and safety assumptions for reprocessing. By opening up the possibility that it will export reprocessing technology, the United States would be sending confusing signals to allies and reduce its ability, successfully exercised in the past, to discourage allies not to export reprocessing technology.

THE AMENDMENT

Title V, adopted from H.R. 6318, would prohibit the export of essential reprocessing components, sensitive reprocessing technology, and other assistance which is essential to nuclear fuel reprocessing.

TITLE VI: EXPORTS LICENSED BY THE DEPARTMENT OF COMMERCE

BACKGROUND

Like the Department of Energy authorizations for nuclear activities abroad, Department of Commerce export licenses for nuclear related commodities are not subject to restrictions comparable to those governing NRC export licenses. As a result, items on the Commerce Nuclear Referral List, which include commodities that have direct application for nuclear weapons production, may be sent to a country that has not accepted full-scope safeguards or provided other assurances that it will use commercial nuclear facilities strictly for nonmilitary purposes. Indeed, according to Commerce testimony before the subcommittees on International Security and Scientific Affairs and on International Economic Policy and Trade in June, the Department is currently permitting such exports to Pakistan, South Africa, Brazil, and Argentina, all countries that are considered serious proliferation risks.

THE AMENDMENT

The amendment prohibits the Secretary of Commerce from issuing a validated license for the export to a nonnuclear weapons state of goods or technology that are to be used in a production or utilization facility or are likely to be diverted for use in such a facility unless the recipient country accepts full-scope IAEA safeguards and otherwise meets the criteria for direct nuclear exports licensed by the NRC. The bill also requires termination of exports to nations engaging in activities that would lead to a halt of exports licensed by the NRC. A Presidential wavier of these requirements and a congressional veto of this waiver by concurrent resolution is provided for under provisions already contained in the NNPA for NRC licensed exports.●

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 631

Mr. WHITTEN submitted the following conference report and statement on the joint resolution (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year 1983, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-980)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.J. Res. 631) making further continuing appropriations and providing for productive employment for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 6, 10, 11, 12, 16, 22, 33, 35, 37, 40, 41, 58, 61, 67, 73, 81, 82, 83, 84, 86, 87, 88, 90, 91, 97, 98, 109, 112, 113, 114, 115, 116, 120, 122, 123, 128, and 130.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 15, 17, 18, 19, 20, 21, 24, 25, 27, 28, 29, 32, 36, 38, 39, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 59, 60, 62, 63, 64, 65, 66, 68, 69, 72, 74, 76, 77, 78, 80, 85, 89, 100, 101, 102, 103, 104, 105, 106, 107, 108, 111, 117, 118, 124, 126, 129, and 132, and agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the matter stricken by said amendment insert the following: , *or any other provision of law or section 102 of this joint resolution*; and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

That notwithstanding the provisions of this paragraph making amounts available or otherwise providing for levels of program authority, the following amounts only shall be available and the following levels of authority only shall be provided for the following accounts or under the following headings: $284,100,437 for payment to the "Inter-American Development Bank" and not to exceed $828,137,742 in callable capital subscriptions; $126,041,553 for payment to the "International Bank for Reconstruction and Development" and not to exceed $1,530,275,913 in callable capital subscriptions; $700,000,000 for payment to the "International Development Association"; $131,882,575 for payment to the "Asian Development Bank" and not to exceed $2,243,811 in callable capital subscriptions; $50,000,000 for payment to the "African Development Fund"; $249,002,000 for "International Organizations and Programs"; including the provisions of section 103(g) of the Foreign Assistance Act of 1961, except that such funds shall be made available only in accordance with the Joint Explanatory Statement of the Committee of Conference accompanying the conference report on this joint resolution (H.R. Res. 631); $140,288,000 for "Energy and selected development activities, Development Assistance"; $25,000,000 for "International disaster assistance"; $93,757,000 for "Sahel development program", of which not less than $2,000,000 shall be available only for the African Development Foundation; $35,403,000 for "Payment to the Foreign Service Retirement and Disability Fund"; $1,700,000 in foreign currencies for "Overseas training and special development activities (foreign currency program)"; $2,576,000,000 for the "Economic Support Fund" (without applying prior year earmarking of funds for Sudan and Poland), of which not less than $785,000,000 shall be available for Israel and not less than $750,000,000 shall be available for Egypt; $31,100,000 for "Peacekeeping operations"; $335,000,000 for "Operating expenses of the Agency for International Development"; $10,500,000 for "Trade and development"; $109,000,000 for the "Peace Corps", $395,000,000 for "Migration and Refugee Assistance" (without applying prior year earmarking of funds); $290,000,000 for necessary expenses to carry out the provisions of section 503 of the Foreign Assistance Act of 1961 and the provisions of title I of S. 2608, as reported, of which not less than $110,000,000 shall be available for Turkey, not less than $37,500,000 shall be available for Portugal, and not less than $25,000,000 shall be available for Morocco; $45,000,000 for "International Military Education and Training"; $1,175,000,000 for necessary expenses to carry out sections 23 and 24 of the Arms Export Control Act and the provisions of title I of S. 2608, as reported, of which not less than $750,000,000 shall be allocated to Israel ($1,700,000,000 of the amount provided for the total aggregate credit sale ceiling during the current fiscal year shall be allocated only to Israel) and not less than $425,000.000 shall be allocated to Egypt; $3,638,000,000 of contingent liability (of which not less than $290,000,000 shall be available for Turkey, not less than $52,500,000 shall be available for Portugal, not less than $75,000,000 shall be available for Morocco, and not less than $400,000,000 shall be available for Spain) for total commitments to guarantee loans under "Foreign Military Credit Sales"; not to exceed $125,000,000 are authorized to be made available for the "Special Defense Acquisition Fund"; and not to exceed $4,400,000,000 of gross obligations for the principal amount of direct loans and $9,000,000,000 of total commitments to guarantee loans under "export-Import Bank of the United States": Provided further, That none of the funds available under this paragraph may be made available for payment to the "International Finance Corporation": Provided further, That in addition to the funds made available under this paragraph for the "Economic Support Fund" $85,000,000 is available for the "Economic Support Fund" to be transferred to the Agency for International Development for economic development assistance projects, under the terms and conditions of sections 103 through 106 of the Foreign Assistance Act of 1961, such projects to be approved through the established reprograming processes of the Appropriations Committee of the House of Representatives and of the Senate, except that none of the funds provided herein shall be available for non-development activities including balance of payments support, commodity imports, sector loans, and program loans: Provided further, That notwithstanding any other provision of this joint resolution or any other Act, $5,500,000 of the funds provided for Honduras under the authority of this joint resolution shall not be made available until that country meets the final terms of the binding arbitration award established by the Inter-American Commercial Arbitration Commission as regards Construction Aggregates Corporation.

(2) Notwithstanding section 102 of this joint resolution, chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 128. Targeting Assistance for Those Living in Absolute Poverty.—In carrying out this chapter, the President in fiscal year 1983, shall attempt to use not less than 40 per centum of the funds made available to carry out this chapter to finance productive facilities, goods, and services which will expeditiously and directly benefit those living in absolute poverty (as determined under the standards for absolute poverty adopted by the International Bank for Reconstruction and Development and the International Development Association). Such facilities, goods, and services may include, for example, irrigation facilities, extension services, credit for small farmers, roads, safe drinking water supplies, and health services. Such facilities, goods, and services may not include studies, reports, technical advice, consulting services, or any other items unless (A) they are used primarily by those living in absolute poverty themselves, or (B) they constitute research which produces or aims to produce techniques, seeds, or other items to be primarily used by those living in absolute poverty. Research shall not consititue the major part of such facilities, goods, and services.":

Provided further, That within six months after the date of approval of this joint resolution, the Administrator of the Agency for International Development shall report to Congress on the implementation of this provisio, the types of projects determined to meet these requirements, and the effect on the overall U.S. foreign assistance program. and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

(c) Notwithstanding any other provision of this joint resolution, such amounts as may be necessary for programs, projects or activities provided for in the Department of Defense Appropriation Act, 1983, at a rate of operations and to the extent and in the manner provided, to be effective as if it had been enacted into law as the regular Appropriation Act, as follows:

An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1983, for military functions administered by the Department of Defense, and for other purposes, namely:

TITLE I

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (includ-

ing all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $14,454,848,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; $10,537,408,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty (except members of the Reserve provided for elsewhere); $3,293,277,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $12,099,850,000.

RESERVE PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army Reserve on active duty under sections 265, 3019, and 3033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,247,250,000.

RESERVE PERSONNEL, NAVY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Naval Reserve on active duty under section 265 of title 10, United States Code, or personnel while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $657,125,000.

RESERVE PERSONNEL, MARINE CORPS

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Marine Corps Reserve on active duty under section 265 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Marine Corps platoon leaders class, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $170,900,000.

RESERVE PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air Force Reserve on active duty under sections 265, 8019, and 8033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Air Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $358,925,000.

NATIONAL GUARD PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army National Guard while on duty under sections 265, 3033, or 3496 of title 10 or section 708 of title 32, United States Code, or while serving on active duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,698,800,000.

NATIONAL GUARD PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air National Guard on duty under sections 265, 8033, or 8496 of title 10 or section 708 of title 32, United States Code, or while serving on active duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $548,425,000.

TITLE II

RETIRED MILITARY PERSONNEL

RETIRED PAY, DEFENSE

For retired pay and retirement pay, as authorized by law, of military personnel on the retired lists of the Army, Navy, Marine Corps, and Air Force, including the reserve components thereof, retainer pay for personnel of the Inactive Fleet Reserve, and payments under section 4 of Public Law 92-425 and chapter 73 of title 10, United States Code; $16,154,800,000.

TITLE III

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, as authorized by law; and not to exceed $7,310,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes; $15,847,425,000, of which not less than $1,240,000,000 shall be available only for the maintenance of real property facilities.

ARMY STOCK FUND

For the Army stock fund; $221,138,000.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, as authorized by law; and not to exceed $2,620,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Navy, and payments may be made on his certificate of necessity for confidential military purposes; $21,079,712,000, of which not less than $657,000,000 shall be available only for the maintenance of real property facilities: Provided, That of the total amount of this appropriation made available for the alteration, overhaul, and repair of naval vessels, not more than $2,887,000,000 shall be available for the performance of such work in Navy shipyards: Provided further, That funds herein provided shall be available for payments in support of the LEASAT program in accordance with the terms of the Aide Memoire, dated January 5, 1981.

NAVY STOCK FUND

For the Navy stock fund; $354,372,000.

OPERATION AND MAINTENANCE, MARINE CORPS

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Marine Corps, as authorized by law; $1,481,671,000, of which not less than $218,000,000 shall be available only for the maintenance of real property facilities.

MARINE CORPS STOCK FUND

For the Marine Corps stock fund; $11,812,000.

OPERATION AND MAINTENANCE, AIR FORCE

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Air Force, as authorized by law, including the lease and associated maintenance of replacement aircraft for the CT-39 aircraft to the same extent and manner as authorized for service contracts by section 2306(g), title 10, United States Code; and not to exceed $4,490,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Air Force, and payments may be made on his certificate of necessity for confidential military purposes; $16,915,766,000, of which not less than $1,100,000,000 shall be available only for the maintenance of real property facilities.

AIR FORCE STOCK FUND

For the Air Force stock fund; $161,600,000.

OPERATION AND MAINTENANCE, DEFENSE AGENCIES

For expenses, not otherwise provided for, necessary for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments), as authorized by law; $5,715,778,000: Provided, That not to exceed $7,890,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of Defense, and payments may be made on his certificate of necessity for confidential military purposes: Provided further, That not less than $80,000,000 of the total amount of this appropriation shall be available only for the maintenance of real property facilities.

DEFENSE STOCK FUND

For the Defense stock fund; $160,500,000.

OPERATION AND MAINTENANCE, ARMY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Army Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $705,584,000, of which not less than $35,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, NAVY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Navy Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $637,507,000, of which not less than $25,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, MARINE CORPS RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Marine Corps Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $51,094,000, of which not less than $1,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR FORCE RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Air Force Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $765,735,000, of which not less than $17,500,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, ARMY NATIONAL GUARD

For expenses of training, organizing, and administering the Army National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, and repairs to structures and facilities; hire of passenger motor vehicles; personnel services in the National Guard Bureau; travel expenses (other than mileage), as authorized by law for Army personnel on active duty, for Army National Guard division, regimental, and battalion commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; supplying and equipping the Army National Guard as authorized by law; and expenses of repair, modification, maintenance, and issue of supplies and equipment (including aircraft); $1,195,067,000, of which not less than $35,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

For operation and maintenance of the Air National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, including repair of facilities, maintenance, operation, and modification of aircraft; transportation of things; hire of passenger motor vehicles; supplies, materials, and equipment, as authorized by law for the Air National Guard; and expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense; travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, for Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; $1,822,603,000, of which not less than $35,000,000 shall be available only for the maintenance of real property facilities.

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY

For the necessary expenses, in accordance with law, for construction, equipment, and maintenance of rifle ranges; the instruction of citizens in marksmanship; the promotion of rifle practice; and the travel of rifle teams, military personnel, and individuals attending regional, national, and international competitions; $875,000, of which not to exceed $7,500 shall be available for incidental expenses of the National Board; and from other funds provided in this Act, not to exceed $680,000 worth of ammunition may be issued under authority of title 10, United States Code, section 4311: Provided, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313.

CLAIMS, DEFENSE

For payment, not otherwise provided for, of claims authorized by law to be paid by the Department of Defense (except for civil functions), including claims for damages arising under training contracts with carriers, and repayment of amounts determined by the Secretary concerned, or officers designated by him, to have been erroneously collected from military and civilian personnel of the Department of Defense, or from States, territories, or the District of Columbia, or members of the National Guard units thereof; $147,500,000.

COURT OF MILITARY APPEALS, DEFENSE

For salaries and expenses necessary for the United States Court of Military Appeals; $3,271,000, and not to exceed $1,500 can be used for official representation purposes.

TITLE IV

PROCUREMENT

AIRCRAFT PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,506,572,000, of which $10,000,000 shall be available only for procurement of C-12 cargo aircraft for the Army National Guard, to remain available for obligation until September 30, 1985: Provided, That notwithstanding any other provision of this Act, after the head of the agency concerned gives written notification of a proposed multiyear contract for the CH-47D Helicopter Modernization Program to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, such contract may not then be awarded until the end of a period of 45 days beginning on the date of such notification.

MISSILE PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of missiles, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,287,000,000, of which $422,100,000 shall be available only for purchase of the Multiple Launch Rocket System under a multiyear contract, to remain available for obligation until September 30, 1985.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

(INCLUDING TRANSFER OF FUNDS)

For construction, procurement, production, and modification of weapons and tracked combat vehicles, equipment, including ordnance, spare parts and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $4,551,946,000, and in addition, $198,200,000, of which $67,000,000 shall be derived by transfer from "Procurement of Weapons and Tracked Combat Vehicles, Army, 1981/1983", and $131,200,000 shall be derived by transfer from "Procurement of Weapons and Tracked Combat Vehicles, Army, 1982/1984", to remain available for obligation until September 30, 1985.

PROCUREMENT OF AMMUNITION, ARMY

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public

and private plants, including ammunition facilities authorized in military construction authorization Acts or authorized by section 2673, title 10, United States Code, and the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,122,394,000, to remain available for obligation until September 30, 1985.

OTHER PROCUREMENT, ARMY

For construction, procurement, production, and modification of vehicles, including tactical, support (including not to exceed 7 vehicles required for physical security of personnel notwithstanding price limitations applicable to passenger carrying vehicles but not to exceed $100,000 per vehicle), and nontracked combat vehicles; the purchase of not to exceed two thousand and twenty-five passenger motor vehicles for replacement only; communications and electronic equipment; other support equipment; spare parts, ordnance, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $4,123,404,000, to remain available for obligation until September 30, 1985.

AIRCRAFT PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of aircraft, equipment including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $10,416,107,000, of which $267,800,000 shall be available only for purchase of C-2 aircraft under a multiyear contract, to remain available for obligation until September 30, 1985: Provided, That none of the funds appropriated or made available pursuant to this paragraph for the F/A-18 aircraft program may be obligated or expended until the Secretary of the Navy submits to the Committees on Appropriations of the House of Representatives and the Senate a certified plan to incorporate a United States manufactured ejection seat system in F/A-18 aircraft purchased with fiscal year 1983 and future funds: Provided further, That none of the funds appropriated or made available pursuant to this paragraph for F/A-18 advance procurement may be obligated or expended for any of those aircraft scheduled to replace Navy attack mission aircraft squadrons until such time as the Secretary of Defense certifies, in writing, that the A-18 version of the aircraft meets the originally established attack mission requirements, goals, and specifications.

WEAPONS PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of missiles, torpedoes, other weapons, and related support equipment including spare parts, and accessories therefor; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $3,561,700,000, of which $124,700,000 shall be available only for the purchase of Mark-46 torpedoes under a multiyear contract, to remain available for obligation until September 30, 1985, distributed as follows: For missile programs, $2,844,200,000; for the MK-48 torpedo program, $119,300,000; for the MK-46 torpedo program, $124,700,000; for the MK-60 torpedo program, $133,200,000; for the MK-30 mobile target program, $19,400,000; for the MK-38 mini-mobile target program, $2,300,000; for the antisubmarine rocket (ASROC) program, $10,100,000; for modification of torpedoes, $76,500,000; for the torpedo support equipment program, $66,900,000; for the MK-15 close in weapons system program, $118,740,000; for the MK-75 76-millimeter gun mount program, $10,700,000; for the MK-19 gun mount program, $400,000; for the 20-millimeter gun mount program, $400,000; for the modification of guns and gun mounts, $19,700,000; for the guns and gun mounts support equipment program, $17,460,000; and reductions of $1,100,000 for consultants, studies and analyses and $1,200,000 for personnel security clearances.

SHIPBUILDING AND CONVERSION, NAVY

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary for the construction, acquisition, or conversion of vessels as authorized by law, including armor and armament thereof, plant equipment, appliances, and machine tools and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; procurement of critical, long leadtime components and designs for vessels to be constructed or converted in the future; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended, as follows: for the Trident submarine program, $1,462,600,000; for Trident submarine program advance procurement, $81,300,000; for the CVN aircraft carrier program, $6,559,500,000, to be available for construction only under a firm, fixed price type contract; for the SSN-688 nuclear attack submarine program, $1,420,200,000; for the reactivation of the U.S.S. Iowa, $300,800,000; for the aircraft carrier service life extension program, $699,500,000; for the CG-47 AEGIS cruiser program, $2,901,700,000; for the LSD-41 landing ship dock program, $415,600,000; for the FFG guided missile frigate program, $646,300,000, of which not less than $40,000,000 shall be available only for an X-band phased array radar, and in addition, $35,000,000 shall be derived by transfer from the "FFG guided missile frigate program" of "Shipbuilding and Conversion, Navy, 1982/1986"; for the T-AO fleet oiler ship program, $173,000,000; for the MCM mine countermeasures ship program, $100,000,000; for the ARS salvage ship program, $50,000,000; for the T-AKRX fast logistics ship program, $44,000,000; for the T-AHX hospital ship program, $300,000,000, however, none of these funds may be obligated or expended until such time as the Department of the Navy provides a budget quality cost estimate, based upon a completed contract design which supports the original hospital ship requirements as presented to the Congress; for the LHD-1 amphibious assault ship program, $55,000,000; for craft, outfitting, post delivery, cost growth, and escalation on prior year programs, $907,900,000; and reductions in the amounts, as follows: $5,900,000 for personnel security clearances; $34,800,000 for consultant, studies and analyses; in all: $16,076,700,000, and in addition, $35,000,000 to be derived by transfer, to remain available for obligation until September 30, 1987: Provided, That of the appropriation for "Shipbuilding and Conversion, Navy," that expired for obligation on September 30, 1982, $176,200,000 shall remain available for obligation until September 30, 1984: Provided further, That none of the funds herein provided for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel: Provided further, That none of the funds herein provided shall be used for the construction of any naval vessel in foreign shipyards.

OTHER PROCUREMENT, NAVY

For procurement, production, and modernization of support equipment and materials not otherwise provided for, Navy ordnance and ammunition (except ordnance for new aircraft, new ships, and ships authorized for conversion); the purchase of not to exceed three hundred and twenty-four passenger motor vehicles of which two hundred and ninety-two shall be for replacement only (including not to exceed 2 vehicles required for physical security of personnel notwithstanding price limitations applicable to passenger carrying vehicles but not to exceed $100,000 per vehicle); expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $3,727,075,000, to remain available for obligation until September 30, 1985, distributed as follows: For ship support equipment, $543,689,000; for communications and electronics equipment, $1,481,798,000; for aviation support equipment, $552,636,000; for ordnance support equipment, $667,456,000; for civil engineering support equipment, $172,837,000; for supply support equipment, $81,224,000; and for personnel/command support equipment, $227,435,000.

PROCUREMENT, MARINE CORPS

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, military equipment, spare parts, and accessories therefor; plant equipment, appliances, and machine tools, and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and vehicles for the Marine Corps, including purchase of not to exceed one hundred and forty-three passenger motor vehicles for replacement only; $2,008,083,000, of which $6,779,000 may not be obligated or expended for procurement of the 81mm SMAW Assault Rocket Launcher and ammunition until the Secretary of Defense certifies to the Committees on Appropriations of the House of Representatives and the Senate that all technical and operational requirements have been demonstrated and that no other weapon is available to fulfill those requirements, to remain available for obligation until September 30, 1985.

AIRCRAFT PROCUREMENT, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For construction, procurement, and modification of aircraft and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $17,658,500,000, of which $186,100,000 shall be available for contribution of the United States share of the cost of the acquisition by the North Atlantic Treaty Organization of an Airborne Early Warning and Control System (AWACS) and, in addition, the Department of Defense may make a commitment to the North Atlantic Treaty Organization to assume the United States share of contingent liability in connection with the NATO E-3A Cooperative Programme; of which $71,300,000 shall be available only for the procurement of B-707 aircraft to provide for engines and parts to reengine KC-135 aircraft; and of which $94,800,000 and, in addition, $50,000,000 to be derived by transfer from "Aircraft procurement, Air Force, 1982/1984", shall be available only for procurement of commercial wide body cargo aircraft; of which $795,000,000 shall be available only for purchase of KC-10 aircraft under a multiyear contract, and in addition, $120,000,000 shall be derived by transfer from "Aircraft procurement, Air Force, 1982/1984", and shall be available only for the purchase of KC-10 aircraft under a multiyear contract, notwithstanding the provisions of the language contained in the Supplemental Appropriations Act, 1982; to remain available for obligations until September 30, 1985.

MISSILE PROCUREMENT, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For construction, procurement, and modification of missiles, spacecraft, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $4,941,100,000, of which $102,000,000 shall be available to initiate multi-year contracting for the global positioning system, and in addition, $15,000,000 shall be derived by transfer from "Missile Procurement, Air Force, 1982/1984", to remain available for obligation until September 30, 1985.

OTHER PROCUREMENT, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed one thousand three hundred and fifty-nine passenger motor vehicles of which eight hundred and eighty-five shall be for replacement only; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon, prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; $5,563,777,000, and in addition, $4,963,000, which shall be derived by transfer from "Other Procurement, Air Force, 1982/1984", to remain available for obligation until September 30, 1985.

NATIONAL GUARD AND RESERVE EQUIPMENT

For procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, other weapons, and other procurement for the reserve components of the Armed Forces, not to exeed $125,000,000, to remain available until September 30, 1985, distributed as follows: Army National Guard, not to exceed $50,000,000; Air National Guard, not to exceed $15,000,000; Army Reserve, not to exceed $15,000,000; Naval Reserve, not to exceed $15,000,000; Marine Corps Reserve, not to exceed $15,000,000; Air Force Reserve, not to exceed $15,000,000.

PROCUREMENT, DEFENSE AGENCIES

For expenses of activities and agencies of the Department of Defense (other than the military departments) necessary for procurement, production, and modification of equipment, supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed one thousand one hundred and thirty-nine passenger motor vehicles of which three hundred and forty-five shall be for replacement only; expansion of public and private plants, equipment, and installation thereof in such plants, erection of structures, and acquisition of land for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; $828,145,000, to remain available for obligation until September 30, 1985.

TITLE V

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $3,879,683,000, to remain available for obligation until September 30, 1984.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $5,965,751,000, of which not less than $15,000,000 shall be available only for the phased array radar improvement program for the Mark 92 fire control system, to remain available for obligation until September 30, 1984: Provided, That none of the funds appropriated or made available pursuant to this paragraph for the development of the Undergraduate Flight Training System (VTX-TS) may be obligated or expended until the Secretary of the Navy submits to the Committees on Appropriations of the House of Representatives and the Senate a certified plan to incorporate a United States manufactured ejection seat system in the new Undergraduate Flight Trainer Aircraft.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $10,650,661,000, to remain available for obligation until September 30, 1984: Provided, That none of the funds appropriated in this Act may be obligated or expended to initiate full scale engineering development of a basing mode for the MX missile, until such basing mode is approved by both Houses of Congress in a concurrent resolution, as specified in subsection (1) hereof.

(1) For the purposes of this section, the term "concurent resolution" means only a resolution introduced in either House of Congress, the matter after the resolving clause of which is as follows: "That the————approves the obligation and expenditure of funds appropriated in Public Law————for MX missile procurement and full-scale engineering development of a basing mode for the MX misssile," the first blank space therein being filled with the name of the resolving House, and the second blank space being filled with the public law number of this statute. It shall not be in order to introduce any such resolution prior to the receipt by the Congress of the report of the President required under subsection (7).

(2) A resolution in the Senate shall be referred to the Committee on appropriations of the Senate. A resolution in the House of Representatives shall be referred to the Committee on appropriations of the House of Representatives.

(3) If the committee to which is referred the first resolution introduced in the Senate or the House, as the case may be, expressing approval of the obligation and expenditure of funds referred to in this subsection has not reported the resolution at the end of 45 calendar days after the introduction of a resolution pursuant to subsection (1) hereof, such committee shall be automatically discharged from further consideration of the resolution and the resolution shall be placed on the calendar of the Senate, in the case of a resolution of the Senate, or the Union calendar, in the case of a resolution of the House of Representatives.

(4) When the committee has reported a resolution or been discharged under subsection (3) hereof it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged in the House and is privileged in the Senate and is not debatable. The motion is not subject to amendment, or to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order.

(5)(A) Debate on the resolution shall be limited to not more than fifty hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to is not in order.

(B) Motions to postpone and motions to proceed to the consideration of other business shall be decided without debate.

(C) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution shall be decided without debate.

(6) Subsections (1) through (5) are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described in subsection (1), and they supercede other rules only to the extent that they are inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedures of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(7)(A) The President shall submit a report to the Committees on Appropriations and Armed Services of the Senate and the House of Representatives, not earlier than March 1, 1983, containing:

(i) a detailed technical assessment of the closely spaced basing system transmitted by the President to Congress on November 22, 1982 or such modifications thereto as the President determines to be advisable;

(ii) a detailed technical assessment of other MX basing systems that might serve as alternatives to the closely spaced basing system transmitted by the President to Congress on November 22, 1982;

(iii) a detailed technical assessment of different types of intercontinental ballistic missiles that might serve as alternatives to the MX missile; and

(iv) a comparative detailed technical assessment of alternative programs including acceleration of the Trident II program to provide target coverage equivalent to that of the MX missile system, enhancements and improvements to the Minuteman missile force, and development and deployment of a land-based missile system in deep underground basing, multiple protective shelters and closely spaced basing incorporating mobility and deception, a road mobile missile smaller than the MX and a common missile for land and sea deployment.

(v) a reaffirmation by the President of his selection of the MX missile basing plan transmitted to Congress on November 22, 1982 or a proposal for an alternative basing plan.

(B) The President shall also include in the report submitted pursuant to paragraph (A) an assessment of the military capability of each alternative system or missile; an assessment of the survivability of each such system or missile against current and projected Soviet threats; an assessment of the projected cost of each such system or missile and possible upgrades thereof; an assessment of the impact each such system or missile might have on present and future arms control negotiations; an assessment of the geographic, geological, and other qualifications a site for each such system or missile would likely require; an assessment of the environmental impact each such system or missile would likely have; and the identification of possible sites for each such system or missile.

(C) The report required under this subsection shall not be subject to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969, relating to environmental impact statements.

Provided further, That notwithstanding any other provision of this Act, no initial flight test of the MX missile may be conducted until after both Houses of the Congress have agreed, in accordance with the provisions of subsections (1) through (5) of the preceding proviso, to a concurrent resolution approving the obligation and expenditure of funds for full-scale engineering development of a basing mode for such missile.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE AGENCIES

For expenses of activities and agencies of the Department of Defense (other than the military departments), necessary for basic and applied scientific research, development, test, and evaluation; advanced research projects as may be designated and determined by the Secretary of Defense, pursuant to law; maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $2,153,189,000, to remain available for obligation until September 30, 1984: Provided, That such amounts as may be determined by the Secretary of Defense to have been made available in other appropriations available to the Department of Defense during the current fiscal year for programs related to advanced research may be transferred to and merged with this appropriation to be available for the same purposes and time period: Provided further, That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to carry out the purposes of advanced research to those appropriations for military functions under the Department of Defense which are being utilized for related programs to be merged with and to be available for the same time period as the appropriation to which transferred.

DIRECTOR OF TEST AND EVALUATION, DEFENSE

For expenses, not otherwise provided for, of independent activities of the Director of Defense Test and Evaluation in the direction and supervision of test and evaluation, including initial operational testing and evaluation; and performance of joint testing and evaluation; and administrative expenses in connection therewith; $55,000,000, to remain available for obligation until September 30, 1984.

TITLE VI

SPECIAL FOREIGN CURRENCY PROGRAM

For payment in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States for expenses in carrying out programs of the Department of Defense, as authorized by law; $3,800,000, to remain available for obligation until September 30, 1984: Provided, That this appropriation shall be available in addition to other appropriations to such Department, for payments in the foregoing currencies.

TITLE VII

GENERAL PROVISIONS

(INCLUDING TRANSFER OF FUNDS)

SEC. 701. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 702. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 703. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 3109 of title 5, United States Code, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty stations and return as may be authorized by law: Provided, That such contracts may be renewed annually.

SEC. 704. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 705. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement to General Services Administration for security guard services for protection of confidential files; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with communication and other

services and supplies as may be necessary to carry out the purposes of this Act.

SEC. 706. Any appropriation available to the Army, Navy, or Air Force may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Army, Navy, or Air Force custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 707. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land or interest therein as authorized by section 2672 or 2675 of title 10, United States Code.

SEC. 708. Appropriations for the Department of Defense for the current fiscal year shall be available (a) for transportation to primary and secondary schools of minor dependents of military and civilian personnel of the Department of Defense as authorized for the Navy by section 7204 of title 10, United States Code; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209(a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interests thereon arising out of condemnation proceedings; (e) for leasing of buildings and facilities including payment of rentals for special purpose space at the seat of government, and in the conduct of field exercises and maneuvers or, in administering the provisions of title 43, United States Code, section 315q, rentals may be paid in advance; (f) payments under contracts for maintenance of tools and facilities for twelve months beginning at any time during the fiscal year; (g) maintenance of defense access roads certified as important to national defense in accordance with section 210 of title 23, United States Code; (h) for the purchase of milk for enlisted personnel of the Department of Defense heretofore made available pursuant to section 1446a, title 7, United States Code, and the cost of milk so purchased, as determined by the Secretary of Defense, shall be included in the value of the commuted ration; (i) transporting civilian clothing to the home of record of selective service inductees and recruits on entering the military services; (j) payments under leases for real or personal property, including maintenance thereof when contracted for as a part of the lease agreement, for twelve months beginning at any time during the fiscal year; (k) pay and allowances of not to exceed nine persons, including personnel detailed to International Military Headquarters and Organizations, at rates provided for under section 625(d)(1) of the Foreign Assistance Act of 1961, as amended; (l) the purchase of right-hand-drive vehicles not to exceed $12,000 per vehicle; (m) for payment of unusual cost overruns incident to ship overhaul, maintenance, and repair for ships inducted into industrial fund activities or contracted for in prior fiscal years: Provided, That the Secretary of Defense shall notify the Congress promptly prior to obligation of any such payments; (n) for payments from annual appropriations to industrial fund activities and/or under contract for changes in scope of ship overhaul, maintenance, and repair after expiration of such appropriations, for such work either inducted into the industrial fund activity or contracted for in that fiscal year; and (o) for payments for depot maintenance contracts for twelve months beginning at any time during the fiscal year.

SEC. 709. Appropriations for the Department of Defense for the current fiscal year shall be available for: (a) donations of not to exceed $25 to each prisoner upon each release from confinement in military or contract prison and to each person discharged for fraudulent enlistment; (b) authorized issues of articles to prisoners, applicants for enlistment and persons in military custody; (c) subsistence of selective service registrants called for induction, applicants for enlistment, prisoners, civilian employees as authorized by law, and supernumeraries when necessitated by emergent military circumstances; (d) reimbursement for subsistence of enlisted personnel while sick in hospitals; (e) expenses of prisoners confined in nonmilitary facilities; (f) military courts, boards, and commissions; (g) utility services for buildings erected at private cost, as authorized by law, and buildings on military reservations authorized by regulations to be used for welfare and recreational purposes; (h) exchange fees, and losses in the accounts of disbursing officers or agents in accordance with law; (i) expenses of Latin American cooperation as authorized for the Navy by law (10 U.S.C. 7208); (j) expenses of apprehension and delivery of deserters, prisoners, and members absent without leave, including payment of rewards of not to exceed $75 in any one case; (k) for carrying out section 10 of the Act of September 23, 1950, as amended; and (l) providing, without reimbursement, not to exceed $50,000,000 to procure secure communications systems, equipment and related items throughout the United States Government.

SEC. 710. The Secretary of Defense and each purchasing and contracting agency of the Department of Defense shall assist American small and minority-owned business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by increasing, to an optimum level, the resources and number of personnel jointly assigned to promoting both small and minority business involvement in purchases financed with funds appropriated herein, and by making available or causing to be made available to such businesses, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by assisting small and minority business concerns to participate equitably as subcontractors on contracts financed with funds appropriated herein, and by otherwise advocating and providing small and minority business opportunities to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 711. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 712. During the current fiscal year no funds available to agencies of the Department of Defense shall be used for the operation, acquisition, or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap bailing or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 713. (a) During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

(b) Upon determination by the President that such action is necessary, the Secretary of Defense is authorized to provide for the cost of an airborne alert as an excepted expense in accordance with the provisions of section 3732 of the Revised Statutes (41 U.S.C. 11).

(c) Upon determination by the President that it is necessary to increase the number of military personnel on active duty subject to existing laws beyond the number for which funds are provided in this Act, the Secretary of Defense is authorized to provide for the cost of such increased military personnel, as an excepted expense in accordance with the provisions of section 3732 of the Revised Statutes (41 U.S.C. 11).

(d) The Secretary of Defense shall immediately advise Congress of the exercise of any authority granted in this section, and shall report monthly on the estimated obligations incurred pursuant to subsections (b) and (c).

SEC. 714. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish sufficient gross revenues from sales of commissary stores to make such reimbursement: Provided, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: Provided further, That no appropriation contained in this Act shall be available to pay any costs incurred by any commissary store or other entity acting on behalf of any commissary store in connection with obtaining the face value amount of manufacturer or vendor cents-off discount coupons unless all fees or moneys received for handling or processing such coupons are reimbursed to the appropriation charged with the incurred costs: Provided further, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. 715. No part of the appropriations in this Act shall be available for any expense of operating aircraft under the jurisdiction of the armed forces for the purpose of proficiency flying, as defined in Department of Defense Directive 1340.4, except in accordance with regulations prescribed by the Secretary of Defense. Such regulations (1) may not require such flying except that required to maintain proficiency in anticipation of a member's assignment to combat operations and (2) such flying may not be permitted in cases of members who have been assigned to a course of instruction of ninety days or more.

SEC. 716. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in any one shipment having a net weight in excess of thirteen thousand five hundred pounds.

SEC. 717. Vessels under the jurisdiction of the Department of Commerce, the Department of Transportation, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. 718. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: Provided, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps, or the National Board for the Promotion of Rifle Practice, Army.

SEC. 719. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: Provided, That the foregoing authority shall not be available for the conversion of heating plants from coal to oil at defense facilities in Europe: Provided further, That within thirty days after the end of each quarter the Secretary of Defense shall render to Congress and to the Office of Management and Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. 720. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the Service concerned.

SEC. 721. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses of off-duty training of military personnel (except with regard to such charges of educational institutions (a) for enlisted personnel in the pay grade E-5 or higher with less than 14 years' service, for which payment of 90 per centum may be made or (b) for military personnel in off-duty high school completion programs, for which payment of 100 per centum may be made), nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training: Provided, That the foregoing limitation shall not apply to the Program for Afloat College Education.

SEC. 722. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 723. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding $10,000, shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing in this section shall preclude the procurement of foreign produced specialty metals used in the production or manufacture of weapons or weapons systems made outside the United States, except those specialty metals which contain nickel from Cuba, or the procurement of chemical warfare protective clothing produced outside the United States, if such procurement is necessary to comply with agreements with foreign governments: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations other than certain contracts not involving fuel made on a test basis by the Defense Logistics Agency with a cumulative value not to exceed $4,000,000,000, as may be determined by the Secretary of Defense pursuant to existing laws and regulations as not to be inappropriate therefor by reason of national security considerations: Provided further, That the Secretary specifically determines that there is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards of such contracts will be made at a reasonable price and that no award shall be made for such contracts if the price differential exceeds 2.2 per centum: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. 724. None of the funds appropriated by this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or drycleaning facility in the United States, its territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. 725. None of the funds appropriated by this Act may be obligated under section 206 of title 37, United States Code, for inactive duty training pay of a member of the National Guard or a member of a reserve component of a uniformed service for more than four periods of equivalent training, instruction, duty or appropriate duties that are performed instead of that member's regular period of instruction or regular period appropriate duty.

SEC. 726. Appropriations contained in this Act shall be available for the purchase of household furnishings, and automobiles from military and civilian personnel on duty outside the continental United States, for the purpose of resale at cost to incoming personnel, and for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. 727. During the current fiscal year, appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901; 80 Stat. 508).

SEC. 728. Funds provided in this Act for legislative liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed $9,100,000 for the current fiscal year: Provided, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense.

SEC. 729. Of the funds made available by this Act for the services of the Military Airlift Command, $100,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: Provided, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to

be used based upon modern aircraft operated by the civil reserve air fleet.

SEC. 730. During the current fiscal year, appropriations available to the Department of Defense for operation may be used for civilian clothing, not to exceed $40 in cost for enlisted personnel: (1) discharged for misconduct, unsuitability, or otherwise than honorably; (2) sentenced by a civil court to confinement in a civil prison or interned or discharged as an alien enemy; or (3) discharged prior to completion of recruit training under honorable conditions for dependency, hardship, minority, disability, or for the convenience of the Government.

SEC. 731. No part of the funds appropriated herein shall be available for paying the costs of advertising by any defense contractor, except advertising for which payment is made from profits, and such advertising shall not be considered a part of any defense contract cost. The prohibition contained in this section shall not apply with respect to advertising conducted by any such contractor, in compliance with regulations which shall be promulgated by the Secretary of Defense, solely for (1) the recruitment by the contractor of personnel required for the performance by the contractor of obligations under a defense contract, (2) the procurement of scarce items required by the contractor for the performance of a defense contract, or (3) the disposal of scrap or surplus materials acquired by the contractor in the performance of a defense contract.

SEC. 732. Upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed $1,200,000,000 of working capital funds of the Department of Defense or funds made available in this Act to the Department of Defense for military functions (except military construction) between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: Provided, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by Congress: Provided further, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority.

SEC. 733. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: Provided, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that transfers between a stock fund account and an industrial fund account may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. 734. Not more than $217,600,000 of the funds appropriated by this Act shall be made available for payment to the Federal Employees Compensation Fund, as established by 5 U.S.C. 8147.

SEC. 735. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, or a grant to any applicant who has been convicted by any court of general jurisdiction of any crime which involves the use of or the assistance to others in the use of force, trespass, or the seizure of property under control of an institution of higher education to prevent officials or students at such an institution from engaging in their duties or pursuing their studies.

SEC. 736. None of the funds available to the Department of Defense shall be utilized for the conversion of heating plants from coal to oil at defense facilities in Europe.

SEC. 737. None of the funds appropriated by this Act shall be available for any research involving uninformed or nonvoluntary human beings as experimental subjects: Provided, That this limitation shall not apply to measures intended to be beneficial to the recipient and consent is obtained from the recipient or a legal representative acting on the recipient's behalf.

SEC. 738. Appropriations for the current fiscal year for operation and maintenance of the active forces shall be available for medical and dental care of personnel entitled thereto by law or regulation (including charges of private facilities for care of military personnel, except elective private treatment); welfare and recreation; hire of passenger motor vehicles; repair of facilities; modification of personal property; design of vessels; industrial mobilization; installation of equipment in public and private plants; military communications facilities on merchant vessels; acquisition of services, special clothing, supplies, and equipment; and expenses for the Reserve Officers' Training Corps and other units at educational institutions.

SEC. 739. No part of the funds in this Act shall be available to prepare or present a request to the Committees on Appropriations for the reprogramming of funds, unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.

SEC. 740. No funds appropriated by this Act shall be available to pay claims for nonemergency inpatient hospital care provided under the Civilian Health and Medical Program of the Uniformed Services for services available at a facility of the uniformed services within a 40-mile radius of the patient's residence: Provided, That the foregoing limitation shall not apply to payments that supplement primary coverage provided by other insurance plans or programs that pay for at least 75 per centum of the covered services.

SEC. 741. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services under the provisions of section 1079(a) of title 10, United States Code, shall be available for (a) services of pastoral counselors, or family and child counselors, or marital counselors unless the patient has been referred to such counselor by a medical doctor for treatment of a specific problem with results of that treatment to be communicated back to the physician who made such referral; (b) special education, except when provided as secondary to the active psychiatric treatment on an institutional inpatient basis; (c) therapy or counseling for sexual dysfunctions or sexual inadequacies; (d) treatment of obesity when obesity is the sole or major condition treated; (e) surgery which improves physical appearance but which is not expected to significantly restore functions including, but not limited to, mammary augmentation, face lifts and sex gender changes except that breast reconstructive surgery following mastectomy and reconstructive surgery to correct serious deformities caused by congenital anomalies, accidental injuries and neoplastic surgery are not excluded; (f) reimbursement of any physician or other authorized individual provider of medical care in excess of the eightieth percentile of the customary charges made for similar services in the same locality where the medical care was furnished, as determined for physicians in accordance with section 1079(h) of title 10, United States Code; or (g) any service or supply which is not medically or psychologically necessary to prevent, diagnose, or treat a mental or physical illness, injury, or bodily malfunction as assessed or diagnosed by a physician, dentist, clinical psychologist, optometrist, podiatrist, certified nurse-midwife, certified nurse practitioner, or certified clinical social worker, as appropriate, except as authorized by section 1079(a)(4) of title 10, United States Code: Provided, That any changes in availability of funds for the Program made in this Act from those in effect prior to its enactment shall be effective for care received following enactment of this Act.

SEC. 742. Appropriations available to the Department of Defense for the current fiscal year shall be available to provide an individual entitled to health care under chapter 55 of title 10, United States Code, with one wig if the individual has alopecia that resulted from treatment of malignant disease: Provided, That the individual has not previously received a wig from the Government.

SEC. 743. Funds appropriated in this Act shall be available for the appointment, pay, and support of persons appointed as cadets and midshipmen in the two-year Senior Reserve Officers' Training Corps course in excess of the 20 percent limitation on such persons imposed by section 2107(a) of title 10, United States Code, but not to exceed 60 percent of total authorized scholarships.

SEC. 744. None of the funds appropriated by this Act shall be available to pay any member of the uniformed service for unused accrued leave pursuant to section 501 of title 37, United States Code, for more than sixty days of such leave, less the number of days for which payment was previously made under section 501 after February 9, 1976.

SEC. 745. None of the funds appropriated by this Act may be used to support more than 300 enlisted aides for officers in the United States Armed Forces.

SEC. 746. No appropriation contained in this Act may be used to pay for the cost of public affairs activities of the Department of Defense in excess of $32,900,000.

SEC. 747. None of the funds provided in this Act shall be available for the planning or execution of programs which utilize amounts credited to Department of Defense appropriations or funds pursuant to the provisions of section 37(a) of the Arms Export Control Act representing payment for the actual value of defense articles specified in section 21(a)(1) of that Act: Provided, That such amounts so credited shall be deposited in the Treasury as miscellaneous receipts as provided in 31 U.S.C. 484.

SEC. 748. No appropriation contained in this Act shall be available to fund any costs

of a Senior Reserve Officers' Training Corps unit—except to complete training of personnel enrolled in Military Science 4—which in its junior year class (Military Science 3) has for the four preceding academic years, and as of September 30, 1982, enrolled less than (a) seventeen students where the institution prescribes a four-year or a combination four- and two-year program; or (b) twelve students where the institution prescribes a two-year program: Provided, That, notwithstanding the foregoing limitation, funds shall be available to maintain one Senior Reserve Officers' Training Corps unit in each State and at each State-operated maritime academy: Provided further, That units under the consortium system shall be considered as a single unit for purposes of evaluation of productivity under this provision: Provided further, That enrollment standards contained in Department of Defense Directive 1215.8 for Senior Reserve Officers' Training Corps units, as revised during fiscal year 1981, may be used to determine compliance with this provision, in lieu of the standards cited above.

SEC. 749. (a) None of the funds appropriated by this Act or available in any working capital fund of the Department of Defense shall be available to pay the expenses attributable to lodging of any person on official business away from his designated post of duty, or in the case of an individual described under section 5703 of title 5, United States Code, his home or regular place of duty, when adequate government quarters are available, but are not occupied by such person.

(b) The limitation set forth in subsection (a) is not applicable to employees whose duties require official travel in excess of fifty percent of the total number of the basic administrative work weeks during the current fiscal year.

SEC. 750. (a) None of the funds appropriated by this Act shall be available to pay the retainer pay of any enlisted member of the Regular Navy, the Naval Reserve, the Regular Marine Corps, or the Marine Corps Reserve who is transferred to the Fleet Reserve or the Fleet Marine Corps Reserve under section 6330 of title 10, United States Code, on or after December 31, 1977, if the provisions of section 6330(d) of title 10, are utilized in determining such member's eligibility for retirement under section 6330(b) of title 10: Provided, That notwithstanding the foregoing, time creditable as active service for a completed minority enlistment, and an enlistment terminated within three months before the end of the term of enlistment under section 6330(d) of title 10, prior to December 31, 1977, may be utilized in determining eligibility for retirement: Provided further, That notwithstanding the foregoing, time may be credited as active service in determining a member's eligibility for retirement under section 6330(b) of title 10 pursuant to the provisions of the first sentence of section 6330(d) of title 10 for those members who had formally requested transfer to the Fleet Reserve or the Fleet Marine Corps Reserve on or before October 1, 1977.

(b) None of the funds appropriated by this Act shall be available to pay that portion of the retainer pay of any enlisted member of the Regular Navy, the Naval Reserve, the Regular Marine Corps, or the Marine Corps Reserve who is transferred to the Fleet Reserve or the Fleet Marine Corps Reserve under section 6330 of title 10, United States Code, on or after December 31, 1977, which is attributable under the second sentence of section 6330(d) of title 10 to time which, after December 31, 1977, is not actually served by such member.

SEC. 751. None of the funds appropriated by this Act for programs of the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year, except for funds appropriated for the Reserve, which shall remain available until September 30, 1984.

SEC. 752. None of the funds provided by this Act may be used to pay the salaries of any person or persons who authorize the transfer of unobligated and deobligated appropriations into the Reserve for Contingencies of the Central Intelligence Agency.

SEC. 753. None of the funds appropriated by this Act may be used to support more than 9,901 full-time and 2,603 part-time military personnel assigned to or used in the support of Morale, Welfare, and Recreation activities as described in Department of Defense Instruction 7000.12 and its enclosures, dated September 4, 1980.

SEC. 754. All obligations incurred in anticipation of the appropriations and authority provided in this Act are hereby ratified and confirmed if otherwise in accordance with the provisions of this Act.

SEC. 755. None of the funds provided by this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

SEC. 756. None of the funds appropriated by this Act shall be used for the provision, care or treatment to dependents of members or former members of the Armed Services or the Department of Defense for the elective correction of minor dermatological blemishes and marks or minor anatomical anomalies.

SEC. 757. None of the funds appropriated by this Act shall be available for the purchase of insignia for resale unless the sales price of such insignia is adjusted to the extent necessary to recover the cost of purchase of such insignia and the estimated cost of all related expenses, including but not limited to management, storage, handling, transportation, loss, disposal of obsolete material, and management fees paid to the military exchange systems: Provided, That amounts derived by the adjustment covered by the foregoing limitations may be credited to the appropriations against which the charges have been made to recover the cost of purchase and related expense.

SEC. 758. None of the funds appropriated by this Act or heretofore appropriated by any other Act shall be obligated or expended for the payment of anticipatory possession compensation claims to the Federal Republic of Germany other than claims listed in the 1973 agreement (commonly referred to as the Global Agreement) between the United States and the Federal Republic of Germany.

SEC. 759. During the current fiscal year the Department of Defense may enter into contracts to recover indebtedness to the United States pursuant to section 3 of the Federal Claims Collection Act of 1966, as codified at section 3711 of title 31, United States Code, and amended by Public Law 97-258, September 13, 1982, and any such contract entered into by the Department of Defense may provide that appropriate fees charged by the contractor under the contract to recover indebtedness may be payable from amounts collected by the contractor to the extent and under the conditions provided under the contract.

SEC. 760. None of the funds appropriated by this Act shall be available for a contract for studies, analyses, or consulting services entered into without competition on the basis of an unsolicited proposal unless the head of the activity responsible for the procurement determines:

(a) as a result of thorough technical evaluation, only one source is found fully qualified to perform the proposed work, or

(b) the purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source, or

(c) where the purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support:

Provided, That this limitation shall not apply to contracts in an amount of less than $25,000, contracts related to improvements of equipment that is in development or production, or contracts as to which a civilian official of the Department of Defense, who has been confirmed by the Senate, determines that the award of such contract is in the interest of the national defense.

SEC. 761. None of the funds appropriated by this Act shall be available to provide medical care in the United States on an inpatient basis to foreign military and diplomatic personnel or their dependents unless the Department of Defense is reimbursed for the costs of providing such care: Provided, That reimbursements for medical care covered by this section shall be credited to the appropriations against which charges have been made for providing such care.

SEC. 762. None of the funds appropriated by this Act shall be obligated for the second career training program authorized by Public Law 96-347.

SEC. 763. None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for salaries or expenses during the current fiscal year for the purposes of demilitarization of surplus nonautomatic firearms less than .50 caliber.

SEC. 764. During the current fiscal year, not to exceed $125,000,000 of the funds provided in this Act for the Civilian Health and Medical Program of the Uniformed Services may be used to conduct a test program in accordance with the following guidelines: In carrying out the provisions of sections 1079 and 1086 of title 10, United States Code, the Secretary of Defense, after consulting with the Secretary of Health and Human Services, may contract with organizations that assume responsibility for the maintenance of the health of a defined population, for the purpose of experiments and demonstration projects designed to determine the relative advantages and disadvantages of providing pre-paid health benefits: Provided, That such projects must be designed in such a way as to determine methods of reducing the cost of health benefits provided under such sections without adversely affecting the quality of care. Except as provided otherwise, the provisions of such a contract may deviate from the cost-sharing arrangements prescribed and the types of health care authorized under sections 1079 and 1086, when the Secretary of Defense determines that such a deviation would serve the purpose of this section.

SEC. 765. None of the funds in this Act shall be available to execute a multiyear contract which employs any economic order quantity procurement or which includes an unfunded contingent liability in excess of $20,000,000 unless the Committees on Appro-

priations and Armed Services of the Senate and House of Representatives have been notified in advance: Provided, That no part of any appropriation contained in this Act shall be available to initiate multiyear procurement contracts for major weapons systems except as specifically provided herein.

SEC. 766. None of the funds appropriated in this or any other Act for the Department of Defense shall be available for obligation to reimburse a contractor for the cost of commercial insurance that would protect against the costs of the contractor for correction of the contractor's own defects in materials or workmanship.

SEC. 767. None of the funds appropriated by this Act which are available for payment of travel allowances for per diem in lieu of subsistence to enlisted personnel shall be used to pay such an allowance to any enlisted member in an amount that is more than the amount of per diem in lieu of subsistence that the enlisted member is otherwise entitled to receive minus the basic allowance for subsistence, or pro rata portion of such allowance, that the enlisted member is entitled to receive during any day, or portion of a day, that the enlisted member is also entitled to be paid a per diem in lieu of subsistence: Provided, That if an enlisted member is in a travel status and is not entitled to receive a per diem in lieu of subsistence because the member is furnished meals in a Government mess, funds available to pay the basic allowance for subsistence to such a member shall not be used to pay that allowance, or pro rata portion of that allowance, for each day, or portion of a day, that such enlisted member is furnished meals in a Government mess.

SEC. 768. Effective January 1, 1982, none of the funds appropriated by this Act shall be available to pay the retired pay or retainer pay of a member of the Armed Forces for any month who, on or after January 1, 1982, becomes entitled to retired or retainer pay, in an amount that is greater than the amount otherwise determined to be payable after such reductions as may be necessary to reflect adjusting the computation of retired pay or retainer pay that includes credit for a part of a year of service to permit credit for a part of a year of service only for such month or months actually served: Provided, That the foregoing limitation shall not apply to any member who before January 1, 1982: (a) applied for retirement or transfer to the Fleet Reserve or Fleet Marine Corps Reserve; (b) is being processed for retirement under the provisions of chapter 61 of title 10 or who is on the temporary disability retired list and thereafter retired under the provisions of sections 1210 (c) or (d) of title 10; or (c) is retired or in an inactive status and would be eligible for retired pay under the provisions of chapter 67 of title 10, but for the fact that the person is under 60 years of age.

SEC. 769. None of the funds appropriated by this Act shall be obligated under the competitive rate program of the Department of Defense for the transportation of household goods to or from Alaska and Hawaii.

SEC. 770. None of the funds appropriated by this Act shall be available to approve a request for waiver of the costs otherwise required to be recovered under the provisions of section 21(e)(1)(C) of the Arms Export Control Act unless the Committees on Appropriations have been notified in advance of the proposed waiver.

SEC. 771. So far as may be practicable Indian labor shall be employed, and purchases of the products of Indian industry may be made in open market in the discretion of the Secretary of Defense.

SEC. 772. Funds available to the Department of Defense during the current fiscal year shall be available to establish a program to provide child advocacy and family counseling services to deal with problems of child and spouse abuse.

SEC. 773. None of the funds appropriated by this Act shall be available for the transportation of equipment or materiel designated as Prepositioned Materiel Configured in Unit Sets (POMCUS) in Europe in excess of four division sets.

SEC. 774. (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant manufacturing large caliber cannons to any foreign government, nor for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated defense plant manufacturing large caliber cannons.

SEC. 775. None of the funds appropriated in this Act may be made available through transfer, reprograming, or other means for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity.

SEC. 776. Of the funds appropriated by this Act for strategic programs, the Secretary of Defense shall provide funds for the Advanced Technology Bomber program at a level at least equal to the amount provided by the committee of conference on this Act in order to maintain priority emphasis on this program.

SEC. 777. Section 766(c) of the Department of Defense Appropriation Act, 1980, is amended by adding the following to the end thereof: ": Provided, That this limitation shall not apply to individuals who are at the top step of the compensation schedule, and who were employed as teachers in the Panama Canal Zone on September 30, 1979. This modification shall become effective on August 1, 1982".

SEC. 778. None of the funds available to the Department of Defense during the current fiscal year shall be used by the Secretary of a military department to purchase coal or coke from foreign nations for use at United States defense facilities in Europe when coal from the United States is available.

SEC. 779. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services shall be available for the payment for any service or supply for persons enrolled in any other insurance, medical service, or health plan to the extent that the service or supply is a benefit under the other plan, except in the case of those plans administered under title XIX of the Social Security Amendments of 1965 (79 Stat. 286).

SEC. 780. None of the funds available to the Department of Defense shall be available for the procurement of manual typewriters which were manufactured by facilities located within States which are Signatories to the Warsaw Pact.

SEC. 781. Notwithstanding any other provision of law, $500,000 of the funds made available by this Act for Operation and Maintenance, Army, shall be available for payment for the cost of extending utility lines to connect with the proposed West Point Jewish Chapel.

SEC. 782. None of the funds appropriated by this Act may be used to appoint or compensate more than 35 individuals in the Department of Defense in positions in the Executive Schedule (as provided in sections 5312-5316 of title 5, United States Code).

SEC. 783. None of the funds made available by this Act shall be available to pay any member of the uniformed services a variable housing allowance pursuant to section 403(a)(2) of title 37, United States Code, in an amount that is greater than the amount which would have been payable to such member if the rates of basic allowance for quarters for members of the uniformed services in effect on September 30, 1982, had been increased by 8 per centum on October 1, 1982.

SEC. 784. None of the funds appropriated by this Act shall be available to convert a position in support of the Army Reserve, Air Force Reserve, Army National Guard, and Air National Guard occupied by, or programed to be occupied by, a military technician to a position to be held by a person in an active Guard or Reserve status if that conversion would reduce the total number of positions occupied by, or programed to be occupied by, military technicians of the component concerned, below the number of positions occupied by military technicians in that component on September 30, 1982.

SEC. 785. None of the funds appropriated by this Act shall be available to pay claims for inpatient mental health services provided under the Civilian Health and Medical Program of the Uniformed Services in excess of sixty days per patient per year: Provided, That the foregoing limitation shall not apply to inpatient mental health services (a) provided under the Program for the Handicapped; (b) provided as residential treatment care; (c) provided as partial hospital care; (d) provided to individual patients admitted prior to January 1, 1983 for so long as they remain continuously in inpatient status for medically or psychologically necessary reasons; or (e) provided pursuant to a waiver for medical or psychological necessities, granted in accordance with the findings of current peer review, as prescribed in guidelines established and promulgated by the Director, Office of Civilian Health and Medical Program of the Uniformed Services.

SEC. 786. During the current fiscal year the Department of the Air Force will transfer from aircraft assigned to the active Air Force one C-130H aircraft in good condition to the Coast Guard without reimbursement.

SEC. 787. None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon. This section does not apply to security or special mission automobiles.

Sec. 788. None of the funds in this Act may be used to impose civilian personnel ceilings on Department of Defense industrially funded activities: Provided, That any increase in civilian personnel of such industrial funds in excess of the number employed on September 30, 1982, shall not be counted for the purposes of any statutory or administratively imposed civilian personnel ceil-

ing otherwise applicable during fiscal year 1983.

SEC. 789. Appropriations or funds available to the Department of Defense during the current fiscal year may be transferred to appropriations provided in this Act for research, development, test, and evaluation to the extent necessary to meet increased pay costs authorized by or pursuant to law, to be merged with and to be available for the same purposes, and the same time period, as the appropriation to which transferred.

SEC. 790. Notwithstanding the budget authority levels provided in title IV of this Act for the procurement appropriation accounts, the sum total of such budget authority levels is hereby reduced by $386,000,000: Provided, That not more than $2,100,000,000 of the remaining budget authority provided in title IV of this Act and as further reduced herein for the procurement appropriation accounts may be obligated or expended to pay independent research and development and bid and proposal costs allocated to procurement contracts as items of indirect expense.

SEC. 791. No later than the end of the second fiscal year following the fiscal year for which appropriations for Operation and Maintenance have been made available to the Department of Defense, unobligated balances of such appropriations provided for fiscal year 1982 and thereafter may be transferred into the appropriation "Foreign Currency Fluctuations, Defense" to be merged with and available for the same time period and the same purposes as the appropriation to which transferred: Provided, That any transfer made pursuant to any use of the authority provided by this provision shall be limited so that the amount in the appropriation "Foreign Currency Fluctuations, Defense" does not exceed $970,000,000 at the time such a transfer is made.

SEC. 792. During the current fiscal year, for the purposes of the appropriation "Foreign Currency Fluctuations, Defense" the foreign currency exchange rates used in preparing budget submissions shall be the foreign currency exchange rates as adjusted or modified, as reflected in applicable Committee reports on this Act.

SEC. 793. None of the funds provided in this Act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities, to any group or individual, not part of a country's armed forces, for the purpose of overthrowing the Government of Nicaragua or provoking a military exchange between Nicaragua and Honduras.

SEC. 794. None of the funds made available by this Act shall be used in any way for the leasing to non-Federal agencies in the United States aircraft or vehicles owned or operated by the Department of Defense when suitable aircraft or vehicles are commercially available in the private sector: Provided, That nothing in this section shall affect authorized and established procedures for the sale of surplus aircraft or vehicles: Provided further, That nothing in this section shall prohibit such leasing when specifically authorized in a subsequent Act of Congress.

SEC. 795. None of the funds made available by this Act shall be available for any competition between the currently approved LANTIRN system and any other system under provisions of section 203 of Public Law 97-252.

SEC. 796. None of the funds made available by this Act shall be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before the Congress.

SEC. 797. None of the funds made available in the Act or any subsequent Act shall be available for the purchase of the alternate or new model fighter aircraft engine that does not have a written warranty or guarantee attesting that it will perform not less than 3,000 tactical cycles. The warranty will provide that the manufacturer must perform the necessary improvements or replace any parts to achieve the required performance at no cost to the Government.

SEC. 798. Section 308(g) and 308a(c) of title 37, United States Code, are amended by striking "December 17, 1982" and inserting in lieu thereof "March 31, 1983".

SEC. 799. Funds available under this Act may be used by the Department of Defense to enter into purchases of or commitments to purchase metals, minerals or other materials under section 303 of the Defense Production Act of 1950, as amended, (50 U.S.C. 2093): Provided, That the total funds under this Act for such purchases or commitments to purchase shall not exceed $50,000,000.

SEC. 799A. None of the funds made available by this Act may be used to support active United States military personnel stationed on shore in Europe at the end of fiscal year 1983 in excess of the planned number of such personnel stationed on shore in Europe at the end of fiscal year 1982 (315,600): Provided, That this limitation may be waived by the President upon a declaration to Congress of overriding national security requirements.

SEC. 799B. After the date of enactment of this Act, annual sales of silver from the National Defense Stockpile under the authority of Public Law 97-35, or any other Act, shall not exceed 10 per centum of the silver produced from existing domestic producing mines in the preceding 12 month period.

TITLE VIII

RELATED AGENCIES

INTELLIGENCE COMMUNITY STAFF

For necessary expenses of the Intelligence Community Staff; $15,856,000.

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM FUND

For payment to the Central Intelligence Agency Retirement and Disability System Fund, to maintain proper funding level for continuing the operation of the Central Intelligence Agency Retirement and Disability System; $91,300,000.

This Act may be cited as the "Department of Defense Appropriation Act, 1983".

And the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert the following:

SEC. 101(d). Such amounts as may be necessary for programs, projects, and activities provided for in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1983 (S. 2956), at a rate for operations and to the extent and in the manner provided for in such Act as reported in the Senate on September 24, 1982, as if such Act had been enacted into law, except that the following appropriation items shall be a rate for operations and to the extend and in manner provided herein:

DEPARTMENT OF COMMERCE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the general administration of the Department of Commerce, including not to exceed $2,000 for official entertainment, $31,613,000.

BUREAU OF THE CENSUS

PERIODIC CENSUSES AND PROGRAMS

For expenses necessary to collect and publish statistics for periodic censuses and programs, provided for by law, $97,294,000, of which $150,000 shall be available together with $50,000 from non-Federal sources for a new combined monthly survey of men's and women's apparel, to remain available until expended. None of the funds made available to the Bureau of the Census under this Act may be expended for prosecution of any person for the failure to return 1978 Agricultural Census forms 78-A40A or 78-A40B, or 78-A40C or 78-A40D, or form 79-A9A, or form 79-A9B, or for the preparation of similar forms for any future agricultural census.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, of economic and statistical analysis programs, $36,832,000.

ECONOMIC DEVELOPMENT ADMINISTRATION

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

(INCLUDING TRANSFER OF FUNDS

For economic development assistance as provided by the Public Works and Economic Development Act of 1965, as amended, and Public Law 91-304, and such laws that were in effect immediately before September 30, 1982, $168,500,000, and in addition, $30,000,000 shall be available by transfer from the unobligated balances in the Economic Development Revolving Fund, notwithstanding section 203 of the Act of 1965: Provided, That during 1983 total commitments to grarantee loans shall not exceed $150,000,000 of contingent liability for loan principal.

ECONOMIC DEVELOPMENT REVOLVING FUND

(LIMITATION ON LOAN GUARANTEES)

During fiscal year 1983, total commitments to guarantee loans to steel companies shall not exceed $20,000,000 of contingent liability for loan principal.

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

For necessary expenses for international trade activites of the department of Commerce, including trade promotional activities abroad without regard to the provisions of law set forth in 44 U.S.C. 3702 and 3703; full medical coverage for dependent members of immediate families of employees stationed overseas; employment of Americans and aliens by contract for services abroad; rental of space abroad for periods not exceeding five years, and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; payment of tort claims, in the manner authorized in the first paragraph of 28 U.S.C. 2672 when such claims arise in foreign countries; not to exceed $135,200 for official respresentation expenses abroad; awards of compensation to informers under the Export Administration Act of 1979, and as authorized by 22 U.S.C. 401(b); purchase of passenger motor vehicles for official use abroad; $166,426,000, to remain available until expended: Provided, That the provisions of the first sentence

of section 105(f) and all of section 108(c) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2455(f) and 2458(c)) shall apply in carrying out these activities. During fiscal year 1983 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $12,484,000. During fiscal year 1983, total commitments to guarantee loans shall not exceed $28,250,000 of contingent liability for loan principal.

MINORITY BUSINESS DEVELOPMENT AGENCY

MINORITY BUSINESS DEVELOPMENT

For necessary expenses of the Department of Commerce in fostering, promoting, and developing minority business enterprise, including expenses of grants, contracts, or other agreements with public or private organizations, $48,000,000, of which $33,463,000 shall remain available until expended: Provided, That not to exceed $14,537,000 shall be available for program management: Provided further, That none of the funds appropriated in this paragraph or in this title for the Department of Commerce shall be available to reimburse the fund established by 15 U.S.C. 1521 on account of the performance of a program, project, or activity, nor shall such fund be available for the performance of a program, project, or activity, which had not been performed as a central service pursuant to 15 U.S.C. 1521 before July 1, 1982, unless the House and Senate Appropriations Committees have approved the performance of the program, project, or activity as a central service in accordance with the policies of said Committees applicable to reprogramming of funds.

UNITED STATES TRAVEL AND TOURISM ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the United States Travel and Tourism Administration, as provided for by law, including employment of aliens by contract for service abroad; rental of space abroad for periods not exceeding five years, and expenses of alteration, repair, or improvement; advance of funds under contracts abroad; payment of tort claims in the manner authorized in the first paragraph of 28 U.S.C. 2672, when such claims arise in foreign countries; and not to exceed $5,000 for representation expenses abroad; $8,100,000 of which $500,000 shall be used only to provide direct financial assistance to the State of Hawaii (which has been declared as a major disaster area by the President) and that such funds: (1) shall be used to supplement and increase rather than replace funds that normally would be used to promote travel by foreign visitors to Hawaii; (2) shall be obligated or expended within 60 days of the date of enactment of this Act; and (3) shall not be used to pay the administrative costs of the United States Travel and Tourism Administration or any other unit of the Federal Government.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including maintenance, operation, and hire of aircraft; 399 commissioned officers on the active list; construction of facilities, including initial equipment; alteration, modernization, and relocation of facilities; and acquisition of land for facilities; $850,127,000, to remain available until expended, of which so much as may become available during the current fiscal year shall be derived from the Pribilof Islands Fund, and, in addition, $22,600,000 shall be transferred to this appropriation from the fund entitled "Promote and develop fishery products and research pertaining to American fisheries", and $4,140,000 from repayments of principal and interest on outstanding loans in the fund entitled "Coastal Energy Impact Fund".

FISHERIES LOAN FUND

For expenses necessary to carry out the provisions of Section 221 of the American Fisheries Promotion Act of December 22, 1980 (Public Law 96-561), there are appropriated to the Fisheries Loan Fund, $10,000,000 from receipts collected pursuant to that Act: Provided, That during fiscal year 1983 not to exceed $300,000 of the Fisheries Loan Fund shall be available for administrative expenses.

SCIENCE AND TECHNICAL RESEARCH

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

For necessary expenses of the National Bureau of Standards, $117,861,000, to remain available until expended. Of the foregoing amount, not to exceed $47,816,000 is for Measurement, Research and Standards (including not to exceed $1,000,000 for "Measurement Standards for the Handicapped"); not to exceed $21,635,000 is for Engineering Measurements and Standards; not to exceed $10,000,000 is for Computer Science and Technology; not to exceed $13,557,000 is for Core Research Program for Innovation and Productivity; not to exceed $5,491,000 is for the Fire Research Center; not to exceed $6,986,000 is for Technical Competence; not to exceed $12,376,000 is for Central Technical Support; and not to exceed $6,286,000 may be transferred to the "Working Capital Fund". $700,000 is provided for a metal processing program.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses, as provided for by law, of the National Telecommunications and Information Administration, $12,667,000, to remain available until expended, of which $503,000 of prior year unobligated balances in the appropriation "Public telecommunications facilities planning and construction" shall be transferred to this appropriation".

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act.

During the fiscal year appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

No funds in this title shall be used to sell to private interest, except with the consent of the borrower, or contract with private interests to sell or administer, any loans made under the Public Works and Economic Development Act of 1965 or any loans made under section 254 of the Trade Act of 1974.

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

OPERATIONS AND TRAINING

For necessary expenses of operations and training activities authorized by law, including not to exceed $2,500 for entertainment of officials of other countries when specifically authorized by the Maritime Administrator; not to exceed $2,500 for representation allowances; not to exceed $2,500 for contingencies for the Superintendent, United States Merchant Marine Academy, to be expended in his discretion; $78,113,000, to remain available until expended: Provided, That reimbursements may be made to this appropriation from receipts to the "Federal ship financing fund" for administrative expenses in support of that program.

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Trade Commission, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and not to exceed $2,000 for official reception and representation expenses; $63,638,000: Provided, That notwithstanding any other provision of law, the provisions of sections 10, 11(b), 18, 20, and 21 of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374) are hereby extended until the termination date set forth in section 102(c) of H.J. Res. 631, as enacted into law, notwithstanding subsections 10(e) and 21(i) of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374).

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses, not otherwise provided for, of the Small Business Administration, including hire of passenger motor vehicles and not to exceed $1,500 for official reception and representation expenses, $202,029,000; and for grants for Small Business Development Centers as authorized by section 21(a) of the Small Business Act, as amended $16,000,000. In addition, $25,600,000 for disaster loan making activities, including loan servicing, shall be transferred to this appropriation from the "Disaster loan fund".

BUSINESS LOAN AND INVESTMENT FUND

For additional capital for the "Business loan and investment fund", authorized by the Small Business Act, as amended, $128,700,000, to remain available without fiscal year limitation; and for additional capital for new direct loan obligations to be incurred by the "Business loan and investment fund", authorized by the Small Business Act, as amended, $185,000,000, to remain available without fiscal year limitation; and for additional capital for new direct loan obligations to be made only to disabled veterans and veterans of the Vietnam era as defined in section 1841, title 38, United States Code, under the general terms and conditions of title III of Public Law 97-72, $25,000,000.

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the administration of the Department of Justice, $54,873,000, of which $350,000 is to remain available until expended for the Federal justice research program.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, ANTITRUST DIVISION

For expenses necessary for the enforcement of antitrust, consumer protection and kindred laws, $43,389,000.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS AND MARSHALS

For necessary expenses of the offices of the United States attorneys, and marshals, and bankruptcy trustees; including acquisition, lease, maintenance, and operation of aircraft, $330,981,000.

SUPPORT OF UNITED STATES PRISONERS

For support of United States prisoners in non-Federal institutions $34,254,000: Provided, That not to exceed $4,050,000 shall be available for the purpose of renovating, constructing, and equipping State and local jail facilities that confine Federal prisoners under the Cooperative Agreement Program: Provided further, That accounts made available for constructing any local jail facility shall not exceed the cost of constructing space for the average Federal prisoner population for that facility as projected by the Attorney General: Provided further, That following agreement on or completion of any Federally assisted jail construction, the availability of such space shall be assured and the per diem rate charged for housing Federal prisoners at that facility shall not exceed direct operating costs for the period of time specified in the cooperative agreement.

FEES AND EXPENSES OF WITNESSES

For expenses, mileage, compensation, and per diems of witnesses and for per diems in lieu of subsistence, as authorized by law, including advances; $35,700,000.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

For necessary expenses of the Community Relations Service, established by Title X of the Civil Rights Act of 1964, $5,764,000.

INTERAGENCY LAW ENFORCEMENT

ORGANIZED CRIME DRUG ENFORCEMENT

For expenses necessary for the detection, investigation, prosecution, and incarceration of individuals involved in organized criminal drug trafficking not otherwise provided for, $127,500,000, of which $18,000,000 is to remain available until expended for construction of new facilities and constructing, remodeling, and equipping buildings and facilities at existing detention and correctional institutions.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

For expenses necessary for detection, investigation, and prosecution of crimes against the United States; including purchase for police-type use (not to exceed one thousand three hundred for replacement only) and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; $825,154,000, of which not to exceed $3,000,000 for automated data processing and telecommunications and $600,000 for undercover operations shall remain available until September 30, 1984: Provided, That notwithstanding the provisions of title 31 U.S.C. 483(a) and 484, the Director of the Federal Bureau of Investigation may establish and collect fees to process fingerprint identification records for noncriminal employment and licensing purposes, and credit not more than $13,500,000 of such fees to this appropriation to be used for salaries and other expenses incurred in providing these services: Provided further, That passenger motor vehicles for police-type use may be purchased without regard to the general purchase price limitation for the current fiscal year.

IMMIGRATION AND NATURALIZATION SERVICE

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary for the administration and enforcement of the laws relating to immigration, naturalization, and alien registration, including not to exceed $50,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on his certificate; purchase for policy-type use (not to exceed four hundred one of which four hundred shall be replacement only) and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; and research related to immigration enforcement; and for expenses necessary under Section 501(c) of the Refugee Education Assistance Act of 1980 (Public Law 96-442) for the processing, care, maintenance, security, transportation, and the initial reception and placement in the United States of Cuban and Haitian entrants; $484,431,000, of which not to exceed $400,000 shall remain available for research until expended: Provided, That none of the funds available to the Immigration and Naturalization Service shall be available for administrative expenses to pay any employee overtime pay in an amount in excess of $20,000 except in such instances when the Commissioner makes a determination that this restriction is impossible to implement.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Drug Enforcement Administration, including not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; purchase of not to exceed two hundred seventy-seven pasenger motor vehicles (for replacement only) for police-type use without regard to the general purchase price limitation for the current fiscal year; and acquisition, lease, maintenance, and operation of aircraft; $248,162,000, of which not to exceed $1,200,000 for research shall remain available until expended and $1,700,000 for purchase of evidence and payments for information shall remain available until September 30, 1984.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. A total of not to exceed $35,000 from funds appropriated to the Department of Justice in this title shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

SEC. 202. Notwithstanding section 501(e)(2)(B) of Public Law 96-422, funds appropriated to the Department of Justice in this title may be expended for assistance to Cuban-Haitian entrants as authorized under section 501(c) of said Act.

SEC. 203. Authorities contained in Public Law 96-132, "Department of Justice Appropriation Authorization Act, Fiscal Year 1980", are in effect until the termination date in section 102(c) of this joint resolution as enacted into law.

RELATED AGENCIES

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

For expenses necessary for the Commission on Civil Rights, including hire of passenger motor vehicles, $11,626,000.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Equal Employment Opportunity Commission as authorized by title VII of the Civil Rights Act of 1964, as amended, 29 U.S.C. 206(d) and 621-634, including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and not to exceed $18,500,000 for payments to State and local enforcement agencies for services to the Commission pursuant to title VII of the Civil Rights Act, as amended and sections 6 and 14 of the Age Discrimination in Employment Act; $142,771,000.

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

For payment to the Legal Services Corporation to carry out the purposes of the Legal Services Corporation Act of 1974, as amended, $241,000,000: Provided, That none of the funds appropriated in this Act for the Legal Services Corporation shall be expended to provide legal assistance for or on behalf of any alien unless the alien is a resident of the United States and is—

(1) an alien lawfully admitted for permanent residence as an immigrant as defined by section 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15), (20)).

(2) an alien who is either married to a United States citizen or is a parent or an unmarried child under the age of twenty-one years of such a citizen and who has filed an application for adjustment of status to permanent resident under the Immigration and Nationality Act, and such application has not been rejected;

(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157, relating to refugee admissions) or who has been granted asylum by the Attorney General under such Act; or

(4) an alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)).

An alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of section 1007(b)(1) of the Legal Services Corporation Act, to be an alien described in subparagraph (C) of such section: Provided further, That none of the funds appropriated in this Act for the Legal Services Corporation shall be used by the Corporation in making grants or entering into contracts for legal assistance unless the Corporation insures that the recipient is either (a) a private attorney or attorneys (for the sole purpose of furnishing legal assistance to eligible clients) or (b) a qualified nonprofit organization chartered under the laws of one of the States for the primary

purpose of furnishing legal assistance to eligible clients, the majority of the board of directors or other governing body of which organization is comprised of attorneys who are admitted to practice in one of the States and who are appointed to terms of office on such board or body by the governing bodies of State, county, or municipal bar associations the membership of which represents a majority of the attorneys practicing law in the locality in which the organization is to provide legal assistance: Provided further, That none of the funds appropriated in this Act shall be expended by the Legal Services Corporation to participate in litigation unless the Corporation or a recipient of the Corporation is a party, or a recipient is representing an eligible client in litigation in which the interpretation of this title or a regulation promulgated under this title is an issue, and shall not participate on behalf of any client other than itself: Provided further, That none of the funds appropriated in this Act shall be available to any recipient to be used—

(A) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or other device, intended or designed to influence any decision by a Federal, State, or local agency, except where legal assistance is provided by an employee of a recipient to an eligible client on a particular application, claim, or case, which directly involves the client's legal rights and responsibilities, or

(B) to influence any Member of Congress or any other Federal, State, or local elected official to favor or oppose any Acts, bills, resolutions, or similar legislation, or any referendum, initiative, constitutional amendment, or any similar procedure of the Congress, any State legislature, any local council, or any similar governing body, except that this subsection shall not preclude such funds from being used in connection with communications made in response to any Federal, State, or local official, upon the formal request of such official: Provided further, That none of the funds appropriated in this Act for the Legal Services Corporation shall be used to bring a class action suit against the Federal government or any State or local government unless (1) the project director of a recipient has expressly approved the filing of such an action in accordance with policies established by the governing body of such recipient; (2) the class relief which is the subject of such an action is sought for the primary benefit of individuals who are eligible for legal assistance; and (3) that prior to filing such an action, the recipient project director has determined that the government entity is not likely to change the policy or practice in question, that the policy or practice will continue to adversely affect eligible clients, that the recipient has given notice of its intention to seek class relief and that responsible efforts to resolve without litigation the adverse effects of the policy or practice have not been successful or would be adverse to the interests of the clients: Provided further, That none of the funds appropriated in this Act for the Legal Services Corporation shall be expended for any purpose prohibited or limited by or contrary to section 11 of H.R. 3480, as passed the House of Representatives on June 18, 1981: Provided further, That notwithstanding any regulation, guideline, or rule of the Corporation, the funds appropriated in this Act for the Legal Services Corporation shall be used by the Corporation in making grants or entering into contracts under section 1006(a) (1) and (3) so as to insure that funding for each such current grantee and contractor is maintained in 1983 at the annualized level at which each such grantee and contractor was funded in 1982, or in the same proportion which total appropriations to the Corporation in fiscal year 1983 bear to the total appropriations to the Corporation in fiscal year 1982, until action is taken by directors of the Corporation who have been confirmed in accordance with section 1004(a) of the Legal Services Corporation Act: Provided further, That no member of the Board of Directors of the Legal Services Corporation shall be compensated for his services to the Corporation except for the payment of an attendance fee at meetings of the Board at a rate not to exceed the highest daily rate for grade fifteen (15) of the General Schedule and necessary travel expenses to attend Board meetings in accordance with the Standard Government Travel Regulations: Provided further, That no officer or employee of the Legal Services Corporation or a recipient program shall be reimbursed for membership in a private club, or be paid severance pay in excess of what would be paid a Federal employee for comparable service.

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

SALARIES AND EXPENSES

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including obligations of the United States abroad pursuant to treaties, international agreements, and binational contracts (including obligations assumed in Germany on or after June 5, 1945); expenses authorized by section 9 of the Act of August 31, 1964, as amended (31 U.S.C. 240 et seq.), and section 2 of the Act of August 1, 1956, as amended (22 U.S.C. 2669); telecommunications; expenses necessary to provide maximum physical security in Government-owned and leased properties and vehicles abroad; permanent representation to certain international organizations in which the United States participates pursuant to treaties, conventions, or specific Acts of Congress; acquisition by exchange or purchase of vehicles as authorized by law, except that special requirement vehicles may be purchased without regard to any price limitation otherwise established by law; $995,000,000, of which $25,000,000 shall remain available until September 30, 1984.

REOPENING CONSULATES

For necessary expenses of the Department of State and the Foreign Service for reopening and operating certain United States consulates as specified in Section 103 of the Department of State Authorization Act, Fiscal Years 1982 and 1983, $1,000,000.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

For expenses, not otherwise provided for, necessary to meet annual obligations of membership in international multilateral organizations, pursuant to treaties, conventions, or specific Acts of Congress, $444,315,000, of which $12,506,000 shall be for payment of the full 1983 assessed contributions to the Inter-American Institute for Cooperation on Agriculture: Provided, That none of the funds appropriated in this paragraph shall be available for a United States contribution to an international organization for the United States' share of interest costs made known to the United States government by such organization for loans incurred on or after October 1, 1982, through external borrowings.

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING ACTIVITIES

For payments, not otherwise provided for, by the United States for expenses of United Nations peacekeeping forces, $73,400,000: Provided, That section 149 of Public Law 97-276 shall be effective until the termination date of H.J. Res. 631 as enacted into law.

THE ASIA FOUNDATION

For a grant to the Asia Foundation, $4,100,000 to remain available until expended.

COMMISSION ON WARTIME RELOCATION AND INTERNMENT OF CIVILIANS

SALARIES AND EXPENSES

For necessary expenses of the Commission on Wartime Relocation and Internment of Civilians, as authorized by Public Law 96-317, $300,000 to be available only until June 30, 1983.

UNITED STATES INFORMATION AGENCY

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary, to enable the United States Information Agency, as authorized by Reorganization Plan No. 2 of 1977, the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2451 et seq.), and the United States Information and Educational Exchange Act, as amended (22 U.S.C. 1431 et seq.), to carry out international communication, educational and cultural activities, including employment, without regard to civil service and classification laws, of persons on a temporary basis (not to exceed $20,000); expenses authorized by the Foreign Service Act of 1980 (22 U.S.C. 3901 et seq.), living quarters as authorized by 5 U.S.C. 5912, and allowances as authorized by 5 U.S.C. 5921-5928; and entertainment, including official receptions, within the United States, not to exceed $10,000; $407,830,000, of which not to exceed $2,671,000 of the amounts allocated by the United States Information Agency to carry out section 102(a)(3) of the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2452(a)(3)), shall remain available until expended; Provided, That not to exceed $500,000 may be used for representation abroad: Provided further, That receipts not to exceed $500,000 may be credited to this appropriation from fees or other payments received from or in connection with English-teaching programs as authorized by section 810 of Public Law 80-402, as amended; and, for expenses of certain exchange programs of the United States Information Agency, $84,292,000, of which $73,965,000 shall be for the Fulbright and International Visitor Programs, $3,206,000 shall be for the Humphrey Fellowship Program, and $7,121,000 shall be for the Private Sector Programs.

THE JUDICIARY

BANKRUPTCY COURTS, SALARIES AND EXPENSES

For salaries and expenses of the judges and other officers and employees of the Bankruptcy Courts of the United States, not otherwise provided for, $89,000,000.

And the Senate agreed to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment as follows: Restore the matter stricken by said amendment, amended to read as follows:

The following Act, notwithstanding any other provision of the joint resolution; this subsection shall be effective as if it had been enacted into law as the regular appropriation Act:

An act making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1983, and for other purposes.

TITLE I—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

To carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $219,921,000.

To carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $62,029,000.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and allowances to ex-servicemen, as authorized by title 5, chapter 85 of the United States Code, as amended, of benefits and payments as authorized by title II of Public Law 95-250, as amended, of trade adjustment benefit payments and allowances, as provided by law (part I, subchapter B, chapter 2, title II of the Trade Act of 1974, as amended) $230,000,000, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: Provided, That amounts recovered from the States during the current fiscal year pursuant to 5 U.S.C. 8505(d) shall be available for such payments during the year. Amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments.

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

For grants for activities authorized by the Act of June 6, 1933, as amended (29 U.S.C. 49-49n; 39 U.S.C. 3202(a)(1)(E)); Veterans' Employment and Readjustment Act of 1972, as amended (38 U.S.C. 2001-2013); title III of the Social Security Act, as amended (42 U.S.C. 501-503); and necessary administrative expenses for carrying out 5 U.S.C. 8501-8523, chapter 2, title II, of the Trade Act of 1974, as amended, and sections 101(a)(15)(H)(ii) and 212(a)(14) of the Immigration and Nationality Act, as amended (8 U.S.C. 1101 et seq.), including, upon request of any State, the payment of rental for space made available to such State in lieu of grants for such purpose, $22,200,000, together with not to exceed $2,454,300,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund and of which $627,176,000 shall be available only to the extent necessary to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic grant was based, which cannot be provided for by normal budgetary adjustments: Provided, That any portion of the funds granted to a State in the current fiscal year and not obligated by the State in that year shall be returned to the Treasury and credited to the account from which derived.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, as amended, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1954, as amended, and for nonrepayable advances to the Unemployment Trust Fund as authorized by section 8509 of title 5, United States Code and by title VI of the Tax Equity and Fiscal Responsibility Act of 1982, and to the "Federal unemployment benefits and allowances" account, to remain available until September 30, 1984, $5,441,000,000.

LABOR-MANAGEMENT SERVICES ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Labor-Management Services Administration, $58,077,000.

PENSION BENEFIT GUARANTY CORPORATION

The Pension Benefit Guaranty Corporation is authorized to make such expenditures, including financial assistance authorized by section 104 of Public Law 96-364, within limits of funds and borrowing authority available to such Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 849), as may be necessary in carrying out the program through September 30, 1983, for such Corporation.

EMPLOYMENT STANDARDS ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Employment Standards Administration, including reimbursement to State, Federal and local agencies and their employees for inspection services rendered, $169,296,000, together with $347,000 which may be expended from the Special Fund in accordance with sections 39(c) and 44(j) of the Longshoremen's and Harbor Workers' Compensation Act.

SPECIAL BENEFITS

For the payment of compensation, benefits, and expenses (except administrative expenses) accruing during the current or any prior fiscal year authorized by title V, chapter 81 of the United States Code; continuation of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the Employees' Compensation Commission Appropriation Act, 1944; and sections 4(c) and 5(f) of the War Claims Act of 1948 (50 U.S.C. App. 2012); and 50 per centum of the additional compensation and benefits required by section 10(h) of the Longshoremen's and Harbor Workers' Compensation Act, as amended, $339,600,000, together with such amount as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to September 15 of the current year: Provided, That in addition there shall be transferred from the Postal Service fund to this appropriation such sums as the Secretary of Labor determines to be the cost of administration for Postal Service employees through September 30, 1983.

BLACK LUNG DISABILITY TRUST FUND

For payments from the Black Lung Disability Trust Fund, $673,544,000, of which $639,255,000 shall be available until September 30, 1984, for payment of all benefits and interest on advances under subsection (c)(2) of section 9501 of the Internal Revenue Code of 1954, as amended, as authorized by section 9501(d) (1), (2), (4), and (7) of that Act and of which $21,192,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses and $13,097,000 for transfer to Departmental Management, Salaries and Expenses for expenses of operation and administration of the Black Lung Benefits program as authorized by section 9501(d)(5)(A) of that Act: Provided, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to June 15 of the current year: Provided further, That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 9501(d)(5)(B) of that Act.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, $205,256,000, including not to exceed $47,625,000, which shall be the maximum amount available for grants to States under section 23(g) of the Occupational Safety and Health Act, which grants shall be no less than fifty percent of the costs of State occupational safety and health programs required to be incurred under plans approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970: Provided, That none of the funds appropriated under this paragraph shall be obligated or expended to enforce or prescribe as a condition for initial, continuing, or final approval of State plans under section 18 of the Occupational Safety and Health Act of 1970, State administrative or enforcement staffing levels which are greater than levels which are determined by the Secretary to be equivalent to Federal staffing levels: Provided further, That none of the funds appropriated under this paragraph shall be obligated or expended for the assessment of civil penalties issued for first instance violations of any standard, rule, or regulation promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful, or repeated violations under section 17 of the Act) resulting from the inspection of any establishment or workplace subject to the Act, unless such establishment or workplace is cited, on the basis of such inspection, for ten or more violations: Provided further, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: Provided further, That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational

Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing: Provided further, That no funds appropriated under this paragraph shall be obligated or expended to administer or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 with respect to any employer of ten or fewer employees who is included within a category having an occupational injury lost work day case rate, at the most precise Standard Industrial Classification Code for which such data are published, less than the national average rate as such rates are most recently published by the Secretary, acting through the Bureau of Labor Statistics, in accordance with section 24 of that Act (29 U.S.C. 673), except—

(1) to provide, as authorized by such Act, consultation, technical assistance, educational and training services, and to conduct surveys and studies;

(2) to conduct an inspection or investigation in response to an employee complaint, to issue a citation for violations found during such inspection, and to assess a penalty for violations which are not corrected within a reasonable abatement period and for any willful violations found;

(3) to take any action authorized by such Act with respect to imminent dangers;

(4) to take any action authorized by such Act with respect to health hazards;

(5) to take any action authorized by such Act with respect to a report of an employment accident which is fatal to one or more employees or which results in hospitalization of five or more employees, and take any action pursuant to such investigation authorized by such Act;

(6) to take any action authorized by such Act with respect to complaints of discrimination againt employees for exercising rights under such Act: Provided further, That the foregoing proviso shall not apply to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: Provided further, That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of ten or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such, which was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained from such consultants: Provided further, That none of the funds appropriated under this paragraph may be obligated or expended for any State plan monitoring visit by the Secretary of Labor under section 18 of the Occupational Safety and Health Act of 1970, of any factory, plant, establishment, construction site, or other area, workplace or environment where such a workplace or environment has been inspected by an employee of a State acting pursuant to section 18 of such Act within the six months preceding such inspection: Provided further, That this limitation does not prohibit the Secretary of Labor from conducting such monitoring visit at the time and place of an inspection by an employee of a State acting pursuant to section 18 of such Act, or in order to investigate a complaint about State program administration including a failure to respond to a worker complaint regarding a violation of such Act, or in order to investigate a discrimination complaint under section 11(c) of such Act, or as part of a special study monitoring program, or to investigate a fatality or catastrophe: Provided further, That none of the funds appropriated under this paragraph may be obligated or expended for the inspection, investigation, or enforcement of any activity occurring on the Outer Continental Shelf which exceeds the authority granted to the Occupational Safety and Health Administration by any provision of the Outer Continental Shelf Lands Act, or the Outer Continental Shelf Lands Act Amendments of 1978.

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Mine Safety and Health Administration, $153,828,000, including purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work, and the purchase of not to exceed eighty-eight passenger motor vehicles for replacement only; the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private; the Mine Safety and Health Administration is authorized to promote health and safety education and training in the mining community through cooperative programs with States, industry, and safety associations; and any funds available to the Department may be used, with the approval of the Secretary, to provide for the costs of mine rescue and survival operations in the event of major disaster: Provided, That none of the funds appropriated under this paragraph shall be obligated or expended to carry out section 115 of the Federal Mine Safety and Health Act of 1977 or to carry out that portion of section 104(g)(1) of such Act relating to the enforcement of any training requirement, with respect to shell dredging, or with respect to any sand, gravel, surface stone, surface clay, colloidal phosphate, or surface limestone mine.

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

For necessary expenses for the Bureau of Labor Statistics, including advances or reimbursements to State, Federal, and local agencies and their employees for services rendered, $120,143,000.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for Departmental Management, including $1,973,000 for the President's Committee on Employment of the Handicapped, $91,864,000, together with not to exceed $8,752,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund and of which $8,535,000 shall be for carrying into effect the provisions of 38 U.S.C. 2001-03.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law, $67,000, to remain available until expended. This appropriation shall be available in addition to other appropriations to such agency for payments in foreign currencies.

OFFICE OF THE INSPECTOR GENERAL

For salaries and expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, $38,133,000, together with not to exceed $6,835,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

GENERAL PROVISION

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

This title may be cited as the "Department of Labor Appropriation Act, 1983".

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES ADMINISTRATION

HEALTH SERVICES

For carrying out titles III, V, VII, VIII, X, and XIX of the Public Health Service Act, the Act of August 8, 1946 (5 U.S.C. 7901), section 1 of the Act of July 19, 1963 (42 U.S.C. 253a), section 108 of Public Law 93-353, section 427(a) of the Federal Coal Mine Health and Safety Act, as amended, and title V of the Social Security Act, $1,018,563,000 of which $1,732,000 shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with Hansen's disease; and of which $3,292,000, to be available until expended, shall be used to renovate the National Hansen's Disease Center: Provided, That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: Provided further, That when the Health Services Administration operates an employee health program for any Federal department or agency, payment for the estimated cost shall be made by way of reimbursement or in advances to this appropriation: Provided further, That during 1983, and within the resources and authority available under sections 338 and 338E of the Public Health Service Act, gross obligations for the principal amount of direct loans under section 338E of that Act shall not exceed $1,000,000: Provided further, That none of the funds made available by this Act shall be used to provide special retention pay (bonuses) under paragraph (4) of 37 U.S.C. 302(a) to any regular or reserve officer of the Public Health Service for any period during which

the officer is providing obligated service under section 338B (or under former sections 225(e) or 752) of the Public Health Service Act except that this proviso shall not apply to any period of service covered by an agreement entered into by an officer under 37 U.S.C. 302(c)(1) before the date of enactment of this Act.

CENTERS FOR DISEASE CONTROL

PREVENTIVE HEALTH SERVICES

To carry out titles III, XI, and XIX of the Public Health Service Act, the Federal Mine Safety and Health Act of 1977, and the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and purchase, hire, maintenance, and operation of aircraft, $290,701,000, of which $2,050,000 shall remain available until expended and shall be for construction and equipment of facilities of or used by the Centers for Disease Control: Provided, That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training.

NATIONAL INSTITUTES OF HEALTH

NATIONAL CANCER INSTITUTE

For carrying out, to the extent not otherwise provided, the Public Health Service Act with respect to cancer, $983,576,000.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

For expenses, not otherwise provided for, necessary to carry out the Public Health Service Act with respect to heart, lung, blood vessel, and blood diseases, $622,745,000.

NATIONAL INSTITUTE OF DENTAL RESEARCH

For expenses, not otherwise provided for, to carry out title IV of the Public Health Service Act with respect to dental diseases, $78,860,000.

NATIONAL INSTITUTE OF ARTHRITIS, DIABETES, AND DIGESTIVE AND KIDNEY DISEASES

For expenses necessary to carry out title IV of the Public Health Service Act with respect to arthritis, diabetes, digestive and kidney diseases, $412,182,000.

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

For expenses necessary to carry out, to the extent not otherwise provided, title IV of the Public Health Service Act with respect to neurological and communicative disorders and stroke, $295,719,000.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

For expenses, not otherwise provided for, to carry out title IV of the Public Health Service Act with respect to allergy and infectious diseases, $273,581,000.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

For expenses, not otherwise provided for, necessary to carry out title IV of the Public Health Service Act with respect to general medical sciences, $369,561,000.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

To carry out, except as otherwise provided, title IV of the Public Health Service Act with respect to child health and human development, $253,655,000.

NATIONAL EYE INSTITUTE

For expenses necessary to carry out title IV of the Public Health Service Act, with respect to eye diseases and visual disorders, $141,561,000.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

To carry out, except as otherwise provided, sections 301, 311, and 472 of the Public Health Service Act with respect to environmental health sciences, $164,367,000.

NATIONAL INSTITUTE ON AGING

To carry out, except as otherwise provided, title IV of the Public Health Service Act with respect to aging, $93,996,000.

RESEARCH RESOURCES

To carry out, except as otherwise provided, sections 301 and 472 of the Public Health Service Act with respect to research resources and general research support grants, $213,804,000: Provided, That none of these funds, with the exception of funds for the Minority Biomedical Support program, shall be used to pay recipients of the general research support grants program any amount for indirect expenses in connection with such grants.

JOHN E. FOGARTY INTERNATIONAL CENTER FOR ADVANCED STUDY IN THE HEALTH SCIENCES

For the John E. Fogarty International Center for Advanced Study in the Health Sciences, $10,147,000, of which $1,800,000 shall be available for payment to the Gorgas Memorial Institute for maintenance and operation of the Gorgas Memorial Laboratory.

NATIONAL LIBRARY OF MEDICINE

To carry out, to the extent not otherwise provided for, section 301 with respect to health information communications and parts I and J of title III of the Public Health Service Act, $46,043,000.

OFFICE OF THE DIRECTOR

For expenses necessary for the Office of the Director, National Institutes of Health, $24,683,000, including purchase of not to exceed thirteen passenger motor vehicles for replacement only.

BUILDINGS AND FACILITIES

For construction of, and acquisition of sites and equipment for, facilities of or used by the National Institutes of Health, where not otherwise provided, $17,500,000, to remain available until expended.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH

For carrying out the Public Health Service Act with respect to mental health, drug abuse, and alcoholism, $777,556,000, of which $100,000 for design, modernization and improvement of government owned or leased intramural research facilities shall remain available until expended.

SAINT ELIZABETHS HOSPITAL

For expenses necessary for the maintenance and operation of Saint Elizabeths Hospital in the District of Columbia, $76,505,000: Provided, That the Secretary of Health and Human Services may set rates for inpatient and outpatient services provided through Saint Elizabeths Hospital that in the aggregate do not exceed the estimated total cost of providing such services, and may bill and collect from (prospectively or otherwise) individuals, the District of Columbia, Executive agencies and other entities for any services so provided. Amounts so collected shall be credited to the appropriation for Saint Elizabeths Hospital for the year in which the services are provided.

HEALTH RESOURCES ADMINISTRATION

HEALTH RESOURCES

For carrying out titles III, IV, VII, VIII, and XVI of the Public Health Service Act and section 1122 of the Social Security Act, $188,531,000 of which $1,500,000 shall remain available until expended for loan guarantees made prior to fiscal year 1981 and interest subsidies under part B of title VII, $5,000,000 shall remain available until expended for grants for construction of teaching facilities under section 720(a)(3) of the Public Health Service Act, and $29,000,000 shall be available until expended to enable the Secretary of Health and Human Services to enter into appropriate financial arrangements to repay in full any loan to Meharry Medical College guaranteed under section 726 (formerly section 729) of the Public Health Service Act.

MEDICAL FACILITIES GUARANTEE AND LOAN FUND

For carrying out title XVI of the Public Health Service Act, $32,000,000 shall be available without fiscal year limitation for the payment of interest subsidies. The total principal amount of loans to be guaranteed or directly made, which may be allotted among the States, pursuant to titles VI and XVI of the Public Health Service Act shall not exceed a cumulative amount of $1,500,000,000. During fiscal year 1983, no commitments for direct loans or loan guarantees shall be made.

ASSISTANT SECRETARY FOR HEALTH

HEALTH SERVICES MANAGEMENT

For the expenses necessary for the Office of the Assistant Secretary for Health and for carrying out titles III, XIII, and XX of the Public Health Service Act, $96,694,000 and section 2008(g) does not apply to these programs.

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE FUND

Any amounts received by the Secretary as repayment of loans under title XIII of the Public Health Service Act for direct loans as authorized by said title XIII, and not to exceed $16,500,000 may be disbursed with respect to any liability or contingent liability incurred prior to 1983. During 1983 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $24,500,000.

RETIREMENT PAY AND MEDICAL BENEFITS FOR COMMISSIONED OFFICERS

For retirement pay and medical benefits of Commissioned Officers as authorized by law, and for payments under the Retired Serviceman's Family Protection Plan and Survivor Benefit Plan and for medical care of dependents and retired personnel under the Dependents' Medical Care Act (10 U.S.C., ch. 55), such amounts as may be required during the current fiscal year: Provided, That none of these funds shall be available for payment to retired personnel of the Coast Guard or the National Oceanic and Atmospheric Administration or to the survivors of such personnel or for payment of medical care for dependents of such personnel and shall be used solely for Commissioned Officers of the Public Health Service, their dependents and survivors.

HEALTH CARE FINANCING ADMINISTRATION

GRANTS TO STATES FOR MEDICAID

For carrying out, except as otherwise provided, title XIX of the Social Security Act, $19,361,845,000 to remain available until expended.

For making, after June 30 of the current fiscal year, payments to States under title XIX of the Social Security Act, for the last three months of the current fiscal year, such sums as may be necessary, the obligations

incurred and the expenditures made thereunder for payments under such title to be charged to the subsequent appropriation therefor for the current or succeeding fiscal year.

In the administration of title XIX of the Social Security Act, payments to a State under such title for any quarter in the period beginning July 1 of the prior year and ending September 30 of the current year may be made with respect to a State plan approved under such title prior to or during such period. After a plan or plan amendment is approved, payment may be made with respect to it for the quarter in which it was submitted or any subsequent quarter in which it remains in effect.

Such amounts as may be necessary from this appropriation shall be available for grants to States for any period in the prior fiscal year subsequent to June 30 of that year.

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1984, $5,105,600,000 to remain available until expended.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under sections 217(g), 229(b) and 1844 of the Social Security Act, sections 103(c) and 111(d) of the Social Security Amendments of 1965, and section 278(d) of P.L. 97-248 $15,347,000,000.

PROGRAM MANAGEMENT

For carrying out, except as otherwise provided, titles XI, XVIII and XIX of the Social Security Act, and sections 1526 and 1533(d) of the Public Health Service Act, $92,905,000 together with not to exceed $959,671,000, to be transferred to this appropriation as authorized by section 201(g)(1) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: Provided, That these amounts shall be in addition to funding for this purpose available under section 118 of Public Law 97-248. Provided further, That $20,000,000 of the foregoing amount shall be expended only to the extent necessary to process workloads not anticipated in the budget estimates and to meet unanticipated costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: Provided further, That none of the funds appropriated under this paragraph shall be allotted or otherwise awarded to any Professional Standards Review Organization which the Secretary of the Department of Health and Human Services has determined should be terminated from the Professional Standards Review Program because of its inability to effectively or efficiently discharge its responsibilities under the Social Security Act.

SOCIAL SECURITY ADMINISTRATION

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

For payment to the Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Funds, as provided under sections 217(g), 228(g), 229(b), and 1131(b)(2) of the Social Security Act, $855,213,000.

SPECIAL BENEFITS FOR DISABLED COAL MINERS

For carrying out title IV of the Federal Mine Safety and Health Act of 1977, including the payment of travel expenses on an actual cost or commuted basis, to an individual, for travel incident to medical examinations, and to parties, their representatives and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands, to reconsideration interviews and to proceedings before administrative law judges, $1,093,000,000: Provided, That after July 31, such amounts for benefit payments as may be necessary may be charged to the subsequent year appropriation.

SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out the Supplemental Security Income Program under title XVI of the Social Security Act, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the social security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, $8,543,616,000 to remain available until expended: Provided, That after July 31, such amounts for benefit payments as may be necessary may be charged to the subsequent year appropriation: Provided further, That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury.

ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV, X, XI, XIV, and XVI of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), $6,684,207,000, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under titles I, IV, X, XIV, and XVI of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and expenditures to be charged to the subsequent appropriations therefor for the current fiscal year.

For making payments to States under titles I, IV, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year 1984, $1,718,000,000, to remain available until expended.

CHILD SUPPORT ENFORCEMENT

For carrying out, except as otherwise provided, titles IV-D and XI of the Social Security Act, $347,500,000 to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under title IV-D of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and the expenditures to be charged to the subsequent appropriations therefor.

For making payments to States under title IV-D of the Social Security Act for the first quarter of fiscal year 1984, $118,000,000 to remain available until expended.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM

For carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, $1,850,000,000.

REFUGEE AND ENTRANT ASSISTANCE

For expenses necessary to carry out the provisions of the Refugee Act of 1980, as amended, and sections 501 (a) and (b) of the Refugee Education Assistance Act of 1980, $585,000,000: Provided, That such funds may be expended for individuals who would meet the definition of "Cuban and Haitian entrant" under section 501(e) of the Refugee Education Assistance Act, 94 Stat. 1810, but for the application of paragraph (2)(B) thereof.

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses, not more than $3,408,451,000 may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: Provided, That travel expense payments under section 1631(h) of such Act may be made only when travel of more than seventy-five miles is required: Provided further, That $50,000,000 of the foregoing amount shall be apportioned for use pursuant to section 3679 of the Revised Statutes (31 U.S.C. 665), only to the extent necessary to process workloads not anticipated in the budget estimates, for automation projects, and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: Provided further, That $47,026,000 authorized herein shall be available only for acquisition of sites, construction, renovation, and equipment of facilities and for payments for principal, interest, taxes and any other obligations under contracts entered into pursuant to the Public Buildings Purchase Contract Act of 1954 and the Public Buildings Amendments of 1972, and shall remain available until expended: Provided further, That $151,625,000 for automatic data processing and telecommunications activities shall remain available until expended.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

SOCIAL SERVICES BLOCK GRANTS

For carrying out the Social Services Block Grant Act, $2,450,000,000.

HUMAN DEVELOPMENT SERVICES

For carrying out, except as otherwise provided, the Older Americans Act of 1965, the Child Abuse Prevention and Treatment Act, title VIII of the Community Services Act, the Developmental Disabilities Assistance and Bill of Rights Act of 1981, and the Head Start Act of 1981, $1,753,514,000, of which $43,180,000 shall be for grants under part C of the Developmental Disabilities Assistance and Bill of Rights Act, and $7,320,000 shall be for section 113 of such Act.

CHILD WELFARE SERVICES

For carrying out, except as otherwise provided, parts A, B, and E of title IV and sections 1110 and 1115 of the Social Security Act and title II of Public Law 95-266 (adoption opportunities), $572,669,000.

WORK INCENTIVES

For carrying out a work incentive program, as authorized by part C of title IV of the Social Security Act, including registration of individuals for such programs, and for related child care and other supportive services, as authorized by section 402(a)(19)(G) of the Act, including transfer to the Secretary of Labor, as authorized by section 431 of the Act, $270,760,000 which shall be the maximum amount available for transfer to the Secretary of Labor and to which the States may become entitled pursuant to section 403(d) of such Act, for these purposes.

OFFICE OF COMMUNITY SERVICES

COMMUNITY SERVICES BLOCK GRANT

For carrying out the Community Services Block Grant Act, $360,500,000, of which $18,840,000 shall be for carrying out section 681(a)(2)(A), $3,840,000 shall be for carrying out section 681(a)(2)(D), $2,880,000 shall be for carrying out section 681(a)(2)(E), and $5,760,000 shall be for carrying out section 681(a)(2)(F): Provided, That the Secretary of Health and Human Services may waive the requirements of section 138 of Public Law 97-276, relating to continuing appropriations for fiscal year 1983, for any State applying for such a waiver if—

(1) the State had, prior to October 1, 1982, submitted an application for fiscal year 1983 under the Community Services Block Grant Act, containing provisions for the use of assistance under that Act by political subdivisions; and

(2) the chief executive officer of the State certifies that, in at least 45 percent of the counties of the State, services assisted under the Community Services Block Grant Act were not available in fiscal year 1982 (other than a State for which the distribution of funds within the State for such fiscal year was contested by more than one eligible entity).

DEPARTMENTAL MANAGEMENT

GENERAL DEPARTMENTAL MANAGEMENT

For expenses not otherwise provided, which are necessary for general departmental management, including hire of six medium sedans, $158,143,000, together with not to exceed $8,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, $44,921,000, together with not to exceed $6,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

For making payments to States for medicaid State fraud control units under section 1903(a)(6) of the Social Security Act for fiscal year 1983, $36,346,000.

For making, after May 31 of the current fiscal year, payments to States under section 1903(a)(6) of the Social Security Act for the last three months of the current fiscal year for unanticipated costs, incurred for the current fiscal year, not to exceed $5,000,000, the obligations and expenditures to be charged to the subsequent appropriations therefor.

For making payments to States for medicaid State fraud control units under section 1903(a)(6) of the Social Security Act for the first quarter of fiscal year 1984, $10,000,000 to remain available until expended.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, $19,163,000, together with not to exceed $2,350,000, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

POLICY RESEARCH

For carrying out, to the extent not otherwise provided, research studies under section 1110 of the Social Security Act, $14,718,000: Provided, That not less than $1,500,000 shall be obligated to continue research on poverty conducted by the Institute for Research on Poverty.

GENERAL PROVISIONS

SEC. 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 202. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

SEC. 203. Appropriations in this Act for the Health Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Health Resources Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand eight hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed $9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

SEC. 204. None of the funds provided by this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term: Provided, however, That the several States are and shall remain free not to fund abortions to the extent that they in their sole discretion deem appropriate.

SEC. 205. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327(a) of the Public Health Service Act.

SEC. 206. Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed $5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. 207. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed $2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

This title may be cited as the "Department of Health and Human Services Appropriation Act, 1983".

TITLE III—DEPARTMENT OF EDUCATION

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

For carrying out chapter 1 of the Education Consolidation and Improvement Act of 1981, $3,160,394,000 to become available on July 1, 1983, and remain available until September 30, 1984: Provided, That no funds shall be used for the purposes of section 554(a)(1)(B), $4,746,000 shall be available for purposes of section 555(d), $255,744,000 shall be available for the purposes of section 554(a)(2)(A), $146,520,000 shall be available for purposes of section 554(a)(2)(B), and $32,616,000 shall be available for purposes of section 554(a)(2)(C).

For carrying out section 418 of the Higher Education Act, $7,500,000.

SPECIAL PROGRAMS

For carrying out the consolidated programs and projects authorized under chapter 2 of the Education Consolidation and Improvement Act of 1981; title IX, part C of the Elementary and Secondary Education Act; title IV of the Civil Rights Act of 1964; the Follow Through Act; sections 1524 and 1525 of the Education Amendments of 1978; and Public Law 92-506, $534,500,000: Provided, That $450,655,000 to carry out the State block grant program authorized under chapter 2 of the Education Consolidation and Improvement Act shall become available for obligation on July 1, 1983, and shall remain available until September 30, 1984: Provided further, That $28,765,000 for the purpose of subchapter D of the Education Consolidation and Improvement Act shall become available for obligation on October 1, 1982: Provided further, That $3,000,000 of the amount appropriated above shall be for the purpose of Public Law 92-506 of which $1,500,000 shall become available on July 1, 1983, and shall remain available until September 30, 1984.

BILINGUAL EDUCATION

For carrying out, to the extent not otherwise provided, title VII of the Elementary and Secondary Education Act and part B, subpart 3 of the Vocational Education Act, as amended, $138,057,000, of which $3,686,000 for part B, subpart 3 of the Vocational Education Act shall become available on July 1, 1983, and shall remain available until September 30, 1984: Provided, That $2,400,000 of the funds appropriated by title III of this bill shall be used for section 751 of title VII of the Elementary and Secondary Education Act.

SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS

For carrying out title I of the Act of September 30, 1950, as amended (20 U.S.C., ch. 13), $455,000,000, of which $445,000,000 shall be for entitlements under sections 2 and 3 and $10,000,000 shall be for payments under section 7 of said Act: Provided, That payment to any local educational agency with respect to entitlements under section 3(a) shall be 90 per centum of the amount of such payment for the fiscal year 1981 unless such agency is determined eligible for payment under section 3(d)(2)(B), except that payment to any local educational agency with respect to entitlements under section 3(a) shall be 95 per centum of the amount of such payment for fiscal year 1981 for any agency in which the number of children determined under such section 3(a) is at least 20 per centum of the total number of children who are in average daily attendance at the schools of such agency; and payment to any local educational agency with respect to entitlements under section 3(b) shall not exceed the amount of such payment for the fiscal year 1982 unless such agency is determined eligible for payment under section 3(d)(2)(B): Provided further, That notwithstanding the payment provisions stated herein, the Secretary is authorized to determine and make payment of a fair and equitable amount with regard to an otherwise eligible local educational agency which was not eligible in the fiscal years 1981 or 1982: Provided further, That the aggregate amount for payments of entitlements calculated under section 3(d)(2)(B) shall not exceed $15,000,000: Provided further, That no payments shall be made under section 3 of said Act to any local educational agency whose payment under that section fails to exceed $5,000: Provided further, That no payments shall be made under section 7 of said Act to any local educational agency whose need for assistance under that section fails to exceed the lesser of $10,000 or 5 per centum of the district's current operating expenditures during the fiscal year preceding the one in which the disaster occurred: Provided further, That in addition to the $10,000,000 appropriated in the foregoing, there is hereby appropriated $5,000,000 for section 2 for the purpose of paying entitlements, including the payment of entitlements under this section for the Douglas School District in the State of South Dakota impacted as a result of Ellsworth Air Force Base which shall be made at 100 per centum of the amount to which such school district is entitled under section 2.

For carrying out the Act of September 23, 1950, as amended (20 U.S.C., ch. 19), $20,000,000 which shall remain available until expended, shall be for providing school facilities as authorized by said Act: Provided, That with the exception of up to $8,500,000 for section 10 and up to $8,500,000 for section 14 (a) and (b), none of the funds contained herein for providing school facilities shall be available to pay for any other section of the Act of September 23, 1950, until payment has been made of 100 per centum of the amounts payable under sections 5 and 14(c).

EDUCATION FOR THE HANDICAPPED

For carrying out the Education of the Handicapped Act, $1,110,252,000, of which $970,000,000 for section 611 and $25,000,000 for section 619 shall become available for obligation on July 1, 1983, and shall remain available until September 30, 1984.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, as amended, and the International Health Research Act of 1960, $1,036,727,000, of which $939,753,158 shall be for allotments under section 100(b)(1), $4,146,842 shall be for activities under section 110(b)(3), and $650,000 shall be made available to the Navajo Tribal Council for activities under section 130: Provided, That of the amount appropriated for centers for independent living under part B of title VII of the Rehabilitation Act of 1973, such amounts as are necessary shall be available for fiscal year 1983 to fund all such centers which received assistance under such part in fiscal year 1981 at the level of assistance made to each such center in fiscal year 1981: Provided further, That of the amount appropriated and available for projects with industry under section 621 of the Rehabilitation Act of 1973, such amounts as are necessary shall be available for fiscal year 1983 to fund all such projects which received assistance under such part in fiscal year 1981 at the level of assistance made to each such project in fiscal year 1981.

VOCATIONAL AND ADULT EDUCATION

For carrying out, to the extent not otherwise provided, the Vocational Education Act, and the Adult Education Act, $816,500,000 which shall become available for obligation on July 1, 1983, and shall remain available until September 30, 1984, except that $7,678,000 for part B, subpart 2 of the Vocational Education Act shall become available for obligation on July 1, 1983, and shall remain available until expended: Provided, That $6,500,000 for State advisory councils under section 105 of the Vocational Education Act shall be used to provide to each State, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Trust Territory of the Pacific Islands, and Northern Mariana Islands an amount equal to the amount it received in the previous fiscal year: Provided further, That not to exceed $99,590,000 shall be for carrying out part A, subpart 3, of the Vocational Education Act: Provided further, That $2,243,100 shall be made available for the National Occupational Information Coordinating Committee.

STUDENT FINANCIAL ASSISTANCE

For carrying out subparts 1, 2, and 3 of part A, and parts C and E of title IV of the Higher Education Act, $3,567,800,000 which shall remain available until September 30, 1984: Provided, That amounts appropriated for Pell Grants shall be available first to meet any insufficiencies in entitlements resulting from the payment schedule for Pell Grants published by the Secretary of Education for the 1982-1983 academic year: Provided further, That pursuant to section 411(b)(4)(A) of the Higher Education Act, amounts appropriated herein for Pell Grants which exceed the amounts required to meet the payments schedule published for any fiscal year by 15 per centum or less shall be carried forward and merged with amounts appropriated for the next fiscal year: Provided further, That the maximum grant a student may receive in the 1983-1984 academic year shall be $1,800 notwithstanding section 411(a)(2)(A)(i)(III) of the Higher Education Act: Provided further, That notwithstanding any other provision of law, such sums as may be necessary not to exceed $30,000,000 of the amount appropriated by Public Law 97-257 for Pell Grants shall be available for the purpose of restoring eligibility for Pell Grants to individuals adversely affected by the modification, pursuant to paragraphs (4) and (5) of section 124 of Public Law 97-92, of the family contribution schedule with respect to the treatment of payments under title 38, United States Code, to such individuals. For the purposes of determining eligibility and amount of Pell Grant awards under this section, only one-third of the benefits received under such title 38 shall be considered as student financial assistance. The Secretary of Education shall take such steps as may be necessary to notify such individuals of restored eligibility and to make appropriate allocations of the reserved sum: Provided further, That notwithstanding any other provision of this Act, any other Act, or section 415B of the Higher Education Act of 1965, the Secretary shall apportion the sums appropriated pursuant to section 415A of the Higher Education Act of 1965 for the fiscal year 1983 among the States so that each State's apportionment bears the same ratio to the total amount appropriated as that State's apportionment in the fiscal year 1982 bears to the total amount appropriated pursuant to section 415A for that fiscal year.

GUARANTEED STUDENT LOANS

For necessary expenses under title IV, part B of the Higher Education Act, $3,100,500,000, to remain available until expended.

HIGHER AND CONTINUING EDUCATION

For carrying out titles III; VI, parts A and B; VIII; IX, parts B, D and E; title X; and sections 417, 420, and 734 of the Higher Education Act; section 406A(2) of the General Education Provisions Act (20 U.S.C. 1221e-1b(2)); section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961; title XIII, part H, subparts 1 and 2 of the Education Amendments of 1980; H.R. 3598 as passed the House on November 4, 1981; and title V, section 528(5) of the Omnibus Budget Reconciliation Act of 1981, without regard to section 512(b) of the Omnibus Budget Reconciliation Act of 1981, $385,525,000: Provided, That funds made available in Public Law 96-536, section 110 for the Wayne Morse Chair of Law and Politics shall remain available for obligation until September 30, 1985: Provided further, That $2,000,000 shall be available until expended for the Carl Albert Congressional Research and Studies Center: Provided further, That $25,000,000 made available for interest subsidy grants under section 734 of the Higher Education Act shall remain available until expended: Provided further, That sections 922(b)(2) and 922(e)(2) and the funding limitations set forth in section 922(e) of the Higher Education Act shall not apply to funds in this Act.

HIGHER EDUCATION FACILITIES LOANS AND INSURANCE

For the payment of principal and interest on participation certificates as authorized

by the Department of Health, Education, and Welfare Appropriation Act, 1968, issued by the Government National Mortgage Association as trustee on the behalf of the Department of Education pursuant to the Federal National Mortgage Association Act (12 U.S.C.1717(c)), and for the payment of interest expenses to the Department of the Treasury as required by title VII, section 733(b)(2) of the Higher Education Act, $20,143,000 to remain available until expended. The Secretary is hereby authorized to make such expenditures, within the limits of funds available under this heading and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 849) as may be necessary in carrying out the program set forth in the budget for the current fiscal year. During fiscal year 1983, no new commitments for loans may be made from this account.

COLLEGE HOUSING LOANS

The aggregate amount of commitments for loans made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), for the fiscal year 1983 shall not exceed the total of loan repayments and other income available during such period, less operating costs. Payments of insufficiencies in fiscal year 1983 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749) using loan repayments and other income available during fiscal year 1983. During fiscal year 1983 and within the resources and authority available, gross commitments for the principal amount of direct loans shall be $40,000,000.

EDUCATIONAL RESEARCH AND STATISTICS

For necessary expenses for education statistics activities and for research and development, to carry out sections 405 and 406 of the General Education Provisions Act, $64,203,000.

EDUCATIONAL, RESEARCH, AND TRAINING ACTIVITIES OVERSEAS (SPECIAL FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies which the Treasury Department determines to be in excess of the normal requirements of the United States, for necessary expenses of the Department of Education, as authorized by law, $516,000, to remain available until expended.

LIBRARIES

For carrying out, to the extent not otherwise provided, titles I and III of the Library Services and Construction Act (20 U.S.C., ch. 16); title II, part A, part B except section 224, and part C of the Higher Education Act, notwithstanding the provisions of section 221, $80,320,000.

SPECIAL INSTITUTIONS

AMERICAN PRINTING HOUSE FOR THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101-105), $5,000,000.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For carrying out the National Technical Institute for the Deaf Act (20 U.S.C. 681 et seq.), $26,300,000.

GALLAUDET COLLEGE

For carrying out the Model Secondary School for the Deaf Act (80 Stat. 1027) and for the partial support of Gallaudet College authorized by the Act of June 18, 1954 (68 Stat. 265), $52,000,000.

HOWARD UNIVERSITY

For partial support of Howard University, $145,200,000. If requested by the university, construction financed by prior year appropriations to this account shall be supervised by the General Services Administration.

OFFICE FOR CIVIL RIGHTS

SALARIES AND EXPENSES

For expenses necessary for the Office for Civil Rights, as authorized by section 203 of the Department of Education Organization Act, $44,868,000.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For carrying out, to the extent not otherwise provided, the Department of Education Organization Act, including rental of conference rooms in the District of Columbia and hire of three medium sedans, $222,000,000. During the current fiscal year up to $10,500,000 from collections of federally insured defaulted loans may be transferred to this account for payment of related collection activities.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, as authorized by section 212 of the Department of Education Organization Act, $12,840,000.

GENERAL PROVISIONS

SEC. 301. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 302. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

SEC. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

SEC. 304. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 305. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed, or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 306. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 307. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

This title may be cited as the "Department of Education Appropriation Act, 1983".

TITLE IV—RELATED AGENCIES

ACTION

OPERATING EXPENSES

For expenses necessary for Action to carry out the provisions of the Domestic Volunteer Service Act of 1973, $129,321,000, of which $11,831,000 shall be available to carry out title I, part A of said Act: Provided, That none of the funds appropriated under this heading may be used to close State field offices of the Action agency or to reduce the number of personnel engaged in operating State field offices of the Action agency.

CORPORATION FOR PUBLIC BROADCASTING

PUBLIC BROADCASTING FUND

For payment to the Corporation for Public Broadcasting, as authorized by the Public Broadcasting Amendments Act of 1981, an amount which shall be available within limitations specified by said Act, for the fiscal year 1985, $130,000,000: Provided, That no funds made available to the Corporation for Public Broadcasting by this Act shall be used to pay for receptions, parties and similar forms of entertainment for government officials or employees: Provided further, That none of the funds contained in this paragraph shall be available or used to aid or support any program or activity excluding from participation in, denying the benefits of, or discriminating against any person on the basis of race, color, national origin, religion or sex.

FEDERAL MEDIATION AND CONCILIATION SERVICE

SALARIES AND EXPENSES

For expenses necessary for the Federal Mediation and Conciliation Service to carry

out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171-180, 182), including expenses of the Labor-Management Panel and boards of inquiry appointed by the President, hire of passenger motor vehicles, and rental of conference rooms in the District of Columbia; and for expenses necessary pursuant to Public Law 93-360 for mandatory mediation in health care industry negotiation disputes and for convening factfinding boards of inquiry appointed by the Director in the health care industry; and for expenses necessary for the Labor-Management Cooperation Act of 1978 (29 U.S.C. 125a); and for expenses necessary for the Service to carry out the functions vested in it by the Civil Service Reform Act, Public Law 95-454 (5 U.S.C. Chapter 71), $21,321,000.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary for the Federal Mine Safety and Health Review Commission, $3,686,000.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

SALARIES AND EXPENSES

For necessary expenses of the National Commission on Libraries and Information Science, established by the Act of July 20, 1970 (Public Law 91-345), $674,000.

NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

For necessary expenses to carry out section 491 of the Higher Education Act, $840,000.

NATIONAL LABOR RELATIONS BOARD

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, $124,045,000: Provided, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

NATIONAL MEDIATION BOARD

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151-188), including emergency boards appointed by the President, $5,468,000.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary for the Occupational Safety and Health Review Commission, $6,316,000.

RAILROAD RETIREMENT BOARD

DUAL BENEFITS PAYMENTS ACCOUNT

For payment to the Dual Benefits Payments Account, authorized under section 15(d) of the Railroad Retirement Act of 1974, $430,000,000, which shall be credited to the account in 12 approximately equal amounts on the first day of each month in the fiscal year.

LIMITATION ON ADMINISTRATION

For expenses necessary for the Railroad Retirement Board, $46,361,000 to be derived from the railroad retirement accounts: Provided, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 1,162 full-time-equivalent employees: Provided further, That $500,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: Provided further, That notwithstanding any other provisions in law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228 a-r). For further expenses necessary for the Railroad Retirement Board, for administration of the Railroad Unemployment Insurance Act, not less than $16,644,000 shall be apportioned for fiscal year 1983 pursuant to section 3679 of the Revised Statutes, as amended (31 U.S.C. 665) from moneys credited to the railroad unemployment insurance administration fund: Provided, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 416 full-time-equivalent employees.

MILWAUKEE RAILROAD RESTRUCTURING, ADMINISTRATION

For administrative expenses authorized by section 14(c) of the Milwaukee Railroad Restructuring Act, $250,000.

SOLDIERS' AND AIRMEN'S HOME

OPERATION AND MAINTENANCE

For maintenance and operation of the United States Soldiers' and Airmen's Home, to be paid from the Soldiers' and Airmen's Home permanent fund, $26,718,000: Provided, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army upon recommendation of the Board of Commissioners and the Surgeon General of the Army.

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 507. The Secretaries of Labor, Education, and Health and Human Services are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: Provided, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 510. The Secretaries of Labor, Education, and Health and Human Services are each authorized to make available not to exceed $7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. 511. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 512. Section 104 of Public Law 97-276 is deemed to charge no amount appropriated by section 132, 134, 137, 141, or 142 of that joint resolution to any appropriation, fund, or authorization contained in this or any other measure whenever enacted.

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1983".

And the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as follows:

In lieu of subsection "(5)" named in said amendment, insert: *"(3)"*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Provided further, That Department of Energy, Atomic Energy Defense Activities, shall be funded at not to exceed an annual rate for new obligational authority of $5,700,000,000, of which not more than $4,372,000,000 shall be available for operating expenses and not more than $1,328,000,000 shall be available for plant and capital equipment, except that no funds shall be available for Project 82-D-109.

And the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $519,711,198: Provided, That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by $8,651,475,689: Provided further, That of the budget authority provided herein, $361,760,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, $1,834,000,000 shall be for assistance for projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q), and $2,500,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437l): Provided further, That all budget authority recaptured and becoming available for obligation in fiscal year 1983 shall only be made available for annual contributions contracts under the section 8 moderate rehabilitation program and the section 8 existing housing program (42 U.S.C. 1437f): Provided further, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1983, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1983: Provided further, That the $89,321,727 of budget authority deferred and made available in accordance with the provisos under the heading "Annual Contributions for Assisted Housing" in Chapter VII of the Supplemental Appropriations Act, 1982 (Public Law 97-257), shall be made available for the modernization of vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such act: Provided further, That none of the merged amounts available for obligation in 1983 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439): Provided further, That with respect to newly constructed and substantially rehabilitated projects under section 8 of the United States Housing Act of 1937, as amended, during 1983, the Secretary shall not impose a percentage or other arbitrary limitation on the cost and rent increases resulting from increased construction cost in exercising the authority to approve cost and rent increases set forth in section 8(1) of such Act: Provided further, That no funds provided in this joint resolution or any other Act shall be used to administer or implement any regulation, policy direction or handbook instruction concerning maximum total development costs applicable to the public housing, Indian housing or low-rent homeownership programs not in effect before September 7, 1982: Provided further, That the proceeding proviso may be waived by the Committees on Appropriations after the Department of Housing and Urban Development presents to the Appropriations Committees, an analysis of the impact of the maximum total development cost regulation, published September 8, 1982 in the Federal Register, amending 24 CFR 804, 805 and 841, upon the ability of local public housing authorities to develop the units in the pipeline in a timely fashion.

And the Senate agree to the same.

Amendment numbered 31:

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows:

In lieu of the sum named in said amendment insert: *$181,200,000,* and the Senate agree to the same.

Amendment numbered 34:

That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

(h) Notwithstanding any other provision of this joint resolution such amounts as may be necessary for programs, projects, or activities provided for in the Department of the Interior and Related Agencies Appropriation Act, 1983 (H.R. 7356), to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (House Report Number 97-978), passed by the House of Representatives on December 18, 1982, and by the Senate on December 19, 1982, as if such Act had been enacted into law: Provided, That notwithstanding any other provision of this joint resolution or any other Act including the Department of the Interior and Related Agencies Appropriation Act, 1983, $2,000,000 is appropriated for "Fossil energy research and development", Department of Energy, to remain available until expended.

And the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and inserted, insert: *"111A"*; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and inserted, insert: *"111B"*; and the Senate agree to the same.

Amendment numbered 70:

That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

SEC. 128. No funds provided under this joint resolution shall be used to deny or reduce supplemental security income or aid to families with dependent children benefits because of home energy assistance provided by a private nonprofit organization, or any entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental body, if the appropriate State agency has certified that such assistance was based on need as determined by such organization or entity.

And the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert:

SEC. 128. (a) Section 101(e) of Public Law 97-276 is amended by striking out "December 17, 1982," and inserting "September 30, 1983,".

(b) In lieu of payment of salary increases of up to 27.2 percent as authorized by law for senior executive, judicial, and legislative positions (including members of Congress), it is the purpose of this section to limit such increases to 15 percent. Notwithstanding the provisions of section 306 of S. 2939 made applicable by subsection (a) of this section, nothing in subsection (a) shall (or be construed to) require that the rate of salary or pay payable to any individual for or on account of services performed after December 17, 1982, be limited to an amount less than the rate (or maximum rate, if higher) of salary or pay payable as of such date for the position involved increased by 15 percent

and rounded in accordance with section 5318 of title 5, United States Code.

(c) Subsection (b) shall not apply to Senators.

(d) For the purposes of any rule, regulation, or order having the force and effect of law and limiting the annual rates of compensation of officers and employees of the Senate by reference to the annual rate of pay of Senators, the annual rate of pay of Senators shall be deemed to be the annual rate of pay that would be payable to Senators without regard to subsection (c) of this section.

And the Senate agree to the same.

Amendment numbered 75:

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert

SEC. 132. Notwithstanding any other provision of this joint resolution, none of the funds appropriated or made available (other than funds for "Operating expenses of the Agency for International Development") pursuant to this Act for carrying out the Foreign Assistance Act of 1961, may be used to finance the operating expenses of the Agency for International Development, except that funds contained in deferral numbered D83-1 shall be used for operating expenses of the Agency for International Development.

And the Senate agree to the same.

Amendment numbered 79:

That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 136. Any commuter authority operating commuter service transferred from the Consolidated Rail Corporation under part 2 of the Northeast Rail Service Act of 1981 shall be subject to applicable laws with respect to such service.

And the Senate agree to the same.

Amendment numbered 92:

That the House recede from its disagreement to the amendment of the Senate numbered 92, and agree to the same with amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 149. The authorization for the water project on Bradley Lake, near Cook Inlet, Alaska described in the plans recommended in the report of the Chief of Engineers contained in House Document Numbered 455, 87th Congress, which plan was adopted and authorized by the Flood Control Act of 1962 (76 Stat. 1180, 1193) is hereby terminated: Provided, That for clarification, funds in the amount of $31,050,000 authorized to be appropriated in fiscal year 1978 for continuation of construction of distribution systems and drains on the San Luis Unit, Central Valley Project under Public Law 95-46 shall remain available until expended: Provided further, That $4,000,000 shall be made available for the Yatesville Lake construction project: Provided further, That funds available or hereafter made available for the project for flood protection on the Sacramento River, California, authorized by the Flood Control Act of 1960, may be used for construction of bank erosion control works along the banks of the Sacramento River for Chico Landing to the upstream ends of the project levees.

And the Senate agree to the same.

Amendment numbered 93:

That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment, as follows:

In lieu of the sum named by said amendment insert *$3,500,000*; and the Senate agree to the same.

Amendment numbered 94:

That the House recede from its disagreement to the amendment of the Senate numbered 94, and agree to the same with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 151. (a) For payment to the Alaska Railroad Revolving Fund for capital improvements, replacements, operations, and maintenance, $7,600,000, to remain available until expended.

(b) For an additional amount to execute contracts for the Dodge Island Bridge Project, Miami, Florida, in accordance with the provisions of Title 23, United States Code, Section 144, $23,200,000 to be derived from the Highway Trust Fund, and to remain available until expended: Provided, That, notwithstanding any other provision of law, obligations incurred under this section shall not be subject to any limitation on obligations for federal-aid highways.

And the Senate agree to the same.

Amendment numbered 95:

That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 152. Notwithstanding any other provision of this joint resolution, until the United States court of Appeals for the District of Columbia renders a final decision in Case No. 82-2389, (National Cable Television Assoc., Inc. v. Copyright Royalty Tribunal), or March 15, 1983, whichever occurs first, no funds appropriated by this joint resolution or any other Act of Congress which provides funds for the Library of Congress and the Copyright Royalty Tribunal for fiscal year 1983 shall be expended to implement, enforce, award, or collect royalty fees under, and no obligation or liability for copyright royalty fees shall accrue until March 15, 1983 pursuant to, the decision announced by the Copyright Royalty Tribunal on October 20, 1982, Docket Numbered 81-2, and any subsequent decision, order, memorandum, or opinion issued by the Tribunal in such docket, insofar as such decision and any subsequent decision, order, memorandum, or opinion relate to the establishment of a royalty rate of 3.75 per centum of the gross receipts of certain cable systems for the carriage of certain distant signal equivalents. Nothing in this section shall be construed as barring the Copyright Royalty Tribunal from expending funds to decide, and to issue written materials with regard to its Docket Number 81.2, and to defend in court or elsewhere its decisions, orders, memoranda, or opinions in such docket or relating to the subject matter of such docket.

Nothing in this joint resolution shall inhibit the Library of Congress and the Copyright Office from expending funds duly appropriated for the general purpose of administering the Copyright Act, including the compulsory licensing provisions therein, except as solely and specifically related to implementation of the Copyright Royalty Tribunal's rate determination of October 20, 1982 as set out in 47 FR 42146 (November 19, 1982) until the Court of Appeals has rendered a final decision regarding said determination as it relates to the distant signal rate adjustment.

And the Senate agree to the same.

Amendment numbered 96:

That the Hosue recede from its disagreement to be the amendment of the Senate numbered 96, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 153. Notwithstanding any provision of this joint resolution or any other law or regulation, payments for local educational agencies under the Act of September 30, 1950 (Public Law 874, 81st Congress) in Montana for fiscal year 1983 shall be computed from corrected 1981 financial data. The provisions of this section shall not apply unless the following conditions are met:

(1) No such payments shall be made until an audit is conducted. (2) No such payments shall be made prior to March 30, 1983. (3) The total amount of the increase in payments made by reason of this section shall not exceed $3,000,000. (4) No such payments shall be made prior to the submission of the audit report to the Committee on Appropriations of the Senate and of the House of Representatives.

And the Senate agree to the same.

Amendment numbered 99:

That the House recede from its disagreement to the amendment of the Senate numbered 99, and agree to the same with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 156. Notwithstanding any other provision of this joint resolution, section 5546a(a) of title 5, United States Code, is amended (1) by deleting the period at the end of paragraph (2) of subsection (a) and inserting in lieu thereof a semicolon and the word "and", and (2) by inserting immediately after paragraph (2) of subsection (a) the following new paragarph:

"(3) any employee of the Federal Aviation Administration who occupies a position at the Federal Aviation Administration Academy, Oklahoma City, Oklahoma, the duties of which are determined by the Administrator to require the individual to be actively engaged in or directly responsible for training employees to perform the duties of a position described in subparagraphs (a); (b); or (c) or paragraph (1) of this subsection, and who, immediately prior to assuming such position at such Academy, occupied a position referred to in subparagraph (a), (b), or (c) of paragraph (1) of this subsection.".

And the Senate agree to the same.

Amendment numbered 110:

That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

"SEC. 110. (a) It is the purpose of this section to provide the Secretary of Energy the exclusive authority for the disbursement of the designated petroleum violation escrow funds for limited restitutional purposes (1) which are reasonably expected to benefit the class of persons injured by such violations, and (2) which, based on information previously provided to Congress by the Secretary of Energy, are likely not to be, through procedures established by regulation, otherwise refunded to injured persons because the purchasers of the refined petroleum products cannot be reasonably identified or paid or because the amount of each purchaser's

overcharge is too small to be capable of reasonable determination.

(b) As soon as practicable, the Secretary of Energy shall disburse designated petroleum violation escrow funds to the Governors of the States in accordance with the formula set forth in subsection (d).

(c) Amounts disbursed to the Governor of any state shall be used by the Governor as if such funds were received under one or more energy conservation programs. The Governor shall identify to the Secretary within one year after the time of disbursement the energy conservation program or programs to which the funds are or will be applied. Funds disbursed under this section shall be used to supplement, and not supplant, funds otherwise available for such programs under Federal or State law.

(d) The disbursement by the Secretary of Energy to each State shall be based on the ratio, calculated by the Secretary, which

(1) the volume of refined petroleum products consumed within that State during the period beginning September 1, 1973, and ending January 28, 1981, bears to

(2) the volume of refined petroleum products consumed within all States during such period.

Calculations made by the Secretary of Energy under this subsection shall be based upon estimates by the Secretary from reasonably available information.

(e) For purposes of this section—

(1) The term "designated petroleum violation escrow funds" means amounts (not in excess of $200,000,000) which are derived from settlements from alleged petroleum pricing and allocation violations generally resulting in overcharges to purchasers of refined petroleum products and held in trust accounts administered by the Department of Energy on December 17, 1982, and which—

(A) are not likely to be required for satisfying claims of potential claimants identified in the proceedings of the Office of Hearings and Appeals initiated prior to December 17, 1982, or identified in judicial proceedings initiated prior to such date; and

(B) the use of under this section would be consistent with the remedial order or consent order covering such funds.

(2) The term "energy conservation programs" means—

(A) the program under Part A of the Energy Conservation and Existing Buildings Act of 1976 (42 U.S.C. 6861 and following);

(B) the programs under part D of title III of the Energy Policy and Conservation Act (relating to primary and supplemental State energy conservation programs; 42 U.S.C. 6321 and following);

(C) the program under part G of title III of Energy Policy and Conservation Act (relating to energy conservation for schools and hospitals; 42 U.S.C. 6371 and following);

(D) program under the National Energy Extension Service Act (42 U.S.C. 7001 and following); and

(E) the program under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 and following).

(3) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

(4) The term "Governor", when used with respect to any State, means the Governor or the chief executive officer of that State.

(5) The term "refined petroleum product" means gasoline, kerosene, distillates, (including Number 2 fuel Oil), LPG (other than ethane), refined lubricating oils, diesel fuel, and residual fuel oil, but does not include refinery feedstocks.

(f) No funds disbursed under this section may be used for any administrative expenses of the Department of Energy or of any State, whether incurred in connection with any energy conservation program or otherwise."

And the Senate agree to the same.

Amendment numbered 119:

That the House recede from its disagreement to the amendment of the Senate numbered 119, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 176. Funds in this joint resolution may not be made available for payment to the International Atomic Energy Agency unless the Board of Governors of the International Atomic Energy Agency certifies to the United States Government that the State of Israel is allowed to participate fully as a member nation in the activities of that Agency, and the Secretary of State transmits such certification to the Speaker of the House of Representatives and the President of the United States Senate.

And the Senate agree to the same.

Amendment numbered 121:

That the House recede from its disagreement to the amendment of the Senate numbered 121, and agree to the same with an amendment, as follows:

In lieu of the sum named in said amendment insert: *$100,000,000*; and the Senate agree to the same.

Amendment numbered 125:

That the House recede from its disagreement to the amendment of the Senate numbered 125, and agree to the same with an amendment, as follows:

In lieu of the sum named in said amendment insert: *$25,000,000*; and the Senate agree to the same.

Amendment numbered 127:

That the House recede from its disagreement to the amendment of the Senate numbered 127, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 184. Notwithstanding any other provision of this joint resolution, $94,000 is appropriated to the United States Fish and Wildlife Service, "Resource Management".

And the Senate agree to the same.

Amendment numbered 131:

That the House recede from its disagreement to the amendment of the Senate numbered 131, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

SEC. 188. Notwithstanding any other provision of law, an additional amount of $2,000,000 shall be available to the Secretary of Labor to enter into a contractual or other agreement to support social science and historical studies of international labor issues.

And the Senate agree to the same.

Amendment numbered 133:

That the House recede from its disagreement to the amendment of the Senate numbered 133, and agree to the same with an amendment, as follows:

Delete the matter stricken by the Senate and delete the matter proposed by the Senate.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 631), making further continuing appropriations and providing for productive employment for the fiscal year 1983 and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and

recommended in the accompanying conference report:

TITLE I—FURTHER CONTINUING APPROPRIATIONS ACT, 1983

Amendment No. 1: Technical change as proposed by the Senate.

Amendment No. 2: Deletes "Agriculture, Rural Development and Related Agencies Appropriation Act, 1983" from Title I as proposed by the Senate.

Amendment No. 3: Deletes House reference to the "District of Columbia Appropriation Act, 1983;" from section 101(a)(1) which provides funding for activities in the D.C. Appropriation Act (H.R. 7144) at the House or Senate bill rate, whichever is lower. See amendment No. 36 for the funding rate agreed to by the Committee of Conference.

Amendment No. 4: Deletes language proposed by the House which would have provided funding for programs and activities in the Department of the Interior and Related Agencies Bill at the lower of the House or Senate passed levels.

Amendment No. 5: Deletes language proposed by the House which provides for funding projects and activities in the Department of Transportation and Related Agencies Appropriation Act at the lower of the House or Senate passed bill.

Amendment No. 6: Changes paragraph number.

Amendment No. 7: Provides for an expiration date of September 30, 1983 for foreign assistance programs as proposed by the House and drops the earmarking for the United Nations Development Program which is carried in another section.

Amendment No. 8: Provides funding for programs normally contained in the Foreign Assistance Appropriation bill at a level for new budget authority of $8,113,729,656 for economic and military assistance and $4,400,000,000 for the Export Import Bank compared with $7,869,288,970 and $4,400,000,000 proposed by the House and $8,534,562,565 and $4,400,000,000 proposed by the Senate.

A number of the accounts within the foreign assistance program, both military and economic, are well below the administration's request. During these times of constraint on the domestic budget, high deficits, and budgetary limitations, the Conferees cannot at this time recommend any higher levels. However, should serious and far reaching foreign policy problems develop as a result of these recommendations, the Appropriations Committees of the House and Senate would be willing to consider additional requests in a supplemental. However, any such supplemental request must be in response to serious emergency needs. A simple re-requesting of those items which the conferees have not provided under the regular fiscal year 1983 budget estimates will not be considered genuine needs resulting from real foreign policy problems.

The conferees are seriously concerned about the growing number of expropriation cases involving U.S. companies in foreign countries. In case after case, the Department of State, which is responsible for these matters frequently appears to be more interested in defending the position of the foreign country rather than the rights of U.S. citizens. Consequently, more and more foreign countries are failing to respect internationally recognized tenets of law involving expropriation claims. Besides the issue of Honduras which is referenced in the Conference Report, the conferees are particularly concerned about expropriation claims in El Salvador, Indonesia and Haiti. The conferees expect prompt resolution of these matters.

In the House report accompanying the fiscal year 1982 foreign Assistance Appropriations bill, language was included that requested the Agency for International Development and the Department of Treasury to report to the appropriate Committees on the domestic economic policies of countries receiving development assistance by February 1 of each year beginning in 1982. The 1982 reports were not received. The conferees fully expect the Administrator of AID and the Secretary of the Treasury to provide these reports as requested on an annual basis.

Although the conferees have agreed to recommend funding for the International Fund for Agricultural Development, (IFAD), the conferees continue to have a number of concerns which are fully discussed in the Senate report accompanying the Foreign Assistance bills for fiscal year 1982 and fiscal year 1983. the conferees expect that these concerns will be resolved before IFAD receives additional funding in subsequent years.

The conferees are concerned over the numerous critical reports from the Office of the Inspector General of the Agency for International Development concerning management of the Sahel Development Program. The conferees expect that significant improvements in the management of this program will be forthcoming if it is to continue to receive funding at the present levels.

The conferees have reduced funding for the Migration and Refugee Account by $24,000,000 below the budget request level. This reduction is based primarily on concerns about the United Nations Relief and Works Agency (UNRWA) and its involvement with the Palestine Liberation Organization. These concerns are fully discussed in the Senate report accompanying the 1983 Foreign Assistance bill. The conferees expect these issues to be resolved before additional funding will be provided to UNRWA.

The conferees have not provided funds for the new anti-terrorism program requested by the Administration. The denial of funds was based in part on a lack of details regarding the countries in which the program would operate and the type of equipment that would be supplied. If the Administration desires to request this program again in the future and provides sufficient information about it the Committees will consider it.

The conferees have provided authority amounting to $125,000,000 for the Special Defense Acquisition Fund, the same level as provided in fiscal year 1982. Because this program has only been operating for one year the conferees were reluctant to increase the funding available to it before a thorough review could be made of its initial operation and performance. Accordingly the conferees direct that the General Accounting Office make a complete review of the program and report back to the Committees well in advance of their budget deliverations on fiscal year 1984 funding.

The funds provided for international organizations and programs are allocated as shown in the following table:

United Nations:	
U.N. Development Program	140,000
U.N. Children's Fund	42,500
U.N. Capital Development Fund	2,000
U.N./Food and Agriculture Organization: World Food Program	2,000
U.N. Voluntary Fund for the Decade for Women	.....
World Meteorological Organization Voluntary Cooperation Program	2,300
International Atomic Energy Agency	10,000
U.N. Environment Program	7,850
U.N. Educational and Training Program for Southern Africa	1,000
U.N. Institute for Namibia	500
U.N. Trust Fund for South Africa	343
U.N. Institute for Training and Research	422
Convention on International Trade in Endangered Species.	138
International Fund for Agriculture Development	24,000
U.N. fellowship program	449
Subtotal, United Nations	233,502
Organization of American States.	15,500
Total, International Organizations and Programs	249,002

DEPARTMENT OF DEFENSE APPROPRIATIONS

Amendment No. 9: Section 101(c) of House Joint Resolution 631 provides appropriations for programs, projects and activities provided for in the Department of Defense Appropriations Act, 1983. The House version of the joint resolution provides appropriations for programs, projects and activities at a rate of operations and to the extent and in the manner provided for in H.R. 7355 as passed the House of Representatives on December 8, 1982. The Senate version of the joint resolution provides appropriations for these programs, projects and activities at the rate and in the manner provided for in S. 2951 as reported to the Senate on September 23, 1982, with certain exceptions, and placed certain restrictions on MX missile funding.

The conference agreement on House Joint Resolution 631 incorporates some of the provisions of both the House and Senate versions of the Department of Defense Appropriations Act, 1983, and has the effect of enacting the Act into law. The language and allocations set forth in House Report 97-943 and Senate Report 97-580 should be complied with unless specifically addressed in this joint resolution and statement of the managers to the contrary. The Department of Defense Appropriaton Act, 1983 put in place by this joint resolution incorporates the following agreements of the managers.

Pay raise.—The managers concur with the House position with regard to the fiscal year 1983 pay raise. Achievement of 25 percent absorption will require an intensive scrutiny of all DoD accounts, and may well require, transfers and reprogrammings, especially into the military personnel accounts. The managers, therefore, direct the Department to submit a plan for achieving these amounts by May 15.

TITLE I—MILITARY PERSONNEL

The conferees agree to the following amounts for the Military Personnel accounts:

[In thousands of dollars]

	Budget	House	Senate	Conference
SUMMARY				
MILITARY PERSONNEL, ARMY	15,363,700	14,478,149	14,023,827	14,454,848
MILITARY PERSONNEL, NAVY	11,275,300	10,566,028	10,230,678	10,537,408
MILITARY PERSONNEL, MARINE CORPS	3,496,300	3,300,008	3,221,394	3,293,277
MILITARY PERSONNEL, AIR FORCE	12,857,800	12,112,952	11,748,221	12,099,850
RESERVE PERSONNEL, ARMY	1,302,000	1,247,450	1,224,800	1,247,250
RESERVE PERSONNEL, NAVY	683,500	657,125	641,300	657,125
RESERVE PERSONNEL, MARINE CORPS	175,500	170,925	165,900	170,900
RESERVE PERSONNEL, AIR FORCE	372,300	358,925	350,900	358,925
NATIONAL GUARD PERSONNEL, ARMY	1,792,500	1,695,150	1,669,200	1,698,800
NATIONAL GUARD PERSONNEL, AIR FORCE	583,600	549,553	534,100	548,425
TOTAL, MILITARY PERSONNEL	47,902,500	45,136,265	43,810,320	45,066,808

The following items represent language as agreed to by the conferees:

European troop strength.—The House made no specific force structure assumptions in connection with its end strength actions, while the Senate specifically directed the Army to deactivate the 3rd Brigade, 1st Cavalry Division, and directed the Department to hold European strength to 1980 levels. The Senate, however, added language to the joint resolution which established a limitation on active U.S. military personnel stationed on shore in Europe at the planned 1982 level, except that the President may waive this limitation if he declares to Congress that overriding national security requirements make such action necessary. The managers concur with the language added by the Senate to the joint resolution. Furthermore, the managers reduce the budget by the amount of support savings associated with the disestablishment of the European Brigade. The Department is directed to report to the Appropriations Committees by March 30, 1982, describing exactly how the savings will be achieved, either through disestablishment of the European Brigade or by other changes in force structure, if the Department attests that the European Brigade is essential and must be maintained.

Reenlistment bonus drag along—The managers intend the amounts provide in this Act to fund the selective reenlistment bonus program through fiscal year 1983. It has been the practice in the past for the Department to initiate cost of living adjustments for this program after the fiscal year began, and to seek funding necessary to cover these actions through supplemental appropriations. The managers' action does not preclude continuation of the Department's practice of linking the program to cost of living adjustments. It simply requires the Department to fund these actions within the total amount appropriated for the program in the regular annual defense appropriations bill. If the Department wishes to continue the practice of linkage, the managers urge the Department to include the full estimated costs of the program in the original budget submission for the year.

Enlistment bonus test.—The managers expect the ongoing Army enlistment bonus test program to continue.

Joint advertising test.—The managers expect the joint advertising test to be initiated in fiscal year 1983.

Operational and rotational moves.—The managers accept the Department's downward revisions for permanent change of station, although the managers do not necessarily expect the entire amount to be achieved by reductions in operational and rotational moves as the Department indicated might be possible.

Navy selective reenlistment bonus.—The managers agree to restore all but $1,000,000 of the Senate reduction associated with out-of-skill bonus awards. The managers note that the Navy is actively examining this disjunction between Navy policy and practice and that it now asserts it has solid management control over the assignment and utilization of SRB recipients. The managers likewise recognize, however, that the Navy had no idea of how widespread the problem was when the initial Senate reduction was made, and that the Navy disregarded Naval Audit Report recommendations to correct the issue long before any Senate reduction was made. Accordingly, the managers will withhold determination of whether the Navy has satisfactorily controlled bonus awards until an independent review confirms the Navy's assertion. The managers expect the Committees on Appropriations to be fully informed of the progress of Navy bonus management.

Extension of authority for military bonuses.—The managers agree to change the expiration date of the enlistment and reenlistment bonus programs from December 17, 1982, to March 31, 1983, rather than to September 30, 1983 as proposed by the Senate. The authority to operate these programs expires on December 17, 1982. The conferees agree to extend this authority to March 30 to prevent the disruption and confusion that would otherwise occur from closing down these activities entirely. The conferees note that similar action was taken in connection with the continuing resolution that ran from October 1 to December 17, 1982, in the expectation that authority for the operation of these programs would be extended through action on authorizing legislation. The conferees feel that the extension through March 30 provides reasonable time for extension of these programs through the end of the fiscal year by authorizing legislation.

Travel initiatives.—The House funded three travel initiatives at the budget request and four other travel initiatives at 25 percent of the budget request. The Senate funded none of these initiatives. The Managers agree to fund two new travel programs. Although the Managers reviewed seven requests for higher and new travel reimbursement, those for increased mileage allowances for members and dependents, household goods weight allowances, environmental and morale leave, and a temporary lodging expense have been rejected. The Managers believe the current mileage reimbursement of 13¢ is more than fair, based on the latest Runzheimer Corporation data obtained from the American Automobile Association. These data show the national average cost for operating an automobile as 8.37¢ per mile. Operating expenses range from 7.0¢ to 10.6¢ per mile for subcompact to standard cars, respectively. Furthermore, legislative actions in each house during this session recommended against increased dependent mileage, temporary lodging expense, and increased weight allowances. The Managers believe that the Department's transfer policy results in too many moves at great expense to the taxpayer. Accordingly, the Managers concur with the House direction that the General Accounting Office study Department travel policy and practices as well as various travel initiatives to assist in a comprehensive review by the Appropriations Committees.

The Managers deny funding for environmental and morale leave since the program is not reasonable and it is ripe for cost increases. It is noted that this program permits government-sponsored rest and relaxation (R&R) transportation to the United States for personnel stationed in Bermuda and Barbados. Accordingly, the Managers direct a program review before any budget request is again submitted. Funding for emergency leave and for household goods storage in excess of 180 days is recommended. Because only the Marine Corps and Air Force budgeted for these programs, the Army and Navy are expected to implement these programs using existing resources. Each program should be initiated concurrently by all services.

Emphasis on Guard and Reserve Forces.—The managers have accepted various reductions to the active forces' accounts offered by the Department of Defense to achieve outlay savings. The managers have not accepted, however, those reductions which would have reduced National Guard and Reserve accounts. On the contrary, the managers urge continued growth in these forces and have increased the operation and maintenance and procurement items necessary to facilitate this growth.

The managers are convinced that by augmenting the strength and capabilities of the Guard and Reserve forces, the military readiness of the armed forces can be maintained at a lower cost with no degradation to combat effectiveness.

Opportunities for such cost-effectiveness exist for a test case transfer of a number of functions to the Air National Guard. The conferees recognize that the specific assets of the Alaska Air National Guard permit outstanding prospects for a transfer of responsibilities, and the National Guard Bureau and Department of the Air Force are encouraged to examine these alternatives.

Military technician conversions.—The Continuing Resolution for Fiscal Year 1983 included a section prohibiting further conversions of military technicians, and it in-

cluded the following explanation of the conferees' action in the Statement of the Managers:

"In fiscal year 1982, congressional report language directed the Department of Defense to let each reserve component be free to determine the appropriate mix of full time military and military technicians. It has come to the managers' attention that this language has been interpreted to mean that cost should not be a principal factor in the determination of the appropriate mix. The managers wish to reaffirm that cost is clearly intended to remain a principal factor in this determination as set forth in Public Law 93-365 (DOD Appropriation Authorization Act of 1975), which directed DOD to "use the least costly form of manpower that is consistent with military requirements and other needs of the Department of Defense". This is particularly the case since (1) the quality of cost comparisons previously presented to the Congress has been called into question by the General Accounting Office; and (2) Congress has approved significant pay increases for the military since the last comprehensive comparative cost assessment of conversions. Furthermore, the managers understand that a significant portion of the conversions planned for fiscal year 1983 are principally responsive to the requirement to reduce the number of civilian personnel to achieve personnel ceiling objectives, rather than considerations of relative cost and relative effect on readiness. Finally, the managers understand that in some components the Active Guard/Reserve personnel involved in these conversions are not deployable assets, which is also in contradiction to congressional report directives.

"The language in the joint resolution is intended to put a stop to conversion of military technicians, by whatever means that may be accomplished administratively. It, therefore, is intended specifically to cover the 43 military technician Senior Staff Administrative Assistant positions in the Army Reserve now scheduled to be eliminated on October 1, 1982."

The Department has indicated that the revised language included in this Act will better accomplish the purpose of the managers, which is to establish a floor for the strength of military technicians for each component at the September 30, 1982 levels. Those levels are as follows:

Army Reserve	6,753
Air Force Reserve	7,283
Army National Guard	22,557
Air National Guard	21,834

Setting the floor at these strength levels means that the 1,200 conversions planned for fiscal year 1983 cannot take place. Accordingly, the managers have reduced military personnel accounts to reflect the lower requirement for Active Guard/Reserve (AGR) personnel. Furthermore, they have increased the operations and maintenance accounts to reflect a comparable increase in military technician personnel. The net effect is to approve the same total strength as was budgeted for fiscal year 1983.

Growth in the full-time support personnel required by National Guard and Reserve units is to be provided by the least costly form of manpower, which is consistent with readiness requirements. Each component is directed to submit a cost-benefit analysis in support of future budget submissions, justifying the mix of AGR personnel and military technicians proposed by that component. These analyses should cover at least full life cycle costs to the government, including insurance and retirement programs, fringe benefits, medical care costs, and other relevant items, as well as direct pay. Each analysis should also describe in detail how readiness is best improved through the mix of personnel proposed. To assist the Committees in their deliberations, the General Accounting Office will report its views on these analyses submitted to the Committees by the components.

The managers direct the Secretary to use authority available to him to exceed the civilian personnel ceilings of the Department and hire the additional Army and Air National Guard civilians funded by this Act. For future years the managers urge the Department to submit legislation streamlining the programming and budgeting process for all components of both the AGR and military technicians of the full-time support. Presently the AGR have specific limitations, but are not counted against overall active end strength. Military technicians are also subject to specific ceiling limitations, but more importantly fall under overall civilian ceilings of the Department. Earlier studies of the military technician conversion program and recent GAO reports indicate that overall personnel ceilings are a major factor affecting proposals to convert military technicians to AGR status. This conversion program provides, at least, an administrative path of least resistance by permitting reductions in civilian personnel ceilings, while at the same time acquiring strength to meet requirements through alternative sources. The managers' concern is that this situation denies prominence to cost effectiveness and readiness in manpower decisionmaking. It seems that a streamlined approach would remove military technicians from overall ceilings to permit the determination of appropriate mix for each component on the basis of cost effectiveness and combat readiness.

The managers believe that cost effectiveness and combat readiness also will be enhanced if each component develops a plan for the management of its full time support personnel. These management plans must insure at a minimum that:

Military technicians may change to AGR status only voluntarily. No involuntary conversion or change of status is allowed.

No military technician or civilian position will be abolished while incumbered for the purpose of reestablishing it as an AGR position.

Military technicians and AGR personnel are employed in approved, validated full-time positions.

Every position incumbered by AGR personnel has a maximum authorized military grade that is consistent with the day-to-day responsibilities and skill level required for the position.

The annual AGR grade ceilings authorized for each component are not exceeded.

The following items represent language as agreed to by the conferees:

Working capital fund transfers.—The conferees endorse the House language directing DOD to comply with Section 732 when transferring funds between working capital funds. However, the conferees agree that these transfers may be accomplished without regard to the dollar limitation contained in section 732 inasmuch as 733 provides the basic authorization for such transfers and contains no dollar ceiling.

Consultants, studies, and analyses.—In order to preclude dual adjustments to the same item, the conferees agree that recruiting and advertising programs should be excluded from the reduction for consultants, studies, and analyses.

Further, the conferees agree that the reduction to consultants, studies, and analyses is in full compliance with section 622 of S. 2916 as applicable under this continuing resolution.

West German reserve support and equipment.—The conferees have deleted all funding requested for the support and equipping of West German Reservists. The conferees believe that any such request should be considered as a part of the foreign military aid budget. DOD is directed not to proceed with this program.

Foreign military sales.—The conferees agree with the House language concerning Foreign Military Sales program management. In addition, the conferees agree that DOD should recover all direct and indirect costs of administering the FMS program by increasing the administrative surchage to an appropriate level.

Real property maintenance.—While the Senate conferees agree to the House language and amounts on real property maintenance, it is expected that DOD shall make necessary repairs to the Shemya Air Force Base and storm damaged facilities in Hawaii from within funds available.

Industrial plant equipment.—The managers are in agreement with the Department's intent to provide industrial fund financing for industrial plant equipment. Obligations for equipment purchases through industrial funds will be limited to an annual rate of $240 million, which is the level of depreciation charges factored into the fiscal year 1983 industrial fund rates. DOD shall allocate obligation authority by military service. In accordance with testimony provided to the Congress concerning need for local flexibility in equipment purchases, approval shall be at a level no higher than an echelon above the industrial activity. Further, general purpose passenger vehicles are specifically excluded from purchase through the industrial funds. Under no circumstances will the level of obligation exceed $240 million in fiscal year 1983.

Items not addressed by conferees.—The conferees agree that language addressed in only one Committee report shall be controlling unless otherwise addressed in the statement of the managers.

OPERATION AND MAINTENANCE, ARMY

The conferees agree to the following amounts for Operation and Maintenance, Army:

(In thousands of dollars)

TOTAL, OPERATION AND MAINTENANCE, NAVY	22,314,253	21,050,862	21,043,400	21,079,712

The following items represent language as agreed to by the conferees:

Ship overhaul and repair.—The Conferees recognize that the Navy has had some difficulty staying within budgeted schedules and costs for complex ship overhauls in the past. In part, this difficulty has been caused by erratic workloading of Navy yards and the inability to qualify private sources for overhaul of complex surface combatants and their associated subsystems.

The expanding ship overhaul program will force the Navy to utilize fully qualified private shipyards and subcontractors to a greater extent than in the past. In order to accommodate this expanding workload, Navy should certify those private shipyards holding commercial master ship repair licenses and nuclear certification and establish a procedure to qualify firms to act as master ordnance repair facilities. This action will guarantee a fully qualified private sector capability.

As directed by the Senate Committee, the Navy will report to the Congress on its assessment of the total demands on the shipbuilding industrial base resulting from naval and commercial new construction and repairs. In addition, the Navy will provide the Congress with a quarterly assessment of actual inductions and obligations compared to the budgeted overhaul plan. Furthermore, the Navy should include in the overhaul account, the costs for provisioning and berthing crews on ships and submarines in overhaul. With regard to the Fleet Modernization Program, the Navy is expected to include in the FY 1984 budget submission, the actual cost to install alterations.

Finally, within the amount provided, the active Navy shall pay the costs of the overhaul of the US Mobile being transferred from the Navy Reserve, and provide reimbursement to the Navy Reserve for the cost of said vessel.

Administration of shipbuilding and maintenance.—The conferees agree that the Navy should review the feasibility of transferring the administrative costs of shipbuilding and maintenance to the procurement accounts as requested by the Senate. However, the conferees agree that the Department is not to make any change in the present method of budgeting for these costs without specific congressional guidance to do so.

OPERATION AND MAINTENANCE, MARINE CORPS

TOTAL, OPERATION & MAINTENANCE, DEFENSE AGENCIES	5,838,103	5,664,678	5,665,800	5,715,778

The following items represent language as agreed to by the conferees:

Expansion of CHAMPUS coverage.—The Senate included report language addressing the need for CHAMPUS coverage for members of the U.S. merchant seamen. While the conferees are not at this time endorsing this proposal, it is noted the Department of Defense has no jurisdiction over the U.S. merchant seamen. It is agreed that the General Accounting Office should investigate the need for such an expansion of the CHAMPUS program.

Civilian Health and Medical Program of the Uniformed Services.—The conferees agree to the additional funding of $120,000,000 above the budget, as proposed by the Senate.

The conferees agree that, based on new initiatives by the Department of Defense whereby greater utilization is anticipated for the direct care health system in fiscal year 1983, the $93,000,000 originally transferred by the House should be restored to the medical departments of the Services. In adding the $120,000,000 in new appropriations, the conferees believe the funding will be sufficient if these new initiatives are followed.

The conferees direct the Services to report to the Committees on Appropriations no later than 30 days after the enactment of this joint resolution what actions are being taken to increase the specific numerical workload goals for beneficiaries treated in military medical facilities. The conferees direct that a quarterly report be made to the Committees on Appropriations showing patient workload data as a result of the new initiatives undertaken in fiscal year 1983.

To the extent that the Services fail to meet their own goals, the Committees will consider reducing the resources as recommended by the House.

JCS Exercises.—The conferees agree to reduce the allowance for port handling and inland transportation costs associated with JCS Excerises. While the management of this support should be retained at the service level, funds shall be reimbursed to the services from the allowances provided for JCS Exercises within the Defense Agencies account. This will complete the transfer of such support costs initiated by the Congress last year.

OPERATION AND MAINTENANCE, ARMY RESERVE

The conferees agree to the following amounts for Operation and Maintenance, Army Reserve:

The following items represent language as agreed to by the conferees:

AUTHORIZATIONS—REPROGRAMMINGS

In several instances throughout this conference agreement programs are funded in excess of the authorization. The conferees direct the Department to submit a proposal to the Armed Services and Appropriations Committees of the House and Senate, through the reprogramming procedure, to effect the necessary authorizations. The programs involved are: C-2 aircraft procurement; A-10 aircraft procurement; C-17 aircraft RDT&E; Shipbuilding reappropriation; and Marine Corps Reserve procurement.

It is expected that the funds for the unauthorized programs will not be obligated until the Armed Services Committees of the House and Senate authorize these programs through the reprogramming procedure. Although the entire amount authorized for the F-16 program was not provided in the bill, the Committee will consider an F-16 reprogramming action if one is subsequently submitted by the Department.

AIRCRAFT PROCUREMENT, ARMY

The conferees agree to the following amounts for the Aircraft Procurement, Army account:

(In thousands of dollars)

The following items represent language as agreed to by the conferees:

C-12 AIRCRAFT

The conference agreement provides $21,000,000 for procurement of 12 C-12 aircraft as proposed by the House. The conferees agree that six of these aircraft be used to support diplomatic missions in third world countries only. The other six shall be allocated to the Army National Guard.

MANUFACTURING METHODS AND TECHNOLOGY

The Conferees have agreed to the reductions proposed by the House for manufacturing methods and technology and military adaptation of commercial items programs funded in the Army procurement appropriations. However, $50,000,000 has been included in the Research, Development, Test and Evaluation, Army appropriation to carry out these programs in fiscal year 1983.

MISSILE PROCUREMENT, ARMY

The conferees agree to the following amounts for Missile Procurement, Army:

(In thousands of dollars)

TOTAL, MISSILE PROCUREMENT, ARMY	2,846,600	2,287,600	2,611,600	2,287,000

The following items represent language as agreed to by the conferees:

PERSHING II

The conferees agree to provide no funds for Pershing II as proposed by the House, instead of $498,300,000 as proposed by the Senate. The conferees share the concern expressed by the House over concurrency in the program schedule, and agree that more test results are needed before additional Pershing II procurement funds can be justified. The conferees nevertheless remain firmly committed to modernization of the theater nuclear forces. To emphasize that commitment, the conferees agree to add $30,000,000 to the Operation and Maintenance, Army account for Pershing II engineering services, refurbishment of training missiles, and project SWAP. These efforts will ensure meeting the initial operational capability date of December, 1983 with the missiles and hardware funded in the fiscal year 1982 appropriation.

The conferees agree that Pershing II procurement funds may be requested by reprogramming or budget supplement following successful completion of full flight testing.

MULTIPLE LAUNCH ROCKET SYSTEM

The conference agreement includes $422,100,000 for procurement of the Multiple Launch Rocket System under a multiyear contract. The conferees are in agreement that the contract shall extend for no more than five years. The two additional option years proposed by the Army are unacceptable since procurement would begin for items to be funded in those years during the basic contract period. If the Army wishes to propose fixed price, fully funded, and severable options for years six and seven, the Committees on Appropriations of the House and Senate would consider such a proposal.

The conference agreement includes, under production base support, $1,000,000 for an examination of the requirements for production of insensitive high explosive materials as proposed by the Senate.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

The conferees agree to the following amounts for Procurement of Weapons and Tracked Combat Vehicles, Army:

(In thousands of dollars)

The following items represent language as agreed to by the conferees:

M-1 TANK PROGRAM

The Conferees have agreed to the funding proposed by the House for production and advance procurement of the M-1 tank. However, the Conferees specify that production of these vehicles be scheduled at a rate not to exceed 60 per month until the Army has successfully demonstrated and reported to the Committees on Appropriations of the House and Senate that the power train durability requirements have been demonstrated using production vehicles in a test like the recently terminated durability test.

PROCUREMENT OF AMMUNITION, ARMY

INDUSTRIAL PLANT EQUIPMENT	---	-3,800	---	---
ITEMS NOT IN CONFERENCE	1,911,384	1,632,294	1,632,294	1,632,294
TOTAL, PROCUREMENT OF AMMUNITION, ARMY	2,625,684	2,075,394	2,123,694	2,122,394

The following items represent language as agreed to by the conferees:

120MM TANK AMMUNITION

The Conferees have agreed to the reduction proposed by the House for the production of 120mm tank ammunition. However, this reduction is made without prejudice and the Army may submit a reprogramming as necessary to support the fielding of the new 120mm M-1E1 tank when ammunition development problems have been clearly resolved and production readiness can be demonstrated.

VIPER

The conferees agree with the Senate position that no further funds shall be spent to develop or procure Viper. However, an additional $10,000,000 is included in the Research, Development, Test and Evaluation appropriation to expedite completion of the Congressionally mandated competitive test and evaluation of alternative, individual shoulder-fired anti-armor weapons.

Funds provided for Viper procurement in fiscal years 1981 ($24,800,000) and 1982 ($98,600,000) should be adequate for continued low rate production of Viper pursuant to termination of the production of the current Viper. The Viper variant will remain a competitor in the alternative testing.

The conferees reaffirm their special interest in the Viper program, and no funds can be reprogrammed into this account without the prior specific approval of the Appropriations Committees of both Houses of Congress.

OTHER PROCUREMENT, ARMY

The conferees agree to the following amounts for items in conference in Other Procurement, Army:

TOTAL, OTHER PROCUREMENT, ARMY	4,625,791	4,148,804	4,207,891	4,123,404

The following items represent language as agreed to by the conferees:

ARMY CALIBRATION EQUIPMENT

The Committee is concerned that the Army has not resolved serious problems in its calibration program. The Army has failed to issue a final comprehensive report which included a detailed implementation plan for the acquisition of calibration equipment, as directed in the conference report accompanying the Department of Defense Appropriations Act, 1982.

The Committee remains concerned that production contracts will be awarded before the Army issues the comprehensive report. Accordingly, the Army should not award any production contracts for calibration equipment before the issuance of the comprehensive report without the prior approval of the Committee.

GROUND LASER LOCATOR DESIGNATOR

The conference agreement deletes the $45,400,000 budgeted for procurement of the Ground Laser Locator Designator as proposed by the House. This action is taken in recognition of the large delivery backlog. The conferees expect the Army to budget for an economic procurement quantity, based on a production rate of about 20 per month, in fiscal year 1984.

AIRCRAFT PROCUREMENT, NAVY

The conferees agree to the following amounts for Aircraft Procurement, Navy:

(In thousands of dollars)

The following items represent language as agreed to by the conferees:

A-6E AND F-14 AIRCRAFT PROGRAMS

The conferees provided $235,200,000 to procure 8 A-6E aircraft and $875,000,000 to procure 24 F-14 aircraft. The Department stated that the amount requested in the budget did not reflect anticipated contract savings. Although the amount recommended by the conferees represents a reduction from the budget request, the Committee directs that no less than 8 A-6E aircraft or 24 F-14 aircraft be procured with the funds provided.

KC-130 TANKER AIRCRAFT

The conferees direct that any additional funds required, over and above the $30,000,000 provided herein, to procure 2 KC-130 tanker aircraft be absorbed within existing Department of the Navy funds.

CH-53E HELICOPTER

In avoiding further delay of the depot-level facilitization of the Main Rotor Blade Dynamic Balance Facility at Naval Air Station, Pensacola, the conferees direct that the facilitization be funded within existing funds. In complying with the conferees direction, the Department is not to reduce any quantities of aircraft being procured.

C-9 AIRCRAFT

While the conferees agree on the allowance for the purchase of C-9 aircraft, the Navy is directed to purchase such aircraft only from U.S. flag carriers. Further, the aircraft must have been owned by U.S. carriers prior to December 1, 1982.

RF-4 AIRCRAFT MODIFICATIONS

The conferees agree to $29,470,000 for the Maine Corps RF-4 Aircraft Modification program instead of $51,970,000 as proposed by the House and $9,900,000 as proposed by the Senate. Of the funds agreed to, $22,500,000 is provided to complete procurement of side-looking airborne radar (SLAR) data link packages and related aircraft modification equipment, and the remaining funds, $6,970,000, are provided for the purposes for which they were budgeted.

TOTAL, WEAPONS PROCUREMENT, NAVY	3,901,600	3,644,060	3,506,300	3,561,700

The following items represent language as agreed to by the conferees:

BGM-109 TOMAHAWK

The conferees agree to provide $229,800,000 for BGM-109 Tomahawk, instead of $237,300,000 as proposed by the House, or $173,000,000 as proposed by the Senate. The amount provided will be sufficient to procure approximately 100 missiles. The conferees direct that the total of 52 missiles to be procured from a second source with fiscal year 1983 funds, consisting of some Tomahawks and some Ground Launched Cruise Missiles, be fully funded as proposed in the budget.

The conferees agree to provide $6,663,000 for BGM-109 Tomahawk Advanced Procurement as proposed by the Senate, instead of $19,223,000 as proposed by the House.

AGM-88A HARM

The conferees agree to provide $127,100,000 for AGM-88A HARM as proposed by the House, instead of $95,800,000 as proposed by the Senate. The conferees agree that $40,000,000 of the amount provided shall be specifically for establishment of a second source. The Navy is directed to procure the maximum possible number of missiles with the remaining funds.

MARK-48 TORPEDO

The conferees direct that the Department not exceed the procurement of 144 Mark-48 torpedoes. This acquisition is to be accomplished within the funds requested and prior year contract savings.

SHIPBUILDING AND CONVERSION, NAVY

The Conferees agree to the following amounts for Shipbuilding and Conversion, Navy:

(In thousands of dollars)

The following items represent language as agreed to by the conferees:

RESTORATION OF MANAGEMENT RESERVES FOR THE TRIDENT AND CV-SLEP PROGRAMS.

The conferees agree to provide full funding of $1,462,600,000 for the Trident submarines. This estimate has been certified by the Navy as budget quality for the cost of the submarine configured for D-5 missiles. Reductions recommended by the House pertaining to management reserves and future characteristic changes have been rejected by the conferees to assure full funding. Consequently, any future budget requests for cost growth on the fiscal year 1983 Trident program will not be approved. Similarly, the conferees agree to an allowance of $536,500,000 for the CV Forrestal Service Life Extension Program with the understanding that any future cost growth requests would be denied. Restored management reserves should be adequate to foreclose any shortfalls in the modification package.

T-AO FLEET OILER PROGRAM

The conferees fully support the T-Ao diesel engine technology transfer program, which would ultimately provide a low speed diesel engine manufacturing capability in the United States. The conferees direct that the Department fund the low speed diesel engine technology transfer program within fiscal year 1982 T-AO program savings.

MCM MINE COUNTERMEASURE SHIPS

The conferees believe the Department requirements for mine warfare forces, which call for over 30 mine countermeasures ships and low mix mine hunters, MSH ships, necessitates establishing a second source shipyard. Accordingly, the conferees direct that the funds provided for the MCM mine countermeasure ship be used to establish a second source shipyard and construct an MC-1 avenger class mine countermeasure ship.

ARS SALVAGE SHIP PROGRAM

The conferees agree to provide $50,000,000 for the ARS Salvage Ship Program instead of $74,000,000 as proposed by the Senate and no funding as proposed by the House. The conferees direct that prior year ARS Salvage Ship program savings are to be used to offset any additional funding requirements. Also, the conferees agree that this fourth ARS ship is to be the last ARS-50 class Salvage Ship funded. Therefore, the conferees direct that the Department not include future procurement requests for the ARS Salvage Ship program.

The following items represent language as agreed to by the conferees:

MODULAR UNIVERSAL LASER EQUIPMENT (MULE)

The conference agreement includes $37,314,000 for procurement of 120 Modular Universal Laser Equipment (MULE) as proposed by the House. The multiyear procurement proposed in the budget is denied since the program does not meet the criteria established for multiyear procurement. However, the Conferees agree that the MULE may qualify for a traditional multiyear procurement contract under which the base year contract provides for several prepriced options to be fully funded in the outyears. The Committees on Appropriations of the House of Representatives and the Senate would consider such a proposal if the Marine Corps demonstrates that it is an economical and supportable alternative to fully funded annual contracts.

The following items represent language as agreed to by the conferees:

B-1 BOMBER

The conferees agree that the Secretary of Defense should promptly advise the Congress of any alterations in procurement goals, structures, or schedule which are anticipated and could result in an increase in the total cost of the B-1B program.

WIDE BODIED CARGO AIRLIFT

The conferees direct the Air Force to prepare a plan which provides an expanded heavier airlift mission for the Air National Guard.

C-5B AIRCRAFT

The Conferees expect the Air Force to expeditiously execute a firm fixed-price contract for 50 C-5B aircraft, subject to the annual availability of funds. This does not constitute approval to enter into a multiyear contract without the specific authority required by section 765 of the Department of Defense Appropriations Act, 1983, as contained in H.J. Res. 631.

EUROPEAN DISTRIBUTION SYSTEM AIRCRAFT

The conferees have provided $5,000,000 for the first two aircraft. However, none of these funds, nor any Operations and Maintenance, Air Force funds for multi-year leases of CT-39 replacement aircraft, may be obligated until thirty days after the Air Force provides a thorough analysis and plan for the replacement of all operational support aircraft to include the CT-39 fleet. The plan should address all wartime operational support aircraft requirements (to include basing schemes) within the current authorization of 120 CT-39's. The number of types of jet or propeller aircraft to be in the operational aircraft fleet need not be restricted to two, but minimized to ease training and logistics requirements. The plan should clearly consider all liability that might occur to the government from damage during wartime operation of leased aircraft in the combat zone. The Air Force should consider the use of a "civilian reserve" air fleet in its study to back fill for domestically based aircraft deployed to the combat zone. Further, the report should fully examine the benefit to the government of alternate financing methods (single year or multi-year procurement, lease with purchase option) to procuring the proposed fleet in a competitive environment. Use of commercially available and supportable aircraft must be considered. Finally, the introduction of replacement aircraft must be phased with the scheduled retirement of CT-39 aircraft.

B-52 MODIFICATION

The conferees recommend a total of $532,200,000 for B-52 modifications, instead of $521,600,000 as proposed by the House and $530,500,000 as proposed by the Senate. The reduction of $22,400,000 from the budget request is to be applied to the common strategic rotary launcher program.

KC-135 RE-ENGINING

The conferees recommend a total $558,700,000, for KC-135 re-engining, as proposed by the House, of which $60,000,000 shall be available only for the purchase of as many used B-707 aircraft as feasible. The JT3D engines removed from these used aircraft shall be refurbished and installed on Air Guard KC-135's currently in the inventory. The continuation of the JT3D re-engining program accelerates the timetable for re-engining KC-135's, and thus diminishes the need for the Pacer Grade modification program.

SPARES AND REPAIR PARTS

The conferees recommend a total of $3,544,100,000 for spares and repair parts instead of $3,581,900,000 as proposed by the House and $3,518,000,000 as proposed by the Senate. This net reduction of $101,500,000 consists of the following: Undistributed reduction: −$61,000,000—F-15 initial spares: −$5,700,000—C-5B initial spares: −$12,500,000—C-130H initial spares: +$7,000,000—MC-130H initial spares: +$5,000,000—JT3D spares: +$11,300,000—Pacer Grade: −$39,200,000—F-100 Engine: −$6,400,000.

MISSILE PROCUREMENT, AIR FORCE

The conferees agree to the following amounts for Missile Procurement, Air Force:

TOTAL FUNDING AVAILABLE	6,795,900	4,696,700	5,904,800	4,956,100

The following items represent language as agreed to by the conferees:

MX MISSILE

The conferees agree to provide no procurement funds as proposed by the House instead of $988,000,000 as proposed by the Senate.

GROUND LAUNCHED CRUISE MISSILE

The conferees agree to provide $431,500,000 for Ground Launched Cruise Missile (GLCM), instead of $432,300,000 as proposed by the Senate, or $416,800,000 as proposed by the House. The amount provided will be sufficient to procure approximately 84 missiles. The conferees direct that the total of 52 missiles to be procured from a second source with fiscal year 1983 funds, consisting of some Tomahawks and some GLCMs, be fully funded as proposed in the budget. The conferees further direct that procurement of Transporter Erector Launchers and of Launch Control Centers be fully funded as proposed in the budget.

The conferees agree to provide $21,500,000 for GLCM Advanced Procurement, instead of $18,500,000 as proposed by the House, or $24,600,000 as proposed by the Senate.

AGM-88A HARM

The conferees agree to provide $112,500,000 for AGM-88A HARM as proposed by the House, instead of $90,800,000 as proposed by the Senate. The conferees agree that $40,000,000 of the amount provided shall be specifically for establishment of a second source. The Air Force is directed to procure the maximum possible number of missiles with the remaining funds.

RAPIER

The conferees endorse the language concerning Rapier and off-the-shelf alternatives such as Rapier and European Roland appearing on pages 166 and 167 of House Report 97-943.

DEFENSE METEOROLOGICAL SATELLITE PROGRAM

The conferees agree to appropriate $167,900,000 as proposed by the House and the Senate. The conferees agree with the House position as regards the proposed multiyear procurement of DMSP satellites. Accordingly, the funds provided are for the full funding of two satellites. The $30,700,000 budgeted for Advanced procurement of two additional satellites under the multiyear proposal are, therefore, not required, and the conferees agree to earmark these funds for the full funding of future DMSP satellites. However, the Appropriations Committees of the House and Senate will extend full consideration to a fully justified supplemental or future budget request to approve multi-year procurement if such a proposal clearly documents reliable cost savings estimates.

OTHER PROCUREMENT, AIR FORCE

The conferees agree to the following amounts for items in conference in Other Procurement, Air Force:

The following items represent language as agreed to by the conferees:

COMBINED EFFECTS MUNITION

The conference agreement includes $25,000,000 for procurement of the CBU-87 Combined Effects Munition. Since this item was not budgeted, and since this is the first procurement, the conferees direct that the Air Force provide complete justification material, including testing results, to the Committees on Appropriations of the House of Representatives and the Senate at least 30 days before contract award.

RANGE IMPROVEMENTS

The Conference agreement includes $54,149,000 for range improvements. The conferees agree that these funds shall include the procurement of the Modular Threat Emitter.

PROCUREMENT, DEFENSE AGENCIES

The conferees agree to the following amounts for items in conference in Procurement, Defense Agencies:

TOTAL, RDTE	24,398,894	22,114,054	22,876,984	22,704,284

The conferees agree to the following language:

DEFENSE RESEARCH SCIENCES

The conferees agree that no funding reductions are to be applied against the university research instrumentation initiative, or against the naval research graduate fellowship program, or against the $1,739,000 transfer to Navy Defense Research Sciences made by the House for medical research and development activities.

INDEPENDENT RESEARCH AND DEVELOPMENT AND BID AND PROPOSAL COSTS

The conferees share the concern expressed by the House over visibility and accountability of Independent Research and Development (IR&D) and Bid and Proposal (B&P) costs. The House directed, as a result of those concerns, that IR&D and B&P be carried as line items in the budget starting with the fiscal year 1984 budget. The Department has stated that, because of the time element, implementation of this directive will work hardship. The conferees therefore modify the House directive as follows: (1) The Department is directed to submit not later than April 1, 1983, an annex to the fiscal year 1984 budget which proposes the total ceilings for fiscal year 1984 for negotiated IR&D costs and for negotiated B&P costs, by Service. The Committees on Appropriations will review and approve or modify the proposed ceilings. The Department will subsequently ensure that the sum totals of negotiated IR&D and B&P costs remain within the Committee approved ceilings. (2) The Department is directed to begin carrying IR&D and B&P costs as line items in the fiscal year 1985 budget, provided that hearings do not show conclusively that line item budgeting will be counterproductive.

TOTAL, RESEARCH DEVELOPMENT TEST & EVAL, ARMY	4,533,778	3,822,842	3,820,690	3,879,683

The conferees agree to the following language:

INDUSTRIAL BASE BIOLOGICAL WARFARE

The conferees agree to provide $4,951,000 for Industrial Base Biological Warfare as proposed by the Senate, instead of no funds as proposed by the House. The conferees note the concerns expressed previously by the House, and direct that the report requested by the House concerning this program be submitted not later than June 30, 1983.

CHEMICAL DEFENSE MATERIEL CONCEPTS

XM-21 ALARM

The conferees agree to provide $16,542,000 for Chemical Defense Materiel Concepts as proposed by the House, instead of $26,542,000 as proposed by the Senate. The conferees agree that the Appropriations Committee will entertain a reprogramming request for additional funds for the XM-21 Alarm, if that request is accompanied by adequate justification material.

DIVISION AIR DEFENSE COMMAND/CONTROL

The conferees agree to provide $1,000,000 for Division Air Defense Command/Control, instead of $4,399,000 as proposed by the Senate, or no funds as proposed by the House. The conferees note that as recently as December 10, 1982, representatives of the Army and of OSD were in apparent disagreement over the content and objectives of this program. The conferees emphasize that allowing $1,000,000 for planning does not in any way represent agreement to starting a program which was stated by the Army to cost $1.6 billion. The conferees direct that the immediate focus of efforts in this program be preparation of a specific plan of action, agreed upon by both the Army and OSD, which will lead to an affordable, cost-effective system based on improving existing equipment rather than developing new items.

ARMY HELICOPTER IMPROVEMENT PROGRAM

The conferees agree to provide $73,811,000 for the Army Helicopter Improvement Program, instead of $65,811,000 as proposed by the Senate, or $75,811,000 as proposed by the House. The conferees note that in excess of $4 million of TRACE funds are still available in the program, and agree that the $2,000,000 reduction shall be applied to TRACE. The amount provided will be sufficient to protect the fixed price incentive contract now in effect.

LIGHT ANTITANK WEAPON ALTERNATIVE TESTING AND EVALUATION

The conferees agree to provide $10,000,000 for expedited testing and evaluation of light antitank weapon alternatives to the Viper. This initiative is discussed in the Procurement of Ammunition, Army section of this statement.

MANUFACTURING METHODS AND TECHNOLOGY

MILITARY ADAPTATION OF COMMERCIAL ITEMS

The conferees agree to provide $50,000,000 for MM&T/MACI, for reasons discussed in the Procurement section of this report. The conferees agree that $3,000,000 of the amount provided shall be used for eleven projects to be conducted at Watervliet Arsenal.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

The conferees agree to the following amounts for Research, Development, Test and Evaluation, Navy:

The conferees agree to the following language:

TOMAHAWK II

The conferees agree to provide $19,900,000 for Tomahawk II as proposed by the House, instead of $4,900,000 as proposed by the Senate. The conferees agree that development of the Medium Range Air-to-Surface Missile (MRASM) is to be continued, and direct the Navy to pursue MRSAM development as a joint effort with the Air Force.

MARINE CORPS ASSAULT VEHICLES

The conferees agree to provide $40,000,000 for Marine Corps Assault Vehicles, instead of $29,000,000 as proposed by the House, or $73,414,000 as proposed by the Senate. The conferees agree that the amount provided shall be applied as follows: $11,200,000 for the LAV; $8,600,000 for the LVTX; and, $20,200,000 for the Mobile Protected Gun.

LINK HAZEL

The conferees agree to provide $1,000,000 for Link Hazel, the authorized amount, as proposed by the House, instead of $16,000,000 as proposed by the Senate. The conferees invite the Navy to submit a reprogramming request.

AV-8B AIRCRAFT

The conferees agree to provide $114,071,000 for AV-8B Aircraft as proposed by the House, instead of $133,571,000 as proposed by the Senate. The conferees support efforts to develop an AV-8B Trainer, and understand that the Marine Corps will finanace those efforts within available AV-8B procurement funds.

HELICOPTER DEVELOPMENT

The conferees agree to provide $13,300,000 for Helicopter Development, instead of $10,262,000 as proposed by the House, or $15,300,000 as proposed by the Senate. The conferees agree that the reduction from the budget request is to be applied only to the Helo Night Vision System.

ACOUSTIC SEARCH SENSORS

The conferees agree to provide $10,000,000 for Acoustic Search Sensors, instead of $6,172,000 as proposed by the House, or $14,600,000 as proposed by the Senate. The conferees note that the Expendable Reliable Acoustic Path Sonobuoy (ERAPS), which has been in development for approximately twenty years, continues to exhibit high technical risk and a dubious cost effectiveness. The conferees agree that no funds for ERAPS will be provided in the future, unless the Navy submits a report which documents acceptable technical progress, a practical plan for deployment, a demonstration of cost effectiveness, and a certification of affordability.

AN/SQS-53C

The conferees agree to provide $35,980,000, the originally budgeted amount, for AN/SQS-53C instead of $34,180,000 as proposed by the House, or $45,980,000 as proposed by the Senate. The conferees agree that the Appropriations Committees will entertain a reprogramming request, if the Navy desires funds to accelerate this program.

A/N SEMI-ACTIVE LASER GUIDED PROJECTILE

The conferees agree to provide $16,000,000 for the A/N Semi-Active Laser Guided Projectile budget line. The conferees agree that $1,000,000 of the amount provided shall be used for the Infrared Search and Track project, and that $15,000,000 of the amount provided shall be for the Seafire project. The conferees agree that if funds are needed for semi-active laser guided projectile program, the Navy should submit a reprogramming request.

ADVANCED LIGHTWEIGHT TORPEDO

The conferees agree to provide $58,365,000 for Advanced Lightweight Torpedo (ALWT) as proposed by the Senate, instead of no funds as proposed by the House. The conferees agree that $40,365,000 of the amount provided may be used for advanced development of the ALWT, because funding for that phase of the project was underbudgeted. The conferees direct the Navy to perform a "Should Cost" study and present it to the Appropriations Committees not later than June 30, 1983. The conferees agree that $18,000,000 of the amount provided may be used for engineering development of the ALWT, but direct that funds for that purpose may not be obligated or expended until 30 days after the Secretary of the Navy states in writing the firm costs and schedules of the program, his satisfaction that these items are fixed with reasonable certainty, and his belief that eventual procurement will be affordable.

SH-2F SEASPRITE PRODUCT IMPROVEMENT

The conferees agree that $9,000,000 is required to support an SH-2F Seasprite Product Improvement program. This amount can be obtained from within available procurement funds because of contract savings in SH-2F procurement. The conferees direct the Navy to reprogram by transfer $9,000,000 from Aircraft Procurement, Navy to Research, Development, Test and Evaluation, Navy for the purpose of funding an SH-2F Product Improvement program.

IMAGING INFRARED MAVERICK

The conferees agree that the Navy may conduct developmental and operational test and evaluation of Imaging Infrared Maverick within available funds, at a cost not to exceed $5,000,000.

SHIP PROPULSION SYSTEMS

The conferees agree to provide $20,457,000 for the Ship Propulsions Systems program as provided by the House, instead of $25,000,000 as provided by the Senate. The conferees agree that the Committees on Appropriations will entertain a reprogramming request from the Navy to permit RACER to be deployed on the lead DDG-51 class ship.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

The conferees agree to the following amounts for Reaearch, Development, Test and Evaluation, Air Force:

(In thousands of dollars)

TOTAL, RESEARCH DEVELOPMENT TEST & EVAL, AIR FORCE	11,298,748	10,246,361	10,835,468	10,650,661

The conferees agree to the following language:

CIVIL/ENVIRONMENTAL ENGINEERING TECHNOLOGY

The conferees agree to provide $4,102,000 for Civil/Environmental Engineering Technology as proposed by the Senate, instead of $4,502,000 as proposed by the House. The $400,000 reduction is to be applied to the Rapid Runway Repair project, thereby deferring that project for one year. The conferees suggest that the Air Force supply more substantial justification for this project in future budget submissions.

MX MISSILE

The conferees agree that no further Congressional action on the $988,000,000 for MX missile and basing procurement will be taken until both houses have approved a basing mode. The conferees agree that a total of $2,509,332,000 be provided for MX and basing mode research, development, test and evaluation. The conference Committee bill restricts obligation or expenditure of $560,000,000 for full scale engineering development of a permanent basing mode until both Houses of Congress have approved a permanent basing mode. Further, no missile flight testing will be conducted until both Houses of Congress have approved a permanent basing mode.

The conferees note that the MX research and development program includes the acquisition of missiles. When both the House and the Senate have approved a permanent basing mode, missiles which have been acquired under the research and development program may be deployed in the approved permanent basing mode. The conferees intend by this action to emphasize their firm commitment to modernization of our strategic nuclear forces.

SPACE DEFENSE SYSTEMS

The conferees agree to provide $211,764,000 for Space Defense Systems as proposed by the House, instead of $231,764,000 as proposed by the Senate. The conferees agree that any additional funding which may be required for the Air Force space laser program office should be obtained from within available funds.

ENGINE MODEL DERIVATIVE PROGRAM

The conferees agree to provide $38,254,000 for the Engine Model Derivative Program, instead of $8,254,000 as proposed by the House, or $64,254,000 as proposed by the Senate. The conferees agree that the $30,000,000 provided above the amount proposed by the House shall be for development of increased thrust capability for the existing F-100 fighter engine. It is the sense of the Conferees that fighter engine competition will result in a significant overall savings. The Air Force plan to hold such a competition is fully supported by the Conference.

F-16 SQUADRONS

The conferees agree to provide $73,642,000 for F-16 Squadrons, instead of $66,142,000 as proposed by the Senate, or $76,142,000 as proposed by the House. The conferees agree that $5,000,000 of the amount provided shall be restored to the emergency backup pump system project, and $2,500,000 of the amount provided shall be restored to the multinational staged improvement program (MSIP). The conferees agree that the Appropriations Committees will entertain a reprogramming request for additional MSIP funds, if that request is accompanied by adequate justification material.

CONVENTIONAL STANDOFF WEAPON

The conferees endorse the language concerning Conventional Standoff Weapon appearing on page 207 of House Report 97-943.

PRECISION LOCATION STRIKE SYSTEM

The conferees agree to provide $78,859,000 for Precision Location Strike System (PLSS) as proposed by the House, instead of $98,859,000 as proposed by the Senate. The conferees endorse the language concerning PLSS appearing on pages 207 and 208 of House Report 97-943.

JOINT TACTICAL COMMUNICATIONS PROGRAM

The conferees agree to provide $47,875,000 for Joint Tactical Communications Program, instead of $42,875,000 as proposed by the Senate, or $52,875,000 as proposed by the House. The conferees direct that $5,000,000 of the amount provided shall be restored to the communications systems control project.

C-17

The conferees agree to provide $60,000,000 for C-17, instead of $1,000,000 as proposed by the House, or $200,000,000 as proposed by the Senate. Of the $60,000,000, only $1,000,000 has been authorized. Therefore, the conferees direct the Air Force to submit a reprogramming in the amount of $59,000,000 to the Committees on Armed Services and Appropriations of the House and the Senate, to provide a vehicle for consideration of authorization.

CONSOLIDATED SPACE OPERATIONS CENTER

The conferees agree to provide $28,000,000 for Consolidated Space Operations Center, instead of $23,400,000 as proposed by the Senate, or $32,116,000 as proposed by the House. The conferees note, and share, the concerns expressed by the Senate that the hardware and software chosen for this project be capable of future growth without the need for expensive backfitting. The Air Force is directed to submit a report on the computer architecture to be used in CSOC and the capacity of that architecture for future growth. The conferees agree that, following submission of such a report, the Appropriations Committees will entertain a reprograming request for additional funds.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE AGENCIES

The conferees agree to the following amounts for Research, Development, Test and Evaluation, Defense Agencies:

The conferees agree to the following language:

STRATEGIC TECHNOLOGY

The conferees agree to provide $161,900,000 for Strategic Technology, instead of $151,900,000 as proposed by the House, or $171,900,000 as proposed by the Senate. The conferees agree that $10,000,000 of the amount provided shall be specifically for development efforts on short wavelength lasers.

TITLE VII—GENERAL PROVISIONS

The conferees agree to the following language in the General Provisions:

Industrially funded activities personnel ceiling.—The conferees agree to prohibit funds to impose civilian personnel ceilings on Department of Defense industrially funded activities. However, any increase in civilian personnel of such industrial funds in excess of the number employed on September 30, 1982, should not be counted for the purposes of any statutory or administratively imposed civilian personnel ceiling otherwise applicable during fiscal year 1983.

Leasing of aircraft and vehicles to non-Federal agencies.—The conferees agree to Senate language with an amendment permitting such leasing when specifically authorized.

Military bonuses.—The conferees agree to language which changes the expiration date of the enlistment bonus and reenlistement bonus programs from December 17, 1982, to March 31, 1983.

Defense Production Act purchases.—The conferees agree to language to utilize $50,000,000 of funds available to the DOD for purchases or purchase commitment of metals, minerals, or materials under title III of the Defense Production Act of 1950.

Troops in Europe.—The conferees agree to language which establishes a limitation on active U.S. military personnel stationed on shore in Europe at the level planned for fiscal year 1982, except that the President may waive this limitation if he declares to Congress that overriding national security requirements make such action necessary.

National defense stockpiles.—The conferees agree to language which states sales by the Government shall not exceed, within any 12 month period, 10 percent of the domestic production of silver in the preceding 12 month period.

TITLE VIII—RELATED AGENCIES

INTELLIGENCE COMMUNITY STAFF

The conferees agree to $15,856,000 for the Intelligence Community Staff.

Amendment No. 10: Deletes language proposed by the Senate which would have set expenditure limitations for specific programs, set obligation and expenditure limitations for specific appropriation accounts, and provided $29,000,000 from available funds for continued operation of five LSD-28 class ships. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

Amendment No. 11: Deletes language proposed by the Senate which would have required certain actions by Congress and the President before obligation or expenditure of funds for procurement of the MX missile or for institution of a permanent basing mode. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriation.

Amendment No. 12: Deletes language proposed by the Senate which would have allowed the purchase of specialty metals used in the production of defense items or parts or components of defense items and chemical warfare protective clothing produced outside the United States to the extent necessary to comply with agreements with foreign governments.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES

Amendment No. 13: Provides funding for programs, projects, and activities provided in, and under the terms and conditions of S. 2956, the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act for 1983, reported on September 24, 1982, with certain exceptions, until the termination date of the continuing resolution as specified in section 102(c). The House bill had proposed funding as provided in H.R. 6957 with certain exceptions, subject to the termination date of the continuing resolution. The Senate bill proposed funding as provided in S. 2956, with certain exceptions, for the fiscal year 1983.

The following table summarizes the conference agreement for these departments and agencies:

FY 1982 Appropriations	$8,811,489,000
FY 1983 Budget Estimates	8,866,070,000
FY 1983 House allocation under Budget Resolution	9,070,000,000
New Budget requests since allocation	+195,276,000
Allocation plus new budget requests	9,265,276,000
House Continuing Resolution (H.R. 6957 as passed House)	[1] 9,004,628,000
Senate Continuing Resolution (S. 2956 as reported and amended)	9,256,120,000
Conference Agreement	9,264,172,000
Conference Agreement Compared with:	
Allocation and new budget requests	−1,104,000
House Continuing Resolution	[1] +259,544,000
Senate Continuing Resolution	+8,052,000

[1] House Continuing Resolution did not include the following items (totalling $233,016,000) funded in the conference agreement:

$63,638,000 for the Federal Trade Commission;

$169,378,000 in new budget requests not considered by the House for: Organized crime drug enforcement ($127,500,000); FBI law enforcement ($18,351,000); DEA equipment ($975,000); Justice Department General Administration ($1,846,000); U.S. Attorneys and Marshals ($14,139,000); U.S. Prisoners ($3,550,000); Fees and expenses of witnesses ($300,000); and Federal Prison System ($2,717,000).

The conferees have agreed on the following exceptions from S. 2956, as reported to the Senate:

TITLE I—DEPARTMENT OF COMMERCE

General Administration, "Salaries and Expenses", $31,613,000.

Bureau of the Census, "Periodic Censuses and Programs", $97,294,000, including the following: local, state and regional population estimates ($2,000,000); Household Survey Redesign ($550,000); National Travel Survey ($1,000,000); and Monthly Survey of Apparel ($150,000).

Economic and Statistical Analysis, "Salaries and Expenses", $36,832,000, including the following: National Economic Accounts ($200,000); Center for Utilization of Federal Technology ($500,000); and Industrial Technology Partnerships ($1,500,000).

Economic Development Administration: "Economic Development Assistance Programs", not to exceed $150,000,000 of contingent liability for loan principal. "Economic Development Revolving Fund", total commitments to guarantee loans to steel companies shall not exceed $20,000,000 of contingent liability for loan principal.

International Trade Administration, $166,426,000, including $3,000,000 for research and engineering in preparation for U.S. participation in a 1985 International Trade Fair in Beijing, China.

Minority Business Development Agency, "Minority Business Development", including language limiting changes in the Department's use of the fund established by 15 U.S.C. 1521 without the prior approval of the Appropriations Committees of the House and Senate.

United States Travel and Tourism Administration, "Salaries and Expenses", $8,100,000, of which $500,000 is for the State of Hawaii. Language has been deleted from the bill relating to the level of overseas operations and activities. However, to the extent practicable, USTTA is expected to maintain the level of FY 1983 overseas activities and personnel at FY 1982 levels.

National Oceanic and Atmospheric Administration, "Operations, Research, and Facilities", $650,127,000 including the following transfers:

Transfer from "promote and develop" fund—$22,600,000;

Transfer from "Coastal Energy Impact Fund"—$4,140,000;

And, in addition, including the following program restorations and changes in assumptions from the level of the budget request:

Marine boundary survey program	+$537,000
National geodetic control network	+1,000,000
Ship operations and maintenance	+6,620,000
Resource survey methods and Salmon smolt research	+1,078,000
Improving analysis used for stock abundnace and distribution, and investigating United States-Canadian salmon interception	+1,971,000
Studies concerning the impact of variable atmospheric and oceanic conditions on fishery habitats	+402,000
Application of advanced technology in data gathering	+520,000
Fisheries habitat investigations (excludes Oxford, Md. laboratory listed below)	+1,428,000
Environmental impact analysis	+1,424,000
Endangered species enforcement activities and sea turtle research	+760,000
Federal support to the Pribilof Islands	+1,182,000
Federal support to the Columbia River Hatcheries.	+4,543,000

Anadromous fisheries grants	+3,000,000
Aquaculture Research and Development (excludes Newport, Oregon and Stuttgart, Arkansas labs)	+4,886,000
Maintain steelhead enhancement planning and salmon vessel buy-back activities at the 1982 level	+3,500,000
Regional Fishery Management Councils for operations and administrative support services	+3,300,000
Fisheries grants to states	+4,000,000
Market News program and data collection activities	+3,633,000
Maintain laboratories at the 1982 level:	
Oxford, Maryland	+759,000
Tiburon, California	(1)
Charleston, South Carolina	(1)
Galveston, Texas	(1)
Gloucester, Massachusetts	+1,180,000
Newport, Oregon	+300,000
Stuttgart, Arkansas	+157,000
Fisheries development research and services	+4,180,000
Regional ocean pollution projects (including $750,000 for the Great Lakes Research Office)	+6,833,000
Ocean technology and engineering services	+2,000,000
NOAA undersea research program	+3,755,000
Sea Grant Program	+33,247,000
Maintain weather stations proposed for closing (no weather stations will be closed)	+927,000
Adjustments related to restoring weather stations	+1,062,000
Maintain fire weather services at 1982 levels	+825,000
Maintain fruit frost program at 1982 level	+209,000
Maintain four weather service forecast offices proposed for downgrading	+836,000
Maintain agriculture weather services at 1982 levels (no closures or reduction in offices; no decrease in services)	+1,260,000
Maintain NWS southern region headquarters, Fort Worth, Texas	+1,200,000
Upper atmosphere and space research (Maintain Space Environment Laboratory at Boulder, Colorado at FY 1982 level	+3,100,000
Aviation weather forecast preparation	+350,000
Maintain Great Lakes Environmental Research Laboratory at 1982 level	+3,644,000
North Dakota-Utah-Nevada weather modification matching grant program	+900,000
Maintain two polar orbiting satellite systems	+18,000,000
Climate data base	+478,000
Maintain Environmental Science Information Center	+1,046,000
Maintain global atmosphere research program	+2,221,000
Maintain administrative services commensurate with program restorations	+7,474,000
Maintain NACOA	+90,000
Atlantic salmon research and tagging	+100,000
Long Island Sound study	+250,000
Chesapeake Bay study	+250,000
Legislation for chart user fees not enacted	−26,100,000
Landsat [2]	−13,555,000
Adjustments for transfers:	
Promote and develop fund	+4,000,000
Coastal energy impact funds	+12,170,000
NOAA Weather Wire Service (eliminate per mile charge)	+525,000
Total Change	+117,457,000

[1] Included in program restorations listed above.

[2] Full year funding provided for this item in Sec. 148, P.L. 97-276, Continuing Appropriations for fiscal year 1983.

The fiscal year 1983 Budget assumed that $26,700,000 would be transferred to the "Operations, Research, and Facilities" account from the Federal Aviation Administration's Airport and Airway Trust Fund as a reimbursement for weather forecasts provided by the National Weather Service (NWS). The Managers direct NWS to continue to provide these services to the FAA at the budgeted level of activity. The Managers also expect the Department of Commerce to submit, and the Office of Management and Budget to approve the funding of this level of activities on a deficiency apportionment basis, assuming the full reimbursement will be transferred, or otherwise provided, in the fiscal year 1983 Supplemental Appropriation Act. Such a transfer is pending the results of the study to be conducted jointly by the Departments of Commerce and Transportation concerning the implementation and manner of such a transfer.

"Fisheries Loan Fund," $10,000,000.

Science and Technical Research, "Scientific and Technical Research and Services", $117,861,000, with certain limitations pertaining to authorized program activities. This level includes $350,000 for continued research on toxicity of combustion products. This research is in no way intended to delay or discourage states or localities from developing and adopting regulations to reduce the risks of deaths and injuries due to toxic inhalation in fires. NBS officials are expected to seek the advice and expertise of industry in coordinating and conducting this important research, but the Managers agree there is no intent to direct the selection by NBS of any particular organization to perform the proposed research.

National Telecommunications and Information Administration, "Salaries and Expenses", $12,667,000, of which $503,000 of prior year unobligated balances in the appropriation "Public telecommunications facilities, planning and construction" shall be transferred to this appropriation.

General provisions—Department of Commerce; includes language prohibiting, without the consent of the borrower, the sale or contract with private interests to sell any loans made under the Public Works and Economic Development Act of 1965 and any loans made under section 254 of the Trade Act of 1974.

RELATED AGENCIES

Department of Transportation: Maritime Administration "Operations and Training", $78,113,000, including $7,100,000 for the replacement or repair of the Massachusetts Maritime Academy training ship, the *Bay State.*

Federal Trade Commission, "Salaries and Expenses", $63,638,000. In addition, the conference agreement extends, until the termination of H.J. Res. 631, certain provisions of the Federal Trade Commission Improvements Act of 1980 that expired on September 30, 1982. These provisions are: public participation funding, regulation of commercial advertising, trademarks, agricultural cooperatives and marketing orders, and legislative veto.

SMALL BUSINESS ADMINISTRATION

"Salaries and Expenses": $202,029,000 for necessary expenses; $16,000,000 for Small Business Development Centers; $25,600,000 by transfer from the "Disaster Loan Fund" disaster loan making activities including loan servicing.

The conferees are agreed that $3,000,000 of the amount provided for necessary expenses of the Small Business Administration is for an outreach program for disabled and Vietnam era veterans in accordance with the provisions of P.L. 93-237; $1,000,000 is for continuation of the effort to establish a small business external economic data base; $1,000,000 is for enhancement of SBA's technology assistance program.

"Business Loan and Investment Fund": $128,700,000 for additional capital $185,000,000 for new direct loan obligations; and $25,000,000 for business loans to disabled and Vietnam era veterans in accordance with title III of Public Law 97-72. The following table shows the amount in the budget request, the House and Senate bills, and the conference agreement for each of the direct loan and loan guarantee programs:

[Amounts in Millions]

Program	Budget request	House	Senate	Conference agreement
General business:				
Direct		$85	$80	$85
Guaranteed	$1,938	2,010	2,510	2,510
Handicapped:

Total business loans:				
Direct	41	185	205	210
Guaranteed	2,400	2,500	3,000	3,000

TITLE II—DEPARTMENT OF JUSTICE

General Administration, "Salaries and Expenses", $54,873,000, including $350,000 for the Federal justice research program and $9,400,000 for the State and local drug grants program.

"Salaries and Expenses, General Legal Activities". The conferees are agreed that of the $136,128,000 provided, not to exceed $2,291,000 may be used for continuation of

the project to automate litigation support activities.

"Salaries and Expenses, Antitrust Division", $43,389,000.

"Salaries and Expenses, United States Attorneys and Marshals", $330,981,000 which includes $7,500,000 for the United States Bankruptcy Trustees.

"Support of United States Prisoners", $34,254,000, of which not to exceed $4,050,000 is for renovating, constructing, and equipping State and local jail facilities under the Cooperative Agreement Program. In addition, the conference agreement includes language to control construction costs of local jail facilities built under the Cooperative Agreement Program and to ensure availability of space for housing Federal prisoners in such facilities.

"Fees and Expenses of Witnesses", $35,700,000.

"Salaries and Expenses, Community Relations Service", $5,764,000. The conferees are agreed that the 12 positions proposed for elimination in the FY 1983 budget are to be maintained and funded through reimbusements from other agencies within the Department of Justice.

Interagency Law Enforcement: "Organized Crime Drug Enforcement", $127,500,000. The conference agreement includes the full amount requested for positions and special enforcement equipment requirements for the 12 Regional Organized Crime Drug Task Forces; construction, renovation, and repair of Federal, State and local facilities to house Federal prisoners; a 50-state organized crime control project; and an annual report to Congress.

The conferees are agreed that an annual report should be delivered to the President, the Appropriations Committees and Judiciary Committees of the Senate and the House of Representatives starting no later than March 31, 1984, which indicates by comparison to similar statistics, information or other appropriate measures from previous years, whether this program has made contributions toward:

(1) Reducing the supply of available heroin, cocaine, marijuana, hashish and dangerous drugs in each of the task force regions and the United States in total using such measures as estimated importation or production, estimated number of abusers, treatment admission statistics, overdose death figures, price and purity of drug sales at the consumer or "street" level.

(2) Increased seizure and forfeiture of assets of drug traffickers, including a breakdown of the types of assets seized and/or forfeited;

(3) Arrests and convictions of drug traffickers by violator type;

(4) Volume of drugs seized or confiscated by type;

(5) Estimates on the number of organized drug trafficking organizations that are dismanteled and/or the extent to which their organizational structure has been damaged by this program; and

(6) Other indicators deemed appropriate by the Attorney General to analyze the level of success of these task forces.

This report should also include an explanation of the guidelines established and examples of task force jurisdictions that exemplified successful law enforcement and prosecution efforts based on information exchange, allocation of resources, coordination between agencies (federal state, and local) and other indicators that may serve as a model for improved task force programs.

Federal Bureau of Investigation: "Salaries and Expenses", $825,154,000, including language which permits the purchase of passenger motor vehicles for police-type use without regard to the general purchase price limitation for FY 1983.

Immigration and Naturalization Service: "Salaries and Expenses", $484,431,000 The conferees are agreed that $5,000,000 above the budget request for the Inspections Program is to be allocated to the Inspections Program for an additional 100 inspectors along the Southwest Border in Texas. The conferees are further agreed that these resources are to be allocated from funds requested for the refugee processing program, which are in excess of current requirements.

Drug Enforcement Administration: "Salaries and Expenses", $248,162,000.

General Provisions: Sec. 203 extends authorities contained in the Department of Justice Appropriation Authorization Act for FY 1980 until the termination date in section 102 of the resolution.

RELATED AGENCIES

Commission on Civil Rights: "Salaries and Expenses", $11,626,000.

Equal Employment Opportunity Commission: "Salaries and Expenses", $142,771,000, of which not to exceed $18,500,000 is for grants to State and local enforcement agencies.

Legal Services Corporation: "Payment to the Legal Services Corporation". The conference agreement provides for restrictions on the activities of the Legal Services Corporation as follows:

1. Restrictions on use of funds for aliens, as provided in Sec. 14(a)(6) and (b) of H.R. 3480 as passed the House of Representatives on June 18, 1981.

2. Restrictions on qualifications of recipients and local board composition as provided in Public Law 97-276 of October 2, 1982. The conferees note that the Legal Services Corporation provides funds for a number of recipients with multi-state service responsibilities. The conferees are concerned that requiring those programs to have the attorney members of their governing bodies appointed by bar associations of several states would be unduly cumbersome. Accordingly, the conferees are agreed that such recipients may comply with this provision by having the state, county or local bar association in which a recipient maintains its principal office perform the attorney appointment function.

3. Restrictions on use of funds for lobbying activities as provided in S. 2956 as reported to the Senate.

4. Restrictions on use of fund for class actions which prohibit such suits against the Federal Government or any State or local government unless (1) the project director of a recipient has expressly approved the filing of such an action in accordance with policies established by the governing body of such recipient; (2) the class relief sought is for the primary benefit of individuals who are eligible for legal assistance; and (3) that prior to the filing of such an action, the project director has determined that the government entity is not likely to change the policy or practice in question, that the policy or practice will continue to affect eligible clients adversely, that the recipient has given notice of its intention to seek class relief, and that reasonable efforts to resolve without litigation the adverse effects of the policy or practice have not been successful or would be adverse to the interests of the clients.

5. Allocation of funding (minimum access) as provided in Sec. 11 of H.R. 3480 as passed the House of Representatives on June 18, 1981. The conferees intend that the Fiscal Year 1983 Legal Services Corporation appropriation be allocated so as to insure continued minimum access funding to legal services programs covering all counties in the country in the same way that this geographical distribution was acomplished in 1982. However, it is not the intent of the conferees to mandate a redistribution of grant allocations to all recipients.

6. Refunding of current grantees as proposed by the Senate in H.J. Res. 631. This language provides for continued funding of current grantees and contractors until action is taken by directors of the Corporation who have been confirmed in accordance with the provisions of the Legal Services Corporation Act. Funding is to be maintained at the same annualized level as in 1982, or at a proportionally higher or lower amount tied to the ratio which the total 1983 appropriation for the Corporation bears to the appropriation for 1982. The conferees intend that such funding shall be provided under grants an contracts containing the same terms and conditions now in effect for each said grantee or contractor but that nothing herein shall be construed as preventing the Corporation from ensuring that all grantees and contractors comply with the requirements of the Legal Services Corporation Act, as amended, and other Federal statutes.

7. Restrictions on compensation of the Board and officers and employees of the Legal Services Corporation and recipient programs, as proposed by the Senate in H.J. Res. 631. This language prohibits the Board of Directors of the Corporation from being compensated for services to the Corporation except for payment of an attendance fee at Board meetings at a rate not to exceed the highest daily rate for a GS-15 and necessary travel expenses in accordance with Government travel regulations. In addition, the language prohibits an officer or employee of the Corporation or a recipient program from being reimbursed for membership in a private club or from being paid severance pay in excess of what would be paid a Federal employee for comparable service.

TITLE III—DEPARTMENT OF STATE

Administration of Foreign Affairs: "Salaries and Expenses", $995,000,000. The conferees are agreed that within the total amount provided, funds are available for replacement of two mainframe computers, purchase of minicomputers and word processors, and temporary duty communications activities as proposed by the House.

"Reopening Consulates," $1,000,000. The conferees are agreed that this separate appropriation is for reopening and operating certain United States consulates as specified in the Department of State Authorization Act, Fiscal Years 1982 and 1983.

International Organizations and Conferences: "Contributions to International Organizations", $444,315,000, of which $12,506,-000 shall be for payment of the full 1983 assessed contribution to the inter-American Institute for Cooperation on Agriculture (IICA). The conference agreement also includes language prohibiting the use of this appropriation for payment of the United States' share of any interest costs made known to the United States Government by an international organization for loans incurred by such organization on or after October 1, 1982 through external borrowings.

"The Asia Foundation", $4,100,000.

RELATED AGENCIES

Commission on Wartime Relocation and Internment of Civilians: "Salaries and Expenses", $300,000 to be available only until June 30, 1983.

United States Information Agency: "Salaries and Expenses", $492,122,000 of which $500,000 is for representation expenses and $84,292,000 is for certain exchange programs.

The following table shows the levels for FY 1982, those in the House and Senate bills for FY 1983 and the conference agreement for certain exchange programs:

[In thousands]

Program	FY 1982	FY 1983 House	FY 1983 Senate	Conference agreement
1. Fulbright and international vistors	$60,415	$67,301	$83,161	$73,965
2. Humphrey fellowship	2,620	2,620	3,206	3,206
3. Private sector	7,087	7,121	8,790	7,121
Total	$70,122	$77,042	$95,157	$84,292

Of the funds appropriated for the Private Sector programs, the conferees are agreed that $4,121,000 shall be for the core programs, such as Crossroads Africa, that have been traditionally funded in this account. The remaining $3,000,000 shall be used to fund the International Youth Exchange program recently initiated by the agency.

TITLE IV—THE JUDICIARY

Courts of Appeals, District Courts, and Other Judicial Services: "Bankruptcy Courts, Salaries and Expenses", $89,000,000.

LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES APPROPRIATION ACT

Amendments Nos. 14, 15, and 16: Deletes language proposed by the House and Senate and inserts new language relating to the rate for operations for projects or activities provided for in the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1983.

Section 101(e)(1) of H.J. Res. 631 provides appropriations for projects or activities provided in H.R. 7205, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1983. The House version of H.J. Res. 631 provides for these projects or activities at a rate for operations and to the extent and in the manner provided for in House Report 97-894 and in H.R. 7205 as passed the House of Representatives on December 1, 1982, with certain exceptions. The Senate version of H.J. Res. 631 provides for these projects and activities at the rate provided in H.R. 7205 as reported to the Senate on December 8, 1982.

The conference agreement on H.J. Res. 631 incorporates the provisions of H.R. 7205 in accordance with the following agreements:

TITLE I—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

Appropriates $219,921,000 for national grants or contracts, instead of $223,704,000 as proposed by the Senate and $216,138,000 as proposed by the House.

Appropriates $62,029,000 for grants to States, instead of $63,096,000 as proposed by the Senate and $60,962,000 as proposed by the House.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

Appropriates $230,000,000, instead of $280,000,000 as proposed by the Senate and $35,000,000 as proposed by the House.

GRANTS TO STATES FOR UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICES

Authorizes the expenditure of $2,454,300,000 from the Unemployment Trust Fund for State administrative expenses, as proposed by the Senate, instead of $2,378,900,000, as proposed by the House.

Earmarks $627,176,000 for the contingency fund as proposed by the Senate, instead of $551,776,000 as proposed by the House.

The conferees recognize that, in all probability, additional funds will be required later in this fiscal year for the processing of unemployment insurance claims. The conferees agree to reassess this situation in connection with a supplemental appropriations bill in the next session of Congress.

The conferees also agree to consider in a supplemental bill the need for additional permanent Unemployment Insurance Service State staff, instead of relying solely on additional temporary staff, in order to more efficiently and accurately process the workload.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

Appropriates $5,411,000,000 as proposed by the Senate, instead of $3,798,000,000 as proposed by the House.

LABOR-MANAGEMENT SERVICES ADMINISTRATION

SALARIES AND EXPENSES

Appropriates $58,077,000, instead of $60,153,000 as proposed by the Senate, and $56,002,000 as proposed by the House.

The conference agreement provides an additional 75 positions over the House bill.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

Appropriates $205,256,000, instead of $204,256,000 as proposed by the Senate, and $206,256,000 as proposed by the House.

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

Appropriates $120,143,000 as proposed by the Senate, instead of $122,643,000 as proposed by the House.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

Appropriates $91,864,000 as proposed by the Senate, instead of $91,705,000 as proposed by the House.

OFFICE OF THE INSPECTOR GENERAL

Changes account heading as proposed by the Senate.

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH SERVICES

Appropriates $1,018,563,000 instead of $1,002,997,000 as proposed by the House and $1,027,846,000 as proposed by the Senate. The conference agreement includes the following changes to the amounts recommended by the House:

Community health centers	+$13,783,000
Black lung services	+120,000
Migrant health	+104,000
Family planning	+88,000
Program support (BCHS)	+722,000
National Health Service Corps	+391,000
Health professions student loans	−1,000,000
HPSL loan repayment	+25,000
Exceptional financial need scholarships	−900,000
Nursing loans	+860,000
Nursing loan repayments	+750,000
Program support (BHPES)	+323,000
Program management (HSA)	+300,000
	+15,566,000

The conferees have provided $295,000,000 to ensure that the fiscal year 1982 level for community health centers be maintained in fiscal 1983, and that the program is permitted to expand its activities to high priority medical service areas, restore supplemental service delivery capacity where restoration of such services could not be made during fiscal 1982 and continue to expand its special prevention initiative which was begun with the fiscal 1982 supplemental.

CENTERS FOR DISEASE CONTROL

PREVENTIVE HEALTH SERVICES

Appropriates $290,701,000, instead of $290,368,000 as proposed by the Senate and $321,039,000 as proposed by the House. The conference agreement includes the following amounts:

Preventive health block grant	$86,300,000
Veneral disease: Direct operations	7,335,000
Chronic diseases	19,503,000
Environmental hazards	4,279,000
Tuberculosis grants	5,000,000
Acquired immune deficiency syndrome (AIDS)	2,000,000
Program management	2,605,000

NATIONAL INSTITUTES OF HEALTH

Appropriates $4,001,980,000 instead of $4,004,075,000 as proposed by the House, and $3,999,887,000 as proposed by the Senate.

The conferees continue to believe that basic research and stable funding for investigator-initiated research project grants are of the highest priority. With the funds provided NIH should support as close to 5,000 new and competing research project grants as possible. In addition NIH should pay full indirect cost reimbursements on research grants. A portion could be used to restore part of the proposed 4 percent reduction in noncompeting research project grants, mitigate the problems of higher average costs of new and competing grants, support additional research trainees, high priority clinical trials and other important activities the Committees have identified. The Director of NIH should assure optimum use of the additional funds provided to support these high priority areas.

NATIONAL CANCER INSTITUTE

Appropriates $983,576,000 instead of $981,441,000 as proposed by the House, and $985,711,000 as proposed by the Senate.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

Appropriates $622,745,000 instead of $620,947,000 as proposed by the House, and $624,542,000 as proposed by the Senate.

NATIONAL INSTITUTE OF DENTAL RESEARCH

Appropriates $78,860,000 instead of $80,304,000 as proposed by the House, and $77,416,000 as proposed by the Senate.

NATIONAL INSTITUTE OF ARTHRITIS, DIABETES, AND DIGESTIVE AND KIDNEY DISEASES

Appropriates $412,182,000 instead of $408,508,000 as proposed by the House, and $415,856,000 as proposed by the Senate.

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

Appropriates $295,719,000 instead of $294,361,000 as proposed by the House, and $297,077,000 as proposed by the Senate.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

Appropriates $273,581,000 instead of $276,367,000 as proposed by the House, and $270,795,000 as proposed by the Senate.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

Appropriates $369,561,000 instead of $367,009,000 as proposed by the House, and $372,114,000 as proposed by the Senate.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

Appropriates $253,655,000 instead of $251,561,000 as proposed by the House, and $255,749,000 as proposed by the Senate.

NATIONAL EYE INSTITUTE

Appropriates $141,561,000 instead of $138,763,000 as proposed by the House, and $144,360,000 as proposed by the Senate.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

Appropriates $164,367,000 instead of $162,695,000 as proposed by the House, and $166,040,000 as proposed by the Senate.

NATIONAL INSTITUTE ON AGING

Appropriates $93,996,000 instead of $96,104,000 as proposed by the House, and $91,887,000 as proposed by the Senate.

RESEARCH RESOURCES

Appropriates $213,804,000 instead of $227,642,000 as proposed by the House, and $199,967,000 as proposed by the Senate.

ALCOHOL, DRUG ABUSE AND MENTAL HEALTH

Appropriates $777,556,000 instead of $768,106,000 as proposed by the House and $782,056,000 as proposed by the Senate. The conference agreement includes the following changes to the amounts recommended by the House:

Alcohol, drug abuse and mental health block grant	+$7,000,000
Mental health:	
Service demonstrations (CSP)	−2,000,000
Research training	+950,000
Clinical training	+3,500,000
Advanced nurse training	+1,740,000
Nurse practitioners	+240,000
Nursing special projects	+666,000
Nursing research ($5,000,000 provided in P.L. 97-276)	−3,400,000

The conferees are disturbed about continuing reports that ADAMHA is proceeding to develop plans to fund clinical training grants for only one or two of the four core disciplines. The conferees reiterate strongly the intent of both the House and the Senate that all 4 core disciplines be eligible for funds and that the funds be distributed in a reasonable balance among all four core disciplines.

HEALTH RESOURCES ADMINISTRATION

HEALTH RESOURCES

Appropriates $188,531,000 instead of $213,573,000 as proposed by the House, and $194,338,000 as proposed by the Senate.

The conference agreement provides the following changes from the amounts in the House bill:

Health facilities program support	−$568,000
Family medicine residencies ($34,000,000 provided in P.L. 97-276	−26,880,000
Family medicine departments	+1,160,000
Special health professions initiatives	+2,000,000

ASSISTANT SECRETARY FOR HEALTH

HEALTH SERVICES MANAGEMENT

Appropriates $96,694,000, instead of $94,713,000 as proposed by the Senate and $98,676,000 as proposed by the House. The conference agreement includes $1,826,000 for health promotion and $13,518,000 for adolescent family life.

HEALTH CARE FINANCING ADMINISTRATION

GRANTS TO STATES FOR MEDICAID

Appropriates $19,361,845,000 for FY 1983 instead of $17,895,162,000 as proposed by the House, and $19,652,750,000 as proposed by the Senate. The amount agreed to by the conferees is based on revised State estimates submitted by the Department of Health and Human Services subsequent to Senate Committee action on the bill.

Appropriates $5,105,600,000 as an advance payment for fiscal year 1984 as proposed by the Senate. The House bill included $4,470,000,000 for this purpose.

PAYMENTS TO HEALTH CARE TRUST FUNDS

Appropriates $15,347,000,000 instead of $15,576,000,000 as proposed by the House and $15,743,000,000 as proposed by the Senate. The amount agreed to by the conferees is based on revised estimates submitted by the Department of Health and Human Services subsequent to Senate Committee action on the bill. The revised estimate includes $25,000,000 for the "federal uninsured payment" authorized by P.L. 97-248.

PROGRAM MANAGEMENT

Provides authority to transfer $959,671,000 from the health care trust funds for administrative expenses related to the Medicare program. This is $10,000,000 less than provided by the Senate but $35,000,000 more than provided by the House. The conference agreement includes an additional $20,000,000 for medicare claims processing costs over the $800,000,000 previously agreed to in P.L. 97-276. The additional funds are in a contingency reserve.

The conference agreement also includes $15,000,000 for the Professional Standards Review Organization (PSRO) program instead of the $25,000,000 proposed by the Senate. The House bill did not include funding for this program. The Tax Equity and Fiscal Responsibility Act repealed the existing program and authorized a new program of utilization review for Federally insured patients. This new program is not expected to be operational during fiscal year 1983 but Section 150 of the new law provides for the maintenance of existing PSRO organizations until the new structure is approved and operational. The amount agreed to by the conferees represents the minimum level necessary to continue efficient and effective organizations including preservation of records and files, completion of on-going studies and maintenance of a minimum staff. The conferees have included language requested by the President to allow for the termination of PSRO's which the Secretary of Health and Human Services finds to be either inefficient of ineffecive.

SOCIAL SECURITY ADMINISTRATION

SPECIAL BENEFITS FOR DISABLED COAL MINERS

Appropriates $1,093,000,000 as proposed by the Senate, instead of $1,102,000,000 as proposed by the House.

SUPPLEMENTAL SECURITY INCOME

Appropriates $8,543,616,000 as proposed by the Senate, instead of $8,571,749,000 as proposed by the House.

Deletes language proposed by the House but omitted by the Senate related to hold harmless payments. Language phasing out these hold harmless payments has been included in P.L. 97-248.

ASSISTANCE PAYMENTS

Appropriates $6,684,207,000 for fiscal year 1983 as proposed by the Senate, instead of $5,284,635,000 as proposed by the House. Appropriates $1,718,000,000 for the first quarter of fiscal year 1984 as proposed by the Senate, instead of $1,327,203,000 as proposed by the House.

CHILD SUPPORT ENFORCEMENT

Appropriates $347,500,000 for fiscal year 1983 as proposed by the Senate, instead of $284,877,000 as proposed by the House. Appropriates $118,000,000 for the first quarter of fiscal year 1984 as proposed by the Senate, instead of $112,500,000 as proposed by the House.

REFUGEE AND ENTRANT ASSISTANCE

Appropriates $585,000,000 for refugee and entrant assistance activities administered by the Department of Health and Human Services. Both the House and Senate deferred consideration of this appropriation in their deliberation on H.R. 7205 and instead included funding in separate sections of H.J. Res. 631, the Continuing Resolution. House included $532,152,000 for these activities while the Senate resolution provided for these activities at the level of $670,670,000. The conference agreement inserts this appropriation into the bill and provides a total of $585,000,000 distributed as follows:

$390.5 million for reimbursement of 100% of eligible cash and medical assistance costs for both refugees and entrants;

$80 million for refugee and entrant social services;

$75.0 million for targeted assistance for both refugees and entrants of which $5 million shall be to continue grants to school districts heavily impacted by entrant students;

$5.9 million for Federal administrative costs;

$6.0 million for preventive health programs;

$11.0 million for voluntary agency grants.

The conferees have agreed to include language requested by the President, included by the House but not included by the Senate. This language allows reimbursement for costs related to legally excludable entrants recently released by Federal courts into U.S. communities.

The conferees have further agreed that the allocations of $75 million for targeted assistance and $80 million for social services have been agreed to notwithstanding any limitation on such funding included in section 412(c) of the Immigration and Nationality Act.

LIMITATION ON ADMINISTRATIVE EXPENSES

Earmarks $47,026,000 for construction activities as proposed by the Senate, instead of $56,026,000 as proposed by the House. Also earmarks $151,625,000 for data processing activities as proposed by the Senate, instead of $142,625,000 as proposed by the House.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

SOCIAL SERVICES BLOCK GRANTS

Appropriates $2,450,000,000, as proposed by the Senate, instead of $1,974,126,000, as proposed by the House.

HUMAN DEVELOPMENT SERVICES

Appropriates $1,753,514,000 instead of $1,762,211,000, as proposed by the House and $1,754,194,000, as proposed by the Senate; earmarks $43,180,000 for part C and $7,320,000 for section 113 of the Developmental Disabilities Assistance and Bill of Rights Act. The conferees note the deletion of $10,514,000 and the legal citation for the Runaway Youth Act, as proposed by the Senate due to the fact that annual funding for this program has been provided by the First Continuing Resolution for 1983 (Public Law 97-276).

CHILD WELFARE SERVICES

Appropriates $572,669,000, as proposed by the Senate, instead of $410,920,000, as proposed by the House.

WORK INCENTIVES

Appropriates $270,760,000, instead of $260,760,000 as proposed by the Senate, and $280,760,000 as proposed by the House.

OFFICE OF COMMUNITY SERVICES

COMMUNITY SERVICES BLOCK GRANT

Inserts language as proposed by the Senate providing for waiving the requirements, under certain limited circumstances, of section 138 of P.L. 97-276 dealing with the 90% pass-through to local community action agencies. Section 138 provides for a mandatory 90% pass-through to local community action agencies; the House bill includes the same language.

DEPARTMENTAL MANAGEMENT

POLICY RESEARCH

Appropriates $14,718,000, as proposed by the Senate instead of $13,440,000, as proposed by the House, and earmarks $1,500,000 to continue research on poverty conducted by the Institute for Research on Poverty, as proposed by the Senate.

GENERAL PROVISION—SECTION 208

Deletes House language relating to the location of the Headquarters of the National Institute of Occupational Safety and Health, as proposed by the Senate.

TITLE III—DEPARTMENT OF EDUCATION

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

Appropriates $3,160,394,000 for Chapter 1 of the Education Consolidation and Improvement Act, instead of $3,033,969,000, as proposed by the House and $3,200,000,000, as proposed by the Senate; and earmarks $4,746,000 for evaluation and studies, as proposed by the Senate, instead of $5,760,000, as proposed by the House. The conference agreement provides $2,687,754,000 for grants to local educational agencies and $33,014,000 for State administration.

Appropriates $7,500,000 for section 418 of the Higher Education Act, as proposed by the Senate, instead of $7,011,000, as proposed by the House.

SPECIAL PROGRAMS

Appropriates $534,500,000 instead of $538,920,000, as proposed by the House and $530,080,000, as proposed by the Senate; earmarks $450,655,000 for the State block grant program authorized under Chapter 2 of the Education Consolidation and Improvement Act; and earmarks $28,765,000 for the Secretary's discretionary fund instead of $29,030,000 as proposed by the House and $28,500,000 as proposed by the Senate. The conferees intend that within the discretionary fund the Secretary use $1,000,000 for law related education projects, similar to those previously authorized by title III-G of the Elementary and Secondary Education Act.

BILINGUAL EDUCATION

The conferees are agreed that the appropriation of $138,057,000 includes $84,126,000 for grants to local school districts, $31,288,000 for training grants, $16,557,000 for support services, and $2,400,000 for bilingual education desegregation grants.

SCHOOL ASSISTANCE IN FEDERALLY AFFECTED AREAS

The conference agreement provides that payment to any local educational agency under section 3(a) shall be 90 percent of such payment for fiscal year 1981 unless such agency is eligible under section 3(d)(2)(B), except that payment under section 3(a) shall be 95 percent for any local educational agency in which the number of children eligible under section 3(a) is at least 20 percent of the total number of children in average daily attendance at such agency.

The conference agreement provides that payment to any local educational agency under section 3(b) shall not exceed the amount of such payment for fiscal year 1982 unless such agency is determined eligible under section 3(d)(2)(B).

The conference agreement restores language proposed by the House authorizing payments to newly eligible local educational agencies.

The conference agreement limits the aggregate amount for payments under section 3(d)(2)(B) to $15,000,000, as proposed by the Senate instead of $10,000,000 as proposed by the House.

The conference agreement appropriates an additional $5,000,000 for payments of entitlements under section 2 to all local educational agencies, thus appropriating a total of $15,000,000 for such payments during fiscal year 1983. The conferees intend that the section 2 payment to the Douglas School District in South Dakota impacted as a result of Ellsworth Air Force Base shall be at 100 percent of entitlement under section 2.

EDUCATION FOR THE HANDICAPPED

Appropriates $1,110,252,000 as proposed by the Senate instead of $1,103,680,000 as proposed by the House. The conference agreement provides $970,000,000 for the basic State grant program, $25,000,000 for preschool incentive grants, and $12,000,000 for media services and captioned films.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

Appropriates $1,036,727,000 as proposed by the Senate, instead of $1,035,227,000 as proposed by the House. The conference agreement includes all of the earmarkings, and the language provisions relating to centers for independent living and projects with industry, as proposed by the Senate.

VOCATIONAL AND ADULT EDUCATION

Appropriates $816,500,000 instead of $829,500,000 as proposed by the House and $803,500,000 as proposed by the Senate; and earmarks $7,678,000 for programs of national significance, and $99,590,000 for program improvement and supportive services. The conferees are agreed that the amount appropriated includes $31,633,000 for consumer and homemaking education.

STUDENT FINANCIAL ASSISTANCE

Appropriates $3,567,800,000, as proposed by the Senate, instead of $3,569,480,000, as proposed by the House. The conference agreement provides $540,000,000 for college work study grants and $60,000,000 for State student incentive grants, and includes language proposed by the Senate authorizing the Secretary of Education to make ratable reductions in the distribution of the amount appropriated for State student incentive grants.

GUARANTEED STUDENT LOANS

Appropriates $3,100,500,000 as proposed by the Senate, instead of $2,484,631,000 as proposed by the House.

HIGHER AND CONTINUING EDUCATION

Appropriates $385,525,000 instead of $400,990,000 as proposed by the House and $374,940,000 as proposed by the Senate.

The conference agreement provides the following:

Special programs for the disadvantaged	$154,740,000
Veterans cost of instruction	3,000,000
International education (Domestic Programs)	21,000,000
Public service fellowships	1,920,000
Law school clinical experience	605,000
Fund for improvement of postsecondary education	11,710,000
Carl Albert research center	2,000,000

The conference agreement inserts citation for title VI, parts A and B of the Higher Education Act as proposed by the Senate.

The conference agreement deletes appropriation of $9,000,000 for the General Daniel James Memorial Education Center as proposed by the Senate because the funds for this purpose are included in the first continuing resolution for 1983 (Public Law 97-276).

The conference agreement provides that the funding limitation of section 922(e) of the Higher Education Act shall not apply to funds in this Act, as proposed by the Senate.

EDUCATIONAL RESEARCH AND STATISTICS

Appropriates $64,203,000 as proposed by the Senate instead of $61,978,000 as proposed by the House.

For the National Institute of Education, the conferees have agreed to a level of $55,614,000, the full authorization. Of that amount, $30,000,000 will support the 8 regional educational laboratories and 9 regional centers. To avoid possible disruption in funding these laboratories and centers, the Secretary is directed to provide sufficient funds to assure that these institutions be continued at the 1982 funding level. Also, within the $30,000,000 provided for laboratories and centers, sufficient funds should be used to establish and maintain, through a competitive process, a new central midwestern regional laboratory. In addition, of the amount provided for labs and centers, funds should be used to establish a New England regional laboratory or center; and either a new laboratory or center in the southeast, or an equivalent amount to support the Southeast Educational Research Consortium.

LIBRARIES

Appropriates $80,320,000 as proposed by the Senate instead of $80,080,000 as proposed by the House.

DEPARTMENTAL MANAGEMENT

Deletes language proposed by the House authorizing the transfer of $576,000 from the Social Security Trust funds.

OFFICE OF THE INSPECTOR GENERAL

Amends appropriation heading as proposed by the Senate.

TITLE IV—RELATED AGENCIES

ACTION

OPERATING EXPENSES

Appropriates $129,321,000 instead of $125,490,000 as proposed by the Senate and $129,073,000 as proposed by the House. The conference agreement includes the following amounts:

VISTA	$11,831,000
Service learning	1,830,000
Citizen participation and volunteer demonstration	1,984,000

The conferees direct that appropriations for VISTA be used to recruit, train, and place new VISTA volunteers at projects evenly throughout fiscal year 1983. The conferees further direct that VISTA volunteers in service be maintained at a level of not less than 1,800 volunteers throughout fiscal year 1983. The conferees have included these directives in order to give the authorizing committees an opportunity to act on reauthorization or sunset.

The conference agreement also includes bill language proposed by the House which earmarks $11,831,000 for the VISTA program and language as proposed by the Senate providing that no funds may be used to close State field offices of the agency or to reduce the number of personnel in those offices.

FEDERAL MEDIATION AND CONCILIATION SERVICE

SALARIES AND EXPENSES

Appropriates $21,321,000 as proposed by the Senate, instead of $21,721,000 as proposed by the House.

NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

Appropriates $840,000, as proposed by the Senate, instead of $345,000, as proposed by the House.

GENERAL PROVISION—SECTION 510

Inserts language proposed by the Senate authorizing the Chairman of the National Mediation Board to make available not to exceed $2,500 for official reception and representation expenses.

GENERAL PROVISION—SECTION 512

Deletes language proposed by the House relating to job opportunities and inserts language proposed by the Senate relating to amounts appropriated in P.L. 97-276.

The conferees agree that instructions and guidance contained in House Report 97-894 and in Senate Report 97-680 should be followed to the fullest extent consistent with the agreements reached in the conference.

REFUGEE AND ENTRANT ASSISTANCE

Amendment No. 17: Deletes provision included by the House which provided $532,152,000 for refugees and entrants. The agreement on Amendment No. 14 includes $585 million in lieu of the amounts which would have been made available by this section.

DEPARTMENT OF LABOR

Amendment No. 18: Deletes language proposed by the House which would have appropriated "such amounts as may be necessary, not to exceed $5,411,000,000" for "Advances to the Unemployment Trust Fund and other funds". This account is provided for elsewhere in the joint resolution.

Amendment No. 19: Changes paragraph number as proposed by the Senate.

Amendment No. 20: Inserts language proposed by the Senate which makes the provision effective during fiscal year 1983 notwithstanding section 102 of the joint resolution.

UTILIZATION AND QUALITY CONTROL REVIEW (PSRO)

Amendment No. 21: Deletes section included by the House which would have provided for utilization and quality control review activities at the current rate. The agreement on Amendment No. 14 includes a specific appropriation of $15,000,000 for this activity.

REFUGEE AND ENTRANT ASSISTANCE

Amendment No. 22: Deletes provision included by the Senate which provided $670,670,000 for refugees and entrants. The agreement on Amendment No. 14 includes $585 million in lieu of the amounts which would have been made available by this section.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

Amendment No. 23: Changes paragraph number and restores language proposed by the House concerning staffing levels in those States that operate their own occupational safety and health programs under section 18 of the Occupational Safety and Health Act. The House language overrides language on this subject contained in the Supplemental Appropriations Act, 1982 (P.L. 97-257) and in the House and Senate versions of the regular Labor-HHS appropriations bill for 1983 (H.R. 7205).

Because of the complexity of this issue, the conferees agree to reexamine it in the next session of Congress. The conferees believe that the authorizing committees should carefully examine the issue as well.

ENERGY AND WATER DEVELOPMENT

Pending enactment of the regular appropriations act for fiscal year 1983, energy and water development activities are continued at the current rate of operations under the authority and conditions provided in applicable appropriation acts for fiscal year 1982. In order to provide greater program direction, agencies under the jurisdiction of the Energy and Water Development Subcommittee are directed to use House Report 97-850 and Senate Report 97-673 which accompany the fiscal year 1983 appropriations bills in implementing the provisions of this resolution.

The conference agreement provides sufficient funding to continue and complete by July 31, 1983 the safeguards evaluation and demonstration at the Barnwell facility. No federal funding is provided for any activities at the Barnwell plant beyond July 31, 1983.

The continuing resolution provides funding for the second stage of the Sacramento Municipal Utility District's 100 megawatt photovoltaic project at the $6.8 million level. The Department is to make these funds available to the SMUD in a manner and at a rate that enables SMUD to meet the two-step process for implementing the second stage the utility has recently proposed.

Within available funds, the Corps of Engineers is directed to proceed with the necessary planning and engineering of the Town Brook, Quincy, Massachusetts project.

The conferees are aware of the serious flooding problems which occurred in Clinton and Jacksonport, Arkansas, during December 1982. The Corps is directed within available funds to expedite construction of these projects under the Small Flood Control Projects Program to alleviate occurrences of future flood damages.

Within funds available, the Corps of Engineers is directed to proceed with the Tualatin channel improvement project and to continue construction on the Siuslaw River and Bar project in Oregon.

In light of recent severe flooding in the Meramec River Basin in Missouri, the conferees direct that, within available funds provided by this joint resolution, $800,000 be made available to initiate action to provide flood control measures along the Meramec River Basin authorized by Section 2(h) of P.L. 97-128.

Within available funds, the Bureau of Reclamation is directed to proceed with the WEB project in South Dakota.

Within available funds provided by this joint resolution, $16,400,000 shall be available for the Tug and Levisa Fork of the Big Sandy and Cumberland Rivers, West Virginia and Kentucky projects authorized by section 202 of Public Law 96-367. Further, the provisions included in Senate Report 97-673 with respect to section 202 shall be in force during the term of this joint resolution.

Amendment No. 24: Adds Senate language providing that no funds shall be used for further study or construction or in any fashion for a Federally funded waterway which extends the Tennessee-Tombigbee project south from the City of Demopolis, Alabama.

Amendment No. 25: The Conference agreement includes $1,000,000 to correct an existing navigation hazard at the Franklin Ferry Bridge, Jefferson County, Alabama, as proposed by the Senate.

Amendment No. 26: Inserts language proposed by the Senate for funding of Department of Energy, Atomic Energy Defense Activities, modified to specify the total amounts available for operating expenses and plant and capital equipment.

The managers agree with the allowances and conditions for Atomic Energy Defense Activities Contained in Senate Report 97-673 except for the Inertial Confinement Fusion program, security investigations and decommissioning activities at the Mound facility, which shall be at the levels provided in House Report 97-850. The special isotope separation program is to be funded at $66,200,000. Within operating expenses, the funding for these changes is available as a result of buildup constraints during the period of the first continuing resolution and the continuing reduction in inflation expectations in other program activities. The conference agreement reflects the following specific project allowances in plant and capital equipment:

Project:	*Conference allowance*
82-D-15	$5,000,000
82-D-124	2,000,000
82-D-107	154,400,000
82-D-111	6,000,000
Inflation estimates	−16,100,000

From within the available ICF funding, $4,250,000 shall be available for the pulsed power project. For the W-82, the conferees have provided no funding for Project 82-D-109. This action does not preclude continuation of research and development.

Amendment No. 27: Deletes House language relating to the Clinch River Breeder Reactor project.

The House voted on December 14 to delete additional funding for the Clinch River project, except for contract termination costs, during the period December 17, 1982, through March 15, 1983. The Senate voted on December 17, 1982, to continue Clinch River funding at FY 1982 levels through September 30, 1983.

The conferees agree as follows:

1. The Department will not initiate construction of any permanent facility structures or place any additional major equipment orders during the period of this resolution.

2. Ongoing activities related to the NRC licensing process should be continued.

3. The current rate of Federal funding for the Clinch River project shall be determined so as to take into account the anticipated $19,000,000 available from non-Federal contributions in 1983.

4. Up to $1,000,000 shall be available to vigorously explore proposals including a reconsideration of the original cost-sharing arrangement, that would reduce Federal budget requirements for the Clinch River project or project alternative, and secure greater participation from the private sector. The Department is to submit its findings to the cognizant congressional committees for consideration by not later than March 15, 1983.

The conferees strongly urge the cognizant authorizing committees in the House and the Senate to consider this issue early in the 98th Congress.

Amendment No. 28: Deletes House language relating to the O'Neill Irrigation Unit, Nebraska.

Amendment No. 29: Deletes House language relating to the Garrison Diversion Unit, N.D.

No appropriation, fund or authority made available by this joint resolution shall be used for construction of features of the Garrison Diversion Unit in North Dakota affecting waters flowing into Canada.

Department of Housing and Urban Development

Amendment No. 30: Restores language proposed by the House and stricken by the Senate and deletes language proposed by the Senate, amended to appropriate $8,651,475,689 in budget authority and $519,711,198 in annual contract authority for annual contributions for assisted housing, instead of $9,186,630,000 and $485,114,257 as proposed by the House and $5,732,355,689 and $313,477,865 as proposed by the Senate. This is $535,154,311 less than the comparable level of $9,186,630,000 provided by the House and $2,919,120,000 more than the Senate recommendation of $5,732,355,689.

The conferees have agreed to fund 2,000 Indian housing units; 14,000 Section 202 new and substantially rehabilitated units; 65,000 rent supplement and Section 23/Section 8 conversion units; and 10,000 property disposition units from within the $8.7 billion of new budget authority recommended. In addition, a total of 67,146 Section 8 existing units and 15,000 Section 8 moderate rehabilitation units are funded from the anticipated recapture of $4,600,000,000 in 1983. It is agreed that for the purposes of allocating units to the field, the Department should make such initial allocation on the assumption that the full $4.6 billion of estimated recaptured funds will materialize and be utilized. The conferees further agree that Section 8 existing and moderate rehabilitation units should be funded on an eighty percent/twenty percent split from every dollar recaptured.

The resolution also includes $2,500,000,000 from new authority for public housing modernization. This is a significant increase above the 1982 level of $1,800,000,000, and it is anticipated that approximately 100,000 public housing units can be modernized with these funds.

The most critical decision made by the conferees was not to include any monies for new and substantial rehabilitation of low-rent public housing projects. This action was taken with the understanding that it is essential to "clean out" the existing public housing new construction pipeline of approximately $9 billion. The Committee of conference believes that an effort must be made to at least begin to clear the pipeline before additional development authority is provided. The conferees expect that budget authority for public housing new construction will be provided in 1984 and future years if progress is made on clearing the pipeline.

In that connection, the conferees want to make clear that both bill and report language are constructed so as to direct HUD to permit every reasonably viable new public housing project—regardless of how long it has been in the pipeline—to go to construction as soon as possible. It is recognized that in many areas new public housing construction faces local resistance, site acquisition problems, interest rate difficulties—all of which combine to impede the construction of public housing units.

By the same token, the Committee of Conference also recognizes that within the current public housing pipeline there are a substantial number of units reserved in previous years that will never go to construction regardless of how much time is made available. Therefore, the Department is directed to implement an emergency effort to bring to the construction stage those public housing projects currently reserved for new construction. The conferees also direct that no artificial limits be placed on the time allowable from reservation to start of construction for individual projects. Rather, it is the intent of the conferees to permit those projects in the public housing pipeline to go to construction that have a reasonable chance of doing so in the coming months.

In this connection, the conferees direct the Department to report on the total universe of public housing reservations now within the pipeline. This report should include, by project, the Department's and the local public housing authority's expectations of each project's potential in reaching the construction stage. The Committee of Conference expects the receipt of this report within ninety days of the date of enactment of this joint resolution.

The conferees have included legislative language that would prohibit the Department from implementing the final rule concerning total housing development costs published in the September 8, 1982 Federal Register. The Congressional Budget Office has indicated that these new limits on public housing significantly constrain the development of same because they do not take into account the higher land and site development costs of public housing. Although the conferees are in agreement with the Department's intent to reduce the cost of public housing, the new rule may go beyond this intent and result in stopping the production of otherwise feasible housing projects through the establishment of an arbitrary limitation on total development costs. A separate legislative provision provides that if the Department wishes to submit an analysis of the expected impact of the rule, the Appropriations Committees may waive the restriction on implementing the rule.

The following table reflects the conference agreement.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING—GROSS RESERVATIONS, FISCAL YEAR 1983

	Units	Cost	Contract authority	Term	Budget authority
Authority available:					
New authority	NA	NA	519,711,198	NA	8,651,475,689

Total, all programs	173,146	NA	921,564,376	NA	15,616,541,887

Amendment No. 31: Inserts language proposed by the Senate increasing the housing for the elderly and handicapped fund loan limitation by $271,800,000 and providing that loans made in fiscal year 1983 shall bear an interest rate of 9.25 percent, amended to increase the loan limitation by $181,200,000.

Amendment No. 32: Inserts language proposed by the Senate increasing the Federal Housing Administration Fund limitation on guaranteed loans by $6,100,000,000 and permitting multifamily mortgages in highest cost areas to exceed the Federal Housing Administration limit by 140 percent.

Amendment No. 33: Restores language proposed by the House and stricken by the Senate providing $500,000,000 in mortgage purchase authority for the Government National Mortgage Association's Special Assistance Functions Fund.

Of the total amount provided the Committee of Conference agrees that $250,000,000 shall be made available to the Targeted Tandem program, to be distributed on the basis of the chronological firm commitment date. The remaining $250,000,000 shall be made available for partially assisted Section 8 projects.

Amendment No. 34: The managers have amended the amendment in order to reflect the latest action on the Interior Appropriation Act. This provides that that bill will be continued at the level provided in the conference agreement (H. Rept. 97-978) which was agreed to in the House on December 18, 1982 and in the Senate on December 19, 1982. There is also an additional appropriation of $2,000,000 for fossil energy research and development to conform the appropriation to the agreements reached by the conference committee.

Amendment No. 35: Deletes Senate language specifying that activities provided for in the Agriculture, Rural Development and Related Agencies Appropriation Act, 1983 would be at the conference rate.

DISTRICT OF COLUMBIA

Amendment No. 36: Adds language proposed by the Senate which provides that funding for programs and activities in the District of Columbia Appropriation Act, 1983 (H.R. 7144) shall be to the extent and in the manner provided for in the Conference Report and Joint Explanatory Statement of the Committee of Conference (House Report No. 97-972) filed in the House of Representatives on December 15, 1982. The conference action as agreed to by the conferees was adopted by the House on December 17, 1982, and by the Senate on December 18, 1982, and is presently awaiting the President's signature.

Amendment No. 37: Deletes language proposed by the Senate which provides for funding projects and activities in the Department of Transportation and Related Agencies Appropriation Act at the conference agreement rate.

Amendment No. 38: Inserts expiration date of September 30, 1983 for the joint resolution as proposed by the Senate instead of March 15, 1983 as proposed by the House.

PREVAILING RATE SUPERVISORS

Amendment No. 39: Inserts language proposed by the Senate which exempts certain prevailing rate supervisors from the pay increase limitation.

VETERANS ADMINISTRATION

Amendment No. 40: Restores language proposed by the House and stricken by the Senate repealing the $35,000,000 limitation on the Veterans Administration's medical automatic data processing services, directing the VA to cease further development of the computerized medical information support system, and shifting resources to support the installation of the decentralized hospital computer program.

The Committee of Conference does not intend that such specific actions as those taken in this joint resolution become common practice. However, the Committees on Appropriations have for years been encouraging the Veterans Administration to resolve the issue of the proper medical computer system. The VA has struggled with the problem without any discernible progress. Any further delay in proceeding with the decentralized (MUMPS) system is not justified and will only result in the VA's medical computer system falling further behind the private health care industry. The conferees are concerned that the VA continue with all deliberate speed to develop plans to use the automated output of the decentralized systems in order to provide system-wide data to the Administrator.

Amendments No. 41, 42 and 43: Change section numbers.

U.S. POSTAL SERVICE

Amendment No. 44: Inserts language proposed by the Senate which appropriates sufficient amounts so that postal rates for all preferred rate mailers covered by section 3262 of 39 U.S.C. can be maintained at step 14 rates.

Amendment No. 45: Deletes House language limiting certain activities related to minerals exploration or development in wilderness or wilderness study areas.

Similar language has been agreed to in the conference agreement on the Interior and Related Agencies Appropriations Act, 1983 (House Report 97-978).

Amendment No. 46: Changes section number.

Amendment No. 47: Strikes language concerning the International Financial Institutions proposed by the House and is no longer required.

Amendment No. 48: Changes section number.

Amendment No. 49: Inserts language proposed by the Senate to make expenditures from the Bonneville Power Administration Fund available for construction of the Boundary Integration and Colville Valley Support project and to provide additional borrowing authority, not to exceed $276,000,000 in fiscal year 1983, as authorized by P.L. 96-501.

Amendment No. 50: Restores section number.

INTERNAL REVENUE SERVICE

Amendments Nos. 51, 52, and 53: Appropriates $170,510,000 for Salaries and Expenses, $1,009,409,000 for Examinations and Appeals and $1,000,778,000 for Taxpayer Services and Returns Processing as proposed by the Senate.

U.S. CUSTOMS SERVICE

Amendment No. 54: Inserts language prohibiting the closing or relocating of certain Customs officers as proposed by the Senate.

It is the intention of the conferees that present restrictions on the Customs Service with respect to effecting a reduction of Customs Service regions below nine, and for effecting Customs office closings or consolidations, or reductions in personnel, programs or functions, remain in place for now. The conferees intend, however, that the House and Senate Committees on Appropriations review these restrictions in the fiscal year 1984 appropriations hearings, and explore with the Customs Service, ways in which genuine cost savings through consolidations and reductions can be achieved without posing economic loss or hardship on areas and localities affected by cost savings initiatives.

U.S. SECRET SERVICE

Amendment No. 55: Inserts language allowing the Secret Service to hire an additional 200 new special agents as proposed by the Senate. It is the intention of the managers on the part of both the Senate and House of Representatives, that in appropriating $235,000,000 to the Department of the Treasury for "Salaries and expenses," United States Secret Service, that these funds will be expended in accordance with the direction of the Senate Report 97-547 and subject to the "Salaries and expenses" provisions of the associated Senate bill (S. 2916). This includes designation of the Training Facility in Beltsville, Maryland as the James J. Rowley Secret Service Training Center. This position is adopted in view of the fact that the Senate bill and report

contemplate and address expenditures at this level.

INTERNAL REVENUE RULING

Amendment No. 56: Inserts language proposed by the Senate which exempts North Dakota from certain Internal Revenue Service rulings.

Amendment No. 57: Deletes House proposed language in Section 118 which would have required that off-budget oil acquisition funding for the Strategic Petroleum Reserve be continued at the current rate. This provision is unnecessary because requirements for acquisition and transportation for the SPR have been established in the Conference Report on the Department of the Interior and Related Agencies Appropriation Act, 1983 (House Report 97-978) as provided for in Section 101(h) of this joint resolution.

Amendment No. 58: Deletes language proposed by the Senate relating to programs for the handicapped and disabled.

GENERAL SERVICES ADMINISTRATION

FEDERAL BUILDINGS FUND

Amendment No. 59: Makes available $770,000,000 within the Federal Buildings Fund for rental of space as proposed by the Senate. The conferees are agreed that the total limitation on expenditures in the Fund will be raised to accommodate this increase for rental of space.

Amendment No. 60: Deletes House language prohibiting leasing and related activities in designated areas off the northern and central California coast.

Similar language has been agreed to in the conference agreement on the Department of the Interior and Related Agencies Appropriation Act, 1983 (House Report 97-978).

CONTRACTING OUT

Amendment No. 61: Deletes language proposed by the Senate and restores language proposed by the House which limits contracting out of federal jobs performed by veterans.

FEDERAL BUILDINGS FUND—CONSTRUCTION AND OTHER PROJECTS

Amendment No. 62: Inserts language which permits projects listed in the Senate reported Treasury, Postal Service Appropriations bill for 1983 (S. 2916) to be initiated, as proposed by the Senate.

Amendment No. 63: Inserts language proposed by the Senate that amends Reorganization Plan Numbered 3 of 1979 by establishing in the International Trade Administration of the Department of Commerce, a Director General of the United States and Foreign Commercial Services who shall be appointed by the President and approved by the Senate. This section elevates the currently authorized position, established at an Executive Level V, to an Executive Level IV.

PROPERTY REVIEW BOARD

Amendment No. 64: Inserts language proposed by the Senate which establishes the position of the Executive Director of the Property Review Board at the rate of pay of Executive Schedule Level III.

Amendments No. 65 and 66: Change section numbers.

Amendment No. 67: Retains House language, which was stricken by the Senate, transferring $200,000 from the Department of Defense to the Department of Education for a grant to the Highland Falls-Fort Montgomery, New York, central school district.

Amendment No. 68: Changes section number.

Amendment No. 69: Deletes the House provision regarding outside income.

INCOME DISREGARDS

Amendment No. 70: Restores House language stricken by the Senate amended to read as follows:

No funds provided under this joint resolution shall be used to deny or reduce Supplemental Security Income or Aid to Families with Dependent Children benefits because of home energy assistance provided by a private nonprofit organization, or any entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal govenmental body, if the appropriate State agency has certified that such assistance was based on need as determined by such organization or entity.

The language agreed to prohibits the counting of privately financed home energy assistance payments as income under either the Supplemental Security Income or Aid to Families with Dependent Children program. This language is only effective during the period covered by this Continuing Resolution.

Amendment No. 71: Restores language proposed by the House concerning cost-of-living adjustments, modified with respect to members of the Senate and Senate staff. At the request of the Senate conferees, the conference agreement excludes Senators from the cost-of-living adjustment and provides clarification of the intent of the House language regarding Senate staff. The conferees note that section 141(c) of P.L. 97-92 provides that to the maximum extent practicable, the salary of employees whose pay is disbursed by the Clerk of the House may not be less than the salary of employees whose pay is disbursed by the Secretary of the Senate, for equivalent positions. Similarly, it is the intent of the conferees that Senate staff salary maximums should not be less than those maximums payable to House staff, for comparable positions.

The conferees have dropped the House provision regarding federal judges. Therefore, section 140 of P.L. 97-92 would not prevent the October 1982 cost-of-living adjustment from being paid to federal judges or Justices of the Supreme Court since the conference agreement provides a specific authorization by Act of Congress for salary increases for senior-level personnel, which includes those judges and Justices. The conferees note that the retirement program of federal Judges is far more generous than that of all other federal employees. Moreover, Judges make no contributions to their retirement program, unlike most other federal employees. The Conferees believe that the committees of jurisdiction should look into this matter and correct the situation so that the Judges at least make some contribution comparable to other federal employee retirement program participants.

FEDERAL LABOR RELATIONS AUTHORITY

Amendment No. 72: Appropriates $15,500,000 for Salaries and Expenses as proposed by the Senate.

Amendment No. 73: Strikes language proposed by the Senate which dealt with the timing of obligation and disbursement authority.

Amendment No. 74: Provides language proposed by the Senate designed to protect United States commodity producers.

Amendment No. 75: Provides language proposed by the Senate which prohibits certain transfers by the Agency for International Development and also provides $8 million for operating expenses to be obtained from deferral numbered D83-1.

Amendment No. 76: Provides language proposed by the Senate which deals with countries that do not cooperate with the United States in preventing narcotics and other dangerous drugs from entering the United States.

Amendment No. 77: Provides language proposed by the Senate which updates per capita gross national product figures regularly carried in the Foreign Assistance Appropriations Bill.

Amendment No. 78: Inserts language proposed by the Senate regarding a Senate housekeeping item concerning health insurance payments.

Amendment No. 79: Inserts language proposed by the Senate requiring that commuter service authorities which operate commuter service transferred from Conrail under part 2 of the Northeast Rail Service Act of 1981 be subject to applicable laws with respect to such service. The language proposed by the Senate referencing particular Acts was deleted.

The conferees agree that commuter agencies operating service after December 31, 1982, pursuant to part 2 of NERSA, shall be subject to applicable laws. Because of their desire not to influence potential court decisions, the conferees have agreed not to enumerate even a partial list of applicable laws on the basis that the appropriate authorizing committees of Congress are in a better position to clarify any ambiguity which may exist in present law.

Amendment No. 80: Inserts language proposed by the Senate providing that Conrail employees who are deprived of employment or adversely affected by assumption (or discontinuance) of service by Amtrak shall be eligible for employee protection payments exclusively under section 701 of NERSA. The House bill contained no comparable provision.

DEBT COLLECTION

Amendment No. 81: Deletes language proposed by the Senate which would have amended the Debt Collection Act of 1982.

The conferees have not received adequate information as to the manner and extent to which debt collection activities will be conducted pursuant to the Debt Collection Act. The conferees direct that the Administration provide Congress with more information as to the total cost and scope of this activity.

Amendment No. 82: Deletes language proposed by the Senate which would have provided that Department of Defense civilian air traffic controllers receive various pay and allowances at the same rates as Federal Aviation Administration controllers.

Amendment No. 83: Deletes language proposed by the Senate relating to the authorization for the capital construction fund for fishery facilities.

Amendment No. 84: Deletes language proposed by the Senate which would have prohibited the Federal Trade Commission from exercising its antitrust and rulemaking authority to invalidate State laws that establish licensure of professionals and permissable tasks and duties.

FEDERAL EMPLOYEE HEALTH PLANS

Amendment No. 85: Inserts language proposed by the Senate which deletes the provision which prohibits the inclusion of abortion coverage in federal employee health plans.

Amendment No. 86: Deletes language proposed by the Senate which would have prohibited funds from being used to develop or procure the Viper light anti-tank weapon.

This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

Amendment No. 87: Deletes language proposed by the Senate which would have changed the expiration date of the enlistment bonus and reenlistment bonus programs from December 17, 1982 to September 30, 1983. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations

Amendment No. 88: Deletes language proposed by the Senate which would have allowed the utilization of $50,000,000 of funds available to the Defense Department for purchases or commitments to purchase metals, minerals or other materials under section 303 of the Defense Production Act of 1950, as amended. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

FORT DERUSSY

Amendment No. 89: Inserts language proposed by the Senate which prohibits the sale, lease or rental of Fort DeRussy, Honolulu, Hawaii.

Amendment No. 90: Deletes language proposed by the Senate which would have placed a limitation on active United States military personnel stationed in Europe at the level planned for fiscal year 1982, allowing a Presidential waiver if national security requirements dictate. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

Amendment No. 91: Deletes language proposed by the Senate which would have provided that $422,100,000 be available for the purchase of the Multiple Launch Rocket System under a multiyear contract. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

Amendment No. 92: Inserts Senate language deauthorizing the Bradley Lake, Alaska project. Language is also included providing for continuation of construction of vital distribution systems and drains on the San Luis Unit, Central Valley project; $4,000,000 for construction of the Yatesville Lake project in order to avoid further disastrous flooding in the area, and language to provide for construction of urgently needed bank erosion control works along the banks of the Sacramento River.

Amendment No. 93: Appropriates an additional $3,500,000 for carrying out the Runaway and Homeless Youth Act, instead of $7,000,000 as proposed by the Senate. The conferees note that $18,000,000 was appropriated for this purpose in the first continuing resolution for 1983 (Public Law 97-276); therefore the total appropriation for fiscal year 1983 is $21,500,000 for this program.

Amendment No. 94: Inserts language proposed by the Senate appropriating $7,600,000 for payments to the Alaska Railroad revolving fund as proposed by the Senate and adds language appropriating $23,200,000 for the Dodge Island Bridge Projects, Miami, Florida.

Amendment No. 95: Amends language proposed by the Senate regarding the payment of cable system rates. The Senate provision was based upon a concern over the impact of the Copyright Royalty Tribunal's October 20, 1982 decision on the development of a distant signal marketplace and would have stayed the effective date of the decision until the completion of all judicial appeals. The conference agreement delays the effective date of the Tribunal's October 20, 1982 decision with respect to rates charged to cable system operators for certain broadcast signals until the United States Court of Appeals for the District of Columbia renders a final decision or until March 15, 1983, whichever occurs first. The accrual of liability for copyright royalty fees is similarly delayed. The conference agreement also includes a proviso to ensure that in the meantime the Copyright Office and the Library of Congress may continue to perform routine business except as solely and specifically related to the subject decision.

Amendment No. 96: Inserts language proposed by the Senate amended to read as follows:

Notwithstanding any provision of this joint resolution or any other law or regulations, payments for local educational agencies under the Act of September 30, 1950 (Public Law 874, 81st Congress) in Montana for fiscal year 1983 shall be computed from corrected 1981 financial data. The provisions of this section shall not apply unless the following conditions are met:

(1) No such payments shall be made until an audit is conducted. (2) No such payments shall be made prior to March 30, 1983. (3) The total amount of the increase in payments made by reason of this section shall not exceed $3,000,000. (4) No such payments shall be made prior to the submission of the audit report to the Committee on Appropriations of the Senate and of the House of Representatives.

Amendment No. 97: Deletes proposal of the Senate to extend the authorities contained in the Department of Justice Appropriation Authorization Act for fiscal year 1980 for the remainder of fiscal year 1983. Similar language is included in Amendment No. 13.

TRANSPORTATION OF FEDERAL WORKERS

Amendment No. 98: Deletes language proposed by the Senate which would have restricted the transportation of federal employees from home to work.

The General Accounting Office is hereby directed to conduct a study of the various federal departments' and agencies' use of government automobiles and chauffeurs for transportation of federal employees between their domiciles and places of employment. This study is to be provided to the Congress not later than June 1, 1983.

Amendment No. 99: Inserts language proposed by the Senate making certain personnel at the FAA Academy eligible for premium pay awarded with several technical modifications.

The conferees have agreed to this provision in order to correct an inequity which arose upon the enactment of legislation to increase the compensation of air traffic controllers and related personnel in October. Under that legislation, instructors at the FAA Academy in Oklahoma City who train individuals to perform air traffic control, airway facilities, and flight inspection functions which would qualify for premium pay, would not themselves be entitled to premium pay. This section permits these instructors and their immediate supervisors to receive this premium pay.

Without this expansion of coverage, recruitment of instructors for the Academy could be hampered, because people in operational positions covered by premium pay would not want to accept a position at the Academy which would require giving up those benefits. The new provision requires that, in order to be eligible for premium pay, a person must have occupied a position in the field which would have been covered by premium pay immediately prior to accepting a position as an instructor in the Academy.

The conferees expect the Administrator to make the necessary coverage determinations as soon as practicable in order that these pay raises may become available as soon as possible.

BEAVERTAIL POINT

Amendment No. 100: Inserts language proposed by the Senate which prohibits the sale or disposal of property known as the Naval and Marine Corps Reserve Center at Beavertail Point, Jamestown, Rhode Island.

SSI PASS ALONG

Amendment No. 101: Inserts language proposed by the Senate amending Section 1618 of the Social Security Act to waive certain penalties under the Supplemental Security Income program. No similar provision was included by the House.

LOW INCOME ENERGY

Amendment No. 102: Appropriates an additional $25 million for low income energy assistance as provided by the Senate. The agreement on Amendment No. 14 provides $1,850 million for this program.

Amendment No. 103: Inserts language proposed by the Senate directing the Secretary to withdraw from the Interstate Highway System certain planned highway segments in New Jersey and to designate portions of the New Jersey Turnpike as part of the Interstate System. The House bill contained no comparable provision.

The conferees are concerned that restrictive administrative interpretations of the Federal-Aid Highway Act of 1981 may result in exclusion from the Interstate cost estimate of certain eligible projects contrary to Congressional intent. For example, the approved 1981 Interstate cost estimate included construction work on Interstate 95 in Dade County, Florida, associated with high-occupancy vehicle lanes, connectors from I-95 to two rapid transit terminals and parking facilities for the terminals. This project was approved by the Federal Highway Administration on October 8, 1980, and its cost was included in the Interstate cost estimate associated with the Federal-Aid Highway Act of 1981. It is the intent of the conferees that this project remain eligible for Interstate construction funding.

Amendment No. 104: Inserts Senate language requiring the Secretary of the Interior to make reclamation grants to States within 60 days of receipt of a complete abandoned mine reclamation grant application under the provisions of the Surface Mining Control and Reclamation Act. The managers agree that all aspects of such grant application must be approved, as under applicable law, by the Secretary before appropriated funds are withdrawn from the Abandoned Mine Reclamation Fund for transfer to the States.

Amendment No. 105: Inserts language proposed by the Senate providing that notwithstanding Public Law 97-622, funds made available to the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research under Public Law 97-216 shall remain available until March 31, 1983.

The conferees have agreed to a 3 month extension of the life of the Commission so that it can file its final report no later than March 31, 1983. The conferees are in agreement that no further extensions will be granted the Commission.

Amendment No. 106: Inserts language proposed by the Senate exempting the "transportation of broken, crushed, or powdered glass" from ICC jurisdiction. The House bill contained no comparable provision.

Amendment No. 107: Inserts language proposed by the Senate regarding a Senate housekeeping item placing a limitation on the planning or design of any new Senate office buildings.

Amendment No. 108: Provides language proposed by the Senate which limits the use of U.S. funds in international programs if such programs aid the P.L.O., SWAPO, or Cuba.

Amendment No. 109: Deletes language proposed by the Senate extending the authorization for certain provisions of the Federal Trade Commission Improvements Act of 1980. The Managers have agreed to incorporate the extension of the expiring provisions within Amendment No. 13.

Amendment No. 110: The managers have amended the amendment of the Senate in order to establish a one-time distribution of $200,000,000 to states from escrow settlement accounts based upon a formula which considers the amount of refined petroleum consumption within each state. No funds may be used by DOE or the states for administrative purposes but shall be used by states for federally authorized energy conservation programs.

Amendment No. 111: Inserts Senate language which provides benefits payments to surviving spouses and dependent children of certain members of the Armed Forces who died on active duty before August 13, 1981, or who died later as a result of a service-connected disability incurred or aggravated before such date.

Amendment No. 112: Deletes language proposed by the Senate which would authorize deployment of POMCUS sets 5 and 6 and provides $49,300,000 for equipment and unit training costs of West German Reservists.

Amendment No. 113: Deletes language proposed by the Senate which would have prohibited initial flight testing of MX missiles until both the House and the Senate agreed to a concurrent resolution approving the MX basing mode. This issue is addressed under amendment number 9 dealing with the overall Defense Department appropriations.

Amendment No. 114: Strikes languages proposed by the Senate which reduces the International Development Assistance from $800,000,000 to $700,000,000. This reduction is carried in another section of the Conference Report.

Amendment No. 115: Deletes language proposed by the Senate which would have allowed appropriated funds to be used by the Defense Department to establish or operate the Rapid Deployment Joint Task Force as a unified command.

Amendment No. 116: Deletes language proposed by the Senate which would have earmarked no less than $6,500,000 of the amounts available for programs of the National Institute on Aging for research on Alzheimer's disease.

Amendment No. 117: Inserts language proposed by the Senate that authorizes the Secretary of Commerce to permit, upon request from the City of Tacoma, Washington, the sale or lease of the Pantages Centre for the Performing Arts building.

Amendment No. 118: Inserts language proposed by the Senate that provides $1,500,000 for recently authorized White House Conference on Productivity, to be funded within the Department of Commerce.

Amendment No. 119: Provides language proposed by the Senate which contains requirements to ensure the participation of Israel in the International Atomic Energy Agency.

Amendment No. 120: Deletes language proposed by the Senate to elevate the level for the position, Counsel of the Department of State, from Executive Level IV to Executive Level III.

LOW INCOME ENERGY ASSISTANCE

Amendment No. 121: Appropriates an additional $100,000,000 for low income energy assistance instead of $200,000,000 as proposed by the Senate. No similar provision was included in the House resolution. This increases the total fiscal year 1983 appropriation for energy assistance to $1,975,000,000 (See Amendment Nos. 14 and 102).

Amendment No. 122: Deletes language proposed by the Senate which would have made funds available to provide for conversions of Army and Air National Guard civilian technician positions to full-time military positions.

WEATHERIZATION

Amendment No. 123: Deletes language proposed by the Senate which would have increased the portion of a State's energy assistance grant which could be used for weatherization activities. No similar provision was included in the House resolution.

Amendment No. 124: Inserts language proposed by the Senate expressing the Sense of Congress that the Federal Reserve and the Federal Open Market Committee should continue to take such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment

DEPARTMENT OF LABOR

Amendment No. 125: Appropriates $25,000,000 for the dislocated worker program authorized by title III of the Job Training Partnership Act, instead of $50,000,000 as proposed by the Senate.

Amendment No. 126: Inserts language proposed by the Senate dealing with transfer of United States defense equipment, materials or technology to foreign countries.

Amendment No. 127: Appropriates $94,000 for United States Fish and Wildlife Service, "Resource management" instead of $243,000 as proposed by the Senate. This additional amount, together with the $149,000 closedown costs in the regular appropriation act will permit the Ennis NFH, Montana to remain open in fiscal year 1983. The total amount available for that hatchery, $243,000, also includes $71,000 for necessary cyclic maintenance.

Amendment No. 128: Deletes proposal of the Senate to amend the authorization for the Public Safety Officers Benefits Program to include beneficiaries of volunteer firemen, Federal Protective Officers, and law enforcement personnel dealing with juvenile delinquency.

.22 CALIBRE RIMFIRE AMMUNITION

Amendment No. 129: Inserts language proposed by the Senate which prohibits record keeping requirements regarding the sale of .22 calibre rimfire ammunition.

COLLECTOR'S FIREARMS

Amendment No. 130: Deletes language proposed by the Senate which would have amended the criminal code to allow the Secretary of the Treasury to classify certain firearms and ammunition for importation purposes.

Amendment No. 131: The managers have amended the Senate proposed language to make $2,000,000 available to the Secretary of Labor for social science and historical studies of international labor issues, rather than to the Chairman of the National Endowment for the Humanities.

Amendment No. 132: Appropriates $3,000,000 for National Park Service, "Construction" as proposed by the Senate. This will permit the Service to continue construction of bridges on Grandfather Mountain in North Carolina.

ESSENTIAL PRODUCTIVE JOBS

Amendment No. 133: Deletes Title II of the resolution as proposed by the House and modified by the Senate, due to the public announcement that the jobs title would be vetoed. The action of the Conferees is followed by a request that the facts which supported Title II be submitted to the President with the request that they be included in his budget recommendation for the coming year.

The House passed resolution contained approximately $5.4 billion to address some of the unmet needs currently facing the country and thereby generate essential productive jobs. The Senate version included approximately $1.2 billion for similar programs.

The House included the funding recommended in Title II because of the continued economic crisis in the nation. Unemployment has increased to 10.8 per centum on a national basis, reaching a national high of 17.2 per centum in the State of Michigan. Actual filings of business related bankruptcies for the year ending June 30, 1982 reached a total of 77,503 as compared with a prior year figure of 66,332 and business failures, as reported by Dunn and Bradstreet are up 49 per centum as compared to one year ago. Only 35.7 per centum of the raw domestic steel industry's capacity is currently being utilized which represents the lowest capacity since 1932.

The American farmer is more than $200 billion in debt, financed at rates ranging between 15 and 20 per centum, with higher costs and lower prices. The Trade Adjustment Assistance Administration of the Department of Labor has certified that 510,000 are unemployed as a result of foreign automobile imports. During the 1975 rescession approximately 76 per centum of unemployed workers we covered by some form of unemployment benefit and today only 49 per centum are currently covered. Long-term economic stability can only be achieved through the private sector when existing Federal domestic and foreign policies are inadequate to provide means for the recovery of major and minor industries, of large and small businesses, or of United States Agricultural production, which is being held off world markets by refusing to sell at competitive prices. Today every possible means must be made to increase American production and to sell American, instead of continuing to make competitors out of customers. The current unacceptable level of unemployment which has not existed since the Great Depression prior to World War II creates an economic and humanitarian problem too serious to ignore. A strong and viable economy is an essential ingredient of our national security and the efforts to increase our military capability and readiness. Unemployment compensation has

reached an annual rate of over $20 billion, and now hundreds of thousands of workers have exhausted the period of time for which they are entitled to draw unemployment compensation. At a time when the material wealth of the nation is being allowed to deteriorate in the watersheds, rivers and harbors, in the interest of the nation immediate steps should be taken to retain and restore our physical wealth. It is essential that interest rates, which have been reduced following a GAO investigation of the Federal Reserve System at the request of the House Appropriations Committee, continue at present or lower rates for industrial and agricultural recovery.

It is believed that the Board of Governors of the Federal Reserve and the Federal Open Market Committee should take such actions as are necessary to achieve and maintain a level of interest rates low enough to generate significant economic growth and thereby reduce the current intolerable level of unemployment.

The country is in a state of economic emergency reminiscent of the darkest days of the Great Depression. We have been in a severe recession for about a year. Real gross national product showed a cumulative decline of nearly 2.5 percent. This process of decline proceeded at its fastest pace in the fourth quarter of 1981 and the first quarter of 1982 with output falling at about a 4 percent annual rate.

For all these reasons the conferees believe that the Federal Government must take positive action to restore the financial health of industry, business and agriculture. However, the Committee of Conference realizes that government cannot solve these problems unilaterally. Business and industry must share the responsibility.

COOPERATION WITH THE PRIVATE SECTOR

In the past the Federal government has come to the assistance of the private sector when help was needed to avoid bankruptcies and foreclosures, and to maintain productive capacity and employment levels. Recent assistance to the Chrysler Corporation, the Lockheed Aircraft Corporation and the City of New York are examples of necessary and wise federal investments in both the short-term and future.

PRECEDENT FOR CONGRESSIONAL ACTION

Twice before in our history the Congress has created a temporary Federal corporation to restore economic stability to the country. In 1918 the Congress created the War Finance Corporation to strengthen the private investment markets and to make loans to industries engaged in wartime production. During the depression of 1920 to 1922, Congress transformed the War Finance Corporation into an Emergency Finance Corporation. As the economy of the country improved throughout the 1920s and prosperity returned, the War Finance Corporation was phased out.

As the country moved out of the 1920's and into the Great Depression of the 1930's, many leaders of the country pushed for the reestablishment of the War Finance Corporation.

To meet the need to restore economic stability to the country, the 72nd Congress passed H.R. 7360 creating the Reconstruction Finance Corporation. The act was signed into law by President Hoover on January 22, 1932, as Public Law No. 2.

The Corporation's major functions at first were the extension of credit to agriculture, commerce, and industry through loans to banks and other financial institutions, insurance companies, agricultural credit agencies, and railroads. The lending authority of the Corporation was subsequently broadened to include authority to purchase the capital stock of banks, insurance companies, agricultural credit corporation and national mortgage associations. Authority was also given the Corporation to make loans to business enterprises, mining interests, disaster victims and public school authorities, and to assist in financing the construction of public works. It was also authorized and directed to allocate funds to, to make loans and advances to, and to purchase the securities of various U.S. Government corporations and agencies.

In the postwar period as the economy returned to normal, programs of the RFC were one-by-one spun off to other Government agencies and the Corporation was finally abolished by Reorganization Plan No. 1 of 1957.

During its 25-year history, the RFC was among the largest and most complex of all Federal lending agencies. It possessed unlimited authority to borrow funds from the U.S. Treasury, disbursing over $40 billion and guaranteeing private loans and investments for many more billions. Although the RFC did not have the purpose of making a profit, accounting records show that for its activities taken as a whole, its revenues and interest income exceeded its losses and expenses, even though many individual programs were undertaken with little hope of recovery of the funds.

Although Title II did not provide any legislative language creating a federal corporation similar to the RFC, the conferees believe that the appropriate legislative committees of the House should examine the current need for private sector/government cooperation and report legislation to the House floor as soon as possible at the beginning of the 98th Congress.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. SHUSTER (at the request of Mr. MICHEL), for today and the balance of week, on account of recuperation necessitated by several major surgeries due to an auto accident in Ninth District on October 11, 1982.

Mr. TAYLOR (at the request of Mr. MICHEL), from 1:30 p.m. today and balance of week on account of illness in family.

Mr. RUDD (at the request of Mr. MICHEL), for today until further notice, on account of dental surgery.

Mr. LUKEN (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. DOWDY, for today, on account of attending funeral services.

Mr. HUTTO (at the request of Mr. WRIGHT), after 4:30 p.m., on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SOLOMON) to revise and extend their remarks and include extraneous material:)

Mr. KEMP, for 20 minutes, today.

Mr. DORNAN of California, for 20 minutes, today.

Mr. WALKER, for 5 minutes, today.

Mr. McCLOSKEY, for 60 minutes, today.

(The following Members (at the request of Mr. MICA) to revise and extend their remarks and include extraneous material:)

Mr. PHILLIP BURTON, for 60 minutes, today.

Mr. NELSON, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.
Mr. WEAVER, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SMITH of New Jersey, immediately prior to the vote on House Joint Resolution 631, today.

Mr. PEASE, and to include extraneous matter in the body of the RECORD notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $2,261.00.

Mr. SEIBERLING, to extend his remarks and to include extraneous material.

(The following Members (at the request of Mr. SOLOMON), and to include extraneous matter:)

Mr. PETRI.
Mr. DANNEMEYER.
Mr. CONTE.
Mr. HYDE.
Mr. DORNAN of California in two instances.
Mr. CONABLE.
Mr. HUNTER.
Mr. BROOMFIELD in two instances.
Mr. JEFFORDS in two instances.
Mr. MICHEL in two instances.
Mr. HOPKINS.
Mr. HANSEN of Idaho in nine instances.
Mr. YOUNG of Florida.
Mr. SAWYER.
Mr. EVANS of Iowa.
Mr. REGULA.

(The following Members (at the request of Mr. MICA), and to include extraneous matter:)

Mr. LANTOS.
Mr. RODINO in two instances.
Mr. HAMILTON.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. BARNES in 10 minutes.
Mr. OTTINGER.
Mr. ZABLOCKI.
Mr. HUBBARD.
Mr. WON PAT.
Mr. MCDONALD in five instances.
Mr. FOWLER.
Ms. MIKULSKI in five instances.
Mr. BARNARD.
Mr. STOKES in two instances.
Mr. DYSON.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 631. Joint resolution making further continuing appropriations and providing for productive employment for the fiscal year ending September 30, 1983, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that committee did on December 17, 1982, present to the President, for his approval, bills of the House of the following title:

H.R. 6204. An act to provide for appointment and authority of the Supreme Court Police, and for other purposes.

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

H.R. 7072. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

RECESS

The SPEAKER pro tempore. The House will stand in recess subject to the call of the Chair.

Accordingly (at 11 o'clock and 14 minutes p.m.), the House stood in recess subject to the call of the Chair.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[December 20 (legislative day, December 19), 1982]

5314. A letter from the Auditor of the District of Columbia, transmitting a report entitled, "Review of Mayoral Request to Borrow $150 Million in Repayable Advances From the U.S. Treasury", pursuant to section 455(d) of Public Law 93-198; to the Committee on the District of Columbia.

5315. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

5316. A letter from the Deputy Assistant Secretary for Export Administration, Department of Commerce, transmitting certification that waiver of the congressional review period of export licenses for petroleum products to Mexico for the period of December 1982 through June 1983 is vital to the national interest, pursuant to section 7(e) of the Export Administration Act of 1979; to the Committee on Foreign Affairs.

5317. A letter from the Attorney General of the United States, transmitting the Department's report on a further stay of the Supreme Court's judgment in *Northern Pipeline Construction Co.* v. *Marathon Pipeline Co.*, 102 S. Ct. 2858 (1982); to the Committee on the Judiciary.

5318. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report covering certain property transferred to the Republic of Panama in accordance with the Panama Canal Treaty of 1977 and related agreements, pursuant to section 1504(d) of the Public Law 96-70 and section 1-402 of Executive Order 12215; jointly, to the Committees on Merchant Marine and Fisheries and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[December 20 (legislative day, December 19), 1982]

Mr. WHITTEN: Committee of conference. Conference report on House Joint Resolution 631 (Rept. No. 97-980). Ordered to be printed.

Mr. BREAUX: Committee of conference. Conference report on H.R. 5002 (Rept. No. 97-982). Ordered to be printed.

Mr. MOAKLEY: Committee on Rules. House Resolution 636. A resolution providing for the consideration of H.R. 3809, a bill to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes, and the Senate amendment thereto (Rept. No. 97-983). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[December 20 (legislative day, December 19), 1982]

By Mr. BAILEY of Pennsylvania:

H.R. 7449. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for the expense of altering or improving the principal residence of a taxpayer to remove or mitigate the effect of any architectural or other feature which limits the mobility

of the taxpayer or a member of his family because such taxpayer or family member is disabled; to the Committee on Ways and Means.

By Mr. EVANS of Iowa:

H.R. 7450. A bill to amend the Internal Revenue Code of 1954 to provide that the normalization rules of the investment tax credit shall apply to natural gas pipelines without regard to the additional restriction imposed where there is a Federal determination that natural gas is in short supply; to the Committee on Ways and Means.

By Mr. HANSEN of Idaho (for himself, Mr. MARLENEE, and Mr. PASHAYAN):

H.R. 7451. A bill to establish fees for recreation residence on National Forest System Lands; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. PANETTA:

H.R. 7452. A bill to amend titles II and XVIII of the Social Security Act and the Internal Revenue Code of 1954 to require that disbursements and receipts in the old-age and survivors insurance program be set out as separate functional categories in the budget, to provide for financing from general revenues for the disability and hospital insurance programs and to consolidate the trust funds established for such programs, to adjust accordingly the employment and self-employment taxes and to provide for an income surtax to supplement such taxes, and to institute certain other reforms in such programs; to the Committee on Ways and Means.

By Mr. STANGELAND:

H.R. 7453. A bill to amend the Agricultural Act of 1949 with respect to the determination of acreage bases to be used under acreage reduction programs for the 1983 crop of wheat and feed grains; to the Committee on Agriculture.

By Mr. WRIGHT:

H.J. Res. 635. Joint resolution establishing the dates for submission of the budget and economic report; considered and passed.

By Mr. BAILEY of Pennsylvania (for himself and Mr. HUNTER):

H.J. Res. 636. Joint resolution directing the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia; considered and passed.

By Mr. BAILEY of Pennsylvania (for himself and Mr. HUNTER):

H. Con. Res. 437. Concurrent resolution resolution expressing the sense of Congress concerning the completion of the Vietnam Veterans Memorial in West Potomac Park in the District of Columbia; considered and agreed to.

By Mr. FOLEY:

H. Con. Res. 438. Concurrent resolution that the House of Representatives shall adjourn Monday, December 20, 1982, or on Tuesday, December 21, 1982, pursuant to a motion made by the majority leader, or his designee, in accordance with this resolution, and that when it adjourns on said day, it stand adjourned sine die; considered and agreed to.

By Mr. JEFFORDS (or himself, Mrs. SCHNEIDER, MR. SHANNON, Mr. RATCHFORD, Mr. EDGAR, Mr. BOLAND, Mrs. FRAMES, Mr. AUCOIN, Mr. Hughes, Mr. GREEN, Mr. ALBOSTA, Mr. DAVIS, Mr. BEDELL, Mrs. SNOWE, Mr. GEJDENSON, Mr. WYDEN, Mr. FLORIO, Mr. CONTE, Mr. MARKEY, Mr. MAVROULES, Mr. D'AMOURS, Mr. NOWAK, Mrs. FENWICK, Mr. SPENCE, Mr. FINDLEY, Mr. CLINGER, Mr. PETRI, Mr. WORTLEY, Mr. ERDAHL, Mr. JAMES K. COYNE, and Mr. LENT):

H. Res. 634. Resolution expressing the sense of the House of Representatives with respect to the dispositon of oil company overcharges and other amounts collected by the Department of Energy in connection with violations of the Emergency Petroleum Allocation Act of 1973; to the Committee on Energy and Commerce.

By Ms. OAKAR:

H. Res. 635. Resolution expressing the sense of the House of Representatives with respect to the administration's proposal to tax employees' health benefits; to the Committee on Ways and Means.

By Mr. GUARINI:

H. Res.637. Resolution expressing the sense of the House of Representatives that the President should award the Presidential Medal of Freedom to Dr. Barney Clark; to the Committee on Post Office and Civil Service.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

[December 20 (legislative day, December 19), 1982]

H.R. 3298: Mr. FISH.

H.R. 5507: Mr. CROCKETT, Mr. RUSSO, and Mr. THOMAS.

H.R. 6751: Mr. MOLINARI, Mr. HARTNETT, Mr. BONIOR of Michigan, Mr. ENGLISH, Mr. MCHUGH, Mr. COLEMAN, Mr. EMERY, and Mr. MORRISON.

H.R. 6971: Mr. GRAY.

H.R. 7188: Mr. APPLEGATE, Mr. BADHAM, Mr. BEREUTER, Mr. BIAGGI, Mr. FIELDS, Mr. MCEWEN, Mr. SEIBERLING, Mr. STANGELAND, Mr. WEAVER, and Mr. WOLF.

H.R. 7200: Mr. BLILEY.

H.R. 7309: Mr. EDWARDS of California.

H.R. 7320: Mr. HANSEN of Utah.

H.R. 7337: Mr. ROE, Mr. STOKES, and Mr. MITCHELL of Maryland.

H.R. 7358: Mr. MITCHELL of Maryland.

H.R. 7371: Mr. WON PAT, Mr. BEVILL, Mr. DREIER, Mr. BLILEY, Mr. LUKEN, Mr. English, Mr. Frenzel, Mr. Corcoran, Mr. SAWYER, Mr. ROE, and Mr. STENHOLM.

H.R. 7379: Mr. CONYERS, Mr. DANNEMEYER, Mr. HARKIN, and Mr. LEACH OF IOWA.

H.R. 7393: Mr. MINISH.

H.R. 7411: Mr. MORRISON, Mr. MINETA, Mr. BEVILL, and Mr. SUNIA.

H.R. 7437: Mr. MITCHELL of Maryland and Mr. EDWARDS of California.

H.J. Res. 467: Mr. COLEMAN.

H.J. Res. 558: Mr. SOLARZ.

H.J. Res. 591: Mr. GILMAN.

H.J. Res. 607: Mr. ROE and Mr. OBERSTAR.

H.J. Res. 628: Mr. MITCHELL of Maryland, Mr. SEIBERLING, Mr. RUSSO, and Mr. LUNDINE.

H. Con. Res. 427: Mr. DREIER.

H. Res. 406: Mr. HERTEL.

H. Res. 624: Mr. TAUKE and Mr. MITCHELL of Maryland.

EXTENSIONS OF REMARKS

AN ADDRESS BY WALTER B. WRISTON

HON. TIMOTHY E. WIRTH
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WIRTH. Mr. Speaker, international communications are of enormous importance to all of us. As our economy grows more and more interdependent, and as the speed of telecommunications and information transfer continues to accelerate, access to reliable and affordable international telecommunications becomes more important.

The Subcommittee on Telecommunications, Consumer Protection, and Finance has held extensive hearings on the applications of telecommunications and information products and services, both domestically and internationally. Recently, Mr. Walter B. Wriston, the chairman of Citibank/Citicorp, addressed many of these same issues in a very cogent and well-reasoned address.

Restrictions on the flow of data across national boundaries can have enormous economic consequences, as Mr. Wriston points out in his speech. I hope my colleagues will take the time to read through his remarks, as they familiarize themselves with the changes that are taking place in our economy.

Mr. Speaker, I ask that Mr. Wriston's speech be printed at this point in the RECORD.

Text of speech attached:

AN ADDRESS BY WALTER B. WRISTON, CHAIRMAN, CITIBANK/CITICORP

Much has been written and said about the Information Society and its effect upon all of us. Like many catch phrases, the Information Society is both descriptive and deceptive. It is descriptive because it accurately captures the concept of the vast flow of data which now innundates us all. It is deceptive because to some extent all civilization has been built upon the foundation of information passed on from one person to another and from one generation to the next.

The technique employed in passing on information remained basically unchanged for more than a thousand years until Johann Gutenberg brought the marvel of movable type to the European scene in the 15th Century. The great innovation which changed the world was not at first a commercial success. The money Gutenberg borrowed was not repaid and he lost both his press and his type; doubtless the bankers of the time were castigated for making "risky" loans.

However the world's information is assembled and reproduced, the effort to transmit it on a timely basis from one place to another is older than history. And the technique does not change in a predictable manner.

Technologies have ranged from the signal fires that carried the news of the fall of Troy, to the beat of African drums that carried the news to sub-Sahara Africa of the Battle of Tobruk in World War II. The halting efforts of mankind to design and maintain some standard way to communicate data has been far slower than the generation of the data itself. Probably one of the first breakthroughs was at sea where the fate of vessels and their passengers often depended upon swift, accurate signals. The international code of signals was compiled by the British government in 1857, and about half-a-century later in 1901 was amended to its present form by an international agreement. Even today, however, the dots and dashes of the morse code are not standard worldwide. The international morse code differs from the American on eleven letters and almost all numerals.

Against that background, our progress in S.W.I.F.T. does not seem too unsatisfactory. We might remind ourselves that in some parts of the world, the gauge of railway tracks still changes when one comes to a political border. Some say that this was a deliberate effort to halt invading armies, but perhaps in some cases the reason for a failure to agree to something so simple as the width of a railroad track came after the fact and should be called a rationalization. We have one gauge of track across the American continent today because the railway tycoons of the past felt the practical necessity to move goods across this nation. Today, no doubt, their acts of standardization would violate antitrust laws and we would have instead a government commission holding hearings to determine the "proper" gauge of railroad track.

S.W.I.F.T. was born of a similar practical necessity, but in an age of far more stringent regulations.

As the flow of information became more and more important to all of us in the financial business, it became clear we needed some kind of a standard format for financial transfers. While our progress has been slow, today S.W.I.F.T. has moved a long way toward its goals.

Today, as in the past, technology continues to move faster than the political processes. As small earth stations sprout from the roofs of suburban homes and fiber optics becomes a reality, it is easy to get lost in the scientific details and to lose sight of the fundamentals.

Sound banking business is and always has been based on good information received in a timely fashion. The explosion of technology which made the rubricated ledger go the way of the buggy whip did not change the need to record valid numbers in a clear, usable way—and the need for liberty to communicate those numbers to others. There has always been a balance, sometimes something which could be described as an uneasy truce, between the government censor and people who need information to run their own affairs.

Today, following an old tradition, the government censor is reaching for new tools to stop, slow down, or tax the flow of electrons which carries information across political borders. But whether the method employed is burning books in the village square or stopping the flow of data across borders by taxes or other administrative procedures, the result is the same: The nervous system of civilization is slowed down and made more costly.

If we honestly assess the forces at work today, none of us can be sanguine that the future of the information revolution will automatically work toward efficiency and progress.

The impulse to regulate is as old as government itself, and in the area of communications it has usually succeeded. Nor has business always resisted.

Samuel Morse and his partners waged an intensive campaign to sell their telegraph patents to the U.S. government. They were encouraged by the American Postmaster General, who observed that "It becomes . . . a question of great importance, how far the government will allow individuals to divide with it the business of transmitting intelligence. . . . The use of an instrument so powerful for good or evil cannot with safety to the people be left in the hands of private individuals uncontrolled by law."

Fortunately, neither the patentees not the postmaster general could arouse enough interest in Congress to obtain an appropriation for the purchase of telegraph rights—so Morse and his friends had to go the private enterprise route.

The initial British telegraph industry was also based on private initiative. In fact, the Cooke-Wheatstone telegraph patent application was filed in December 1837, four months before the Morse application was filed in the U.S. But in 1868 a bill was passed in England authorizing the government to take over the telegraphs and make them part of the Post Office. Similar stories could be told for most other countries.

The quantum leap in technology which has brought about our present information revolution did not happen by accident. The increasing integration of the world's financial system demanded more accurate information at a faster pace then ever before, and thus members of the financial community became the best customers of the communications engineers.

This process has fed upon itself. Satellites gave us the ability to communicate information around the world at the speed of light by bouncing data off transponders miles in space even as the events are taking place. But the rapid transmission of masses of data has attracted increasing government attention, just as the telegraph did 150 years ago. The rights of individuals to privacy, the rights of the sovereign to protect national security, the rights of the people to know, and the ability of markets to function are but a few of the issues which present themselves. None of these issues is either trival or new, but all of them are attaining higher visibility as technology advances with unprecedented velocity.

There are a few things that we do know based upon past experience. One of these certainties was described more than 40 years ago by Jacob Viner, in his classic work on the gold exchange standard. He wrote that state intervention in private international

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

markets leads "with a certain degree of inevitability to the injection of a political element into all international transactions." The presence of this political element necessarily implies a "marked increase in the potentiality of economic disputes to generate international frictions." This principle is as old as time and as new as the Soviet pipeline controversy. History is replete with evidence to prove his point again and again. Indeed it was not until the world moved away from mercantilism and toward a freer market system that the developing countries had any hope of bettering the lot of their people. It was, in fact, the Euromarket that arose, unbidden by government and untouched by regulation, knowing neither color nor country, that gave access to the credits which permitted some poor countries to double their standard of living in a decade. This was a feat without parallel in history but somehow it never gets favorable mention. It was this market which took the initial financial impact of the oil shock and transferred, with only minor casualties and in a short time frame, the most massive amounts of financial assets in history. It turned a crisis which could not be managed by anybody into a market adjustment process that let the world survive, albeit with scars.

Markets function only through the transmission of information—both good and bad. It used to be that the fast horse, the clipper ship, or Mister Reuter's land telegraph brought the news by which fortunes were made and lost. Today it is the electron. The speed with which the data travels is in order of magnitude different from any time in history, but the information is unchanged and two and two still make four at any speed.

The principles of sound banking are unchanged. If the world is to advance, the flow of data must move across borders unimpeded. This conclusion about the freedom of transborder data flow is merely an extension of what we have learned as a world society about trade in goods.

The postwar boom that rebuilt all our economies was based on the enlightened proposition that goods should be permitted to cross national boundaries with as few restrictions as possible. This concept was institutionalized in such international bodies as the General Agreement on Tariffs and Trade, as well as in many national groupings.

Free trade, while regularly sabotaged and seldom fully realized, is usually given lip service as A Good Thing because it's based on the generally acceptable economic theory of comparative advantage. But when world economic conditions begin to deteriorate, protectionism rears its familiar head and nation after nation begins to raise tariff and nontariff barriers to international trade.

This is an old and recurring phenomenon. Today I would suggest we are seeing an equally dangerous trend that could destroy the premise upon which S.W.I.F.T. is based. I refer to the growing efforts to control the flow of data across national borders.

To us, the idea of setting up a toll-gate or customs post to restrict the entry of a stream of electrons may seem ludicrous. There are others who see it differently.

The beneficent results of low-cost, instantaneous international financial transactions, which we regard as a free market in ideas and information, are by no means appreciated in every quarter. We have seen laws passed to control transborder data flows, and more are over the horizon. Some have laudible purposes—such as protecting the privacy of individuals and businesses. Some have internal political motives, such as job protection or the desire to make full use of, and derive revenues from, the publicly owned postal-telegraph services. Some are viewed as preservation of national self-sufficiency, designed to avoid economic dependence on entities based in other countries. And some, whatever the stated motive, are based on free-floating anxiety about what information carried on the international electron stream might produce.

As governments intervene more actively to control the international flow of data and capital, we may be sure that another fruitful source of political conflict amont governments will be opened up.

Government—and all of us—must live with the fact that modern techology has welded us into an integrated economic and financial markeplace. The clock cannot be turned back. Perhaps we in the financial community have been remiss in not making this clearer to the world's opinionmakers.

The immense Euro-market would never have gotten off the ground if it hadn't been born free—and stayed free. The electronic information revolution which helped make it possible has now soared far beyond that market. But it will surely falter if it becomes subjected to ever-increasing national regulatory wing-clipping. And the market will suffer along with it.

If it is true, as some schools of economics teach, that people act efficiently in their own interests, a good case can be made for the increase in the general welfare that results from the free flow of data. The case has three elements: price, security, and liability.

The chief attraction of the new technology beyond its speed, is is low cost to customers. But when a government insists that we use its publicly owned network, we may be forced into an uncompetitivie situation subject to arbitrary pricing policies not based on cost. The fundamental building block of the commercial international network is the private line. Only through the private leased line can we get a handle on our costs and plan for the expansion of future services.

Again, history offers instructive lessons. In England, the telephone like the telegraph was also developed privately. But only under restrictive licenses from the post office, which already owned the telegraph system. Rates were set very high, no long distance lines were built, and other restrictions were imposed to keep the telephone from becoming competitive with the Post Office's telegraph system.

The Post Office won in its efforts to slow down the new competitor. The number of telegraph messages almost tripled in Great Britain between 1885 and 1900, while the number in the U.S. increased only 50% during the same period, because Americans were using their new telephones.

The telephone should have replaced the telegraph earlier in Britain than the U.S. because Britain's compact size made it technologically feasible to communicate anywhere in the country by telephone much earlier than in the United States. But at the critical moment, the British postmaster succeeded where the American postmaster failed.

The French did even better: in 1889 the government took possession of the telephone company by force, and in its early years gave the world a telephone system which became the astonishment of anyone who every tried to use it.

The topology of networks in Europe today is dictated not by such issues as distance and volume of traffic, but by international Telex rates, national prohibition of private lines, and restrictions on the ability to access foreign data bases in real time from remote locations. The problems are not limited to financial transactions, but more and more to other sectors of society. The London Financial Times, for example, is printed in Germany and then flown to London by air freight because of restrictions on the transmission of foreign data bases and typesetting files. Nor can the Financial Times use the quiet hours on other people's leased lines because of the British Post Office's restrictions on sharing private leased lines. There are, unfortunately, many other examples to suggest that in communications we may be traveling in a political direction that is the fundamental equivalent of high tariffs on merchandise.

The second element, that of security, is fundamental to any international financial network but that, too, deteriorates when we are forced to use PTT or common carrier services. The cost of making security double-checks becomes prohibitive especially when charged on a per-message basis rather than on a flat-rate lease. There are also government efforts to forbid private operators to use encryption techniques superior to those used by the government regulators. Sovereigns have a legitimate worry about encrypted traffic moving across their borders although this has been done by foreign embassies since codes were invented. The end result is a system that costs more, loses value and timeliness—and customers.

Such a system can also increase a corporation's liability for any error in a transmission of data or a transfer of payments, and this also can needlessly complicate legal contracts for certain types of automated services.

Since we have a common stake in the free flow of information, our common strategy should be to seek some reasonable limitations on the scope of PTT monopolies. And we can do this very effectively by stressing the security of private-leased networks and their flexibility of pricing—areas in which the PTTs in the past have demonstrated little inclination to compete. Our task is to make the public—and our customers—understand what is at stake.

There is reason for hope in some recent events. The agreement between Canada and the United States a month or so ago to permit the use of domestic satellites for transborder data services is a step in the right direction. Another encouraging sign is the increasing competition taking place in Britain between its own PTT and private domestic services. Moreover, as the number of regional satellites—like the one linking the Arab world—increases, the opportunities multiply for the expansion of competing services.

As the air becomes more and more crowded with electronic transmissions, governmental agreements are essential in allocating frequencies and setting public policy. We are never going to be able to roar down an open highway as the only car on the road. But as part of a huge user population, we have a duty and a vital interest to see that the global electronic highway we have already built, and which makes possible the functioning of the global marketplace, remains as efficient, as cost effective, and as free as possible.

The legitimate competing concerns of society make this no easy task, but it is one

that is worthy of our best efforts because the global marketplace has become such an essential part of the future of the world. The ability to move capital to where it is needed and wanted is fundamental to the continual effort of mankind to live a better life. In today's world, information about this market and the transfers themselves travel on our networks at the speed of light—which Einstein tells us is as fast as it is possible to go. Keeping that data moving with speed and efficiency, while balancing competing interests, is our particular challenge—and the greatest contribution we can make to the world that emerges from the information explosion.

Thank you.●

THE GIFT OF LIFE

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. YOUNG of Florida. Mr. Speaker, Christmas is the season of giving, and in the spirit of the season I would like to pay tribute to an organization in Pinellas County, Fla., that gives to the community year round.

The Community Blood Bank of St. Petersburg, Fla., is celebrating this year its 30th anniversary of supplying blood to 12 county medical facilities. The blood bank relies on voluntary donors to supply all of its blood. To commemorate the anniversary, St. Petersburg Mayor Corinne Freeman has initiated a special campaign within the community to call attention to the outstanding service the blood bank provides and the ever-increasing need for more blood donors.

As we exchange gifts of all shapes and sizes during the next few days, I hope my colleagues will find time to follow the lead of my friends and neighbors in Florida by giving blood—which provides the most precious gift of all, the gift of life.●

LEGISLATION TO REPEAL PREFERENTIAL TAX TREATMENT FOR NATURAL GAS PIPELINES

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. EVANS of Iowa. Mr. Speaker, today I am introducing legislation which would repeal a provision in the Revenue Act of 1971 which contributes to higher natural gas prices for the American consumer. The provision I am referring to allowed the old Federal Power Commission (FPC), now the Federal Energy Regulatory Commission (FERC), to provide preferential ratemaking treatment of the investment tax credit to natural gas pipelines. Congress allowed the FPC to provide such a preference if the FPC "determines that the natural domestic supply of the product furnished by the taxpayer in the course of such trade or business is insufficient to meet the present and future requirements of the domestic economy." In January of 1972, the FPC issued an order granting gas pipelines this treatment. This order is still in effect today, despite the fact that there currently exists no shortage in the domestic supply of natural gas.

This matter could be handled internally by FERC, through a recission of its 1972 ruling. The Iowa State Commerce Commission has petitioned FERC to make this change. FERC has not as yet responded and now Iowa has been joined in this effort by the National Association of Regulatory Utility Commissioners (NARUC) and several other State regulatory agencies.

NARUC, in a statement in support of the Iowa Commerce Commission's petition, explains the significance of this preferential treatment:

Current FERC policy requires that natural gas pipeline rates be set without regard to the tax forgiveness. In other words, the Federal income tax component of the firm's cost of service is not adjusted to reflect the credit thus creating a permanent rate overcharge. The firm is also permitted to collect from ratepayers, as an element of its cost of service, depreciation charges based upon the original cost of the asset without regard to the zero cost capital subsidy created by the investment tax credit. Similarly, consumers must pay a rate of return on an inflated rate base which has not been adjusted to reflect the capital subsidy.

This clearly results in a substantial direct subsidy from ratepayers to stockholders which in turn causes natural gas rates to exceed those which would be in effect if conventional normalization ratemaking treatment were employed or if the natural gas pipeline industry simply did not qualify for the investment tax credit. Thus current FERC policy regarding the ITC has appropriately been termed "reverse flow through."

At a time when natural gas rates and gas pipeline profits are increasing substantially, the industry is generating record investment tax credits which result in considerable rate overcharges due to current FERC ratemaking policies. The magnitude and direction of this inequity begs for prompt resolution.

Mr. Speaker, at a time when many Americans are having trouble paying their heating bills and when surpluses of natural gas exist, it makes no sense at all to allow any preferential tax treatment to be given to gas pipelines, especially when it means higher consumer prices. My legislation would correct this situation and I intend to reintroduce it in the 98th Congress and push for prompt consideration.●

EASTERN KENTUCKY UNIVERSITY WINS NATIONAL CHAMPIONSHIP DECEMBER 18

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HOPKINS. Mr. Speaker, I am pleased to bring to the attention of my colleagues the outstanding achievement of the Eastern Kentucky University football team and its coach, Roy Kidd.

Working with a team some people said was short on experience but long on heart and enthusiasm, Mr. Kidd led the Eastern Kentucky Colonels to an undefeated 13-to-0 season, setting the stage for the NCAA division 1-AA football championship. In the finals of the national championship game, Eastern was victorious with a 17-to-14 victory over the University of Delaware.

The Eastern Kentucky University football team and its coaches deserve our special attention and congratulations. Each athlete performed magnificently and each made that all-important extra effort to insure victory.

In his first season as starting quarterback, senior Tuck Woolum was the field general marching his team to victory after victory until achieving the ultimate—a national championship.

The most valuable player on the Eastern team was Terence Thompson. Another player deserving special recognition is Ed Hairston who was unfortunately injured in Saturday's game. These three men deserve our special recognition and congratulations for their unselfish efforts and outstanding performance.

Mr. Speaker, I know that the Members of the House of Representatives join me in saluting the championship athletes of Eastern Kentucky University and its outstanding coach, Roy Kidd on a well-deserved accomplishment.●

THE NO-COST, NO-SUBSIDY HOUSING BILL

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WYDEN. Mr. Speaker, in July of this year, Congressmen DICK GEPHARDT, BARBER CONABLE, and I introduced H.R. 6781, the Residential Mortgage Investment Act.

Since its introduction, H.R. 6781—which we are calling the no-cost, no-subsidy housing bill—has been cosponsored on a bipartisan basis by 265 of our colleagues in the House. A similar

bill was introduced with bipartisan support in the Senate in September.

This legislation would remove some of the arbitrary and unnecessary regulations that have been developed, in interpreting the ERISA statute, that discourage private pension funds from investing in mortgages and mortgage-backed securities. It would not, however, eliminate a single essential safeguard now in the law that protects the assets of pension plan recipients.

The sponsors of this legislation have spent a considerable amount of time over the past 6 months working for its enactment. And for good reason.

Mr. Speaker, millions of young people have been denied the American dream of homeownership because of a severe shortage of affordable mortgage capital.

The cure is clear: Find new sources of mortgage capital. And pension funds, both public and private, represent the largest potential new source of mortgage capital—more than $600 billion.

At the present time, only about 3 percent of this vast pool of funds is invested in housing and real estate. There is no reason why that percentage should not and cannot be higher—without endangering the prudent investment of pension funds.

What is needed is legislation that prevents Government agencies from dictating to pension fund trustees how to choose from among sound investments. It is wrong to classify mortgages as second-class investments. Mortgages are not second-class investments and Congress did not intend for agencies to make that kind of judgment.

Mortgages and mortgage-backed securities are sound, safe, and profitable investments. A recent Salomon Brothers survey showed that, over a 10-year period, mortgage securities outperformed investments such as corporate bonds and long-term U.S. Treasury notes.

The Gephardt-Conable-Wyden bill involves no subsidies and no cost to the taxpayers. It would not require pension funds to invest in mortgages. It would merely encourage them to do so by allowing mortgages to compete for the attention of fund managers on an equal footing with other types of investment.

I would like to take this opportunity to thank the 265 Members who have become cosponsors of H.R. 6781 over the past 5 months. I would especially like to thank several Members who have worked very hard for this legislation—including DICK GEPHARDT, TOM FOLEY, GILLIS LONG, JIM WRIGHT, and BARBER CONABLE.

It is now clear that there will not be enough time to enact H.R. 6781 before the 97th Congress adjourns. The severe shortage of mortgage capital and sky-high mortgage interest rates will not expire with the 97th Congress, however, and I would like my colleagues to know that this important legislation will be reintroduced in the next Congress.●

HOMER FERGUSON

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BROOMFIELD. Mr. Speaker, last Friday our Nation lost a great American with the death of the former Senator from Michigan, the Honorable Homer Ferguson.

Senator Ferguson's life epitomizes the best in public service. Besides the 12 years from 1942 to 1954 that he served as a U.S. Senator, Homer Ferguson also served as Ambassador to the Philippines, and as a judge on the court of Military Appeals. In 1976, he retired from the court to his home in Grosse Pointe, Mich.

Mr. Speaker, I did not have the privilege of serving in Washington with Senator Ferguson. However, I was in the Michigan State Legislature for part of those years, and I was impressed with his great skill and dedication.

As a Senator, he sponsored the legislation which added the words "under God" to the "Pledge of Allegiance," and he was an ardent supporter of a strong America.

Mr. Speaker, I wish to express my deepest sympathies to Senator Ferguson's family, and our profound appreciation for his lifetime of service to our country.●

BE GENEROUS, BUT WITH YOUR OWN MONEY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. McDONALD. Mr. Speaker, on numerous occasions I have spoken on the House floor and I have voted against the ever-increasing size and expenditures of the Federal Government. This has included many votes against various social and welfare programs. When these programs are enacted and later allowed to geometrically increase, Members of Congress who oppose such programs are generally labeled as "cold hearted" or "insensitive to the needy."

However, nothing could be further from the truth. The most feared enemy of our Nation's elderly, impoverished, and those living on fixed incomes is skyrocketing inflation and the economic havoc that inflation wreaks on those who are least able to cope with it. If we are truly compassionate toward those in need, we should redouble our efforts to work and vote for a blanced Federal budget and to end the massive Federal deficits which have fueled inflation and have left us with a national debt in excess of $1 trillion. It is a sad paradox that many of the programs and expenditures that are proposed and passed only serve to exacerbate the difficulties of those whom the program is designed to help.

Likewise, a vote in favor of social and welfare programs should not be regarded as evidence of compassion and charity. Simply stated, there is nothing compassionate or charitable about voting to spend someone else's money.

In that vein, what follows is an excellent column written by syndicated business columnist Louis Rukeyser as it appeared in the Atlanta Constitution on December 20, 1982:

BE GENEROUS, BUT WITH YOUR OWN MONEY

'Tis the season to be giving, and as anyone lucky enough to be a human being should know, that's not all bad.

But it might also be appropriate, in this holiday season, to think for a moment about the rightful place of such seasonally heralded virtues as compassion and generosity in our year-round pursuit of a happier U.S. economy.

Much of the arguing now going on concerning economic policy for 1983 tends toward easy oversimplifications of these issues. That deep thinker Tip O'Neill, for example, recently accused President Reagan of having "a stone heart," and the question of sensitivity toward the needs of others dominates much of the current Washington rhetoric.

It would be nice if it were all that simple: If the argument were truly between kindness and cruelty, we would not need to read the papers to decide where we stood. Which of us, indeed, would choose consciously to stand with Ebenezer Scrooge?

But life is not so neat. In the real world, the heroes and villains are blurred and amnbiguous, and practically every man thinks he is one of the good guys. None of our recent presidents failed intentionally, and no curent politician goes to bed at night gleefully contimplating the foreclosing of the nation's mortgages.

LOOK AT RESULTS

So we must look beyond the professions of compassion and generosity to the actual results achieved in their noble names. Take that question of who does, or does not, have "a stone heart." Politicians who talk that way might well be referred to the "Eleventh Commandment" once promulgated by Noble laureate Milton Friedman: everyone should be free to do as much good as he wants to—with his own money.

And, indeed, since when is it the sign of a kind and generous heart to perform great benefactions with other people's cash? A predilection for raising taxes on somebody else is scarcely acknowledged route to personal beatification. Self-righteousness it may well fortify, but sthat is a different (and less lovely) quality entirely.

The notion that any program that increases government social spending is compassionate and generous, and anything that resists such expansion is Scroogelike, falls

down twice: once for the giver and once for the recipient. It is unmistakably clear that many once-generous folks now tend to figure that they already gave, involuntarily, to the Internal Revenue Service; it is hardly surprising that the great flowering of American private charities came in the Nineteenth Century, when taxes were negligible.

THE EASY ASSUMPTION

The easy assumption in Washington is that coercive politicians can decide better than you and me to which causes our dollars should be directed. But when government squeezes the productive turnip so tightly, there is inevitably less left for individual generosity—toward possibly more meritorious recipients.

The link between geometrically increasing social spending and any authentic concept of compassion is weakened further by results suggesting that such programs tend overwhelmingly not to work. All around us is evidence that, far from helping the helpless onto the ladder of success, we are enticing successive generations onto a treadmill of dependence.

So my guess, at this holiday season, is that we ought not to confuse our private generosity with any public notion of programmatic largesse. Of course, we must adequately succor the economically wounded of this recession, but our greatest long-term gift will be not endless government aid but a new birth of noinflationary growth—and jobs. Being generous with other people's money is the route not to heaven but to hypocrisy.●

AMERICAN TECHNOLOGICAL DEVELOPMENT AND ECONOMIC POSITION

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HUNTER. Mr. Speaker, as you know, America's international economic position is in large part determined by the level of technological development in our Nation. Small business has always been a prime source of major new ideas in industrial research. I am pleased to have in the 45th Congressional District an enterprise which has recently been recognized for its outstanding contributions to civil engineering research.

The Hess Geotechnical Corp. & Structual Behavior Engineering Laboratories, Inc., of El Centro, Calif., John D. Hess, president, and the civil engineering facility of the Technological Institute of Northwestern University have been awarded the coveted IR-100 award. This award is given by Industrial Research Magazine for the 100 most significant technical products produced anywhere in the world during the past year.

The award to the Hess Corp. was for the design and development of a high-temperature triaxial torsional testing machine for concrete and rock. This chamber allows for the testing of concrete properties during nuclear meltdown. In addition, the chamber can be used to study fluid transfer in sediments in connection with geothermal research.

The achievement of Mr. Hess' Corp. in receiving the IR-100 award is testimony to the vitality of small business in our country. With a dedication to quality and innovation that is exemplified by the Hess Corp., American business will remain on the leading edge of technological advancement.●

ONLY CONGRESS CAN REDUCE THE DEFICIT

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. REGULA. Mr. Speaker, in an otherwise accurate and sensible editorial today, the Washington Post stated that "the Reagan administration has to start bringing down, forcefully, the budget deficits of 1984 and beyond."

The implication here is that control of the deficit is the sole responsibility of this administration, or any administration for that matter. This is simply untrue. Only Congress can—and should—make fiscal policy.

It is the constitutional prerogative of the legislative branch, not the executive branch, to do so.

This is not to say that the President has no role in fiscal policy. However, the budget—and, hence, the deficit—is solely the result of the fiscal policy which emerges from laws passed by Congress and signed by the President.

The adage "the President proposes and the Congress disposes" is how the system ought to work.

Scapegoats are nice to have, but it is time for Congress to recognize its responsibilities in this regard. It should do what is necessary to reduce the deficits, which threaten to stifle economic recovery.●

SOCIAL SECURITY: AN END TO FANTASY

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. CONABLE. Mr. Speaker, we must not forget that the issue of social security financing is still before us. An excellent commentary by George Will on this subject appeared in the December 19 edition of the Washington Post. I hope that all my colleagues will take the time to read it.

SOCIAL SECURITY: AN END TO FANTASY

(By George F. Will)

At last, Democrats are allowing their sense of probability to inhibit their enjoyment of fantasy. Hitherto, many Democrats have said that Social Security has just two negligible difficulties: an immediate "cash-flow" problem solvable with judicious borrowing, and another difficulty due to arrive around the year 2010 but which may not arrive—at least, assuming fortuitous mortality, fertility and productivity developments.

A fable: a politician and an economist fall into a deep pit with steep sides. The politician exclaims: "How will we escape?" The economist replies: "Easily. First, we'll assume a ladder." For frightened legislators, politics is the art of imaginative assuming.

But the balloon of fantasy has been punctured by two needle-sharp articles—the most important journalism of 1982—written for the New York Review of Books by Peter G. Peterson. In the 1960s, the Review tried to shock the bourgeoisie by printing on its cover a diagram for making Molotov cocktails. Now it has managed to publish something really hair-curling and—such is the irrelevance of the political left—the author is a Republican, the board chairman of the Wall Street investment firm of Lehman Brothers, and a former secretary of commerce.

Peterson refutes the hypothesis that domographics—the coming-of-age as wage earners of the postwar "baby boom"; the retirement of the relatively few Depression babies—will soon make the system solvent. That projection depends on assuming, among other things, "an unbelievable rate of sustained growth in productivity—about 3.1 to 3.3 percent per year from 1985 to 2005. That would far surpass any comparable period in U.S history, even the boom years of the 1960s." Here are some productivity growth rates: 1948-67: 2.5 percent; 1967-73: 1.6 percent; 1973-81: 0.1 percent.

Assuming productivity grows at even a rate of 1.9 percent—higher than in the 1970s (1.2 percent)—the annual deficit in the retirement and disability trust funds would exceed $100 billion by 2005, after which it would "explode," detonated by the retirement of the "baby boom." Add the hospital insurance trust fund, and the 2005 deficit exceeds $700 billion.

A 65-year-old retiring in 1982 who paid Social Security taxes throughout his career and was an average wage earner with a nonworking spouse contributed a total of just $7,209 in payroll taxes during his working life. Given conservative assumptions about longevity and moderate assumptions about inflation, this retiree and/or his spouse will live to receive $520,000—75 times the dollar amount he contributed. If he began receiving benefits in January 1982, he received $803 a month, and got back the dollar amount of his lifetime contributions by September. Even adding interest (say, the Treasury rate, compounded) to the worker's payments, it would take him just three years and seven months to get back the amount he contributed.

Peterson notes that were it not for the growth of Social Security, federal revenues as a percent of Gross National Product would actually have declined between 1955 and 1980. Social Security spends more annually than all corporations invest in plant, equipment and research and development. Since 1949, average wages have increased 470 percent, average income taxes have increased 570 percent, average Social Security taxes have increased 6,480 percent. The maximum annual contribution made in the years 1937-49 was just $30.

This year, employers' share of payroll taxes will amount to a sum equal to about 50 percent of corporate profits. As a result, there is less investment, slower productivity growth and job creation—and an accelerat-

ing Social Security crisis generating pressure for accelerated Social Security tax increases that are part of the problem. Already, 25 percent of American workers pay more in Social Security taxes than in income taxes. Fifty-eight percent of the electorate is under age 45, and those voters are in the expensive family-forming, house-buying years. Sharply increased payroll taxes could depress the economy, deepen despair and ignite generational conflict.

Social Security's unfunded liability—the gap between the actuarially predicted costs of benefits and the taxes the beneficiaries are scheduled to pay—is $6 trillion. By the year 2030, America will be Florida writ large: the percentage of elderly in the population will be that in today's foremost retirement state. Of course, if Americans suddenly return to having five children, and life expectancy stops increasing. Social Security's crisis will moderate. But must biomedical advances against degenerative diseases may be considered bad news because they undermine "optimistic" Social Security assumptions?

The Social Security crisis is evidence that the American government's heart is generally in the right place and that its head is frequently in the sand. But the sheer scale of the crisis should end, at least for now, the politics of imaginative assuming.●

REBUILDING OUR ROADS: A MOST INNOVATIVE PROPOSAL

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. GEJDENSON. Mr. Speaker, I would like to bring to my colleagues' attention a most innovative and cost-effective amendment that my friend RON WYDEN successfully offered as an amendment to the gasoline tax bill.

The amendment earmarks $55 million over the next 3 fiscal years from the portion of the trust fund derived from the tax imposed on tires for States that undertake road rebuilding projects using asphalt mixed with rubber recovered from old, discarded tires.

Experience suggests that rubber/asphalt mixtures are more durable and longer lived than conventional asphalt alone. At the same time, this amendment makes a bold attempt at ridding our Nation of the most pressing solid waste disposal problem facing our cities and counties, namely, the disposal of the some 240 million tires this Nation must dispose of each year. Finally, the amendment furthers our Nation along its road to energy independence. By mixing in rubber with asphalt we save crude oil, the principal ingredient of asphalt.

For the benefit of those who might have missed the amendment in the hectic activities of the last few weeks, I am including an article from the New York Times describing the amendment offered by Congressman WYDEN.

[From the New York Times, Dec. 13, 1982]

STATES COULD GET U.S. FUNDS BY USING NEW ROAD MIXTURE

WASHINGTON, December 12.—The House has voted to alleviate the national solid waste problem, reduce foreign dependence on oil and increase the life expectancy of the nation's roads, all by persuading states to add old, shredded tires to conventional black asphalt when mixing pavement.

Representative Ron Wyden, Democrat of Oregon, proposed an amendment to the surface transportation bill that would provide $55 million over the next three fiscal years to states that paved their roads with the asphalt and tire combination.

Eight years of studies by the Federal Highway Administration seem to indicate that roads paved by this process last longer than roads paved with asphalt alone.

Representatives of the tire and solid waste industries are cautious, however, warning that the tire-asphalt combination may not be the cure to the nation's problem of deteriorating roads because it is too expensive.

PROCESS CALLED A SIMPLE ONE

The process for creating the paving material is relatively simple, according to John E. Huffman, vice president of marketing for the Sahuaro Petroleum and Asphalt Company, an Arizona-based concern that is one of a handful in the country using the procedure.

Discarded truck, bus or automobile tires, both rubber and synthetic, are ground to the consistency of a coarse powder and mixed with hot asphalt in a ratio of 25 percent tire to 75 percent asphalt. The mixture is spread on the road like regular asphalt and is allowed to set.

The normal life of a road surface, Mr. Wyden said, is six to eight years, but a surface paved with the tire-asphalt mixture can be expected to last 10 to 12 years.

"It makes sense" Mr. Wyden said. "You get more for your money."

Another attraction of the material is environmental. According to Environmental Protection Agency estimates, 240 million used tires are discarded annually. The cost of burying those tires in landfills, says Mr. Wyden, costs cities and counties more then $100 million each year.

ASPHALT USES PETROLEUM

Similarly, proponents argue that the hybrid material could potentially help reduce America's dependence on foreign oil, since most asphalt products are made from petroleum.

Not everyone familiar with the material agrees it is a cure-all. "It's a technology, it works, it's commercially available," said Richard Hanneman of the National Association of Waste Management Officials, "but it doesn't always make economic sense. It's more a symbolic gesture to conservationists than anything."

Mr. Huffman of the Sahuaro company said that the mixture could cost "as little as 20 percent or as much as 50 percent" more to use than plain asphalt.

The Wyden amendment, which was passed by a voice vote, allocates $5 million for the fiscal year 1983 and $25 million for the fiscal years 1984 and 1985 to states that develop programs using the tire-asphalt paving mixture.

The money would come from revenue produced by the 5-cent-a-gallon increase in the Federal gasoline tax that was approved by the House on Tuesday.●

PERFECTING THE EXPORT TRADING COMPANY ACT

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BARNARD. Mr. Speaker, when Congress passed the Export Trading Company Act in October, we made a major step toward allowing small and mid-sized firms get into exporting. We intended to allow them to deal with export trading companies set up by or doing business with their own local banks.

However, due to a mischance, the provisions of section 23A of the Federal Reserve Act does apply to transactions between a bank and its trading company affiliate. This will cause severe problems for smaller and regional banks that decide to set up such an export trading company. On Friday, I introduced legislation that will correct this problem and make it possible for regional and small banks to participate in an export trading company.

At this point, I would like to insert an explanation of the problem:

THE EFFECT OF COLLATERALIZING BANK EXTENSIONS OF CREDIT TO EXPORT TRADING COMPANY AFFILIATES UNDER THE EXPORT TRADING COMPANY ACT OF 1982

The Export Trading Company Act represents a clear expression of Congressional initiative to allow bank holding companies to move directly into the exporting business. Congress limited bank holding company investment in ETCs to 5 percent of consolidated capital and surplus, and provided that a further 10 percent could be extended in credit to the ETC subsidiary.

It seems apparent that Congress intended to exempt extensions of credit from the collateral requirements of Section 23A of the Federal Reserve Act. However, because the language in the Export Trading Company Act states that the exemption applies to requirements of Section 23A "in effect on October 1, 1982," a technical problem has arisen. Congress in effect replaced those requirements with new requirements upon the passage of the Depository Institutions Act of 1982 on October 13, 1982. The collateral requirements in Section 23(a) will remain essentially as they were on October 1, but the wording of the Export Trading Company statute now leaves open the interpretation that the subsequently enacted Section 23A does apply to Export Trading Company extensions of Credit.

The report of the House Committee, the Conference Report, and the attached article by a Treasury Official all state that the collateral requirements are not applicable. It therefore appears that a technical correction is required in order to mesh Congressional intent with the actual wording of the statute. Failure to correct this problem would result in the Export Trading Company legislation being unable to fulfill Congressional expectations of its role in promoting foreign trade expansion for the following reasons:

(1) ETCs in a start-up or growth phase will, most likely, have inadequate collateral

against which to borrow; hence, growth will be thwarted. The dynamics of growth are such that working capital is generally strained since increased sales create a larger working capital requirement. Collateralized borrowing generally can't support the larger requirement. The result is a forestalling of sales growth which is clearly opposite to the purposes of the ETC Act.

(2) World trade in *services* exceeds $600 billion per year, and global competition for the business is fierce. It would therefore appear imprudent and contrary to the objectives of the ETC Act to make lending difficult for either the export of trade services or the providing of trade services. Financing export trade services on a collateralized basis is either not possible or difficult in practice for several reasons:

Financing services establishes no transaction-related physical inventory available as collateral; hence, financing is made difficult if not impossible on a collateralized basis.

Providing initial or expanded trade services will involve significant "beefing-up" and operating costs. The inability to borrow may forestall the process.

Secured lending in the export of trade services area is difficult in practice as perfecting a security interest in a service contract is virtually impossible.

(3) ETCs of small or regional bank holding companies would be at a competitive disadvantage. They are generally unable to downstream credit to an ETC affiliate on an unsecured basis and not have easy access to the commercial paper and other short term liability markets.

(4) A collateral requirement would unnecessarily restrict and hinder the flexibility of export trade financing, contrary to the stated intentions of Congress in enacting the ETC bill. For example, a frequent requirement for an ETA in completing a transaction is the requirement to bridge financing to cover the flow of goods from one point to another in the trade process. Frequently, an ETC must pay a supplier of goods purchased prior to goods being loaded on a ship. A typical letter of credit sale transaction is necessary before drawing can be made, and gap created must be financed, hence, the term "bridge". It would be most difficult to finance this transaction on a secured basis and would have an adverse effect on the need for flexibility.

(5) Collateralized lending is more costly and labor intensive than unsecured lending. Administrative costs for collateralized lending are great due to monitoring and manpower expense. Additionally, it may be necessary to have duplicate staffs in the bank and ETC affiliate monitor or comply with collateral requirements. This being so, an ETC would be at a competitive disadvantage and less attractive to management.

(6) Normal bank lending standards and regulatory supervision should be perfectly adequate in making a proper lending decision to an ETC affiliate. Secured lending should be a management decision depending upon individual circumstances, including factors such as capital base, leverage, and quality and size of receivables.●

INSIDE ANDROPOV'S MIND

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. McDONALD. Mr. Speaker, William Safire wrote a very perceptive column on December 6, 1982, in which he outlined how Yuri Andropov must be viewing the world situation. In my view, it is a realist assessment, and in particular, I would like to call the attention of my colleagues to Andropov's supposed thoughts on Mexico. The column follows:

[From the New York Times, December 6, 1982]

INSIDE ANDROPOV'S MIND

(By William Safire)

A couple of months ago, when last I shared my innermost thoughts with you in this space, I explained how I—Yuri Andropov—was going to gain control in the Kremlin after Brezhnev's death. Events have proceeded according to the plan I laid out then: Chernenko and the Brezhnev clique have been rebuffed, and Viktor Grishin has been told by Marshal Ustinov that he would have to wait his turn.

Why do I expose my most intimate plotting in an internationally syndicated column? Simple: 15 years at the head of the K.G.B. taught me the lesson of Edgar Allan Poe's "Purloined Letter"—the best hiding-place is in the open. No better way exists to conceal my purposes than to continue to publish them here from time to time—everybody will think these are the products of some pundit's fevered imagination.

And now to work. In Brezhnev's time, we caught up with and surpassed the Americans in nuclear striking power; in my time, we will consolidate our strategic position in some sort of SALT treaty, and fix our economic mess with the active aid of the West.

However, this curing of our internal weakness, relying as it will on détente and increased trade, will infuriate Comrade Grishin and trouble Marshal Ustinov. If it is not accompanied by concerted action to improve our strategic position and weaken the Americans, I could wind up as the Malenkov of this generation.

The answer is oil. On our side of the world, control of Persian Gulf oil—and the ability to bring Europe to its knees—lies through Afghanistan.

We are currently bleeding in Afghanistan, with 105,000 Soviet troops unable to control the area and obliterate all opposition. Increasing chemical warfare would be effective on guerrillas, but using more poison gas might make it easier for the Americans to avoid a SALT agreement.

We must either get out of that country, using our withdrawal as the quid pro quo for a rapprochement with the Chinese, or go in with the 250,000 more troops Ustinov says he needs to exterminate opposition. If I thought pulling out of Afghanistan would bring Peking back into our orbit, it would be worth the embarrassment—but after the way Huang Hua was fired for shaking my hand, I doubt that is in the works.

The alternative is attractive: to crush the Afghans and to put 500 Soviet tanks in the southwest corner of that country, just over 200 miles from the Straits of Hormuz. Unlike most of that miserable, mountainous country, the south is flatland—tank country. We would then be in position to close off the Persian Gulf when Khomeini dies and Iran comes apart. I have 2,000 men in Iran today who know what to do.

We might never have to choke off Europe's lifeline, of course, but in power balances, the ability to do so is what counts. The American rapid deployment force would be a joke, with Soviet tanks and troops in place at the jugular of Middle East oil. Would we pay in terms of world public opinion? Our firm action in Poland, and the world's handwringing response, is the answer to that.

On their side of the world, our strategic target is Mexico. That is the West's great oil supply of the future, and with relatively little effort we could create much mischief there. Guatemala and Honduras are the places of entry, but we must combine external pressure with internal revolution.

If any country is ripe for revolution, Mexico is. For three generations, the ruling circles have been pretending to the peasants that the revolution has already happened. The corruption is worse in Mexico City than it is in Moscow, and that's saying plenty. My agents tell me that one former President may have a billion dollars in assets abroad. The new President has been serving as finance minister, which makes him appear either blind or venal.

A few months ago, the Government threatened to make public the names of the businessmen who sent money abroad; that plan was dropped when someone else found records of the Government and Pemex officials who enriched themselves. Now nothing is published, but such wholesale corruption fills the room with gas and only a revolutionary spark is needed. We should be able to provide that at no great expense.

Major trouble on the southern border of the United States is the last thing Mr. Reagan and his succesors will need. It would keep them off balance, in strategic terms, for a decade, at no cost to the Soviet economy. It might force them to concentrate on their southern oil problem as we deal with our southern oil problem, and offers the possibility of an agreement on spheres of influence.

I do not have the length of time of a Brezhnev or a Stalin, but I have enough time to make a difference. Maybe if I took the 250,000 troops from the Chinese border and put them in Afghanistan, I could accommodate Peking and prepare to take advantage of the Iranian opportunity at the same time.

That would outfox Viktor Grishin. He headed off my bid to be head of state as well as head of party, and I must avert a Grishin-Chernenko appeal to the Army. The ruler of the Russias must not allow his own back to become a target of opportunity.●

THE SYMBOLS OF SOLIDARITY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Ms. MIKULSKI. Mr. Speaker, my uncle, Mr. Edward Blazucki, brought the following article to my attention. The article, "The Symbols of Solidarity," by Eugene Kusielewicz, appeared

in the November/December issue of Perspectives, a Polish-American educational and cultural bimonthly newsletter. At a time when the Polish people cautiously look forward to better times, their symbols of solidarity and faith are particularly important for all of us during this holiday season.

THE SYMBOLS OF SOLIDARITY

(By Eugene Kusielewicz)

Every major movement has its symbols. The French Revolution had its tricolor and its Marseillaise. The Russian Revolution has its red star and its hammer and sickle. Occupied Poland had its "Polska Walczaca," its "Fighting Poland," the letter "W" meaning fighting, with the letter "P" rising from the center of the letter "W" representing Poland rising from its struggle. We are familiar with the Soidarity logo, "Solidarnosc" with the Polish flag rising from the end of the letter "n". It created the impression of a number of people, determined people, marching forward under the Polish standard. But how many are aware of another Solidarity symbol, the Christian Cross?

It is said that the beginning of this symbol occurred during the visit of Pope John Paul II to Poland. The highpoint of his visit to Warsaw was his appearance in Victory Square, beneath a huge Christian Cross, beautifully proportioned to blend in with the dimensions of the square. After the ceremony, which was attended by hundreds of thousands of Poles, the cross was removed. It appeared again, pointing to the heavens on the death of Cardinal Stefan Wyszynski, the primate of Poland. Again, after the mournful Polish nation paid its last respects to their beloved leader, the cross was again removed. It is believed that it now rests in storage in one of Warsaw's many churches.

Following the events of December 13, 1981, when General Wojchiech Jaruzelski launched his virtuosic—though most Poles would call it diabolical—attack upon the leadership of the Solidarity movement, the Christian Cross reappeared in Victory Square, this time in the form of hundreds upon hundreds of flowers, not pointing in triumph to the heavens, but laid out flat on the stones that formed the surface of the square. Each night, after curfew, the police would remove the flowers that made the cross. Each morning the flowers would appear again. Each day the cross would take on a new shape or form. Each day it grew. One day the "V" for victory would appear at the base of the cross. The next day it would be the symbol for "Polska Walczacza." And the day after that there would be a number of smaller crosses surrounding the larger cross. In the beginning some people brought pictures of John Paul II, Cardinal Wyszynski or Lech Walesa. Later others brought candles. While still later, others brought banners stating that "Solidarity Lives," "Free Walesa," or "Return Poland to the Poles." Who started the cross, nobody knows, though some think that it was begun by members of the various orders of nuns that abound in and around Warsaw. Who publicized it among the people of Warsaw? Nobody knows. Yet everybody knew. Every day, week in, week out, hundreds, no thousands if not tens of thousands of the ordinary men and women of Warsaw came with their offerings. Though it was the heart of winter, they came every day with their fresh flowers, their candles or their banners. They knelt and they prayed and then they left. It was as if the Polish nation shared a common knowledge and a common need, a need they found in the Christian Cross.

After the murder of a number of miners at the Wujek mine, the cross reappeared in Victory Square, this time made of coal. At night the coal was removed. In the morning the coal reappeared again. One day some Poles replaced one of the stones that made up the floor of the square with a plaque bearing the names of those who were killed at the mine. That night the names were covered with a layer of cement. The following morning the cement was covered with a forest of candles and the cross reappeared again, causing no end of frustration for the martial law authorities. The police watched. From the roof of the Hotel Victoria at the edge of the square they filmed those who brought the flowers, the candles, the banners and the coal. But they did not interfere. One day, though, the square was surrounded with high fences. No one could enter it. People wondered why. The official version noted that the floor of the square was badly in need of repair—and indeed it was. The square would therefore be closed until the repairs were completed. But to the ordinary inhabitants of Warsaw the explanation became clear. The government was embarrassed by the constant reappearance of the Christian Cross.

If the martial law authorities thought they had solved their problem, they were sadly mistaken, for the following day two Christian Crosses appeared in the heart of Warsaw, one in front of the Church of the Visitation Sisters, the other in the small courtyard between the belfry and the Church of St. Ann. These crosses were not removed at night. Apparently the military authorities do not wish to alienate the leadership of the Catholic Church, even a note appeared at the foot of the cross in the courtyard of the Church of St. Ann calling for a general strike on November 10th. The Cross has become part of the Polish underground vocabulary. It has become a symbol of the unity of the Polish people, a symbol of their hope and their belief that someday the people will overcome.

The official logo of the movement, "Solidarnosc," was extremely popular in the first months of the movement. But in time, as Solidarity became more and more popular eventually embracing the greater part of the Polish nation, many opportunists began wearing the pin. The symbol began losing its popularity. Yet every people and every movement needs its symbols. Now the people of Poland have turned to Our Lady of Czestochowa, the patron of Poland's most sacred shrine. Lech Walesa usually wore a small square representation of Our Lady of Czestochowa in his lapel. Now, more and more of the people of Poland are following his example. Some do so because of the religious connotation. But most do so for another reason, as a demonstration of protest against unbearable, unreasonable and unconstitutional conditions. They cannot wear their Solidarity logos. They cannot wear their "resistors." But the government is still too uncertain and unstable to challenge the Church by preventing the people of Poland from wearing a representation of Our Lady of Czestochowa, especially during this, her six hundredth anniversary.●

A SALUTE TO JOE PATERNO

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WOLF. Mr. Speaker, "Stop the rain, Joe! Stop the rain, Joe! Stop the rain, Joe!" chanted a stadium of football fans one drizzly Saturday afternoon in 1975. Penn State students and alumni alike have come to expect such miracles from our coach, Joe Paterno.

The scene was the Penn State-Stanford game, the second home contest of the season. By the second quarter, the rain had stopped, the clouds cleared, and Coach Paterno went on to lead the team to an outstanding 34 to 14 victory.

Joe Paterno's 16-year career as coach of one of America's finest college football teams includes many such feats. His amazing record shows 161 victories, 34 losses and 1 tie—representing a total winning percentage of 82.4. That fine record ranks Coach Paterno third among active coaches in career victories and eighth among coaches through college football history.

This season alone he has ushered the team to 10 victories, with consistently high scores—including our 54 to 0 victory over North Carolina State and a 49 to 14 win against Rutgers. The season's highlights include an impressive win over Notre Dame, 24 to 14, and a spectacular victory over Nebraska won by a 2-yard touchdown pass in the closing seconds of the game. But the team's crowning glory was a 19 to 10 sweep over arch rival, the University of Pittsburgh.

Such exciting seasons are hardly uncommon. Our coach has led 12 consecutive Penn State teams to bowl games. This year my alma mater challenges the Georgia Bulldogs in the Sugar Bowl—our fourth Sugar Bowl bid in the last decade.

I salute Joe Paterno and the Penn State Nittany Lions! This is one victory that will indeed be sweet!●

MILITARY SPENDING, DISARMAMENT AND NUCLEAR WEAPONS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HUBBARD. Mr. Speaker, I received an excellent letter from one of my constituents, Gary Bush, of Olmstead, Ky. Mr. Bush has written to me with regard to his concerns about military spending, disarmament, nuclear weapons and the "Ground Zero" movement. I believe that my col-

leagues will be interested in his comments, particularly as the 97th Congress continues to address these important matters as it prepares to adjourn. The letter follows:

OLMSTEAD, KY.,
September 20, 1982.

To: Congressman CARROLL HUBBARD.
From: Mr. Gary Bush.
Subject: Military Spending vs. Disarmament.

This new "Ban the Bomb" movement called "Ground Zero" follows the pattern of a much used and highly refined Communist tactic to soften up the United States by appealing to warm hearted and soft headed Americans. Today both the United States and Russia are armed with nuclear weapons and the "Ground Zero Movement" is using our own citizens to try to shame or scare us into throwing our weapons away by putting a freeze on our nuclear arsenal. The Russians can and will continue their buildup of both nuclear and conventional weapons, not to mention poison and nerve gases.

These proposals are not the road to world peace, they are tantamount to surrender. The aim of the USSR is to rule the world and the only thing blocking their conquest is the free world's stockpile of nuclear weapons. They can destroy us, but at the present time, we can also destroy them. But now, they want us to throw away the equalizer.

I love life and want peace, but not peace at any price, not at the price of freedom. Daniel Webster once said "God grants liberty only to those who love it and are always ready to guard and defend it."

I have no easy solution to offer. The risks of nuclear war can only be eliminated completely by our surrender, but they can be reduced by making the free world so strong that Russia cannot afford to annihilate us. We must accept guns instead of butter on a scale required to make us too strong for anyone to risk attacking us.

I once read that "The one chink in the armor of any democracy is that when the Plebs discover that they can vote themselves Bread and Circuses, they usually do . . . right up to the point that there is neither bread or circuses." We need to cut Federal spending and growth but not at the expense of national security.

KLAN'S IMPORTANCE BOTH MINIMIZED, EXAGGERATED

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. FOWLER. Mr. Speaker, I would like to take this opportunity to share with my colleagues an article about the Ku Klux Klan that appeared in the Atlanta Constitution. This article, written by Charles F. Wittenstein, southern civil rights director for B'nai B'rith's Anti-Defamation League, is a fine piece of analysis which places the Klan in its true context as a small but potentially dangerous terrorist organization. Mr. Wittenstein convincingly demonstrates why we cannot afford to ignore the Klan and similar hate groups. As he says in conclusion:

A democratic society cannot tolerate groups that use violence and intimidation to settle public issues. Either democracy or terrorism will survive, but not both.

The article follows:

KLAN'S IMPORTANCE BOTH MINIMIZED, EXAGGERATED

(By Charles F. Wittenstein)

The Ku Klux Klan must be taken seriously as a terrorist organization, but not as a mass movement representative of any substantial influence in America. The pointy-headed Kluxer may look riduculous in his bedsheet and hood, but he is menacing when he points his shotgun or semiautomatic rifle.

The new "Confederation of Klans," formed Labor Day weekend at Stone Mountain, must be viewed in this context. For a variety of reasons, the importance of the Klan as an organization has been both exaggerated and minimized. The extent to which it's genuine threat, and the nature of that threat, have been obscured by the passions the subject arouses, by Klan secrecy and by both Klan and some anti-Klan elements who are blowing smoke.

It's obvious that grand dragons and imperial wizards have a state in overestimating the KKK. One of the reasons they got into the Klan in the first place was because the costume and the myth made them feel important. Some Klansmen owe more to P. T. Barnum than to Nathan Bedford Forrest; you know, there's a sucker born every minute. For some, Klan leadership is a livelihood, and it beats working.

The communications media, particularly television, seem to love Klan stories. They are picturesque, a photo opportunity, a change of pace and an oddity—like a two-headed snake. As a result, the Klan seems to receive more publicity than its numbers warrant.

Then there are those on the radical left who would have you believe that Klansmen are proxies for the police, and are supported by the establishment (a.k.a. "the capitalist oppressors") to keep blacks in their place and divert poor whites from class conflict to racial conflict. Consistent with this scenario is the view of the Klan as the tip of the iceberg, as truly representative of racist America (sometimes spelled Amerika).

Underestimating the KKK may be a device used by those who believe that if we pretend it isn't there, it will go away; or by those who would simply prefer to avoid the ugly reality and not confront the problem.

The Anti-Defamation League of B'nai B'rith has been monitoring the Klan for almost 70 years now. ADL estimates the Klan's current national membership in the range of 10,000 to 12,000, an infinitesimal percentage in a population of 230 million. It cannot, therefore, be considered a significant national movement, whether united or fragmented. Rather, it should be seen as a fringe element in American society—and a lunatic fringe at that.

While Klan membership is slightly larger now than it was three years ago, in a recession it should have done better. It still has only about 20 percent of the numbers it had in the 1960s, and is far below its peak of several million members in the 1920s. In those days, it had real political influence through control of many public officials and law-enforcement agencies.

That's gone now, except for a few isolated rural areas where it retains some influence. The small number of card-carrying Klansmen contrasted with the large majority of white Christian Americans who abhor the KKK explodes the pretentions of the leadership who claim to represent whites. Such a claim is nothing but a fraudulent pitch for respectability.

Even with its new-found unity, the Confederation of Klans includes no more than half the national KKK membership, maybe less. Nevertheless, the Confederation appears to be an achievement that may enable it to mobilize more manpower and resources for major events and, by putting on a big show, enhance its status.

But it could just as easily turn out to be a paper tiger, a loose alliance rather than a genuine merger. Klan leaders are notoriously reluctant to share dues. And the Confederation could collapse completely if and when Don Black, the newly elected grand wizard, who's also a convicted felon, goes to a federal penitentiary. He's out on bail pending appeal of his conviction of conspiracy to overthrow the government of the Caribbean island nation of Dominica.

Why, then, the KKK seriously? Take it seriously because it's teaching hatred—racial, religious and ethnic bigotry. It's teaching white supremacy and anti-Semitism, which is un-American, and, according to my Christian friends, anti-Christian. If ours is to be a decent and just society, fit for good people, it will be built on mutual respect among racial, religious and ethnic groups, on equality before the law, and equality of opportunity.

Add to the element of hatred the fact that the Klan is well-armed and engaged in paramilitary training, and that it has a history of violence and intimidation, and it adds up to a terrorist threat. And violence is by no means a thing of the past—in recent years numerous Klansmen have been convicted of crimes of violence and attempted bombings.

"The race war is coming. Be prepared," shouts the Klan leader in what he hopes will be a self-fulfilling prophecy. "These guns ain't for killing rabbits," he continues, "they're to waste people." Better believe it.

While Klan membership is small, the Klan mentality is much more widespread. But ignorance and bigotry may be counteracted by education, hate overcome by love. Terrorism, however, must be counteracted by vigorous and effective law enforcement on the local, state and federal level.

The Georgia Bureau of Investigation and the federal Bureau of Alcohol, Tobacco and Firearms are doing a fine job, but the Federal Bureau of Investigation should devote more of its resources to Klan surveillance in order to avert tragedy. This can be done with respect for civil liberties.

It's about time we understood what terrorists have always known: A democratic society cannot tolerate groups that use violence and intimidation to settle public issues. Either democracy or terrorism will survive, but not both.●

JOHN STEINBRUCK

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. LANTOS. Mr. Speaker, I would like to bring to my colleagues attention an article that appeared in the Washington Post Sunday Magazine of December 19 concerning Pastor John Steinbruck of the Luther Place Memorial Church here in Washington. I

became acquainted with Reverend Steinbruck through his work to establish Raoul Wallenberg House as a home for poor families of Washington. His dedication to the needs of the poor, the homeless and the less fortunate is a model for all of us during this season of the year. I consider myself a much better person simply by my association with John Steinbruck.

It is my pleasure to submit the following article for my colleagues:

JOHN STEINBRUCK

Luther Place Memorial Church is a neo-Gothic edifice of magnificent browstone; it is on Thomas Circle, an area bustling with prostitutes and pimps, drug pushers and vagrants. Pastor John Steinbruck calls the neighborhood "the right place for Christian ministry," and he views his church as "an oasis in the asphalt desert of Washington." He cites the hospitality biblical Abraham and Sarah gave to the strangers who turned out to be angels; he says that in every instance one helps strangers, they are angels.

"Jesus was homeless, an itinerant," Steinbruck says. "His companions were exiles, the sick and the hungry." In the 13 years of Steinbruck's ministry, Luther Place has become what officials call "a safety net" for people who have nowhere else to go. On any night, up to 40 homeless women sleep on mattresses placed on the chapel's floor. On N Street, the church sponsors a "village" of townhouses: the Day Center for women to sew, do their laundry, talk to counselors or just rest; Sarah House, for up to 20 homeless or mentally disturbed women; Raoul Wallenberg House, for families evicted; Deborah House, for helping women to return to an independent life; Zaccheus Medical Clinic, for providing health care for 5,000 indigents a year; and a free store that distributes food and clothing.

"We care for the urban nomads, the refugees of the street," he says. "This church is a secure place for them." Walking around the block, he trades greetings with prostitutes. (They are allowed to use the church's bathrooms, but the prostitutes do not want Steinbruck on their turf: his clerical collar discourages clients.)

He chats with a bag lady named Michelle. "In the winter we give her a hat and a pair of gloves, but she returns without them," he says. "She gives them away to people she thinks need them more."

He chides a derelict for drinking. "Robert is intelligent, a lovely human being," he says. "He comes from a fine family, with a brother who has a PhD. But he can't pull himself together."

"The worst crime is not to care," Steinbruck says. "We presume to be the hosts, but we become the guests, as these people bring us into the Kingdom of God. God always acts in solidarity with the weak and the poor. This church would be long gone without the homeless it helps."●

VISITING RIGHTS FOR GRANDPARENTS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BROOMFIELD. Mr. Speaker, last week my constituent, Mr. Richard S. Victor, testified before the House Aging Committee's Subcommittee on Human Services regarding a growing national problem. This problem which affects many of our Nation's elderly concerns their inability to see their grandchildren when the grandchilden's parents are no longer together.

As this Nation's postwar baby boom ages and with the continued high divorce rates, the number of grandparents who are being denied visiting rights with their grandchildren will also grow enormously, however, there is more to this problem than the heartrending trauma that the grandparents face in this situation. The grandparents also suffer for they are being denied the contact, the communications with, and the mutually supportive love that is part of the grandparent/grandchild relationship.

Mr. Victor, as an attorney in private practice in Oak Park, Mich., has developed considerable expertise in this area of grandparent visiting rights because Michigan is one of the few States that have State legislation in this area.

Mr. Speaker, while there may be legitimate questions of proper Federal jurisdiction in this area that still must be addressed, I am including portions of Mr. Victor's testimony to better acquaint our colleagues in the Congress with this growing area of concern for this Nation's elderly.

The testimony referred to follows:

TESTIMONY TO THE HUMAN SERVICES SUBCOMMITTEE OF THE SELECT COMMITTEE ON AGING—GRANDPARENTS' RIGHTS TO VISITATION

As a result of continued population growth, especially our "baby boom of the 40's," the 1980's and 1990's will provide our society with a greater number of grandparents than we have known in our recent past. Add to this fact that the divorce rate in our country is staggering with estimates of almost one divorce for every two marriages, and in addition, these divorces are occurring between young parents who have young children, we can see that this trend in our society can create conflicts which were unimaginable in past decades.

Some of these conflicts need legislative involvement in order to cure injustices which might occur. Whether the legislative involvement which is necessary should be on a state-to-state basis, strictly Federal, or a combination of both, is a question which needs to be answered at this time.

Grandparents across our nation have been standing up and speaking out when they have been denied the opportunity to visit with their grandchildren for no apparent reasons. This has taken place in the form of the formation of various support groups on a state and national level, as well as numerous court cases which have been pursued to enforce inherent rights of grandparents to be able to visit with their grandchildren. The title of this subject "grandparents' rights to visitation" is only one-half of the subject. The converse deals with the rights of grandhchildren to be able to visit with, communicate, and maintain contact with their grandparents. This, I believe, should be the crux of our investigation. This should be of significance to the legislative bodies which pass laws to protect segments of our population who are not able to protect themselves as well as to pass laws which provide remedies where injustices have occurred. To quote Arthur Kornhaver, M.D. and Kenneth L. Woodward: "The grandparent and grandchild relationship is a vital connection."

Through my work as an attorney in private practice in the State of Michigan, I have had numerous dealings with grandparents who have been denied the right to visit with their grandchildren. Because of these denials, these grandparents were forced to seek court intervention to enforce rights which these grandparents felt were their rights inherently. Unfortunately, the rights which they have, if any, are statutory in nature. Therefore, my clients have been limited to what was set forth by state statute in the State of Michigan and the appellate decisions which interpret those statutes, and have only been able to be successful in receiving court intervention when legislation was provided by the state recognizing this issue.

Through our extensive research we have found various state statutes which deal with this topic and which will be discussed later in this testimony. Several of these state statutes have conflicts within the statutes themselves which has caused a great deal of confusion when they are interpreted by the courts. In all of these cases, grandparents, whether maternal or paternal, were involved and wanted contact with their grandchildren. In very few cases have we dealt with grandparents fighting for custody of their grandchildren over a natural parent. The cases that we have primarily dealt with are of such a nature that grandparents only wanted to continue a relationship with their grandchildren that had been established and they wished to continue, but had been terminated arbitrarily by the legal custodian (usually the parent or parents) of the child.

Public attention has been drawn to this issue because of the deep emotions and the equities that are involved. In no case do I believe that grandparental visitation is an absolute. Not all grandparents should be able to visit with their grandchildren. There may be many instances where in fact it would be detrimental to a child to be subjected to visitation with his or her grandparents given the proper factual setting. However, these decisions must be made on a case by case basis with one underlying theme or factor; and that is, that the best interests of the child shall control.

States' attempts to define best interests somehow seem more logical when put in the setting of legal proceedings involving disputes as to custody of minor children. Questions if visitation have usually been left to the discretion of trial court judges to determine what visitation should be granted and to whom. Most cases have dealt with questions of visitation concerning non-custodial parents of minor children. We do not have concrete legislation that specifically sets forth criteria to be utilized in making determinations regarding visitation of minor children with their grandparents.

4. THE PROBLEM WITH STATE LAWS AS THEY CURRENTLY STAND (MICHIGAN AS A PRIME EXAMPLE)

The history of grandparents' rights to visitation in Michigan, can be traced as recently as a little over one decade ago. In 1971 a state law was passed.

This state statute limited the rights of grandparents to seek visitation to situations where there had been a death of their own child leaving a minor grandchild. It would have created a remedy to our client, except for the fact that a stepparent adoption occurred in those factual situations. This was the problem that Michigan faced when a 1979 Court of Appeals decision (*Bikos* v. *Nobliski*, 88 Mich App 157 (1979) was asked to interpret conflicting statutes dealing with this grandparent visitation statute and the Michigan Adoption Statute.

The Michigan Court of Appeals in the *Bikos, supra,* case held that the Order of Adoption Statute took precedence over the Grandparent Visitation Statute which effectively made the natural grandparents of a minor child who was adopted by a stepparent following the death of the natural parent, no longer the legal grandparent of that child. Obviously, this conflict created harsh results and in my opinion a tremendously unjust dilemma for grandparents throughout the State of Michigan. In 1980, following the efforts of many groups and individuals, the Michigan Adoption Statute was amended to read: ". . . after entry of the order of adoption, the adopted person shall no longer be an heir-at-law of a *parent whose rights have been terminated or the lineal or collateral kindred of that parent* . . . . ." (MCLA 710.60 as amended)

The effect of that amendment, was that the adopted child would no longer be an heir to its natural family line once the child's parents' parental rights had been terminated. But, if there had been no termination of parental rights, the child's natural blood line would not be destroyed. This would then not take away from natural grandparents their standing as legal grandparents of a minor child who was adopted unless said adoption followed termination of parental rights.

In addition, in 1980, the Michigan Child Custody Sttute (MCLA 722.27) was amended to provide:

"Upon petition consider the reasonable visitation of maternal or paternal grandparents and, if denied, shall make a record of such denial."

On its face, one would think this amendment to the Michigan Child Custody Statute would solve the problems that grandparents would have when being denied visitation with their grandchildren. However, albeit the intent of the legislature was good, they placed this amended statute under a section of the Michigan laws which had a preamble. The preamble, or prerequisite to utilization of this amended statute, provided as follows:

"If a *child custody dispute* has been submitted to a circuit court as an original action under this act or has arisen incidently from another action in a circuit court or a judgment of a circuit court, for the best interests of the child the court may: . . ."

Therefore, in order for a grandparent to attempt to utilize the statute which allows them to petition for consideration regarding visitation, there must either have been, or presently have, a child custody dispute involved. In the cases I have litigated, very rarely does a grandparent seek custody of their grandchild. They merely want visitation and, therefore, cannot avail themselves to the remedy which Michigan has provided.

A brief research into how other states handle this dilemma finds that over twenty states have passed legislation dealing with this problem. Within these twenty states there are tremendous conflicts, especially once a stepparent adoption occurs. Other conflicts arise in the interpretation of these statutes and whether or not they are to be construed to intend that grandparents have standing to intervene in divorce proceedings to assert their rights to visitation while their own children's divorce matter is pending. Oklahoma (Oklahoma Statute Annotated Title 10, § 60.16) has a unique enactment which appears to set forth that grandparents have visitation rights with their grandchildren unless they are terminated by court order, and such is true even though the child may be adopted by his stepparent. Because of the frequency of stepparent adoptions and what affect the stepparent adoptions have on the grandparents of the child, specifically with respect to visitation rights, we need some cohesive legislation on a Federal level to help our states draw together into a unified position with respect to this problem.

5. THE NEED FOR UNIFORM GRANDPARENTAL VISITATION RIGHTS ACT

Other than the need for a clear and concise understanding of this problem from a national perspective, and Federal legislation appropriate thereto, there is another reason why there is a need for Federal legislation dealing with this problem. In several cases wherein I represented grandparents who were forced to seek court enforcement of their visitation rights, we have been threatened by the parent or legal custodian of the minor grandchild involved, that if we were to pursue our court action they, the parent or legal custodian, would remove the child from the State of Michigan. Considering the fact that the City of Toledo, Ohio is approximately the same distance from Detroit, as the capitol of our state, Lansing, Michigan, this threat of removing children from the state is very real. What remedy would a grandparent have when faced with this threat? If we had Federal legislation, along with state legislation, dealing with this problem, such as we have with our civil rights legislation, the threat of moving from one state to another to avoid enforcement of court orders would be a mere "puff of wind."

Our society today is a "transient society." We are little more than three hours away by air from one coast to another. People move from one state to another as easily now as we used to move from one city to another. The problem of grandparents' rights to visitation is no longer a local issue. We need state statutes to protect people within the boundaries of our states. However, when the people involved live in different states or move from one state to another, then we need Federal legislation available for the same reason that we need state legislation when the parties are confined to one single state. Again, court enforcement of this legislation is a last resort! It is the motivating incentive for parties to reconcile their differences. It is the motivating incentive for parties to voluntarily seek counseling in hopes of reconciling their family traumas. But it does provide a last resort for injustices which may occur.

6. SPECIFIC RECOMMENDATIONS

The most obvious recommendation that I can make, but one which is not part of these hearings is that each state adopt some form of legislation recognizing the problem of grandparents' rights to visitation and providing some remedy which would be available to enforce these rights. I would also suggest that state legislation set forth a scheme of mandatory counseling through the use of professionals in the behavioral sciences to help provide direction for families who are in dispute and are suffering from the emotional traumas which are usually present when an issue of denial of grandparental visitation is involved. The court should be able to consider the willingness to cooperate in attempting to reconcile these problems and not allow one party to control the proceedings by blatant avoidance of attempts to reconcile the dispute.

Further, the court should be able to inquire into reasons for any alleged animosity (or why denial of visitation was made in the first place) and then consider only reasons where proper justification is presented. Obviously, if proper justification is presented, then this is to be considered when determining what is in the best interests of the child with respect to this visitation question.

There is no question in my mind that the problems relating to the rights of grandparents to visit with their grandchildren is a real concern to a great number of people in our country. This concern is one which shall surely grow because of the amount of divorce in our country. We must concern ourselves with the concept of the "extended family" which includes grandparents, stepparents, and other third parties from the traditional family unit. Further, grandparents "as seniors" of our society shall have a greater impact as their numbers increase. The concept of "grandma" and "grandpa" sitting in a corner unable to stand up for themselves and speak, no longer exists. "Grandma" and "grandpa," just as grandson and granddaugher, have inherent rights in our family unit. They are necessary to pass on the heritage of the past. They are a link in the long chain of continued growth and expansion of our society. They should no longer be ignored.

Psychiatrists, phychologists, and social workers can tell us of the importance that grandparents can have on grandchildren. As a former history major, it is interesting to note how different civilizations treat their older generations. It would seem logical that "seniors" can help us learn from our mistakes and teach us traditions and cultures which can be utilized and passed on in the future. Lastly, and it is something that I remind the litigants who are involved in cases where I fight in court for grandparent visitation, and that the parents who are standing in the way of allowing their children to contact, communicate, and share with their grandparents, will one day be grandparents themselves. How do they want their child to remember their own actions. We teach our children not by what we say, but by what we do. It is now time to do what must be done and to recognize the rights and responsibilities that we all face in the most basic structure that God ever created—the family. This is not a concern isolated to the local community, or even to a state as a whole. This is a concern, and a responsibility, of all citizens in our nation. I urge you to strongly consider adopting legislation, on a Federal level, in support of the rights of grandparents, and the rights of grandchildren in this regard. Thank you for your consideration.●

CHILD CARE: A BUSINESS RESPONSIBILITY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Ms. MIKULSKI. Mr. Speaker, the care of this Nation's children deserves our special attention. The number of child care providers is decreasing at a time when the number of children needing care is increasing. One of the provisions of the 1981 Tax Act created employer-assisted child care programs. But so far, the business community has not made an overwhelming response. That is why I was encouraged to read about Mr. Arnold Hiatt's commitment to corporate child care programs in a recent issue of Industry Week. As president of Stride Rite Corp., Mr. Hiatt discusses a need for a cooperative relationship between business and the community. I call this excellent article to the attention of my colleagues.

[From Industry Week, Nov. 29, 1982]

CHILD CARE: A BUSINESS RESPONSIBILITY

(By Arnold Hiatt)

While there is no Hippocratic oath for businessmen, there is, nevertheless, a compelling responsibility that all of us share, one way or another, in meeting the needs of society. Business has become a social leader, and business people must elevate their vision of the bottom line to embrace social as well as economic goals.

It is only good sense for corporations to be involved in the community. The health of a society determines the health of its economy—as the Japanese have so effectively demonstrated. Corporations cannot separate work and family life, for their success ultimately depends on the well-being of the community. Battered wives, abused and abandoned children, broken homes, destitute families—all make limited customers.

Among the more critical needs that business must address are those of children, for they have no voice and they have no vote. There are currently six million youngsters under the age of 6, and 13 million under the age of 13, with mothers in the workforce. Many of these mothers are single parents who, without some kind of daycare asssistance, could not find the dignity of work or achieve any kind of financial independence.

Yet, there are now available only one million places in pre-school child-care facilities—public and private—and the need is escalating rapidly. By 1990, it is estimated, two out of every three mothers will be working, with 55% of them having at least one child under the age of 6.

While strong initiatives must come from corporate leadership, as well as all of us as individuals, radically shifting the burden of social programs from government to the private sector is simply not feasible. Let me explain.

The total of all corporate giving last year amounted to $2.7 billion. The total of all grants from foundations came to $2.4 billion.

In contrast, the proposed cuts in programs designed only for children amount to a staggering $8 billion. The cuts are for 1983 alone and do not reflect those already made in 1982 and those proposed for 1984.

If for no other reason than to protect what remains of our nation's commitment to the young, we have no choice but to become more politicized and more vigorously involved in the electoral process. How our tax dollars are spent becomes the key issue. We can influence the choice of people who move into the vital decision-making roles in government and whose values and priorities could more nearly reflect our own.

Can we afford people in office who decide to eliminate funding for 100,000 children in day-care centers and thereby force some of these parents out of the workforce and back into welfare? Do we save resources by reducing nutrition programs for children by 44%, or health programs by 30%? Do we necessarily better serve national security by adding to our military stockpile rather than investing in an informed and educated, a motivated and healthy younger generation that would have the imagination and the energy, the confidence, and the competitiveness to reverse the downturn in productivity that increasingly hobbles our industrial machine?

In the final analysis, this may prove to be the true test of world leadership in the economic race against Japan and Germany.

A reasonable balance has to be struck between the imperatives of national security and the requirement in a just and free society that our children have the opportunity to develop their potential. Government monies allocated to meet the needs of children should be among the last, not the first, to be scrutinized by the budget slashers.

Mounting evidence suggests that in the future, corporate America, willfully or not, will be playing an expanded role in meeting day-care needs. A recent Harris Poll indicates that corporate-sponsored child care could emerge as a major labor-management issue before the end of the present decade. Certainly, it is an issue that should hold powerful appeal for many women's organizations which, in the wake of the ERA's loss and in light of the rapid growth of the number of two-paycheck families and single-parent families, are setting new priorities.

Today, unhappily, the child-care situation nationally, in terms of broad-based corporate support, is where health benefits were a half-century ago—virtually nonexistent. It is hard to imagine anyone who would accept a job these days that did not provide some kind of medical-insurance plan as part of an employee-benefits package. Child-care advocates see company-funded day care as a comparable "given" by 1990.

The approximately 50 firms across the country—big and small—that have already launched on-site day-care programs have reaped significant rewards. Improved worker morale; a competitive edge in recruiting and holding skilled employees; and improved job performance and significant productivity gains from lowered turnover, absenteeism, and lateness—these are some of the more immediate, visible benefits. The 1981 Economic Recovery Tax Act, which now provides complex tax writeoffs for all child-care outlays, makes the up front dollars-and-cents investment much less burdensome.

Taking the longer view, however, it seems to me that even the most pragmatic executive must be aware that whatever strengthens the bond between the workplace and the family very directly buttresses those special and economic institutions that are the foundation of our system of democratic free enterprise.●

JOSE LOPEZ PORTILLO PRACTICES "POLITICAL GIMMICKERY"

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. McDONALD. Mr. Speaker, Prof. Marvin Alisky, of Arizona State University, is quite an astute observer of the Central American scene. From time to time he publishes a column on events in that part of the world. A column of his on Mexico, which appeared in the San Antonio Light, was recently brought to my attention. While this column appeared on October 3, 1982, much of what it says is still true, only the situation in Mexico has gotten worse, and the peso is even weaker, now, in spite of American aid. As Professor Alisky points out, Lopez Portillo has to bear much of the blame for the present situation in Mexico. He and his friends got Mexico into its present condition. The private banks of Mexico did not bring on the present situation. Nationalizing the banks is merely playing to the coliseum crowd.

The column follows:

[From the San Antonio Light, Oct. 3, 1982]

JOSE LOPEZ PORTILLO PRACTICES "POLITICAL GIMMICKERY"

(By Marvin Alisky)

In his annual "State of the Union" address Sept. 1, Mexican President Jose Lopez Portillo announced the expropriation of all privately owned banks, supposedly in an effort to stem the flow of dollars from Mexico.

Yet, his government, in fact already had stemmed that flow when it instituted currency controls without warning on that day symbolic of bad luck, Friday the 13th of August.

So the action of Sept. 1 was actually intended not to stop dollars from leaving Mexico, but to salvage some political support for Lopez Portillo.

Slated to be succeeded in office on Dec. 1 by Migueal de la Madrid, his former minister of planning and budget, Lopez Portillo has steadily lost popularity since the peso was significantly devalued early this year. Its further devaluation (from 49 down to 70 to the dollar) in August served to undermine still more that president's standing with his people.

In his State of the Union address, Lopez Portillo blamed his country's fiscal plight on international interest rates, foreign investors and "exploitation" of his country by more developed nations.

He did not choose to put any blame on his advisers, who had worked with him in compounding the public debt of Mexico.

Mexico's foreign debt of $80 billion—$60 billion of which is owed by the government itself and $20 billion by the private sector—is the largest of any nation in the Third World. The total debt has grown so much that, for 1982 alone, interest payments plus amortization payments on debt maturing will reach almost $20 billion. That amounts to 60 percent of Mexico's earnings from exports of goods and services.

It was not the privately owned banks of Mexico—Banco de Comercio, Serafin, Banamex, Longoria—which caused Mexico to approach near-bankruptcy, but instead the government's own unabated borrowing—its living beyond its income in order to fund economic expansion and diversification.

And the president knew that. His nationalization of the banks was not an economic move but rather a political one. Government-run banks likely will not help the Mexican economy any more than have deficit-ridden government-run railroads, airlines, mines and the telephone company.

Lopez Portillo's political objective in acting against the banks became apparent immediately. Or. cable from Mexico City on Sept. 6 we could see video coverage of 500 government supporters parading past an expropriated bank. As Lopez Portillo presided over a ceremony transferring the bank to government control, the crowd cheered and waved Mexican flags.

The Federation of Unions of Government Employees (the FSTSE in Spanish) got its 31 unions to muster a cross-section of bureaucrats for the demonstrations.

There was also spontaneous public support for the move, for in the political lexicon of Mexico since its Constitution was promulgated in 1917, bankers are villains. The president knows this and hurled accusations at the private bankers in his Sept. 1 address, implying the private bankers were unpatriotic to have allowed depositors to transfer money abroad.

Mexico spent several years building up its foreign debt through deficit spending and will need, several years to recover from that binge. Now in order to get new loans from the International Monetary Fund and other foreign sources, the government must cut budget deficits. And to do that, it must cut subsidies for food and fuel going to Mexican consumers.

Such actions would have been unthinkable to the country's profligate leaders previously. The economic crisis, then, may prove a boon to the country in the long run, if it prods Mexico's leaders to follow sounder domestic policies.

With the adoption of such policies, Mexico can recover, for it has enormous natural resources.

Our neighboring republic has a skilled, industrious labor force and the good fortune to be close to a vast market in the United States.

And Mexico remains the world's fourth largest producer and exporter of oil. In 1982 alone, Mexico will earn more than $14 billion from petroleum exports.

Back in the 1940s and 1950s, Mexico suffered sudden economic slumps, and recovered within two years each time. And that was before oil reserves had been discovered giving Mexico the extra income as a major seller of petroleum.

Recovery this time, however, will not be advanced by political gimmickery such as the nationalization of the banks represents.

A joke currently popular in Mexico contends: "Our country has arrived at the edge of a great abyss and so our government naturally took a giant step forward." Only if Mexico's government steps back to the firm ground of fiscal responsibility can the country achieve economic stability.●

BAILEY OUTLINES SUPREME COURT GUIDES ON CHRISTIAN NEUTRALITY NOT SEPARATION

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. BAILEY of Missouri. Mr. Speaker, one of the most misunderstood concepts in Government today is the separation of religious principles from Government. In fact, Christian neutrality should be the rule. To this end, I offer the following summary of key U.S. Supreme Court decisions (and would note the grateful guidance and assistance of Mrs. Anne Neamon, National Coordinator of Citizens for God and Country).

CHRISTIAN NEUTRALITY—NOT SEPARATION

Jefferson Walls of Separation did not separate the nation's legal structure from religious principles. "And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded the influence of refined education on minds of peculiar structure, reason and experience forbid us to expect the national morality can prevail in exclusion of religious principles." George Washington, Farewell Address, Abington V. Schempp, US 203, (1963). Lib. of Congress, copy 57, n. Administering in 1977 to the Laws of England, Justice Matthew Hale thundered, "blasphemy not only is an offense to God and Religion, but a crime against law, State and Government, because Christianity is a parcel of the laws of England." Similarly, the United States is legally structured, as all free nations upon religious principles, ours being Christian Ethics. Thus the Constitution, based on Biblical morality, serves the General Welfare, Justice, Tranquility, and Blessings of Freedom, not VICES.

Everson v. Board of Education 330, US 1 (1947) 35, 40, 52, 53, 54, n; p. 65. Jefferson's Walls of Separation were defined in his Caveat to the Virginia Assembly. Bill of Assessments, tithes, for Christian Sectarian Schools. Through Walls of Separation Jefferson resisted Christian SECTARIANISM, to "abolish all distinctions by government of preeminence amongst the different societies of communities of Christians . . . a tendency to usurp on one side or another, or to a corrupting coalition or alliance between them, will be best guarded against by . . . abstinence of Government interference in any way beyond necessity of preserving public order, and protecting each sect against trespasses on its legal rights by others". Jefferson advocated General Christianity for moral order, good government and happiness of mankind, but opposed Christian SECTARIANISM, relating his Walls of Separation to Neutrality, "Within the Christian Community", not to Secularism.

According to Justice Rutledge, ". . . authority which can establish Christianity, in exclusion of all other Religions, may establish with the same ease any particular sect of Christians, in exclusion of all other Sects." Thus, the Jeffersonian Walls of Separation, by means of Neutrality "Within the Christian Community" prevented the State of Virginia from departing from our founding principles as propounded by the US Supreme Court in—

Holy Trinity V U.S. 143 pp 480-471, "We are a Christian nation . . . nothing be done to hurt Christianity . . . legislate, propragate and secure the Christian faith. Not Christianity with established church and tithes and spiritual courts; but Christianity with liberty of conscience to all. General Christianity is and always has been a part of common law . . . to revile with malicious and blasphemous contempt, the religion professed . . . is an abuse of that right. We are a Christian people, and morality of the country is deeply ingrated upon Christianity not the worship of or doctrines of impostors. Passing into view of American life. In law, business customs and society, the same truth is recognized. This and many other matters which might be noticed add a volume of unofficial declarations to the mass of organic utterances that this is a Christian nation!"

The timely success of Jefferson's neutrality "within the Christian community" found outreach into the—

First amendment U.S. Constitution—"Congress shall make no law respecting the establishment of religion, nor prohibit free exercise thereof." This Establishment clause neutrality to secure religious freedom effected the ratification of the Constitution which had been intercepted until the inclusion of this clause. Religion was not defined, because Christianity was it! In this amendment the nation professed its belief in God, recognizing His supremacy and acknowledging the right of man to communicate with God with Constitutional protection as a right God-given and unalienable.

Thus, the first amendment asserts neutrality forbidding prohibition of free exercise by government "making law" to establish religion. Freedom of religion is protected by neutrality. Separation does not protect thus it is unconstitutional!

The First Amendment "prohibition" by neutrality is defined in great detail in—

Abington v. Schempp. p. 22, 71, 1973—"Secularism is unconstitutional . . . preferring those who do not believe over those who do believe—. . . It is the duty of government to deter no-belief religions . . . facilities of government cannot offend religious principles . . . Official encouragement of love of country and belief in God . . . untutored devotion to the concept of Neutrality can lead to non-interference and non-neutrality but also brooding and pervasive devotion to the secular passive and even active hostility to religion. Such results are prohibited by the Constitution . . . the fullest realization of true religious liberty requires that government neither engage in nor compel religious (Sectarian) practices; that it effect no favoritism among, Sects and that it work deterrence of no-belief religions." Throughout the case, Neutrality confines government and forbids Secularism by "making laws". The obvious error of Separation is revealed as totally unrelated to General Christianity which "is and always has been a part of common law, deeply engrafted . . . in law, business, customs, and society".

Engle v. Vitale, U.S. 469 U.S. 11, 14n, (1962) distinguishes that the case related to "making laws" with attorney admission "to promote religion", without any compelling interest to justify. The footnote clarifies, "This case has nothing to do with official encouragement of love of country . . . and belief in God" (administrative prayers for moral order). "The Pledge of Allegiance . . . has nothing to do with establishment of religion. It relates to belief in God, in whom

we sincerely repose our trust. We know that America cannot be defended by guns, planes, and ships alone. Appropriations and expenditures for defense will be of value if the God under whom we live believes that we are in the right. We should at all times recognize God's province over the lives of our people and over this great Nation." 100 Cong. Rec. 7757. House Debate, Abington.

Roemer 74-730 U.S. 7, 1976 reasserted Court Neutrality as "Separation Never Intended".

Bakke, 76-811 U.S. 1976, "We do not cater to shifting political party whims of the times, for they are contrary to the stability of the Constitution".

State constitutions compel Godly living for the quality of life, public conscience for moral order, for liberties for all. Thus, again, Separation falsehoods are exposed.

Kevin Walder v. First Orthodox Presbyterian Church, San Fran. California State Supreme Court, 760-028. 9, (1980) "Freedom of religion is so fundamental to American history that it must be preserved even at the expense of other rights which have become institutionalized by the Democratic process."

Sydell Stone, 1980. ". . . The Ten Commandments . . . and Bible can be in curriculum for . . . ethics."●

PRESIDENT'S PROMISES OF ECONOMIC RECOVERY STILL NOT A REALITY IN FLINT

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. KILDEE. Mr. Speaker, I am angered and frustrated at the incredible insensitivity and the empty promises of President Reagan toward the millions of unemployed workers in America today. His veto threat caused the House and Senate conferees to drop desperately needed jobs programs from consideration this year, and that is a tragedy. I can well remember the President campaigning in my hometown of Flint, Mich., more than 2 years ago decrying the unemployment problem and blaming President Carter for a poorly performing economy. Now, after 2 years of this administration's policies, the economy is worse, unemployment is higher, and there is no end in sight because this administration apparently believes the crisis will go away by itself if we just wait longer.

We cannot afford to keep waiting for the President's promises to fulfill themselves. Action is needed. The President must come to realize that immediate relief is needed for those jobless who are suffering, a program is needed to put the people of Flint and the rest of the Nation back to work.

Many people in my district have been unemployed now for 2 to 3 years. Flint's unemployment is the highest in the Nation. The jobless benefits of many are exhausted, and they are finding it ever more difficult to qualify for public assistance under the tightening program restrictions advocated by this administration. The callousness of the present policies and the havoc they are having on the victims of those policies, the poor and the jobless, are described in an article in today's Detroit Free Press. I would like to share that article with my colleagues. It is a revealing portrait of the difficulties facing the unemployed in Flint and in many other industrial cities across the Nation.

The article follows:

[From the Detroit Free Press]

HARD TIMES IN FLINT—RECOVERY STILL JUST A PROMISE

(Republican Ronald Reagan brought his campaign Wednesday night to the city with the nation's highest unemployment rate and declared he is holding "the Carter administration flatly responsible for the dismal state of today's economy.")—From an Oct. 16, 1980, Free Press story about Reagan's campaign trip to Flint.

(By Helen Fogel)

FLINT—After eight months of layoff, Gerald Ballard was getting back to work at the Coldwater Road Fisher Body plant about the time Reagan hit town with his economic analysis and promise of better times to come if he were elected.

Ballard, now 27, a production worker with a wife, two sons and nearly five years' seniority, worked until October 1981. Then he was laid off again.

Now it's been more than a year since he worked the line. His unemployment pay is gone.

His welfare status is uncertain because he received some welfare payments while also collecting unemployment, and he's running a little thin on just about everything it takes to live, except hope.

Friday, he wondered whether Reagan was dissatisfied with the 300,000-vote margin by which he carried Michigan in 1980.

"Maybe he thinks not enough people voted for him. Maybe he's holding a grudge and he's overlooking us some," Ballard said. "It does seem to me some of the other states are doing all right."

During the campaign, Reagan, along with President Jimmy Carter and both vice-presidential candidates, made eloquent speeches here about the area's dismal economy. With more than 20 percent unemployment, Flint was the political symbol of the nation's economic woes.

Two years later, with the first rustles of the next presidential campaign already sounding in Washington, nothing much has changed economically to improve lives of those who live in Flint.

The latest Department of Labor Statistics issued last week confirm that the Flint area still leads the nation with nearly 21 percent unemployment.

People who live in Flint, including the four out of five who are still working, have paid a price for three years of depression, Mayor James Rutherford said last week.

For instance, Rutherford said, resident have had to decide which city services they value most and which should be curtailed as income tax receipts plummeted to pre-1979 levels.

Last winter, they gave up weekly trash collection. It's now picked up every other week. This winter, because city residents qualified for extra federal revenue sharing by voting to tax themselves more, the city will be able to return to weekly trash pickups, Rutherford said.

But like other cities, Flint felt the loss of Comprehensive Employment and Training Act money sharply—with the end of the CETA program, Flint lost more than 300 municipal jobs, Rutherford said.

And the nearly 21 percent unemployment rate doesn't tell the whole story, Rutherford said. Among some groups, unemployment is much higher. For black people between 18 and 25, the rate exceeds 60 percent, Rutherford said.

Where the city has been able to add new jobs like the 350 at the newly built Hyatt Regency, pay scales tend to be lower, sometimes the minimum wage. This has lowered the median salary in this town which has long been accustomed to the auto workers' wage and benefit scale. Lower salaries mean smaller tax collections even when people are working.

Clyde Huddleston, 26 a road construction worker for the Genessee County Road Commission, has been laid off since February 1980.

"I'd worked ever since I was 14," he said last week. "I didn't know what layoff was."

Now he and his wife, Kathy, 25, who is laid off from General Motors Corp.'s AC Sparkplug Division, are facing a bleak benefit-less future.

Kathy was one of the GM workers eligible for an $300 bonus check last week, but she said it would not buy their two daughters Christmas presents. The money was already promised to creditors.

General Motors with its 11 manufacturing and warehousing facilities is still the lifeblood of Flint.

On Friday alone, $2.6 million in special $300 payments to unemployed GM workers went out to about 8,800 Flint-area unemployed. Many of them. like Kathy, had the check spent before they received it.

Although business is bad, GM expects that figures will show workers at its Flint-area plants spent more than $4 billion during 1982, a spokeswoman said.

With a 56,422-person work force in Flint—down from 76,933 in 1978—GM continues to sustain Flint.

But the figures tell the story. As of Dec. 13, there were 16,533 GM workers on indefinite layoff.

Some of them have been off since 1979.

"Things are critical here and getting worse," said Jack Wagner, assistant UAW regional director.

"We have people who were laid off in the summer of 1979. Some of them are desperate," he said.

People are losing their homes. Some have resorted to suicide, Wagner said.

In a telephone interview, Wagner angrily charged that the president had defaulted on his 1980 promise to put people back to work.

"(Reagan) still doesn't understand that one out of every six people (in this country) is employed in the auto industry. I guess he still can't get that through his head," Wagner said.

It isn't that people in Flint are just sitting around waiting for jobs to come to them.

Huddleston has considered leaving Michigan and looking for work in the south or the west, but he worries about the uncertainty of moving from the area where both he and his wife have family and resources.

Both Clyde and Kathy Huddleston have applied repeatedly for other jobs—he as a janitor, she as a retail clerk. Both have experience in other jobs, but so far neither has been successful in finding work. Hud-

dleston confessed in embarrassment last week that he has been too proud to seek welfare benefits for himself although, except for odd jobs, he has been out of work for almost two years.

Former Fisher Body worker Ballard tries to fill his days with odd jobs for his family and neighbors. He has filled out applications for a job as a grounds keeper for various companies, but the longest job he's had since his last layoff lasted four days.

Like his southern rural forebears, Ballard hunts and fishes for food as much as sport.

The family will eat the deer he bagged during the firearms season, and he expects to get another when the bow hunting season begins. He fishes regularly.

And his family's freezers are full of vegetables he and his wife grew in a "good-size garden" last summer.

Whatever else happens, the family should be able to eat through the winter.

He expects to wait here until spring, Ballard said, hoping for a possible opening when more than 350 retirees leave Fisher Body in February.

But if he doesn't find work in the spring he'll head south searching for a lesser-paying job, perhaps in Alabama where he's heard the road commission is looking for workers.

Many unemployed workers in this hard-times union town are skeptical when Washington economists predict a recovery anytime soon.

"People around here have been told things are going to turn up many times," said Wagner. "They just don't believe anyone anymore."●

STUDY MISSION TO THE MIDDLE EAST

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues an excellent summary written by our colleague, Congressman LARRY COUGHLIN of a study mission we both participated in to the Middle East in November 1982.

It is clear that the United States confronts both enormous challenges in the Middle East and also a unique opportunity in the months ahead to try to help move the Middle East peace process forward and help the parties negotiate an agreement for the removal of all foreign troops from Lebanon.

Congressman COUGHLIN'S report summarizes well the issues we confront. The report follows:

CONGRESSMAN LARRY COUGHLIN'S REPORT ON MIDEAST MISSION, NOVEMBER 1982

On November 20th I returned from an almost two week mission to the Middle East to discuss the Middle East peace process, to examine negotiations aimed at solving the Lebanese crisis and to indicate to foreign leaders substantial bipartisan support in Congress for the Reagan initiatives in that area.

The operative countries visited were Israel, Egypt, Jordan, Saudia Arabia, Syria and Lebanon. We met with Prime Minister Begin, President Mubarak, King Hussein, King Fahd, President Assad and President Gemayyel. In almost every country we also met separately with the Foreign Minister and Defense Minister as well as other leaders. In Israel and Lebanon, we met with the opposition leadership and Palestinians.

The mission had the approval and support of Secretary of State Shultz. It was the first official Congressional mission to the Mideast since the Lebanese crisis and was led by Congressman Lee Hamilton, D-Ind, Chairman of the House Foreign Affairs Subcommittee on Europe and the Middle East.

I returned optimistic about prospects for removal of American and other foreign troops from Lebanon in a way that substantially meets Israel's security requirements, and that this can take place in a relatively short period of time. The ingredients are there.

Israel is anxious to withdraw having accomplished its initial objectives. Contrary to the belief of some Arab leaders, there is no evidence of Israeli expansionist desires in Lebanon. The Syrians are anxious to have Israel withdrawn because Israeli troops in the Shouf Mountains are almost within artillery range of Damascus.

The price of Israeli withdrawl is Syrian withdrawal. Without the support of Syrian troops and heavy weapons, the 3,000 to 4,000 lightly armed PLO in Northern Lebanon are not a significant force and are likely to leave or can be coped with by Lebanon's army. The government of President Amin Gemayyel is working hard at building that army and at national reconciliation. It has the support of both Muslim and Christian factions.

Parenthetically, I might say that I am convinced that the Judicial Investigating Commission in Israel is doing a thorough, painstaking and fair job of investigating the massacres at Sabra and Shatila. There is no evidence of either a whitewash or a witch hunt. In the words of opposition leader, Shimon Peres, "the Commission is superb."

Permanent settlement of the Palestinian problem along the lines proposed by President Reagan is more difficult because the complexities are immense. On the Israeli side, the Begin government has rejected the Reagan initiative because Begin appears determined to retain some form of sovereignty or control over all of the West Bank and Gaza. The Israeli people are deeply divided over this and the settlement issue.

It is a paradox that some temporary freeze in the settlements is a key ingredient to commencing negotiations. At the same time, it is the threat of more and more settlements that is the impetus to bring the Arabs to the bargaining table.

On the Arab side, there appears to be an unprecedented desire for peace with Israel in the moderate Arab world. There is a window of opportunity. King Hussein is very anxious to negotiate but does not have the strength to do so alone. Other moderate Arab States are urging the PLO to move toward recognition of Israel and formal support of United Nations Resolution 242 so as to work with Hussein. There is a question, however, as to whether Syria can block this because of Syria's own territorial interests in the Golan Heights and support by the Soviet Union.

Let me first go into detail on the situation in Lebanon. Not since I visited Hamburg, Germany, as a student after World War II have I seen destruction as in West Beirut. Particularly in PLO controlled areas along the so called green-line, every building is damaged, every fourth building is down. The damage is indiscriminate as to apartments, businesses or Mosques. It is important, however, to note that much of the damage was not a result of Israeli action, but the result of the civil or regional war that has been going on in West Beirut since 1976.

There are still isolated incidents of violence around the airport where we landed. In the Shouf Mountains, controlled by the Israelis, there is still fighting between the Maronite and Druze factions. The situation in the Bekaa Valley is exacerbated by the presence of Shiite Muslim revolutionary guards from Iran.

At the same time, there is a certain sense of euphoria among the Lebanese people at the prospect of having their country back again, free of PLO, Syrians and internal strife. Street vendors sell shoes and flowers among the rubble. Traffic jams the streets. Although utilities are uncertain, there is enormous vitality and little sense of crushing poverty. Our Marines are very much in evidence and morale is high.

President Gemayyel and Foreign Minister Elie Salim, both of the Christian faction, recognize that only Israel could have gotten the PLO out of Beirut. They are determined to move quickly to establish authority. At least as of now, they have an almost unanimous mandate from Christians, Muslims and Druze.

They believe they can increase the Lebanese army from 4,000 to 25,000 men quickly—more quickly than our observers feel is possible. They are prepared to have a safe border with Israel and to give all non-aggressive assurances, yet they believe they cannot recognize Israel formally at this time and survive because of their own Arab population and the need for cooperation of other moderate Arab countries.

Gemayyel and Salim indicated they have the promise of Assad to withdraw Syrian forces. Internally, they are moving toward national reconciliation but are not yet strong enough to disband the Phalange or other private Christian militias, to say nothing of holding an impartial investigation of the massacres at Sabra and Shatila.

Lebanon's Prime Minister al-Wazzan, a Muslim, was less sanguine about Israel. He expressed resentment over the destruction and envisioned an expansionist Israeli hegemony from the Euphrates to the Nile. He also saw Israel as attempting to partition Lebanon among the various religious interests. At the same time al-Wazzan recognized that withdrawal of foreign forces had to be simultaneous and the President Gemayyel had been unanimously elected to seek national reconciliation.

Walid Jumblatt, leader of the Druze faction in Lebanon, also expressed his belief that reconciliation was possible under President Gemayyel. He believed, however, that things were not moving fast enough to eliminate the Phalange and to extend Lebanese authority outside of Beirut.

Despite differences in detail, such as whether negotiations would occur in Jerusalem, the basic framework for a settlement could involve the following:

1. Simultaneous withdrawal of all foreign forces from Lebanon.

2. A security zone in Southern Lebanon which would be demilitarized as to heavy equipment and patrolled by a multi-national force until the Lebanese Army reached strength.

3. Multi-national control of the Bekaa Valley and the Beirut to Damascus highway until the Lebanese Army reached strength.

Lebanon, after all, existed for many years as an independent nation with democratric institutions that coped successfully with its various minorities. It should be able to do so again.

Turning to Israel, as on my previous visits, it was a warm, lovely, challenging country. Through my daughter, who worked on a kibbutz there, through my wife who spent time at Kibbutz Nezzer Serini, as well as through my own experience, I share an immense affection and admiration for the Israeli people. Tough and hard working, yet loving, they have made the desert bloom both physically and culturally.

Today, however, they are intellectually a very disturbed and divided people. The debate is both between Israelis and within each Israeli.

On one side Prime Minister Begin cited the inalienable right of the Jewish people to settle in Judea and Samaria which, he said, were erroneously called the West Bank. He said Judea and Samaria were an integral part of Israel's national security for protection from incursions. Questioned on settlements Begin said: "We only settle on rocky lands."

I asked the question: "Granted Israel has the military and political power to assimilate the West Bank, is it in Israeli's interest from a security, moral and cultural standpoint? Begin's answer: "We can live together in peace."

Foreign Minister Shamir confirmed that Israel could not relinquish control of the West Bank with its 1.2 million Arabs for security reasons. Defense Minister Sharon said the same. At a round table discussion at Hebrew University Professor Reuven Yaron said a truncated Western Palestine would not work, and it would not produce security.

On the other side Shimon Peres, opposition Labor chairman, said it would be a tragic mistake to incorporate inside Israel 1.2 million Arabs against their will.

Meron Benvenisti, former deputy Mayor of Jersusalem with a doctorate from Harvard, said in a late night meeting at his home, that a dual system would be disastrous for both societies and lead to a polarized society.

Benvenisti's controversial recent study indicated that one-third of the West Bank has already been taken by Israel and that two-thirds could be taken under existing procedures because it is not subject to formal Arab land deeds. The "rocky lands" Prime Minister Begin refers to are principally untitled Arab shepherd grazing lands. Benvenisti points out that 75 Israeli settlements exist on these lands, 25 are under construction and 55 are planned.

At the current rates of 3,000 to 4,000 units per year, Benvenisti estimates that the critical mass of 100,000 settlers, that would make the process of annexation irreversable, would be reached by 1986. We visited many of these settlements around Jerusalem, and I might say they are indeed completely planned small cities.

Professor Dalia Golan at Hebrew University indicated the settlements policy was radicalizing the position of the Arabs. Jerusalem Mayor Teddy Kolleck objected to the settlements because they created a drain of young people from Jerusalem. He suggested that they were not being successful despite heavy subsidies on rents and mortgages to encourage people to move.

Our meeting with West Bank Palestinians, Bethlehem Mayor Freij, former Gaza Mayor Shawa and Arab educator Masri indicated an almost frantic concern about the settlement problem, as well as the so-called loyalty oath being required of Arab educators. In addition they spoke confidentally about the PLO making some major conciliatory statement in the near future.

Despite this internal questioning, Prime Minister Begin is still popular, and Israel is in a state of suspended animation awaiting the decision of the Judicial Commission.

Turning to the Arab world, I have mentioned that there appears to be an unprecedented desire for peace and a solution to the Palestinian problem. The Reagan initiative is welcomed cautiously. As King Hussein said: "It is indeed five minutes to midnight."

In Egypt, President Mubarak took pride in the fact that Egypt had started the peace process and said they would not deviate from it. He indicated he was calling on all Arabs to seek a peaceful solution. Mubarak said he had to take some action in response to the Israeli operation in Lebanon but did the minimum. With respect to Sabra and Shatila, he said it was nothing compared to what the Syrians had done over the years.

Significantly, Minister of Defense Abu Ghazala said Egypt regarded as its major threats: First, the Soviet Union and its surrogates in Libya, Ethiopia, South Yemen and Syria, and Second, terrorist activity, particularly if the Palestinian problem is not resolved. When questioned about any threat from Israel, Abu Ghazala responded that Israel was no threat—that peace was a permanent thing.

Meetings with Egypt's Prime Minister Fuad Mohieddin and Minister of Economy Mostafa El Said confirmed these attitudes. It is significant that Egypt receives 10 percent of its total budget from United States aid yet remains a dusty, over-populated, traffic jammed, poverty stricken but exciting country.

In Jordan, King Hussein, as I have said, is very anxious to proceed with the Reagan initiative. The concept of two states, he says, was part of the original partition plan. He indicated that the Arab side was not negative, but that we must move quickly as conditions are changing and this might be a last chance.

Hussein feels bound, however, by the Rabat Conference declaration that the PLO is the sole representative of the Palestinian people and seeks to remove obstacles from PLO contrat. His concern is that Syria may be negative to any solution and prefer to let the problem continue.

Jordan's Crown Prince Hassan echoed these sentiments. Commander in Chief of the Jordan Armed Forces General Bin Shakir indicated as threats: First, Israel which viewed Jordan as home of the PLO and Second, Syria. He perceived, however, no immediate threat from Israel. In common with other Arabs, Bin Shakir resented Israel Defense Minister Sharon's statement that it made no difference is the PLO ruled Jordan with its implication that West Bank Palestinians should be sent to Jordan.

Jordan appears clean, prosperous and safe. It received subsidies of approximately $1.2 billion a year from other Arab countries as well as remittances of about $1.5 billion a year from Jordanians working in other Arab countries. It was here, too, that we first began to learn of the overwhelming concern about the Iran-Iraq war and Iran's attempt to export Shiite Islamic fundamentalism.

In Saudia Arabia, King Fahd indicated his pleasure over the Presiden't plan. He said the most important thing was peace and justice—that the Saudis did not expect 100 percent. With respect to existence of the State of Israel the King said: "It exists."

Minister of Foreign Affairs, Prince Saud, said his country was active in pursuing peace. He saw the major threats as the Soviet Union and Islamic fundamentalism. He sought rapproachment with Egypt and felt the United States should help Israel but guarantee the security of the Arab world.

The Iran-Iraq war and the associated issue of Islamic fundamentalism is predominant among Saudi concerns. Perhaps because of its leadership's concern to stay on the right side of the clergy and avoid an Islamic fundamentalist clash, Saudi Arabia is the most conservative country I have ever visited. This is particularly in its attitude towards women. Black veils are still prevelant. American women must wear long dresses and sleeves. Women cannot drive, jog or swim.

In Saudi Arabia, there are no alcholic beverages, theatres or night clubs. The only pastime is driving your car. A gallon of gasoline, however, is cheaper than a gallon of pure water.

In Syria, we received a lecture from President Assad on our support for Israel. He indicated the 1967 boundaries were not the subject for bargaining, probably because of Syria's territorial interest.

Assad repeatedly emphasized the difficulty of attempting peace between unequal powers, stating that peace would probably come when there were more equal powers. In the end, however, he indicated with regard to Lebanon that Syrian forces would be withdrawn when the Israeli occupation was removed. Assad also said that Syria wanted peace and that it was within Israel's power to obtain peace, implicitly recognizing Israel.

Contrary to warnings that Syria was a dangerous and unfriendly place, we felt safe and that the Syrian people were friendly to the Americans. Outside of refugee camps, it appears to be a prosperous country.

Repeatedly throughout the mission we urged Arab leaders to seek to deal with realities as they have unfolded and to forget recriminations. When it was suggested that we exercise our leverage or cut off aid, we indicated we have leverage on and aid to almost all sides which we would hesitate to use as a tool. We emphasized that the momentum of the peace process should be the pressure and that a solution imposed by aid cut offs or other U.S. leverage would not work.

There is, unfortunately, no agreement about who can do what to unlock the present impasse in efforts to promote the peace process. You hear a lot of theories:

Jordan is the key and we have to persuade the King to join the peace process; but Jordan cannot go it alone.

Israel can break the logjam if only it will freeze settlements; but the settlements are producing the impetus to bargain.

Saudia Arabia is the key because it provides the funds which enable Syria and the PLO to pursue their policies; but the wealthy Saudis see the first move as U.S. pressure on Israel.

Syria can frustrate any move in the peace process and therefore has to be neutralized or isolated; but how?

The PLO could unlock the present situation if only if it would meet U.S. conditions for a dialogue; but the PLO does not know what Israeli reaction would be.

There is probably some truth in each of these theories and it may take movement on all these fronts to put the process together.

Clearly, as of now, the United States is the leader.●

ON WAR

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. HYDE. Mr. Speaker, the subject of war—especially the most difficult questions of the morality of nuclear weapons—is receiving a great deal of attention these days.

Among the churchmen writing on this issue, none is more informed nor more thoughtful than Father James V. Schall, S.J., of Georgetown University. Father Schall quotes then-President Jimmy Carter on this subject in an article published October 23, 1980, in the San Francisco Monitor, which provides another perspective on this dilemma. I trust my colleagues will read this article carefully.

[From the Monitor, Oct. 23, 1980]

ON WAR

(By Father James V. Schall, S.J.)

When I saw my sister, Norma Jeanne, last month in Fort Dodge, she asked me, curiously, "Why do you never write anything about the problem of war, which everyone seems to be talking about?"

Well, of all people, my sister knows she cannot ask her brother a question like that without getting an answer, though, as all the world knows, sisters are happily immune from their brother's musings, even when they bring up the subject in the first place.

Anyhow, she asked for it, besides I just saw "The Big Red One" here in Washington with Father John Connery, while The Economist (August 16) had a good discussion on the subject, as did President Carter himself at a Press Conference. (September 18, 1980)

"The Big Red One" is a particularly good place to begin—a sort of anti-anti-war movie for a change.

It was a good statement of the classic just war practice—namely, that some wars have to be fought, that within any war, men die, but there remain within battles moral rules ever operative, even midst the killing, which is not murder.

The soldier cannot be naive about what is at stake for people if the war is lost, as the soldiers in "The Big Red One" who broke into the Nazi Concentration Camp in Czechoslovakia vividly realized.

But what about nuclear war? Isn't that a special case? No doubt, this has been an area in which contemporary religious thinking has been particularly obscure and even dangerous.

My colleague, Professor William O'Brien, one of the very few men in this country who has really thought deeply on this subject, feels that we need, particularly the bishops, a more realistic commission to deal with this topic.

We are so used to hearing from religious spokesmen that nuclear war is "immoral," that we have left our politicians with no practical guidance. Indeed, I think we leave them with the feeling that religion is positively against them in what they must do.

Politicians, some of them at least, and soldiers often recognize what is at stake, not merely if the bombs are dropped, but if they are not. The politician must know the political consequences of not fighting, of losing.

The recent Directive #59 about flexible retaliation against Soviet missiles gave The Economist occasion to write:

"The whole subject of preventing nuclear war combines the obscurity of higher mathematics with the ugliness of horror fiction. This leads many people to say that the best way of avoiding the unthinkable is not to think about it.

"They are wrong. It is the unthinkable we must think about, and then act intelligently on the thinking."

And at his Press Conference, President Carter was asked precisely how he thought about this subject—what if the Soviets did first strike and kill 20-50 million people, what would he do?

Mr. Carter said—as any president would:

"It's crucial for our potential adversaries to know that if necessary atomic weapons would be used to defend our nation . . . I cannot tell you what would happen if an exchange should take place.

"I would try to defend my nation's security and its integrity, and the integrity and security of allies without resort to atomic weapons. But if necessary to defend the freedom and security of western Europe and this country, then I would use atomic weapons.

"I pray to God that that time will never come, but it's important for our people, our allies and the Soviet Union to know that, if necessary, those weapons would be used." (New York Times, September 19, 1980).

This is a very clear, measured statement, designed to make sure such weapons be not used by forcefully spelling out to the Soviets that they cannot think of using their first or second strike forces and hope to survive.

Churchmen often feel they must, no doubt, call a pox on both of your houses, though they must be quite careful of seeming irrelevant here. Often too, it is said that if we just stop the arms race, we can solve man's problems.

Yet, if there is any arms "race" in the world, the West seems bent on losing it. Mr. Carter's strong words may have been made necessary by his own appearance of weakness and by his belated recognition that we are in fact becoming relatively weaker, which in turn may well increase the danger.

Solzhenitsyn, in fact, thinks the West is becoming so progressively weaker that when the Soviet missile superiority reaches about 5-1, they will simply demand and probably get surrender, so that World War III is already lost.

Thus, it is not at all clear that a lessening in nuclear power or the will to use it would be a step in the direction of peace, granted the operative Soviet ideology.

But churchmen are not politicians responsible for public safety. There has been a relative silence in church writings about the politician's responsibility.

At times, it even seems that everything about nuclear weapons, from thinking about them to using them, is wrong.

At a recent Press Conference in Rome, it was asked if the Holy Father's remarks on peace meant that there was no legitimate use of force.

These reflections seem pertinent:

"If the Pope thought that he would want to condemn any recourse to armed force for the future—which was not done by any of his predecessors nor by the Council which maintained, despite certain pressures, the principle of legitimacy of armed defense against aggression—he would surely not do this 'as an aside' or 'ex obliquo' under the pain of being misunderstood.

"• • • In the present climate, to call attention to the fact, even in passing attention to the fact, even in passing with all the necessary nuances, that a certain kind of deployment of armed force and therefore a certain kind of armament can possibly be justified in the life of a nation or in the international sphere is to expose oneself at one blow to being misunderstood • • •.

"The Pope need not speak out on everything that happens."

In other words, politicians must judge. They are not going to find, for the most part, a clear advice from religion, especially in an area wherein religion itself admits proper political responsibility to the politician.

This does not mean that there is not any religious principle involved. In the context, the President said, "I will use atomic weapons if necessary." It is difficult to say that this is not a responsible and moral position.

I wonder if my sister will ask me any more questions.●

CONGRATULATIONS TO THE BANK OF GUAM ON ITS 10TH ANNIVERSARY

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. WON PAT. Mr. Speaker, this month marks the 10th anniversary of the Bank of Guam. The bank opened its doors to the public on December 11, 1972. The history of this business is nothing short of remarkable and today I want to offer my colleagues some insight into how two men began a bank which 10 years later has assets of over $120 million and branches which are spreading and helping fill the needs throughout Micronesia.

The Bank of Guam is a direct reflection of the drive, energy, and professionalism of its two cofounders, Jesus S. Leon Guerrero, president, and Jose L. G. Untalan, vice president, of the bank. These two men devoted their working lives to the banking industry and they are tried and proven leaders in every sense of the word. Ten years ago, they combined their remarkable talents into a team which would bring to Guam its first bank ever chartered in the territory. While we on Guam have long enjoyed the services of banks from California, New York, and Hawaii, it is always nice to know that the bank you do business with is of the homegrown variety, staffed by people who know and care about the community they serve. This is certainly the case with my good friends Messrs. Jess Leon Guerrero and Joe Untalan. They were born and raised on Guam, and know our island and its financial needs as well as anyone in the banking business.

The Pacific Daily News recently did an excellent special feature marking the 10th anniversary of the Bank of Guam and I would like to place in the RECORD today parts of that feature story. I am deeply proud of the Bank of Guam and want my colleagues here today to see that we on Guam are working hard to develop our own institutions that reflect our needs and our way of life.

At this time I insert the following articles in the RECORD:

TEN YEARS OF SERVICE—BANK STILL GROWING

(By Lorie Eichner)

"We weren't thinking of anything this large. We were thinking of a modest sized bank with about $25 to $30 million in assets," said Jesus S. Leon Guerrero, president of the Bank of Guam.

Leon Guerrero was speaking of what he and co-founder Jose L. G. Untalan had in mind when they chartered the bank a decade ago.

Today, as the founders and employees of the bank celebrate their tenth anniversary they can boast of assets in excess of $120 million.

"I guess it just grew and we had underestimated its potential," Leon Guerrero added.

Leon Guerrero said that such tremendous growth has been due to the support of the people on Guam. "There has never been a public corporation in this community with as many shareholders as the Bank of Guam," he said. "It demonstrates the faith they have in our island and our country."

Leon Guerrero and Untalan initially raised $1.5 million in subscriptions from a total of 900 shareholders who are both citizens of the United States and residents of Guam to start the bank. By 1974 assets had climbed to $30 million. Over 1600 persons are now shareholders in the bank.

Additionally, 30,000 shares are now being offered to Trust Territory citizens residing in the Marshall Islands, the Federated States of Micronesia and the Commonwealth of the Northern Marianas to enable those people to own a share of the bank which has been serving their islands for two years.

"What we had in mind when we established this institution was to have a bank that would help the people of Guam," Leon Guerrero said. "There had never been a bank chartered on Guam. We wanted to do something to establish pride an identity in the community and this was a way to do it."

Both Leon Guerrero and Untalan brought with them years of banking experience with the Bank of America when they established their own bank.

"We knew we could give service to the community. Because of our reputation in the banking community and because we were experienced and knew banking people had faith in us," Leon Guerrero said.

" We did the right thing for the people at the right time," he laughed.

He said that because the administrators of the bank are headquartered on Guam service at the bank can be quick and flexible. "We have the ability to make decisions locally. We don't have to check with headquarters somewhere else. We can personalize our service," he said.

Untalan, vice-chairman of the board of directors and executive vice-president/cashier, added that it is important to know the community one serves. "We know our customers. We're part of the community because we were born and raised here," he said.

The bank has grown in other ways as well. From an initial staff of 13 the number of employees has grown to over 200. And from its humble beginnings in a quonset hut the facilities have now grown to include six locations in Guam, Saipan, Truk and Majuro. The Federal Deposit Insurance Corporation recently approved the opening of a branch in Ebeye in the Marshalls.

When the Bank of Guam acquired branches on Truk, Majuro and Saipan from the Bank of America in November 1980 it marked the bank's entry into international banking circles. "Banking is a business that can grow anywhere in the world if you can provide the service and have the right people to manage it," Leon Guerrero said.

He said there are other plans for expansion on the drawing boards.

The Bank of Guam has also filed an application with the Federal Deposit Insurance Corporation for a permit to establish a branch in San Francisco, California.

"The future for our bank is very bright. It's going to grow. There's no question in our minds about that," Leon Guerrero said.

Leon Guerrero said that Guam is already the financial center of the western Pacific and that the only thing holding back further growth are U.S. federal government restrictions.

He said that once the Bank of Guam has the trained people and the necessary capital it, too, will enter the world of international banking to a greater extent. "But first we have to take care of our home base," he said.

The men said that the average age of their staff is 30 and that among their employees are a number of good, well educated officers that are being trained to take up managerial positions. An officer training program provides a means for improvement and the salary to go with it. Many other incentives and benefits are also provided employees.

"We are developing our staff so we can have a core of capable people to run our branches as we expand," Untalan explained. "You can not grow without a good staff."

CO-FOUNDERS PROVIDE LEADERSHIP

Jesus S. Leon Guerrero is the chairman of the board of directors and president of the Bank of Guam.

Leon Guerrero began his banking career in 1947 when he was still in high school as a part-time bookkeeper at the Bank of Guam (Navy). Upon graduation he assumed a full-time position with the bank.

In 1950 the Bank of Guam America purchased the Bank (Navy) and Leon Guerrero remained in their employ, eventually working his way up to assistant vice-president in the Guam-Trust Territory regional office and manager of all seven branches of the bank in Guam and the Trust Territory. As part of his training the Bank of America sent him to their headquarters for six months. He has also taken other banking courses to increase his knowledge.

He resigned in 1972 to organize the Bank of Guam with his co-founder, Jose L. G. Leon Guerrero.

Leon Guerrero has always been very active in civic and community affairs. He is a former chairman of the Guam Economic Authority and the Guam Economic Incentive Commission. In 1964 Governor Manual Guerrero appointed him as delegate member of an economic goodwill commission to Taiwan.

He is a former president of the Medical Center of the Marianas and has participated in Red Cross fund drives. He is a former treasurer of the Guam Rotary Club and a former director of the Guam Chamber of Commerce. Additionally, he has served on various church and school committees and is presently a member of the Air Force Civilian Advisory Council and the Guam Chamber of Commerce.

Jose L. G. Untalan is vice-chairman of the board of directors and the executive vice-president/cashier of the Bank of Guam.

Untalan began working for the Bank of Guam (Navy) April 1941 and was transferred to the Bank of America when it purchased the Bank of Guam (Navy) in 1950.

He started as a teller/bookkeeper and worked his way up to the position of auditor while with the Bank of Guam (Navy).

He began as an assistant cashier with the Bank of America and rose to the position of assistant vice-president, senior public relations and business development officer. He opened the three branches in Tamuning, Guam, Majuro and Truk for the Bank of America and was in charge of operations of all branches in Guam and the Trust Territory.

During his employment with the Bank of America he attended various training programs, classes and seminars relating to the banking field. He resigned in 1972 to become a cofounder of the Bank of Guam with Jesus S. Leon Guerrero.

Untalan has been a chairman of the Guam Bankers Association, a member of the Selective Service system and the Guam Housing and Urban Renewal Association. He has also served the American Red Cross, the Guam Tuberculosis and Health Association and on various school and church committees.

He is also a former member of the Governor's Commission for the Aging, the Pre-Organic Act bi-cameral Legislature and the Government of Guam Retirement Board.

Presently he is a member of the Board of Commissioners of the Guam Housing and Urban Renewal Authority and the Guam Chamber of Commerce.

BOARD OF DIRECTORS ESTABLISHES POLICY

Pedro P. Ada is president of Nanbo Ada's Trust and Investment, Inc. and President of Ada's Inc. He is also chairman of Nanbo Insurance Underwriter's Ltd.

He was formerly the Chairman of the Board of Regents of the University of Guam and is presently a director of Capital Investment of Hawaii.

He attended St. Thomas Military Academy High School and pursued his B.A. degree at the College of St. Thomas.

Felino B. Amistad is the treasurer and chairman of the audit committee of the Bank of Guam.

He attended Far Eastern University, Manila, and majored in accounting. He took advanced accounting courses from La Salle University, extension division, as well as a course in administration from the U.S. Armed Forces Administrative School.

From 1945 to 1946 he was the paymaster and chief payroll clerk for military and civilians at CONCOR, AFWESPAC, Manila. He was a cost accountant in 1948 for Pollock Stockton Shipbuilding Co., Samar, Marianas Bonins Command in 1949, and the fiscal accountant in 1950 for Bureau of Yards and Docks, Navy auditing office, Guam.

From 1951 to 1964 he was the advertising manager for the Guam Daily News. He is now the owner and manager of Metropolitan Press.

Amistad is a member of the Knights of Columbus, International Toastmasters Club, the Muscular Dystrophy Association of America, the Filipino Community of Guam and Treasurer of the American Lung Association of Guam.

John L. Kerr is the secretary and a director of the Bank of Guam. He attended the Massachusetts Institute of Technology, Cambridge, Massachusetts and holds a BSIE from Northwestern University, Boston, Massachusetts. He is a registered professional engineer.

He was in the U.S. Army during the Korean War and spent twelve years with Standard Oil Company in New Jersey.

Kerr is the president of Guam Dry Cleaners, International Linen Supply and Guam Fast Food, Inc.

He is a former director of the Guam Chamber of Commerce and the Guam Visitor's Bureau. He was also the Chairman of the Board of Directors of the Guam Power Authority.

Francisco Leon Guerrero began his career in the Apprentice Training School, Navy Public Works Machine Shop, Piti Navy Yard, Guam.

He attended the School of Medical Practitioners, Naval Medical Center, Guam and was a medical intern at the Guam Memorial Hospital from 1949 to 1950. Later he transferred to the Department of Public Health Sanitarian section in 1950. He continued his public health career by attending several schools and training programs and is presently with the NINCDS Research Center, Guam. In 1950 he was in charge of the Rota General Hospital.

Leon Guerrero is a registered sanitarian with the National Association of Sanitarians.

He is a past president of the Guam Tuberculosis Association and the San Vicente PTA.

Dr. Ralph G. Sablan is a certified dermatologist and retired Captain in the U.S. Navy medical corps. He is a Diplomat of the American Board of Dermatology, a Fellow of the American Academy of Dermatology, member of the Association of Military Dermatologists, International Society of Tropical Dermatology and the American Medical Association.

He attended Father Duenas Memorial High School and graduated from Woodrow Wilson High School in Long Beach, California. He attended the University of California in Los Angeles and graduated from the Oklahoma School of Medicine in 1959 with an M.D. degree. He served his internship in the U.S. Naval Hospital, Camp Pendleton, California and the University of Southern California in Los Angeles.

Joe T. San Agustin obtained a B.A. degree in Government and M.A. in Public Administration from George Washington University in Washington, D.C.

He is the chairman of the board of directors of the Guam Greyhound, Inc., Guam Concessions, Inc. and the Guam Aqua Research, Inc. He is a former president of the Guam Finance and Investment Corporation, a former member of the Government of Guam Federal Credit Union board of directors and a former director of Bureau of Management Office, Government of Guam. He is also a former management analyst for the U.S. Naval Supply Depot.

He is a senator in the 16th Guam Legislature and was re-elected to serve in the 17th Guam Legislature.

Frank F. Taitano is a successful businessman and has been a farmer all his life. During the 1940s he worked for the American Red Cross and the U.S. Post Office.

Dr. Luis G. Camacho graduated from George Washington High School after which he matriculated in the school of liberal arts at Tampa University in Tampa, Florida. After a year there he transferred to Marquette University in Milwaukee, Wisconsin and graduated with a B.S. degree in 1953.

He studies dentistry at Marquette University of Dentistry where the degree of Doctor of Dental Surgery was conferred upon him in 1957.

After receiving his degree he returned to Guam and was in private practice for seven years. In 1964 he enrolled in the Graduate School, Department of Orthodonics, at St. Louis University where the M.S. in Dentistry was conferred upon him in 1967.

He is president of Dr. Luis G. Camacho, D.D.S. M.S., Inc., a director of Pacific International Corporation, vice-president of Pacific Financial Corporation and president of Camacho Inc.

Dr. Camacho is a member on the Commission of Licensure, American Dental Association, American Association of Orthodontists and a life member of the Delta Sigma Delta dental fraternity.

Dr. Raymond Chan holds a Ph. D. from Harvard University and received an Honorary Doctorate from the China Academy. He has been a full professor and the chairman of the Political Science department at the University of Guam since 1966.

He is a member of Phi Delta Kappa and Chi Omicron Gamma honorary societies. He was the first president of the United Chinese Association of Guam and was a member of the Board of Governor's Committee on Problems of Aging. He was the chairman of the Seventh World Chinese Banking Amity Conference.

His biography has appeared in the Dictionary of International Biography, Outstanding Educators of America, American Men of Science, Men of Achievements and Marquis Who's Who in the West.

JOB LEADS TO CAREER

When Lolita H. Rosario first started working for the Bank of Guam when it opened its doors in December 1972 it was just a job for her. Now it is a career.

When she started out it was as a teller. Now she is the assistant vice-president/operations manager.

"When I first walked in it was just a job. I didn't want to stay home. I had tried that for a month and didn't like it," she said.

"After that I started to expose myself to the different departments and it just got more and more interesting. There has never been a dull moment."

Rosario knew the people she was going to work for because she had worked under Jesus Leon Guerrero and Jose Untalan at the Bank of America. She said she decided to change her place of employment because the Bank of Guam was something entirely new and presented a challenge.

It did not take her long to move up to the position of head teller and in 1975 she was given the task of supervising the food stamp operation phase of the bank's business. The next year saw her being promoted to pro-assistant cashier, a first level officer position.

Another step made her the assistant cashier and in July 1978 she was promoted to assistant manager/operations manager. The following year she got her present position.

"I guess it's my aggressive approach," she said of her success. "I think I've contributed. And I know what I want and I keep going for it."

As manager of operations she has officers under her in the new accounts, note, accounting and cast departments. They in turn oversee their subordinates. She also oversees the mobile and food stamp divisions.

"Each department has to function effectively." she explained. "I have to make certain every department is staffed with qualified employees and make certain that they get their jobs done and the customers are satisfied."

In addition to on-the-job training she has attended seminars and courses related to banking and reads a lot about the banking business. She also takes courses at the University of Guam, although she has found that she can not fit them in every semester due to the demands her job place on her. She will be enrolling again for the second semester of this school year.

When she is not working Rosario devotes her time to her sons. "Because I spend so much time at the bank, when I'm not working I try to spend time with my two boys—read with them and help them with their homework," she explained.

Rosario has come a long way in the past ten years but she is not satisfied to remain stagnant. The same drive that got her to where she is now is driving her on to aim for a higher position. "I'd like to make it to the administrative sector of this bank," she said.

RECONCILIATOR HANDLES ACCOUNTS

Remy Nicholas started with the Bank of Guam ten years ago as a general ledger bookkeeper. She said she went to work for the fledgling bank after having worked for the Bank of America under Jesus Leon Guerrero and Jose Untalan.

From that position she went to that of a utility clerk, which means that she was utilized wherever she was needed. "I became a troubleshooter," she said. She also worked in the audit department.

She interrupted her service with the bank in order to become a fulltime mother and a fulltime student, but after receiving a certificate of accounting at a local business college she returned to the Bank of Guam in an accounting position.

Her present position is that of reconciliator of Bank of Guam accounts with other banks. It includes keeping records, sending telexes and handling correspondence.

"It's a lot of responsibility," she stated.

"I've been with the bank for a long time now. I like the people here and I like the administration," she said.

As far as amibitions for the future, she said, she would like to be successful in her banking career.

Nicholas said she thought the bank has succeeded as well as it has because it is considerate of people and because a lot of businessmen support it.

Her community involement includes being the secretary of the Guam Ritenans association, an organization made up of persons originating from Santa Rita, Pampanga, Philippines.●

COMMENDING THE PHILADELPHIA NAVAL SHIPYARD

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. FOGLIETTA. Mr. Speaker, I would like to take a few moments today to recognize the superior job that has been done by the Philadelphia Naval Shipyard in reconditioning the aircraft carrier *Saratoga.*

Aircraft carriers are the heart of our Navy. American naval defense strategy centers on the carrier battle group. Our national security depends on the quality of maintenance and modernization done on these carriers during the service life extension program, or SLEP.

The U.S.S. *Saratoga* is undergoing the SLEP at the Philadelphia navy yard and will be rejoining the fleet shortly. The ship that sails from Philadelphia next month will be at the cutting edge of modern technology. It is the work that has been done by the men and women of the navy yard that puts her on that cutting edge.

Mr. Speaker, there is every possibility that the *Saratoga* will leave Philadelphia ahead of schedule. This is a remarkable achievement, and one deserving of our praise. At a time when delays are commonplace, the ability to get the job done on time, or ahead of time, should make us proud.

I offer my commendation to the people of the Philadelphia Naval Shipyard for their work on the U.S.S. *Saratoga.* It is a job well done.●

HIGH TECHNOLOGY INDUSTRIES—THE FUTURE

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mrs. HECKLER. Mr. Speaker, there are, of course, many things that have been going through my mind concerning my retirement from the House after 16 years of service. Too many to elaborate on, naturally; but there is one subject I feel strong enough about to comment on today. The high technology industry, including everything from electronics to medicine, is quickly becoming the most important social and economic force in America. Having worked closely with the industry and the Science and Technology Committee, I wanted to share some thoughts on the industry with my colleagues.

"High technology." The name itself is awe inspiring. One can picture the newest apparatus, neatly placed on a polished stainless steel pedistal—too "high," ironically, for most Americans to understand, let alone operate. But high tech is more than complexity and state-of-the-art hardware.

The latest definition, from an article in Industrial Economics Review, states that high technology firms are those with above average concentrations of scientific and engineering talent and that exhibit uncommonly high rates of technological change in terms of product and production process innovation. Even with this definition, the lines are not clearly drawn.

Whatever the definition we know that the future, both in terms of how and how well we live, lies within the effective utilization of technology. Be it a product or a process, the Nation's ability to embrace technology and make it work for the national good is the keystone to America's future.

These truly are the industries of the future. Here is where we enjoy a substantial trade surplus—shaving $7 billion off a $35 billion deficit in 1981. Here is where eight jobs are created to support every one job found in high technology. Here is where the investment in R&D is increasing, despite the recession. Here is where 5 of the top 12 fastest job titles can be found according to the Department of Labor. Here are the industries the Wall Street Journal predicts will be second only to petroleum by the year 2000. It could, in fact, happen well before then.

For two decades, analysts have predicted a new industrial revolution based on the processing of information. Although the computer has been the symbol of this transformation, the semiconductor has in great measure been responsible for it. Advances in semiconductor technology have helped create markets in data processing, automated production, and robotics; and it has fundamentally altered instrumentation, communications, consumer goods, transportation, and military systems. The semiconductor industry in understandably vital to the future growth of high technology firms. From this day forward, the economic strength of advanced industrial—and some developing—economies will rest in part on their capacity to develop and apply technology to product design and production processes.

A strong, high technology industry is, simply stated, a strong America. A prosperous high technology industry is a prosperous America—a country with an increasing standard of living, high employment—high tech is labor intensive—and secure borders.

The prosperity of the industry will depend on the dynamic relationship of private sector industrial policy, the world marketplace, national education and retraining capabilities, and government policy. Effective policies in one area can be adversely affected by poor policies in another. Naturally the world marketplace will continue to operate with a certain autonomy. Nevertheless, coordinated efforts within, and in some cases among, all levels of government and the private sector will assure America's preeminent position in world markets.

INDUSTRIAL POLICY—PRIVATE SECTOR RESPONSIBILITIES

The strength of the strongest tree begins with the roots, and herein is why the industrial policies of the private sector are so important to its own continued growth.

There is a great deal the private sector can do to improve its own operating environment. Lower rates of innovation and productivity are not the sole province of government regulation, although bad and too numerous regulations can claim much of the credit. At least part of the problem rests on a less efficient utilization of capacity and management attitudes and behavior, among others.

One of the most important factors in any industrial policy is a long-term commitment to R&D. We have already witnessed a shrinking of the "technology gap" between the United States and our trading partners. A strong R&D effort is critical to insure continued innovation and product development.

A long-term perspective with respect to markets and profits is also necessary. Shortsighted, quick profit schemes leave American products wide open for errosion by the more market-share oriented Japanese.

Basic science is fundamentally a Federal responsibility, and my familiarity with the work of the National Science Foundation as the ranking Republican on the Science, Research and Technology Subcommittee has shown me how effective federally sponsored basic research can be. It is also true however, that the interface of Federal basic research with private sector commercialization is extremely poor. A wealth of completed and ongoing research is available to the private sector; the willingness of industry to access this data and Federal efforts to make it more accessible leave much to be desired.

One last point. There is an enormous amount of duplication in private sector basic research. This duplication of effort is a waste of valuable scientific talent and financial resources. Much needs to be done in this regard in the area of antitrust, which I will bring up later.

THE WORLD MARKETPLACE—NEW GAME RULES

Nothing has changed more quickly than world markets; and nothing challenges our ability to respond quite so much. The fact is, the world marketplace has changed more quickly than either industry or the Federal Government have been able to acclimate to. Some industries, like high technology, have done fairly well. One of the best

ways to improve the current record would be to get the Federal Government as far out of the way as possible.

The new marketplace is a land marked by targeted industrial strategies, rapid product change, and increasingly scarce resources. The most damaging to American market position has been the targeted strategies of the Japanese in the electronics field. This is a serious threat demanding immediate attention, primarily from the Federal Government.

For over 25 years after its inception in the late 1940's the U.S. electronics industry enjoyed a position of unchallenged technological preeminence and international market dominance. In the mid-1970's however, that leadership was challenged for the first time by large multidivisional Japanese electronics firms. The share of the world market for integrated circuits held by U.S. firms declined between 1974 and 1978, while the Japanese share grew. As the U.S. International Trade Commission concluded, "much of the increase in Japanese market share was gained at the expense of U.S. producers."

These events signify much more than a loss of profits for U.S. firms in particular product categories in a single industry. They indicate the potential for an irreversible loss of world leadership by U.S. firms in the innovation and diffusion of semiconductor technology. Because the products of this industry are the crucial intermediate inputs to all final electronics systems, competition in the semiconductor industry will be at the center of competition in all industries which incorporate electronics in their products and production processes. The loss of leadership in this one industry would mean the loss of international competitiveness in many of the advanced technology sectors that have been the basis of a U.S. advantage since the Second World War.

Japanese entry into the U.S. market is part of a conscious national strategy of establishing comparative advantage of the knowledge-intensive and technology-intensive industries. State policies helped to protect, promote, rationalize the industry, and prevented U.S. firms from consolidating their position in the Japanese market. By bringing their high-volume production strengths to bear in competition for large shares of semiconductor markets in commodity products, Japanese firms could come to dominate U.S. component commodity markets; they could deny U.S. firms the margins that have historically underwritten their capacities to create new products and make new markets.

The United States has a clear strategic interest in retaining leadership in the semiconductor industry and in maintaining an industrial structure that has facilitated the diffusion and innovation of this technology. If U.S.-based firms require U.S. policies that ease constraints and open foreign markets, then failure to adopt such policies could generate serious long-run costs to the U.S. economy. This may seem obvious, yet the industry has yet to convince any administration to make the necessary major policy changes.

Events in the high-technology industry provide the Federal Government with a timely opportunity to reconsider U.S. policy alternatives. In an industry like semiconductors where the United States leads, quick Government action will be much less costly than the significantly more intrusive intervention that would be required later were the United States to lose its leadership. Whether the high-technology firms can adequately present their case to Federal policymakers remains to be seen.

EDUCATION AND RETRAINING—THE RUBICON

America is in trouble. Not simply because of the enormous and targeted competition from abroad, but also because of the broader strains a society hurtling into the 20th century will place on its educational system. Unless some fairly drastic changes are made in education policy, and the way all levels of government support that policy, America may be brought to its knees by the process of modernization itself. We are fast approaching what I call the "human capital fix"—a point beyond which a society cannot efficiently use new innovations to meet human needs, increase production, assist our national security, and fuel new increases in our standard of living.

This may not be a new concept. There certainly are particular fields or industries including high technology, that experience personnel shortages of one type of another. In short, we know shortages can and do occur, but the system appears to adapt and survive, if carefully watched.

I would like to make two observations that I think jeopardize our continued prosperity.

My first observation may be obvious; change is now occurring so rapidly in scientific and technological fields that we have no experience by which to judge the results of that rate of change. We have an idea of what can happen in the private sector; institutions are pushed to their limits as they expand to embrace new discoveries, tangents of research, and product development possibilities. The fact is, there will be more "change" in the coming two decades than in the last 10,000 years.

Can our institutions effectively respond to the requirements of increasing complexity in the workplace when, for example, one in five American adults is functionally illiterate—unable to read, write, or understand basic concepts?

Will America be able to compete with our industrialized partners when their science and math education requirements and per capita graduates far exceed our own? These are critical questions.

My second observation, and the two have to be considered together, is that the inexorable demographic changes underway in this country exacerbate the problem and point to some very serious consequences if we do not respond.

The offspring of the post-World War baby boom have reached maturity, resulting in a dramatic reduction in the work force growth rate. The expected consequences are that in 1990 over 90 percent of the workers will come from the ranks of those working today. By 2000, the figure only drops to 75 percent. This means that the growing employment needs of an increasingly complex work environment will be met, not by a new cadre of science and math qualified graduates—which we already know is inadequately prepared—but rather from the ranks of those currently in the work force.

This might not seem so threatening if it were not for the hundreds of thousands of workers that will be displaced every year as a result of automation, domestic and international competition, robotization, and the continuing shift to a service-based economy. Peter Druckers estimates 20 to 30 million workers will be displaced by these factors in the next decade.

Do we have public or private institutions capable of meeting this demand?

Let me complicate the situation a bit more. Over 65 percent of the new entrants into the work force in the next decade will be women, up from 37 percent in 1960 and 50 percent in 1981. Many people do not realize 1978 marked the first year the number of women enrolling in college exceeded men. In additon, the emerging work force will also be composed of a growing percentage of minorities.

The combination of these two observations would seem to indicate that the sheer size of the reeducation necessary will exceed the current capabilities of both public and private institutions. I might also note that the more prosperous the economy, the bigger the problem, as more people need to be retrained.

I see some great opportunities here, however. New linkages can be forged between higher education and industry as the universities move into the reeducation field to augment a decline in the traditional student population while at the same time meeting a national need.

There is a significant role that can be played by the Congress and other branches of Government. Legislation

to assist industry in retraining, using tax credits for example, will be important. I have authored legislation that seeks to upgrade secondary science and math teachers through summer institutes, and aids postsecondary research and development by providing research grants to hundreds of researchers throughout the country. This legislation has already passed the Science and Technology Committee, and will hopefully be used as a model in the next Congress.

GOVERNMENT POLICY—THE UNFINISHED AGENDA

The agenda for possible actions by the Federal Government is long. So long in fact that unless the industry pulls together to set priorities, it is doubtful that any great inroads will be made in the 98th Congress.

Tax policy is a very critical area, both in terms of providing incentives and removing disincentives. I worked with the White House in the early stages of the formulation of the Economic Recovery Act, and the President favorably responded to my request that the 25-percent tax credit be broadened to include more than wages; that is, R&D expenditures.

Treasury regulation 1.861-8 was put on hold for 2 years in the Economic Recovery Act, and deserves more attention. The regulation is a mechanism for allocating deductions between the United States and foreign source income in order to compute foreign tax credits. It has the effect of pushing R&D overseas at the expense of domestic R&D or not at all. Opponents of the regulation feel that the regulation has caused a net loss of jobs in the United States. In addition to reducing the availability of foreign tax credits. An extension of the 2-year moratorium is in order, but will be difficult since it is the equivalent to a new tax cut.

The extraordinary dependence of high-tech firms on R&D becomes somewhat of a problem due to the high costs associated with basic research. The financial and technical resources necessary to undertake fundamental research, in semiconductor technology for example, is beyond the capability of most firms if forced to act alone.

American manufacturers are simply going to have to be allowed to pool their resources for common research endeavors if they are expected to prosper. The entire structure of trade law and agreements has been unable to prevent our slipping market share in steel, automobiles, office machines, consumer electronics, and most recently, the 64-K semiconductor chip.

Considerable progress could be made in clarifying antitrust policy. The major problem to date is that there has been no clear policy, and the resulting uncertainty is as damaging as the rules themselves. The differences between domestic antitrust policies and international/export policies need to be resolved, along with other inconsistencies.

The Joint Research Act (H.R. 6262), which I support, represents one of the most significant proposals to date. It will allow our firms to compete with Japanese subsidies by pooling research efforts. The increased efficiency of American R&D dollars will help prevent an even greater decline in our collective high-technology market share. The removal of treble damages, also accomplished in this bill, would be a significant improvement.

Considerable progress needs to be made in patent policy as well. I am a strong supporter of legislation that would restore any time lost—up to 7 years—due to Government regulatory review to the 17-year term of a patent. The exclusive licensing of Government-owned patents resulting from federally funded research is also in order. In addition, the deliberate diffusion of technology among firms must be made easier.

The final area of Government policy I would like to address is foreign policy export controls. This will, undoubtedly, generate considerable interest in the 98th Congress—which it should. The high-technology industry will have to keep an eye on even tighter, and expanding, national security controls; that is, into energy equipment. The issue of proper compensation needs to be addressed, and current contracts should be exempt from new policy directives.

Let me conclude by congratulating the industry for settling on what it considers to be the major policy questions facing the Federal Government. The list will, I think, follow most of the issues covered here. Developing the laundry list is only the first step, however. What remains to be seen, and on this rests must of the industry's opportunities for success, is how well the issues are articulated in Washington. Strategy is as important as substance in an effective approach to changing public policy, and this is where the industry is experiencing its greatest growth pains. How these issues are presented may carry the most influence in their eventual implementation. In any case, the industry will undoubtedly be dealing extensively with these issues in the coming 2 years; it is to America's benefit that success is achieved.●

BESS TRUMAN

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 15, 1982

● Mr. PERKINS. Mr. Speaker, Harry Truman's widow, Bess, never shouted from the grandstand, never purveyed an image to the media, but seemed somehow to still be an inspirational figure. She was inspirational to millions of women all over America because she exemplified the wise and good companion, which was just what President Truman needed as the country emerged into the post-World War II era, with all of its complications. We regret her passing, and know that her daughter and family understand the great affection we had for her, and our feeling that we all have suffered a loss.●

TRIBUTE TO CLARENCE BROWN AND BILL STANTON

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Saturday, December 18, 1982

● Mr. ERLENBORN. Mr. Speaker, I join in paying tribute to two of our colleagues from Ohio who will not be returning for the 98th Congress: Mr. BROWN and Mr. STANTON.

Their departure from this House is a personal loss to me. We were all first elected to the 89th Congress, 18 years ago and, since then, have met almost weekly when the Congress was in session as members of the 89th Club. You cannot meet that often for that long a time without becoming good friends.

Our friendship, of course, will not end with the 97th Congress. What will come to an end is the healthy exchanges we had about the issues and the work of each of our committees. They provided a valuable insight into the progress, pros and cons, and intricacies of legislation outside of our own responsibilities.

During all those years, I also worked side by side with BUD BROWN on the Government Operations Committee. We were a team, and a good team, on scores of bills and amendments.

Both BUD and BILL are men of integrity, men of good will, and legislators par excellence. I am proud to number them among my friends and hope that, as they take leave, they feel as gratified by their service in this House as I feel in having served 18 years with them. They are both jolly good fellows, that nobody can deny.●

TRIBUTE TO BOB McCLORY, TOM RAILSBACK, AND CALDWELL BUTLER

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. SAWYER. Mr. Speaker, although we are all eager to return home to our respective holiday festivities, I attach a sense of regret to the

close of the 97th Congress for three reasons: BOB MCCLORY, TOM RAILSBACK, and CALDWELL BUTLER. Each of these Members is leaving this body at the close of the day, and they will be sorely missed.

Each of these men has contributed his ideas, guidance, and friendship to all on the Judiciary Committee and the Congress. They have shaped the work and progress of the Judiciary Committee in a positive and productive fashion.

Under the leadership of our ranking member, ROBERT MCCLORY, the Republican members on the committee have worked together in a successful, congenial atmosphere. I wish BOB every happiness in his retirement, and I look forward to seeing him and Doris about Washington.

TOM RAILSBACK, the chairman of my Subcommittee on Courts, has provided good leadership and friendship throughout the consideration of many very difficult issues faced by the subcommittee. We have not agreed on all issues, such as the recent cable—copyright bill, and I look forward to showing TOM the error of his ways as we continue to discuss this particular issue. TOM has my best wishes as he begins his work on behalf of the Motion Picture Association of America.

I will truly miss the sharp intellect and wit of my friend, CALDWELL BUTLER. It has indeed been an enjoyable privilege to work with this prime example of a good legislator. While I have worked closely with CALDWELL on the Courts Subcommittee issues, I have deferred to his expertise in the bankruptcy area on many occasions. I express my faith in the great success of the continued, distinguished career of one of Roanoke's finest attorneys.

Each of these Members has contributed many fine years of service to this body and the Judiciary Committee. I would like to serve notice to these men that they are not fully escaping the difficult issues addressed by each in this Congress. I believe that many of us will seek the counsel of each of these honorable and distinguished men in the coming years, for they will be sorely missed by the members of the Judiciary Committee and this Congress.●

FINANCIAL REPORTS OF THE CONGRESSIONAL STEEL CAUCUS

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Ms. MIKULSKI. Mr. Speaker, in accordance with Executive Committee Order No. 1, I am respectfully submitting herewith the second- and third-quarter financial reports of the Congressional Steel Caucus for insertion in the RECORD.

The report is as follows:

Quarterly report—Fund balance statement 1982, Congressional Steel Caucus

Balance remaining as of June 30, 1982	$9,409.05
Total revenues (clerk hire, donations, membership dues)	13,586.51
Subtotal	22,995.56
Less expenses:	
July 1982	4,630.58
August 1982	3,425.61
September 1982	6,585.69
Subtotal	14,641.88
Total unexpended revenues (Sept. 30, 1982	8,353.68

Quarterly report—Cumulative statement of expenses, Congressional Steel Caucus

Salaries	$12,979.43
Travel	.....
Stationery	207.08
Postage	20.00
Telephone	182.27
Publications	250.00
Equipment	[1] 870.00
Printing	.....
Miscellaneous	133.10
Total expenses as of Sept. 30, 1982	14,641.88

[1] Third quarter equipment expenses include a bill adjustment in the amount of $360 for November-December 1981.

Quarterly report—Fund balance statement 1982, Congressional Steel Caucus

Balance remaining as of Mar. 31, 1982	$23,941.49
Total revenues (clerk hire, donations, membership dues)	11,271.26
Subtotal	35,212.86
Less expenses:	
April 1982	2,573.06
May 1982	4,045.05
June 1982	19,185.70
Subtotal	25,803.81
Total unexpended revenues as of June 30, 1982	9,409.05

Quarterly report—Cumulative statement of expenses, Congressional Steel Caucus

Salaries	$9,335.26
Travel	.....
Stationery	136.11
Postage	140.00
Telephone	349.80
Publications	27.00
Equipment	510.00
Printing	300.00
Miscellaneous	15,005.64
Total expenses as of June 30, 1982	25,803.81

97TH CONGRESS—CONGRESSIONAL STEEL CAUCUS MEMBERSHIP

NOTE.—Asterisk indicates a Member of the Caucus Executive Committee.

Joseph Addabbo, Frank Annunzio, Douglas Applegate,* Eugene Atkinson, Don Bailey,* Tom Bevill,* William Brodhead, Clarence Brown, George Brown,* James Broyhill, Don Clausen,* William Clay, William Clinger, E. Thomas Coleman, Cardiss Collins, John Conyers.

CHALLENGING THE CONSTITUTIONALITY OF THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Sunday, December 19, 1982

● Mr. SHANNON. Mr. Speaker, even before the House had passed and the President signed the $99 billion Tax Equity and Fiscal Responsibility Act of 1982 a group of 19 Members of Congress sued the Speaker and Clerk of the House, and the House of Representatives itself challenging the constitutionality of the act. Specifically, the plaintiff Members alleged that the tax bill was enacted under procedures which violated the "origination clause," article I, section 7, clause 1 of the Constitution, because it was a revenue-raising measure which originated in the Senate, not the House.

The plaintiffs engaged eminent counsel, Philip Kurland, to assist in prosecution of their case. The Speaker and other House defendants, through the general counsel to the House, Stan Brand, moved to dismiss the suit on a number of grounds: First, the plaintiffs lacked standing to bring the

action because they had been deprived of neither the opportunity to vote on the origination clause issue nor had their vote on the issue been "nullified"—the two requirements which the courts have held must be present to sustain legislator standing; second, that the recently articulated doctrine of judicial "equitable discretion" prevented courts from interfering in a dispute among legislators; and third, that the action was barred by the speech or debate clause, which protects Members from being sued for performance of their legislative acts.

On December 16, 1982, Judge Joyce Hens Green granted the defendants motion to dismiss on the precise first two grounds advanced by the general counsel. The court held that the plaintiff Members had no standing because they suffered no injury in fact: They had not been denied a right to vote or had that right impaired, but rather simply sought as a "frustrated minority" to overturn the majority will and that the courts could not intrude into Congress internal functioning.

I wish to commend the able counsel, Mr. Brand, for his representation of the House in this important and historic case and insert the decision of the district court in the RECORD.

The district court decision follows:

[U.S. District Court for the District of Columbia]

(Civil Action No. 82-2318)

W. HENSON MOORE, ET AL., PLAINTIFFS, *v.* THE UNITED STATES HOUSE OF REPRESENTATIVES, ET AL., DEFENDANTS

(Civil Action No. 82-2352)

RON PAUL, PLAINTIFF, *v.* THE UNITED STATES OF AMERICA, ET AL., DEFENDANTS

MEMORANDUM OPINION AND ORDER

These consolidated cases, before the Court on plaintiffs' motion for summary judgment and defendants' motions to dismiss, present the threshold question whether plaintiffs, 19 members of Congress, have standing to challenge the constitutionality of the "Tax Equity and Fiscal Responsibility Act of 1982," Pub. L. No. 97-248 ("TEFRA"), which the President signed into law on September 3, 1982. Upon consideration of the supporting documentation, the record as a whole and oral arguments presented by the parties, it is determined that plaintiffs lack standing[1] to maintain these actions and that the actions therefore must be dismissed.

Plaintiffs brought their complaints against the United States,[2] the United States House of Representatives, the United States Senate, and officials of those two bodies, seeking a declaratory judgment that the actions of Congress in enacting TEFRA infringed upon the prerogatives of the House in contravention of the "origination clause" of the United States Constitution, U.S. Const. art. I, § 7, cl. 1. The origination clause provides: "All Bills for raising revenue shall originate in the House of Representatives; but the Senate may propose and concur with Amendments as on other Bills."

On November 13, 1981, H.R. 4961, denominated "Miscellaneous Revenue Act of 1981," was introduced in the House of Representatives. After certain amendments, the bill was reported out of the House Ways and Means Committee on December 14, 1981. The House Report estimated that the net effect of the tax provisions of the bill would reduce revenues by 976 million dollars over five years. H.R. Rep. No. 404, 97th Cong., 1st Sess. 9 (1981). The bill was passed by the House on December 15, 1981. 127 Cong. Rec. H9607-10 (daily ed., December 15, 1981).

Thereafter, the bill was referred to the Senate Finance Committee, which reported it out on July 12, 1982 under the new name, "Tax Equity and Fiscal Responsibility Act of 1982" (TEFRA). S. Rep. No. 494, 97th Cong., 2d Sess. (1982). Although carrying the House number, the bill that left the Senate Committee, unlike the bill passed by the House, was designed to raise revenues in the amount of 99 billion dollars over three years. The Senate passed this bill on July 19, 1982. 128 Cong. Rec. S8577-8644 (daily ed., July 19, 1982). The difference between the bill as passed by the Senate and as passed by the House prompted the Senate to seek a conference with the House. 128 Cong. Rec. S9307 (daily ed., July 28, 1982).

In response to the Senate's request, plaintiff Rousselot offered this privileged resolution: *"Resolved*, That the Senate Amendments to the bill, H.R. 4961, in the opinion of the House, contravene the first clause of the seventh section of the first article of the Constitution of the United States, and are an infringement of the privileges of this House and that the said bill, with amendments be respectfully returned to the Senate with a message communicating this resolution." 128 Cong. Rec. H4776 (daily ed., July 28, 1982).

Representative Dan Rostenkowski, Chairman of the Committee on Ways and Means, immediately moved to table the resolution, with 229 members voting yea, 169 voting nay and 36 not voting. Each of the plaintiffs voted against the motion to table. *Id.* at H4776-77. At the direction of this committee, Representative Rostenkowski then moved to send the bill to conference with the Senate. *Id.* at H4777. This motion passed after debate, which included plaintiffs, on the constitutionality of the Senate amended bill. 128 Cong. Rec. H4777-88 (daily ed., July 28, 1982). Each of the plaintiffs voted against the motion to go to conference. *Id.* at H4786-87.

During the following two weeks the constitutional issue was addressed by several Representatives. *See* Statements of Representative Bereuter, 128 Cong. Rec. E3636-37, E3652 (daily ed., Aug. 3, 1982); Representative Dreier, 128 Cong. Rec. E3807 (daily ed., August 11, 1982); Representative Porter, 128 Cong. Rec. E3888 (daily ed., Aug. 13, 1982). On August 17, 1982, a conference bill was reported, substantially similar to the Senate version but including two tax provisions of the House version which the Senate had deleted. *Conference Report to Accompany H.R. 4961*, H.R. Rep. No. 760, 97th Cong., 2d Sess. 267-68 (1982). Plaintiffs in *Moore* promptly filed suit on August 18, 1982.

The next day the constitutional issue was debated further on the House floor. 128 Cong. Rec. H6555 (daily ed., Aug. 19, 1982). Plaintiff Rousselot introduced a second resolution to have the bill returned to the Senate. 128 Cong. Rec. H6555 (daily ed., Aug. 19, 1982). This resolution was also rejected, with 268 members voting yea, 144 voting nay and 22 not voting, in favor of a motion to table. Each of the plaintiffs voted against this motion. 128 Cong. Rec. H6555-6636 (daily ed., Aug. 19, 1982). The bill was passed by both Houses on August 19, 1982, 128 Cong. Rec. S10946, H6635-36 (daily ed., Aug. 19, 1982), with each of the plaintiffs exercising their voting rights on this legislation. Plaintiff Williams voted in favor of passage. All other plaintiffs voted against passage. *Id.* at H6635-36. Plaintiff Paul filed his action on August 20, 1982. On September 3, 1982, President Reagan signed the bill into law.

When voting on a motion to dismiss for want of standing the court "must accept as true all material allegations of the complaint, and must construe the complaint in favor of the complaining party." *Warth v. Seldin*, 422 U.S. 490, 501 (1975). However, even assuming the legal conclusion[3] that TEFRA was enacted in violation of the origination clause of the Constitution, plaintiffs have not demonstrated the injury-in-fact required by Art. III to invoke the judicial power. At a minimum, a plaintiff must show that he personally has suffered an actual or threatened injury which reasonably can be traced to the challenged conduct of the defendant and would likely be redressed by a favorable decision. *Valley Forge Christian College v. Americans United for Separation of Church and State*, 459 U.S. , 102 S. Ct. 752, 758 (1982). "In this manner does Art. III limit the federal judicial power 'to those disputes which confine federal courts to a role consistent with a system of separated powers and which are traditionally thought to be capable of resolution through the judicial process.'" *Id.* (quoting *Flast v. Cohen*, 392 U.S. 83, 97 (1968)). Thus, a court should refrain from adjudicating the constitutionality of an act of a co-equal branch of government unless the claimant has suffered a cognizable injury. *Id.* at 759.

The separation of powers concerns which underlie the concept of standing are particularly acute when plaintiffs are members of Congress. Although "there are no special standards for determining Congressional standing questions," *Harrington v. Bush*, 553 F.2d 190, 204 (D.C. Cir. 1977) (emphasis deleted), injury-in-fact for a congressional plaintiff "must amount to a disenfranchisement, a complete nullification or withdrawal of a voting opportunity." *Goldwater v. Carter*, 617 F.2d 697, 702 (D.C. Cir. 1979) (*en banc*), *vacated on other grounds*, 444 U.S. 996 (1979) (*mem.*). *Riegle v. Federal Open Market Committee*, 656 F.2d 873 (D.C. cir. 1981), *cert. denied*, 102 S. Ct. 636 (1982); *Reuss v. Balles*, 584 F.2d 461, 467 (D.C. Cir.), *cert. denied*, 439 U.S. 997 (1978); *see also Kennedy v. Sampson*, 511 F.2d 430 (D.C. Cir. 1974).

As the legislative history plainly reflects, plaintiffs had ample opportunity to exercise their voting rights and in fact, save for plaintiff Williams, voted their disapproval of TEFRA at every turn. Plaintiffs fully participated in the legislative process which culminated in the passage of the act they now challenge. They were simply outvoted. The argument that plaintiffs' votes were ef-

[1] For this reason other grounds for dismissal advanced by defendants need not be addressed.

[2] Only plaintiff *Paul* named the United States as a defendant. However, the United States successfully moved to intervene as a defendant in *Moore*.

[3] In its response to plaintiffs' opposition to defendants' motion to dismiss, the United States rightly points out that "standing in no way depends on the merits of plaintiffs' contention that particular conduct is illegal." *Warth v. Seldin*, 422 U.S. 490, 500 (1975).

fectively nullified by the Senate's usurpation of their right to originate revenue raising bills, and the House acquiescence therein, is unpersuasive. To support this contention, plaintiffs rely on *Kennedy v. Sampson.* In that case, however, the plaintiff had standing because his successful vote had been nullified by the allegedly illegal pocket veto of the President. But where, as in this case, "Congress itself, and not the Executive, renders any individual legislator's vote ineffective, the courts have no role." *Goldwater v. Carter,* 617 F.2d at 712. *See also Korioth v. Briscoe,* 523 F.2d 1271, 1278 (5th Cir. 1975) (state legislator denied standing to challenge the validity of a statute passed over his objecting vote); *McClure v. Carter,* 513 F. Supp. 265, 270 (D. Idaho), *aff'd mem. sub nom., McClure v. Reagan,* 102 S. Ct. 559 (1981) ("Certainly no one would contend . . . that the losing senators in any vote should automatically have the right to appeal to a federal court for a determination of the correctness of the result approved by a majority of their colleagues").

In short, plaintiffs speak as a frustrated minority. Unless the institution of Congress itself has suffered injury-in-fact at the hand of the Executive, an individual legislator has no standing to complain of impairment to the effectiveness of his vote. "His injury can only be derivative." *Goldwater v. Carter,* 617 F.2d at 712. Here, Congress specifically considered and rejected the suggestion of any constitutional infirmities in the enactment of TEFRA, and in fact opposes this lawsuit. Judicial interference into this intra-legislative dispute is constitutionally precluded.

Even if plaintiffs' claim of injury to their rights as members of Congress to originate bills for raising revenue could be deemed constitutionally sufficient to confer standing, the doctrine of equitable discretion announced by this Circuit in *Riegle v. Federal Open Market Committee* squarely governs this action and mandates dismissal.

In *Riegle* an individual senator challenged the constitutionality of the section[4] of the Federal Reserve Act which provides for the election of five representatives to the Federal Open Market Committee by the Board of Directors of the Federal Reserve Banks, claiming that the selection of these individuals without submission of their nominations to the Senate deprived him of his constitutional right[5] to advise and consent regarding the appointment of these United States officers. Declining to distinguish between Congressional and private plaintiffs,[6] the court determined that Senator Riegle had standing. Nevertheless, the fundamental constitutional principle of separation of powers required that his action be dismissed. Because suits by Congressmen present "the possibility of thwarting Congress' will by allowing a plaintiff to circumvent the process of democratic decisionmaking," a court should, as a matter of equitable discretion, dismiss a Congressman's action where he "could obtain substantial relief from his fellow legislators through the enactment, repeal, or amendment of a statute." *Riegle v. Federal Open Market Committee,* 656 F.2d at 881. Application of the *Riegle* doctrine is especially appropriate where a plaintiff's dispute is not with the executive branch but with his fellow legislators. *See Reuss v. Balles,* 584 F.2d 468. In this way a court may avoid intrusion into the internal functioning of the legislative branch.

In the instant case, plaintiffs must be relegated to their legislative remedies, despite their previous failures to convince their colleagues of the rightness of their views, and no matter how remote their chances for success in the future. "It would be unwise to permit the federal courts to become a higher legislature where a congressman who has failed to persuade his colleagues can always renew the battle." *Riegle v. Federal Open Market Committee,* 656 F.2d at 882.

Before dismissing an action under the *Riegle* doctrine a court must also inquire whether "a similar action could be brought by a private plaintiff." *Id.* Although the *Moore* plaintiffs refuse to discuss this part of the analysis, and refer to it as "baggage", *Moore* plaintiffs' memorandum in opposition to defendants' motions to dismiss at 26, plaintiff Paul argues that "[i]n this instance a private plaintiff has no immediate redress." Plaintiff Paul's opposition to defendants' motions to dismiss at 5. Yet, Representative Paul acknowledges that a taxpayer could challenge the constitutionality of TEFRA by filing for a refund after January 1, 1983. *Id.* Private taxpayer plaintiffs have asserted claims under the origination clause before. *See Rainey v. United States,* 232 U.S. 310 (1914); *Flint v. Stone Tracy Co.,* 220 U.S. 107 (1911); *Miller v. Roberts,* 202 U.S. 429 (1906); *Twin City Bank v. Nebeker,* 167 U.S. 196 (1897); *Bertelson v. White,* 65 F.2d 719 (1st Cir. 1933); *Hubbard v. Lowe,* 226 F. 135 (S.D.N.Y. 1915), *appeal dismissed,* 242 U.S. 654 (1916).

It is, accordingly, this 16th day of December, 1982

Ordered, that plaintiffs' motion for summary judgment be and it hereby is denied; and it is

Further ordered that defendants' motions to dismiss be, and they hereby are, granted, and that these actions stand dismissed.

JOYCE HENS GREEN,
United States District Judge.●

WILSON RILES

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday December 16, 1982

● Mr. FAZIO. Mr. Speaker, I wish to add my reflections and pay tribute to a great American and a great educator.

In the 12 years that Wilson Riles has been California State superintendent of public instruction, he has been this Nation's outstanding educational reformer and innovator—a bona fide pioneer in making education programs better and in providing programs where none have existed before.

In 1971, during his first year as State superintendent, Wilson Riles established an early childhood education task force. Under Riles' direction this group planned the early childhood education program. Without doubt, the early childhood strategy has been the most successful innovation in educating young children that this country has witnessed in the past 25 years.

In 1972 Wilson Riles announced the creation of the California Office of Child Development to coordinate publicly supported child care and preschool programs for the children of low-income families. Since that time more than 1 million children have been served in child development programs, and hundreds of thousands of young adults have been given the chance to go to school or join the work force and thus improve their own and their families' lives.

In 1974 Wilson Riles launched the California master plan for special education. This plan has revolutionized education programs for people with physical, emotional, and learning disabilities. The California example became a model for mainstreaming programs throughout the country. Today, in California alone, more than 350,000 youngsters are beneficiaries of Riles' vision. Indeed, it is no exaggeration to say that millions of youngsters throughout the land now face the future with confidence and hope because of this man's deep concern for all children.

In the late 1960's, in 1972, and again in 1977, Wilson Riles led the California Legislature to expand the education programs and services for the children of families suffering from economic hardship and other educational disadvantages. As a result, California was one of the first States in the Nation to provide a broad spectrum of compensatory services to economically and educationally disadvantaged youngsters. Once again the model provided by Riles and California provided the inspiration for our national title I and chapter 1 programs throughout the land.

In 1977, drawing upon the success and the popularity of the early childhood education model, Wilson Riles expanded this program to include all elementary and secondary schools in a program that he called school improvement. This trail-blazing program benefits the schools and the community by enabling all citizens—parents, teachers, administrators, community leaders, business leaders, even the students themselves—to play a role in each school's future by deciding how to improve educational programs and services for all the school's students.

In introducing these farsighted education programs into the schools of California, Wilson Riles has always been guided by one vision. That vision is to make the ideal of equal educational opportunity a reality for each and every student. In pursuing his vision, Wilson Riles has labored tirelessly for all the children of California, so that through education they might be free to realize the dreams of their lives as he has so magnificently realized his own.

On behalf of the people of California, the children of this Nation, and this Congress, I say, with deepest sincerity and appreciation, Thank you Wilson.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, December 21, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JANUARY 10

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on the effects of current economic problems on international affairs.
4221 Dirksen Building

2:00 p.m.
Foreign Relations
International Economic Policy Subcommittee
To continue hearings on the effects of current economic problems on international affairs.
4221 Dirksen Building

JANUARY 12

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review Federal programs which create certain job opportunities.
4232 Dirksen Building

JANUARY 19

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on the current international debt situation.
4221 Dirksen Building

JANUARY 25

9:30 a.m.
Finance
To hold hearings on the administration's assessment of the meeting of ministers to the General Agreement on Tariffs and Trade (GATT).
2221 Dirksen Building

Rules and Administration
To hold an organizational meeting, to consider its rules of procedure for the 98th Congress, membership assignments for the Joint Committee on Printing and the Joint Committee on the Library of Congress, an original resolution requesting funds for operating expenses of the committee for 1983, to authorize tests of computer equipment in Senators' offices, and to consider other pending business.
301 Russell Building

JANUARY 26

9:30 a.m.
Rules and Administration
To hold hearings on Presidential and congressional campaign finance Laws.
301 Russell Building

JANUARY 27

9:30 a.m.
Rules and Administration
To continue hearings on Presidential and congressional campaign finance laws.
301 Russell Building

FEBRUARY 1

10:00 a.m.
Foreign Relations
International Economic Policy Subcommittee
To hold hearings on proposed solutions to global economic problems.
4221 Dirksen Building

FEBRUARY 2

9:30 a.m.
Rules and Administration
To hold hearings on mass mailings and the use of postal patron mail.
301 Russell Building

FEBRUARY 15

9:30 a.m.
Rules and Administration
To hold hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 16

9:30 a.m.
Rules and Administration
To continue hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 17

9:30 a.m.
Rules and Administration
To continue hearings on committee resolutions requesting funds for operating expenses for 1983.
301 Russell Building

FEBRUARY 22

9:30 a.m.
Rules and Administration
Business meeting, to consider committee resolutions requesting funds for operating expenses for 1983, and proposed legislation relating to Senate mass mailing.
301 Russell Building

FEBRUARY 27

10:00 a.m.
Foreign Relations
To hold hearings on the prospective nomination of Edward J. Derwinski, of Illinois, to be Counselor, Department of State.
4221 Dirksen Building

SENATE—*Tuesday, December 21, 1982*

(Legislative day of Monday, December 20, 1982)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Gracious, patient God, merciful Heavenly Father, we thank Thee for Thy forgiving love. We have worked hard, under great tension of controversy and pressure of time. We have done some things that ought not to have been done and we have failed to do some things we ought to have done, but they cannot be changed now. We have felt some things and said some things about each other that have been less than loving and we pray that they may not be a source of alienation.

In the spirit of this holiday which celebrates love and peace, may we be forgiven and may we forgive and forget, as we anticipate a new Congress, with fresh opportunity to fulfill our promises to the people and the responsibilities mandated by our positions.

We pray for our families who have already suffered more disappointment than they should. Help each of us to give them priority and grant dear God, that the frustrations of these last weeks will have no effect on a joyous family experience. We pray this in the name of Him whose birth brought God's promise of peace. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

ORDER DESIGNATING A PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order there be a period for the transaction of routine morning business of not longer than 1 hour in length in which Senators may speak for not more than 10 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

[Later the following occurred:]

Mr. BAKER. Mr. President, let me change the unanimous-consent order on morning business for a moment.

I ask unanimous consent that the time for the transaction of routine morning business commence after the time allocated the two leaders under the standing order and extend not past the hour of 1:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

[Conclusion of later proceedings.]

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there may be items that are cleared for action by unanimous consent. I have not checked our folders. We will do those as and when they are cleared for action. There are conference committees that are meeting. It is possible that we will have conference reports during the course of the day.

The remainder of the day I cannot describe with any more particularity. I do not anticipate at this moment that the day will be an extraordinarily long day. I do not anticipate that.

I will try to have further advice for the Senate as we proceed during the course of the day.

Mr. President, I have no need for the remainder of my time under the standing order. Could I inquire if the assistant majority leader has need for time?

Mr. STEVENS. Mr. President, I will seek recognition during morning business.

Mr. BAKER. Mr. President, I see no Senator seeking recognition during the standing order time.

Does the minority leader have any requirement for additional time?

Mr. ROBERT C. BYRD. Mr. President, I do not think I will need the remainder of the majority leader's time. I thank the majority leader for his offer.

Mr. BAKER, Mr. President, I yield back the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. ARMSTRONG). The minority leader is recognized.

EIGHT THOUSAND CONSECUTIVE VOTES CAST BY SENATOR PROXMIRE

Mr. ROBERT C. BYRD. Mr. President, I would like to announce that last week, on Wednesday evening, Senator PROXMIRE cast his 8,000th consecutive vote. I do not think that is a matter that should go unnoticed here or in the country. It is a remarkable record. I know of no other Senator who has ever achieved such an outstandingly extraordinary record of casting consecutive votes. In the other body that may very well be the case but not here.

I congratulate Senator PROXMIRE for his spartan dedication to duty. I frankly do not see how he has been able to do it.

I like to pride myself on the fact that I have cast nearly 10,000 votes in my 30 years in the Congress, only to be exceeded by my senior colleagues, Senator RANDOLPH and Senator JACKSON, insofar as I know.

I am proud of the fact that I have a 100-percent rollcall attendance record during this year which was a campaign year for me, and a 98-percent rollcall attendance record for the 24 years I have spent in the Senate. But those achievements pale by comparison with the record that has been achieved by the Senator from Wisconsin—8,000 consecutive rollcall votes without missing a single vote in that time.

Mr. PROXMIRE. Will the leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. PROXMIRE. Mr. President, I want to thank my leader. I appreciate so much his calling attention to this fact that I have not missed a vote in 16 years, 8,000 consecutive votes. But in the last campaign, to put it in the perspective of my opposition, one of my critics said we would have a lot better country if I had missed them all. [Laughter.]

Mr. ROBERT C. BYRD. What happened to your opponent?

Mr. President, I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I would like to join in commending the Senator from Wisconsin. To have cast 8,000 consecutive votes is an unbelievable record. Sometimes I wonder how he does it, particularly when I know that some of us have been on the floor and have occasionally forgotten to vote even though we were here. It has taken a great deal of attentiveness on his part, indeed.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

But to me, there is something else that ought to be added. That is that the Senator from Wisconsin, in those 8,000 votes, has always concerned himself, to the best of my knowledge, as to the public need, and he has not hesitated to speak out on issues of concern, though he was a lone voice in the wilderness. He has been a very unusual Member of this body, in that not only has he been diligent and has seen to it that he voted 8,000 times in a row, but he has also been very diligent in being concerned about the people of this country.

The Senator is one of those who I feel, day in and day out, has recognized the difference between legislation for special interests and legislation for the people's interests.

I commend the Senator for his record of 8,000 consecutive votes, but also for his concern for his constituents as well as the people of this country.

Mr. PROXMIRE. Mr. President, if the Senator from Ohio will yield, there is no one from who I would rather receive that kind of accolade than the Senator from Ohio, the unchallenged champion of the public interest. We had a session one year in the past that became known as the John Williams session. John Williams was the Delaware Senator who stood up again and again to protest and successfully expose waste and extravagance. That particular year was a banner year for him. I think this 1982 session, because of the great job the Senator from Ohio has done in stopping special interest legislation, should become known as the Howard Metzenbaum session, no question about it.

Mr. ROBERT C. BYRD. Mr. President, I have 1 more minute remaining. I yield that time to my colleague (Mr. RANDOLPH).

Mr. RANDOLPH. Mr. President, how much time is remaining?

The PRESIDING OFFICER. There are 5 minutes remaining.

Mr. ROBERT C. BYRD. I yield that time to the distinguished Senator.

Mr. RANDOLPH. I thank my able leader.

Mr. President, there are times in the Senate when we do things that are not absolutely world shaking, or sometimes even necessary. Oftentimes, it turns out that there are things we do that should not have been done. However, this colloquy about the diligent Senator from Wisconsin (Mr. PROXMIRE) is a deserved tribute. Our colleague has achieved a remarkable record.

I saw a motion picture, "Chariots of Fire." When I left the theater, I realized that the hero of the film was determined to do something extraordinary, through the discipline of his body and his mind, and he did it. It is a tremendous picture. It made me want to do a little more, even at my age.

In the case of our colleague from Wisconsin, I often wonder why does he sit there by that center door? You know, people are coming in and out constantly. They are talking, there is disturbance. But I realized that he is a man who wants to be near and with people. Over and over again, I have looked at him and ask myself why he is not upset at the disturbance that occurs as Members come in and out and staff members move around and our guests from the House come over to check on us. But there he is, ready to discuss the issues with Senators, vote yes or no on the issues. The unparalleled record he has compiled is an inspiration to all of us.

I recall the reports of money spent in election races throughout the country, as of last November, for Senate seats. I ask my friend if he would tell us how much he spent in his reelection to the Senate?

Mr. PROXMIRE. I thank my friend. I spent $145.10.

Let me say to my friend from West Virginia, because I cannot tell him how deeply I appreciate his words. I have only been here 25 or 26 years and have known my good friend from West Virginia. He has not changed a bit. The remarkable thing is that I think he is the greatest example of all these crazy food faddists who say you have to be slim and trim to be in good shape. They should see how gloriously the not-exactly-sylphlike JENNINGS RANDOLPH has thrived.

You look the same, you have the same marvelous verve and humor. JENNINGS, bless your heart, and thank you.

Mr. RANDOLPH. Mr. President, the Senator from Wisconsin (Mr. PROXMIRE) is very kind. I am indeed grateful.

He makes reference to being slim and trim. Whether or not I am portly, I try to be friendly. That is natural with me. There was one Member of this body, Chauncey Depew, of New York, who had a fine career in the Senate. He was a brilliant man, but a very large man. His friends said, "Chauncey, if you don't lose weight or take exercise, you are going to die." He would respond, "I am over 80. I feel fine." They would argue, "But you must exercise." He replied, "I take exercise. Yes, I exercise." They asked, "Tell us how you exercise?" He said, "I serve as a pallbearer for my friends who do."

There is no formula for everyone. You know, there is no formula for an ALAN CRANSTON, a METZENBAUM or a PROXMIRE or anyone in this body.

I conclude with part of a poem quoted from memory.

There is a way and ways;
Some choose the high way, some the low.
And in between the misty flats,
The crowds drift to and fro.
But to every man is opened the way his life shall go.

You have chosen your life and it is a shining example. Bless you for your service to our Nation and the Senate.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, has the leader's time expired?

The PRESIDING OFFICER. The leader's time has expired. It is time for morning business under the previous order.

Does the Senator from Alaska seek recognition?

Mr. STEVENS. I do seek recognition in morning business, Mr. President.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

WHEN SENATORS DIFFER

Mr. STEVENS. Mr. President, last evening, I held the floor for a few minutes in an effort to help resolve the problems related to the highway bill. During that time, I moved to take the House-passed railroad bill, which contains the Alaska Railroad bill, from the desk and place it on the calendar—admittedly, that action was done facetiously, since it was obvious that an objection would be made. This bill was held at the desk on a routine request from the Commerce Committee because a companion measure is on the calendar.

The Senator from Ohio has repeatedly objected to the unanimous-consent request to take the railroad bill from the desk. My motion was not to take up the railroad bill; that would not have been in order since were in postcloture on the highway bill. If the House-passed railroad bill could be moved to the calendar, a debatable motion could be made to take it up.

During the time we were in session after that episode, my good friend from Louisiana (Mr. LONG) tried to mediate our dispute on the railroad bill. Senator LONG has told me that I have not realized the depth of resentment the Senator from Ohio feels because of my previous remarks.

I know the Senator from Ohio realizes how deeply I feel about this and other bills which he has blocked this year.

Mr. President, the record will show that in 14 years, this Senator has never blocked another Senator's bill by a parliamentary procedure. As long as we are talking about records around here, I think that is a record. I have never once held a hold so as to prevent a passage of a bill of another Senator.

But, Mr. President, despite these differences, as the Senator's remarks last evening disclose, our differences have been professional, and we have even made light of our differences—such as when he offered to trade the Alaska

Railroad bill for my daughter Lily and I replied that offer shows that he overstates the value of the railroad.

But, Senator LONG'S comments caused me last evening, and early this morning, to review my past comments. I have often said that the Senate is like a family—and I remember so well what my grandmother, who raised our family, said about our family: We could argue as much as we wanted at home, but when we were in public we should do our best to not criticize one another because there were too few of us to take on the rest of the community if we were divided.

I want to apologize to the Senator from Ohio for the remarks I have made which have caused this resentment. In this position which we each hold—that of a U.S. Senator—we get many insults. Even this past few days, I have been the recipient of remarks, made in anger, which have offended me—remarks which should not have been made, but at least they were not made publicly in a manner to cause permanent resentment. And I do not hold permanent resentment for them. The remarks I did make to the Senator were made in public, but they were not made, and I believe had not been interpreted by him, to indicate any personal malice or offense to him.

The Senator from Ohio and I have been in many battles, almost daily, for several years. I think it was 6 or 7 years we battled over the Alaska lands legislation. For months we battled over the waiver package on the Alaska natural gas pipeline. We have had arguments over the timber bill, without which the timber operations of Alaska will soon cease. There is one mill operating still. Our mills are completely dependent upon timber from Federal forests, and that situation does not exist in any other State. And over the shipping bill, which the Senator has blocked. Alaska has half the coastline of the United states. We are completely dependent upon ocean shipping for our survival. We are more affected by this shipping bill than Hawaii because years ago Congress made exceptions for Hawaii.

We have had many other bills, and I could recite them, where we have had our disagreements, and many of those are still blocked. But even during all these arguments—and there have been many more acrimonious, in my opinion, than those of recent date—the Senator from Ohio and I did not get into the situation in which I felt either of us held a personal resentment for what had been said or what had transpired. And as I said, I regret if Senator METZENBAUM feels that resentment, and I again apologize for what I have said or done to cause that.

He will note that last night after others had left, as a matter of fact after everybody had left, I re-read my remarks again and deleted those that I thought might add to that resentment because of the statement that was made to me by the Senator from Louisiana. I hope he will take that as an indication that the conversation I had with the Senator from Ohio and others led me to believe that he had some doubt about my respect for him as a Senator. And I want him to know that my respect for him and this institution is sincere.

May I add that the Senator from Louisiana has demonstrated again, I think, his great devotion to the Senate, which we all know comes from his and his family's long tradition of public service. He obviously had the best interests of the Senate in his heart when he sought me out last night, and he has shown once again I think that he is a true friend of this Senator.

I yield the floor.

Mr. METZENBAUM. Mr. President, is there some matter from which I may obtain some time? May I be recognized in my own right?

The PRESIDING OFFICER. The Senate is considered in morning business, and under the rules the Senator may be recognized for 10 minutes.

Mr. METZENBAUM. Mr. President, let me say that I very much appreciate the apology of the Senator from Alaska. I accept it, and I bear him no ill will. I understand that oftentimes in the heat of debate, in the heat of a particular moment, one does let loose with language that sometimes we all might wish we could put back in our mouth. And so I accept his apology. I think that he does a superb job of fighting for those issues of concern to him. I try to do a good job on issues of concern to me.

I want the Senator to understand that I am very pleased to put our relationship back to what I consider to be a proper one, and that is each of us dedicated to our own concerns, each of us trying to do that which we think is right for our own constituency.

On a matter of personal privilege—and I do want the Senator from Alaska to pay particular attention to these words—I say to the Senator from Alaska that I exercise my right of personal privilege of behalf of Lily. I think saying that Lily is not worth as much as the Alaska Railroad is very offensive to the daughter of the Senator and my friend, and therefore I raise that point of privilege only to say I think she is worth far more than the Alaska Railroad.

Having said that, let me say that there are matters pending here in disagreement on which I have had a hold. I did that which I thought I should do, and I have no apologies to make for that, but I also want to point out that while the Senator from Alaska was on the floor speaking about the Alaska Railroad last evening, his staff, according to my information was on the way to the floor with an agreed upon amendment that would have resolved this matter.

I am not certain that it had been finalized, but the fact is that my own staff had spent about 3 days in connection with that subject and certainly not a matter of major moment to my own constituency in Ohio. But we have been trying to work out a resolution of the matter and had been working with the representative of the Governor of Alaska, the junior Senator from Alaska, and the senior Senator from Alaska.

I think that that matter is still pending, and I am not at all certain whether or not it can be or will be resolved, but I certainly am not unwilling to——

Mr. STEVENS. Will the Senator yield there?

Mr. METZENBAUM. Certainly.

Mr. STEVENS. I thank the Senator for his remarks.

I want to assure the Senator that the remarks I made were not directed toward the possibility that the Senator would withdraw his hold. As a matter of fact, the latest draft of the bill as drawn by our mutual staffs is not acceptable to our Governor, it is not acceptable to my colleague, and it is not acceptable to me. So I did not make those remarks on the basis that I thought it would clear up the differences, but I do thank the Senator for his remarks.

Mr. METZENBAUM. I appreciate the comments of the Senator from Alaska, and I do hope he appreciates the fact that at least an effort was made, although perhaps it was not satisfactorily resolved.

I want to point out one other matter in connection with the Alaska railroad bill and the shipping bill, and in this connection I do not wish to identify the Senator from Alaska with that which has transpired because, as far as I know, he has not been involved.

Mr. STEVENS. Will the Senator yield again?

Mr. METZENBAUM. Surely.

Mr. STEVENS. Before remarks are made that might be misinterpreted, again I want the Senator to be assured I was involved, although I was not to be a conferee, with the action to try to return the railroad and shipping bills to this body in a manner that would not require a unanimous-consent request to take the bill from the desk.

Those bills are back here now as a result of an amendment passed in the House. I knew they were coming back. I think all those working on the bill knew they were coming back. It is an effort to get around the unanimous-consent request that is required to take those bills from the desk. It would not have eliminated debate. As a matter of fact, it would not have eliminated the ability of the Senator to block the bills, but it would have allowed us to raise the bills to the level of debate by virtue of the fact it would

have been a privileged motion to take up the message from the House, either the conference report or the House-passed bill. As a matter of fact, the House-passed bill is at the desk and it, too, is a privileged matter to take it up. It is debatable. So that the point of order that I was trying to avoid yesterday no longer is effective against this bill because it is now a House-passed bill along with the shipping bill. It is on the desk and it is, as I understand it—the Parliamentarian can correct me if I am wrong—it does not take the unanimous consent to take that House-passed bill from the desk.

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. So that the maneuver that I facetiously mentioned last night is no longer necessary because the bill is not subject to a point of order now. A motion to take it up—as a matter of fact, I think it can be called up without debate, although the motion would be voted upon. Am I correct? What would be the procedure to call up that House-passed bill now, Mr. President?

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian that a motion is not required. The Chair may simply lay before the Senate a message from the House.

Mr. STEVENS. In any case, the result of what has transpired is to eliminate one level of potential filibuster against those two bills. And I would say to my good friend that those who are involved in those bills knew about it and participated in it.

I do not think it is unethical or in any way violates the Rules of the Senate to arrange for the House to send us back these bills in a form that would eliminate the first level of objection the Senator from Ohio may raise in the event it is cleared by the majority leadership for us to attempt to raise those bills to the level of debate before the Senate.

But I wanted the Senator to understand, before he said that he knew I was not involved, that I was not going to be a conferee but I was fully advised of what was going on.

Mr. METZENBAUM. So that Senators may understand what the Senator from Alaska and I have been talking about, about 1 a.m. last night, actually after the Senator from Alaska had addressed himself to the Alaska railroad bill, there came to my attention, not officially but unofficially, by someone who had picked it up, that in a bill (H.R. 3420), the Natural Gas Pipeline Safety Act, and the Hazardous Liquid Pipeline Safety Act of 1979, Congressman FLORIO, as I understand it, had seen fit to attach to that bill two amendments, one of which is the Alaska railroad bill and the other one of which is the exemption from the antitrust laws for the shipping industry of this country.

I am frank to say that no one told me about it. No one told my staff about it. And had someone not brought the subject to my attention it is reasonable to conclude that H.R. 3420 and the appointment of conferees would have gone through this body and we would have, in effect, passed the Alaska railroad bill and the exemption from the Shipping Act in all probability without any Member of this body knowing about it.

I must say I really do not believe that that is the way that legislation should be handled, that it comes through in the dead of night without any prior notice, that the House attaches extremely controversial measures to a measure having not at all to do with the two measures that are being attached.

I always thought that Monday night football usually concluded by about 11 p.m., but apparently in this instance there was one sneak play that was still available around 1 a.m. in the morning.

I believe that I was entitled to be notified. I believe that any other Member who would have had an interest in a controversial matter of this kind would have been entitled to be notified.

I am not at all certain that I would have been notified.

Suffice it to say that when and if the matter comes to the floor, I certainly intend to exercise my right to discuss the subject and intend to continue my efforts to defeat those two measures.

I think it highly inappropriate that they were attached to a bill having nothing at all to do with the prime subject. I think it is highly unusual for them to be attached without notice being given to those who have a concern about the two matters at issue.

Mr. STEVENS. Mr. President, will the Senator yield there?

Mr. METZENBAUM. I yield to the Senator from Alaska.

Mr. STEVENS. I hope we are not going to get back in another dispute. If the Senator is going to use the rules to prevent those bills from coming off the desk, those of us who want the bills to come before the Senate are entitled to get them in a position where they cannot be prevented from coming off the desk by the Senator's objection to the unanimous request.

I see nothing wrong—again I say I have not participated in anything illegal or unethical or contrary to the rules in insisting that the bills come back to the Senate so the Senate can debate them. They are here now. If the session prolongs I hope they will be debated.

I think if the Senate ever addressed those bills there would be a different conclusion by a lot of people who now think there is something wrong with them; they are very much in the national interest.

The Senator is entitled to his position; I am entitled to mine.

I do want the RECORD to indicate there are many other people involved in insisting to get those back so the point of order will not lie against taking the bills off the desk.

To my knowledge I have never known in 14 years for anyone to hold a bill at the desk, to kill a bill, by objecting to the unanimous-consent request to take it off the desk.

There are other ways to prevent a bill from coming up. Even the highway bill that came over here was held at the desk. And the Senators who have just gone through this extensive debate did not object to taking it off the desk.

I wish the RECORD to show that is is an extraordinary movement to block the procedural request to take a bill off the desk which does require unanimous consent.

I have used my time. I do not want to get back into another acrimonious discussion. But there are many people working to try to find a way that we can get these bills up to debate.

I shall continue to try to get them up to debate.

Mr. METZENBAUM. Mr. President, will the Senator from Alaska yield for one simple question?

Mr. STEVENS. I yield.

Mr. METZENBAUM. Will the Senator from Alaska agree the Senator from Ohio was entitled to some notice of the status of this matter at the desk knowing the opposition of the Senator from Ohio to these measures? Does the Senator not think that fair play?

Mr. STEVENS. Mr. President, if the Senator from Ohio cared to inquire, he would find out that I left word that they were not to be called up in a manner that would not give the Senator his right to exercise his rights under the rules.

I agree the Senator had a right, that if we called them up to have it disclosed that they were in the conference report. But he has no right to perceive his position to prevent debate.

He has no right to prevent me or anyone else from using the rules to get the bills into position where he cannot exercise his objection to a unanimous-consent request that puts him in the position as one Senator in blocking a series of bills because of an antiquated rule that I hope the Senate will repeal, or at least limit starting next session.

I intend to do my best to try to raise that question in interpreting the rules at the beginning of next session because as it is, in fact, a single Senator may object to taking the bill off the desk and once it is held there by unanimous consent, the Parliamentarian can correct me again, but as I understand it takes unanimous consent to take it off the desk if it is held there by unanimous consent.

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. So one Senator controls taking the bill off the desk, although it was held there for the convenience of all Senators because there is a companion measure for each one of these bills on the Senate Calendar. It means we can do all we want to act on the Senate Calendar bills but when we finish them we still have to ask unanimous consent to take the House passed bill off the desk in order to delete all but the enacting clause and put the Senate version in the House-passed bills so we can have a conference.

I do believe there are other people who say that they need routine morning business. I do not want to belabor this, I do not apologize to anyone for having helped to bring those bills back so they may be called up without objection to a unanimous-consent request.

Again I state, and the Senator can check with my staff, I told them that we would notify the Senator from Ohio before attempting to move that bill across the floor in a manner that would prevent him from using his other rights to debate under the rules.

DR. MARTIN LUTHER KING, JR.

Mr. MATHIAS. Mr. President, this is the season of reconciliation, a season in which we reflect upon some of the positive and enduring values of the human spirit.

I am glad to say that there is good news in that realm of reconciliation and positive spirit, and that good news comes from the unlikely source of the U.S. Senate because we have just agreed to a resolution which will honor the memory of Dr. Martin Luther King, Jr., a man who did so much to reconcile differences and divisions that had existed in American society and that are now less serious strains on our society than they were before he gave his work, his example, and indeed his life.

It has been an arduous job to finally pass the resolution which would authorize the establishment of a memorial to Dr. King within the U.S. Capitol, the placing of a bust or a statue of Dr. King in the Halls of Congress.

That job has been accomplished as the work of many hands, and I particularly salute the junior Senator from Virginia, Mr. WARNER, a member of the Rules Committee, who has taken a particular interest and particularly active part in the resolution that was agreed to by the Senate.

I salute in the other body Representative BINGHAM, who over period of years has taken an active part.

I salute all those who contributed to the resolution that was agreed to by the Senate which will finally provide a fitting memorial for Dr. King in the Capitol.

I first met Dr. King in Selma, Ala., at the time that he was in jail exercising his leadership and paying the penalty for civil disobedience in jail. He came out of jail in Selma and went on to the great ministry in which he led the American people, black and white, to a Nation that conformed more nearly to the dream that he expressed, a Nation that is not perfect in its acceptance of differences among ourselves but a Nation that is more nearly conforming to the ideal of the American dream.

I would like to yield at this point to the Senator from Virginia, who has played such an important role in bringing us to this moment.

Mr. WARNER. I thank my distinguished colleague.

Mr. President, the Senator from Maryland has indeed provided the leadership. While we participated, we more or less have been the followers of his leadership.

Mr. President, House Concurrent Resolution 153, a resolution authorizing a bust or statue of the late Reverend Dr. Martin Luther King, Jr., to be placed in the U.S. Capitol has been agreed to by the Senate.

I support this resolution which will be engrossed today, and believe that such action is most appropriate.

Dr. King was a man who, indeed, was a catalyst of consciousness in America, a man with vision whose dream opened all Americans' eyes to a dichotomy in this Nation. His adult life was dedicated to the noble principles of freedom and equality for all men and women regardless of race, creed, or color.

These principles, the very foundation upon which our Nation was built, are basic. They were and are the law of the land but not always followed.

Dr. King's peaceful efforts to bring about change continue to serve as an example to all. The Nobel Peace Prize stands as recognition from the world. His life and death will always serve as a reminder to all that it is not enough to have laws enacted if these laws are not practiced.

His bust in the Nation's Capitol, together with the other Americans who are regarded as American heroes, will recognize Dr. King's courage and great personal sacrifice.

As a former member of the governing board for the Washington Cathedral, on which my distinguished colleague from Maryland served with me, I was strongly supportive of Dean Sayre's invitation to Dr. King to deliver a sermon from the pulpit in the great shrine in the Nation's Capital, which I attended.

This week I telephoned the former dean of the Washington Cathedral, Francis Sayre, to corroborate my recollections regarding the circumstances leading up to the historic last sermon in a church given by Dr. King before his untimely death. Dean Sayre recollected the events very clearly and added that Dr. King visited the dean and his family in the dean's home before and after his sermon. Further, at Dean Sayre's recommendation, the governing board of the cathedral approved the placing of a statue in one of the Gothic enclaves in the cathedral. The work on this statue has not been completed, but I received assurances from the cathedral that it is still a goal and, when achieved, it will represent the only contemporary statue of an individual who once preached in the Washington Cathedral.

It is my hope and prayer that a statue of Dr. King in the U.S. Capitol will be a national reminder that the pursuit of our constitutionally guaranteed freedoms can be fulfilled through peaceful actions.

I again thank my distinguished colleague from Maryland.

Mr. MATHIAS. I thank the Senator from Virginia. I think the recollection he brings to us today of that last great sermon of Dr. King at the Washington Cathedral is an important one.

As this final action is taken by Congress, I think we can all say we have acted in the spirit in which Martin Luther King addressed the American people.

He said, "I have a dream." Now I think it is proper to say that we have a dream, that same dream that black and white in America can live together in complete harmony, complete equality, and in a positive relationship which will never again be scarred by the kind of problems we have experienced in the past.

I yield to the Senator from Ohio.

Mr. METZENBAUM. I thank the Senator from Maryland.

I want to commend him publicly for his leadership. At one point there was some question raised about putting the statue of Martin Luther King in the capitol. Through his diligent efforts and leadership, and the support of many of us, including myself, it is now an accomplished fact.

I had the privilege of marching in Selma with Dr. Martin Luther King, and it certainly was a historic day for me and unquestionably a historic day for this Nation. It was a day in which a lady, Viola Liuzzo was shot for no reason at all, except that she had come down from Detroit to also indicate her support for that march.

I think that historians will undoubtedly note that Martin Luther King was probably one of the five most outstanding figures of the 20th century in the world. I am pleased that this Congress has now seen fit to honor that memory by his statue in the Capitol, the bust that is to be erected in the Capitol.

Mr. MATHIAS. I thank the Senator from Ohio not only for his assistance

in passing this measure, gaining for Dr. King the recognition for which his lifework served, but also because I witnessed the Senator from Ohio's devotion and steadfast position on civil rights throughout the years.

Mr. METZENBAUM. I thank the Senator.

Mr. GRASSLEY. Mr. President, under the rules of morning business how much time can I have?

The PRESIDING OFFICER. The Senator will be recognized for 10 minutes.

RESHAPING ECONOMIC POLICIES AND STRATEGIES: ECONOMIC DUNKIRK II

Mr. GRASSLEY. Mr. President, this lameduck was called and urged by the President so that Congress could do what it should have done last summer—pass appropriations bills and what should have occurred was an all-out assault on this Nation's economic ills.

Instead, we have passed a budget-busting continuing resolution, achieving only 75 percent of targeted savings, according to the Budget Committee.

We could have accomplished those savings and more, if we had implemented the across-the-board budget freeze I proposed last spring. I want to announce today my intention to reintroduce such a spending freeze in the next Congress.

The economy is undergoing dramatic structural changes. Heavy industry is giving way to less labor-intensive high-tech industries. That, combined with a disinflating economy, is causing unemployment to rise significantly.

This is an indication, Mr. President, that the present high rate of unemployment is by no means merely a cyclical phenomenon. Yet we are doing nothing to address the problem.

The reason why we are still engaged in the current recession is that we are caught in a structural transition zone. We are not quite out of the old economy, and not yet into the new.

The delay has been caused by the Federal Government's misinterpretation of how the economy is changing.

As a result, monetary and fiscal policies have been inappropriate for the economy, and have been incompatible with each other. The economy has been denied the flexibility it needs to cope with the changes it is undergoing.

We have yet to deal with this problem effectively, Mr. President. And time is running out.

It is time to declare an economic offensive, an all-out assault on the ills of the economy. And the place to start this assault is on the Federal budget.

With deficits approaching $200 billion a year for the foreseeable future, the economy can tolerate nothing less than an across-the-board spending freeze.

There is no other alternative.

We spend nearly half a billion dollars a day more than we take in. If deficits continue to expand at such a rate, the national debt—already a breathtaking $1.2 trillion—will double in just 6 years.

During this recession, Mr. President, businesses and households learned to cut costs and debt, and to become more competitive and creative. It was necessary for their survival.

The problems facing the Federal Government are similar, but on a national scale.

Yet Congress is still spending money as if we were still in an inflationary environment. Inflation this year has been running about 5 percent. But the budget will grow this year by about 7 percent. Meanwhile, the economy is producing no new wealth.

A budget freeze, Mr. President, would force the Congress and Federal agencies to do what businesses, family households, and State and local governments have had to do.

It would force us to be more responsible and creative in managing taxpayer dollars. By implementing a dollar-ceiling on what the Government can spend, we would be getting more "bang for the buck." That is precisely what it will take to survive in a disinflationary environment.

It is a necessary step, Mr. President. It is part of the solution for a successful transition to tomorrow's economy.

It seems to me, Mr. President, that the seriousness and the extent of our budget and economic problems were miscalculated by this Congress. The fact is that we are on the brink of global disaster, and we are teetering over the edge.

Our own economy reflects that predicament. Take a look at our budget and our balance of payments. We are facing record budget deficits of up to $200 billion, and a record balance-of-payments deficit this year of about $45 billion.

Next year's payments deficit could double. Taken together, these deficits could total between $250 and $300 billion.

That is the amount of capital that would be denied an already weak U.S. economy. With so little capital available, how are we going to produce our way out of this recession? And producing our way out of the recession is the only way to have a viable economy in the decade of the eighties.

Last year, I proposed a 2-year, across-the-board freeze on Federal spending, showing how Congress could balance the budget by 1985. Congress did not buy the idea of a freeze, but millions of commonsense Americans did.

This year, I predict that Congress will realize the necessity of this approach. Mr. President, there is simply no other alternative.

If we had frozen spending last year, we could have narrowed the deficit this year by $50 billion. We could save roughly the same amount next year by freezing the 1984 budget at the 1983 level. And in the process, we would continue to provide for the needs of all our citizens.

On the other side of the budget equation, we are faced with a contracting revenue base, which also contributes to the size of the deficits. There are three reasons for this contraction:

First, the economy is simply not producing.

Second, there are too many preferences and loopholes in the Tax Code.

And third, there is a growing number of refugees seeking asylum in the underground economy avoiding paying taxes on their income.

Congress must find ways to reverse these symptoms. The Nation's taxable base must be strengthened and expanded, and the rates of taxation on the base lowered.

The Tax Code has been used, over the last 40 years or more, to build up the economy as it is presently structured. But now the structure is changing. Under such changing conditions, asset values tend to be altered, sometimes drastically. Industries also tend to be altered, some downsizing, other exploding.

An equilibrium of changing values and industries cannot be established unless the changes are allowed to take place unrestricted. Otherwise, distortions will persist.

Our present Tax Code has built into it biases against income sources, business activities, and individual financial decisions. It is not tax neutral, in other words, and will therefore cause continued distortions in the economy unless reformed.

Mr. President, the new Congress in January must address our entire economic policy. We should use the next 5 weeks to contemplate the changes needed before we reconvene for serious business on January 25.

Those changes must be bold, decisive, and purposeful. We can wait no longer to freeze Federal spending, or to expand our revenue-producing economic base.

We must implement flexible budget and tax policies.

We must devise training and retraining programs to assist in the transition to tomorrow's economy.

We need a modern international trade policy.

And we need a monetary policy that will accommodate the changing faces of finance and technology.

These are big steps, Mr. President. But we cannot avoid taking them if we are to advance our economy to meet

the challenges ahead. We must tilt the odds in our favor in the war against global recession.

This is a crucial time in our history, and in the history of the world. A successful transition will depend on the courage and wisdom of our political leaders, those of us in this body included.

Mr. President, I hope we can make enormous strides toward these goals when the new Congress convenes next month. Our future depends on it.

"SOPHIE'S CHOICE": A TRAGIC TALE OF GENOCIDE

Mr. PROXMIRE. Mr. President, almost every day when the Senate has been in session for the last 13 years I have come before this body to call for the ratification of the Convention on the Prevention and Punishment of the Crime of Genocide. I have employed legal, political, economic, and, of course, moral arguments to support the convention and its final passage through the Senate. We alone have to ratify it; the other House does not. Each President since President Truman has called upon us to ratify this convention.

The proponents of this historic document have brought witness after witness to discuss its merits and to alleviate whatever concerns may have been raised on the floor. We have defended the document on both philosophic and pragamatic grounds, yet obviously, some 33 years later, some doubt still persists as to the real need and meaning of the Genocide Convention. Nevertheless, I do not wish to draw your attention today to any new testimony or study in support of the convention, which has been before us so long. No, today I would like to draw your attention to a cinematic rather than an academic work that approaches the subject of genocide in a most interesting and provocative way. It is hard to get the attention of the country through a speech or what happened in the United Nations, but sometimes a movie can do it.

"Sophie's Choice," a recent Universal release, which is very popular is based on the best-selling novel that tells the story of a young Polish woman who is attempting to piece her life back together after being released from the infamous Nazi death camp Auschwitz. Sophie acts almost as a microcosm of the age itself; filled with curious paradoxes and unanswered questions. She wrestles with her own identity which seems inextricably linked to Auschwitz and attempts to explain to her young friend, Stingo, the source of her deep, overpowering sadness. It is precisely this sadness that compels her to fall in love with Nathan, a schizophrenic whose colorful, offbeat disposition seems to give her a temporary escape from the horrors locked away in her mind.

This picture is not a documentary on genocide or a historical drama. If it were, it probably would not be as powerful a work as it has turned out to be. "Sophie's Choice" is a story of one woman's view of Auschwitz and the trauma that such places leave within a surviver that is all but undiscernible for the rest of us. Toward the end of the movie, the viewer realizes that Sophie had not survived Auschwitz at all but was simply dying at a different rate; by a more painful process. Her experience continued to spot and kill whatever she touched until the only person compatible for her was Nathan, a mental patient who, like her, existed outside the normal realm of thought. The bitter reality she once had to face was lost in Nathan's existence of pure fantasy and delusion. Together they lived their perverse lives that seemed to give them continuity with the excesses of their past lives.

For Sophie, the greatest injury that the Nazis inflicted upon her was their forcing her to be a part of the machine that destroyed her life. Serving as a secretary to her father—a pro-Nazi professor of law, who was later gassed in the chambers he helped construct—and then in the same capacity for the commandant of Auschwitz, she worked for a machine that claimed her father, husband, and two children. Even the decision to chose which of her two children was to be gassed was left up to her, so that her hate for the Nazis inevitably became self-hate and a sense of shared guilt. The Nazis had deprived her of her identity as a victim by making her a partner in her own destruction and that of others.

"Sophie's Choice" is a remarkable film that explores the tortured lives that many survivers of the death camps must live and the sort of metaphysical wounds that make the physical injuries look almost trivial by comparison. This moving account illustrates in the most personal terms just what the costs of genocide are and how impossible it is to erase even the residue of the act once it has been committed.

This film takes us from the general, theoretical treatment of genocide and places us on the individual level of a victim. This is the true argument of the Genocide Convention as only a surviver can tell it. As the Genocide Convention moves into its 33d year of waiting for this body's advise and consent, I hope that my colleagues who remain anbivalent on this issue will take the time to see "Sophie's Choice." It is important that genocide be considered out of the abstract and in terms that we can all understand and identify with. Perhaps then the Senate will see the urgent need for ratification of the Genocide Convention, a convention that has been accepted by virtually every developed country on the face of the Earth; a convention where only we, as a matter of fact, who proposed at the United Nations, are virtually the sole holdout. The convention has been reported to the floor of the Senate by the Foreign Relations Committee four times. It is a convention that certainly should be ratified at long last.

Mr. METZENBAUM. Will the Senator from Wisconsin yield for a moment?

Mr. PROXMIRE. I am delighted to yield.

Mr. METZENBAUM. Mr. President, I know that for years the Senator from Wisconsin has continually attempted to bring this matter to the floor. Could the Senator from Wisconsin apprise the Senator from Ohio as to why this matter cannot be brought forward for a vote on the floor of the Senate? I am aware of parliamentary procedures, and so forth, which are available. Has the Foreign Relations Committee refused to act or have they acted?

Mr. PROXMIRE. Let me say to the Senator that over the 33 years the resolution has been pending it has been brought to the floor four times. Filibusters were threatened. There was a fear on the part of the leadership that it could not be passed and it was not actually called up for a vote on the floor of the Senate.

For years the American Bar Association opposed it. They reversed that position. Now they are enthusiastic supporters of the Genocide Convention.

The opponents, in the public frankly are a small group of rightwing zealots, including the Liberty Lobby, the John Birch Society, and a few other far out groups.

It is supported overwhelmingly, as I say, by the American Bar Association, by every labor group, by religious groups, the Protestant, Catholic, Jewish groups. There is no significant opposition on the outside.

The Carter administration was about to push this treaty through but they were afraid that it would be used as a vehicle for blocking the SALT II ratification. When they finally decided to go ahead in spite of that, because SALT II was dead because of the invasion of Afghanistan, it was just too late in the year.

Now the Reagan administration is considering it. The position the Foreign Relations Committee takes now is that they will report it when the Reagan administration recommends it.

Alexander Haig, when he appeared before the committee, after he was nominated and before he was confirmed, indicated that this was a terrible embarrassment to us, that we had not ratified it. He indicated clearly his own personal support for it, but the administration itself has not told the Foreign Relations Committee to go ahead.

I understand they are considering it now. There is a chance, I think a pretty good chance, that it may be recommended by the administration next year. If that is the case, I think we will be able to ratify it quite quickly.

Mr. METZENBAUM. I do hope the administration puts its support behind the ratification of the Genocide Convention. It seems to me that if they do not—and, as I say, I hope they will—under any circumstances, I hope the Senator from Wisconsin will force the issue to the floor and let those who would be in support of genocide let this record be made.

I think thee are so many of us who feel so strongly about this subject that, if it has been to the floor four times in the past, I think it ought to come back again and hopefully they may be able to see the light.

In the 7 years I have been here I have not had an opportunity to vote on the issue, or I do not recollect that I did. I hope we will have the opportunity to vote on it. Let us smoke out the opposition. It would be far more preferable if we can get the administration to provide its backing for the ratification.

Mr. PROXMIRE. I thank the Senator. He is absolutely right. This new administration would be in the strongest possible position to win confirmation on the floor of the Senate.

Mr. LEVIN. Will the Senator yield for a moment?

Mr. PROXMIRE. I yield.

Mr. LEVIN. I commend the Senator from Wisconsin for his dogged determination, his constancy. I have been here now for 4 years and I do not know how many times I have personally heard the Senator speak on the subject of genocide. I know he does just about every time he comes to the floor, one way or another. Today, he made reference to a movie about it, "Sophie's Choice." I commend the Senator. I know that some day that convention is going to be ratified by the Senate. When it does, I know that the Senator from Wisconsin will be on the floor. I believe in my heart that the resolution of confirmation will have his very strong support continuously.

Mr. PROXMIRE. I thank the Senator.

I might say that perhaps the most brilliant Senator who served here in the years I have been here was a real champion. He will certainly deserve whatever credit there is in ratifying the convention. That is Jake Javits. He urged the ratification of the treaty for many, many years. It is tragic that he is not here to carry on because he was such a tremendous supporter of the treaty.

NUCLEAR WEAPONS-FREE ZONES WHAT PRECEDENTS?

Mr. PROXMIRE. Mr. President, recently the Prime Minister of Sweden reopened the issue of nuclear free zones. In addition, the State Department has indicated an interest in a nuclear free zone in the Middle East.

This combination of renewed activity is a most promising sign of vitality in a concept that has laid dormant for far too long.

Nuclear free zones are not a pipe dream or exercise in intellectual curiosity. The concept is contained in at least four major international treaties—the Outer Space Treaty of 1967; the Antarctic Treaty of 1979; the Sea Bed Treaty of 1971; and the Treaty of Tlatelolco of 1967.

The latter in some ways is the most interesting of the four since it covers populated areas. In fact, it is the only such treaty in existence.

The treaty prohibits the development, production, testing, or deployment of nuclear weapons in the territory of any signatory and it requires that all parties to the treaty submit existing and planned nuclear facilities to the International Atomic Energy Agency inspection.

While this is all well and good, the effectiveness of the treaty has been greatly diminished by the decision of four nations not to sign—Argentina, Brazil, Chile, and Cuba. Perhaps it is no coincidence that these four nations are estimated to have the greatest potential for developing nuclear devices or, as in the case of Cuba, have a special relationship with a foreign nuclear power.

On the plus side, the five nuclear powers—United States, U.S.S.R., Great Britain, France, and Peoples Republic of China—have agreed to respect the decision of the 22 Latin signatories and thereby keep nuclear weapons out of that region.

The value of the Treaty of Tlatelolco rests with its example. The Director of the Arms Control and Disarmament Agency, Eugene V. Rostow, last August indicated that his agency had "started preliminary diplomatic talks on a Middle East nuclear free zone" based on the Treaty of Tlatelolco.

Undoubtedly this will be a substantial task given the strong possibility of Israel development of nuclear weapons and the interest expressed by Iraq and Pakistan in nuclear technology.

Over the years there have been proposals for a nuclear free zone in Africa, in Europe, around the Mediterranean, in the Indian Ocean area, and in the South Pacific. Each region poses its own distinct set of problems and issues.

Mr. President, I urge the Arms Control and Disarmament Agency to redouble its efforts—not only in the Middle East but also with regard to the other regions I just mentioned. Even small nuclear free zones would be a step forward—areas that could be expended over time. Without such a worldwide effort, time will slip by and the emerging nuclear nations will make the use of this concept difficult if not impossible to achieve.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COCHRAN). The clerk will call the roll.

The legislative clerk preceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CONTINUING APPROPRIATIONS RESOLUTION

Mr. ROBERT C. BYRD. Mr. President, I will ask the distinguished majority leader a question. I know that he can only answer this question to the very best of his understanding and based on conversations that he is in a position to have with the White House and with the President and the President's assistants.

But on yesterday, some of us raised the concern borne of having read in the media that the President was holding the conference report on the continuing resolution hostage to the passage of the gas tax bill. That question was raised on the floor, and I participated in raising that question. At that time the distinguished majority leader said the following. I do not want to misquote him.

He said:

Madam President, the conference report is now on its way to the President. I expect the President will act on that, I hope tonight, I expect tonight. In any event, I expect him to act on it promptly.

May I say I have seen wire service reports that he might wait "a day or two." I have talked to the President. That is not the case. He did not say that. He expects to act on it promptly and I hope—I want everybody to know that I have personally talked to the President. I make that representation on my own authority, based on my own conversation, which was less than 30 minutes ago.

The rest of what the majority leader said pertained to other matters.

Now, there are reports I hear that have come through the media that the President is still holding up signing the conference report on the continuing resolution until he sees what happens on the gas tax. And I read in this morning's Washington Post an excerpt from a story which is subheaded as follows: "Reagan Ready To Sign Measure."

President Reagan will sign the stopgap spending measure sent to him early today even though he has deep reservations about restrictions imposed by Congress on development of the MX missile, high administration officials said.

But then another excerpt reads as follows:

But the president withheld any announcement of his decision yesterday in order to keep pressure on the Senate to complete approval of two measures that he regards as high priority—the 5-cents-a-gallon gasoline tax increase and legislation allowing duty-

free imports that is part of his Caribbean Basin Initiative.

Now, I have had conversations with the distinguished majority leader, whom I trust without any question, and I know that the majority leader would never knowingly misrepresent anything to the Senate. But I would like to know whether or not the President, in the opinion of the majority leader, is going to sign that continuing resolution, whether he is going to sign it promptly or is he going to hold that continuing resolution hostage to the gas tax or the Caribbean Basin Initiative or anything else. If the President is going to do that, I think we ought to know it. And I trust the majority leader to tell us to the best of his knowledge what his up-to-the-minute information is on that matter.

Mr. BAKER. I thank the minority leader.

Mr. President, I want to guard my words now because I do not want to offend my friends in the press, but I honestly believe I know more about this than they do. I do not believe the President ever intended to hold the CR hostage to anything. Indeed, he has represented to me that he does not and did not, and that he intends to sign the bill. I had expected it to be signed last night.

I just now talked to Mr. James Baker, the President's chief of staff, and I urged him to go ahead and get that signed. He once again assured me there were no conditions, there were no restrictions, except one, and the restriction was he was standing outside the State dining room with the document in hand waiting for the President to conclude a State luncheon with King Hussein of Jordan; that as soon as the President was out of that luncheon, which should be in the next few minutes, he would hand that document to the President, and that the President would sign it. They have notified the press office that the signing statement will be available at 2:30. He is going to call me the moment the President's pen leaves the paper, after inscribing his signature.

But, once again, I assure the Senator there is no condition. It is not being held hostage to anything; it has got to be signed, but I believe that Jim Baker is correct that he is not going to interrupt that luncheon with King Hussein in order to get it done.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader. The only thing I can say is that I wish he were the President of the United States right at this moment.

Mr. BAKER. Mr. President, if I make any remark at all there is some danger that both the minority leader and I might be indicted for treason.

Mr. METZENBAUM. Will the majority leader yield for a comment that I would like to make at this point to him?

Mr. BAKER. Yes.

Mr. METZENBAUM. I say to the majority leader that we have been here until 2:30 in the morning 3 nights this week. We stayed 1 night overnight. I have remained on the floor through all of that period. It seems to me that we stayed in session over the weekend for the purpose of dealing with two matters. One was the continuing resolution and the other was the 5-cents-a-gallon tax. the majority leader knows that I have supported him on every cloture vote and, although I voted against him with respect to the 5-cents-a-gallon tax, I have not used any parliamentary procedures to frustrate the effort to move forward in connection with that matter. At the very same time, I continue to be concerned that in some manner some of the measures that I have spent my time attempting to defeat are coming in through the back door, one of which is H.R. 3420, which contains within it two amendments, one of which contains the antitrust exemption for the shipping industry, and the other one of which contains a matter that I am sure is unknown to the majority leader but it is sometimes referred to as the Alaska Railroad.

It is necessary because I was not apprised that that would be in there, and I only learned it by happenstance. That being the case, I do not think any Member should be taken by surprise at this time at this point in the session. I know that many Members have left for home. I wish to be very open and above board with the majority leader. I would not care if the 5-cent-a-gallon tax went down to defeat.

But I will use parliamentary procedures, including a quorum call and requiring it to go live, unless I can get some assurance that the majority leader is not going to press forward with H.R. 3420 or any other Member is going to be accorded the opportunity to bring up a controversial piece of legislation in the dead of the morning or afternoon or whatever it is, when this body is, obviously, not here and not on the floor.

We are all aware of the fact that any one Member can stand up and ask unanimous consent. If the floor is not protected, he can pass a bill within 20 seconds, as I saw happen the other evening. It was a noncontroversial measure. There was no reason for it not to pass. But I feel it is time now for the majority leader to give us assurances that we are going to deal with the 5-cents-a-gallon tax, assuming he can get that matter to a vote with respect to some of those on his side who have created the problem, or with respect to any other Member in this body who has concerns about it, but I am not saying that it should or should not come up. I saw the minority leader starting to rise.

What I am saying is that I think only that measure should be before this body and we should have some assurance that nothing else unless it be unanimously agreed to will be brought onto the floor.

I feel that we are entitled to that assurance and I do not desire to put this body into a parliamentary snag but I have no reservations about doing so if that be the only way that I can protect my own concerns.

Mr. BAKER. Mr. President, I do not recall a single time, if I could have the attention of the Senator from Ohio——

Mr. PRYOR. Mr. President, while waiting may I just ask would the majority leader advise us say at 2:30 or 3 p.m. if the President is afflicted possibly with writer's cramps?

Mr. BAKER. I intend to advise the Senate in any event.

Mr. PRYOR. The majority leader has always been honest with us and forthright. I hope he will advise us as to that condition.

Mr. BAKER. I will indeed.

Mr. President, I cannot remember a single time when I have done anything that took the Senator from Ohio by surprise. I really cannot think of a single time that I have ever done that.

Mr. METZENBAUM. I totally agree. My point is that sometimes the majority leader is not on the floor and when he is not on the floor the floor is under the control of others, and I cannot say that I have quite that same comfort or confidence.

As a matter of fact, last night I was not on the floor. We were aware of what occurred, and I do not wish to rehash that situation. But the fact is that had two Members on this side, no one on that side, two Members on this side not objected unanimous consent would have been granted.

Mr. BAKER. No, it would not have been granted. I do not mean to dispute with the Senator, but I accept at face value the remarks that were made by the Senator from Alaska were not made seriously. They would not have gone through. Had I known about it I would have stopped it.

I was off the floor trying to make an arrangement on another bill.

There is no way I can give the assurance the Senator asks because I am one Senator. The one assurance I have always given Senators is that I will try in my capacity as leader to deal forthrightly and directly and never by subterfuge or by surprise. I believe I have performed on that. I have tried to, and that assurance I freely make to the Senator from Ohio.

Mr. METZENBAUM. I have full confidence in the leader.

Mr. BAKER. But, Mr. President, surely in these waning moments the Senator is not going to put me to a restrictive request of that sort. I simply cannot make it.

But I will make the assurance that I always make, that I am not going to do anything in my capacity as leader nor willingly permit anyone to do anything that is going to take the Senate by surprise.

We treat with measures directly and fairly and all Senators who have indicated an interest in those things are going to be apprised of it, and I am not trying to say anything to the Senator except what I have said—my words have no meaning beyond their obvious import.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield to me?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, the majority leader and I deal with each other as friends, not enemies. We obviously have to disagree at times. But I have no better friend in this body than HOWARD BAKER.

Mr. METZENBAUM. Mr. President, I cannot hear the Senator.

Mr. ROBERT C. BYRD. I know of no better friend that I have than HOWARD BAKER. We deal with each as friends and not enemies and he lays it right on the table. I try to do the same.

He cannot commit himself at this moment, but before he proceeds he will consult with me and others, and I assure the distinguished Senator from Ohio that there were not only two objections ready to be made last night. I was sitting in the chair right there. There were two others who objected so why should I object?

Mr. METZENBAUM. I agree.

Mr. ROBERT C. BYRD. I was right here. I would have objected.

So there was plenty of protection.

Mr. METZENBAUM. The Senator from Virginia has constantly protected the Senator from Ohio.

Mr. ROBERT C. BYRD. He need not be concerned. I will do everything I can to protect my colleagues on this side of the aisle as the majority leader protects those on his side of the aisle and as he consults and tries to be protective, fair, and generous to Members on this side.

I merely wanted to be sure that the President was not playing games. I cannot be indicted for treason for anything I say on this floor. If that is reasonable then I am guilty. And the best way I knew to get that assurance was to ask the majority leader and he has given that assurance.

I do not know of anything more I can say or he can say, but I assure the distinguished Senator from Ohio that he can count on me as the leader of his party to do everything I can to protect all our Democrats, and I do not think I will have to protect them against surprises from the majority leader, but I will do everything I can to protect them, to put them on adequate notice of any vote that is going to arise.

We are in a difficult point in this session right now. Some of our Members have gone home, although we have a good many Members left. But I hope that we could let the matter rest at that point.

Mr. METZENBAUM. As I understand the majority leader indicated that he or his representative will provide adequate notice. Is that a fair interpretation.

Mr. BAKER. That is fair.

Mr. President, what I will do as a practical matter is advise the minority leader if there is some measure that I intend to move to as I always do.

Let me say, by the way, that I wish to reciprocate absolutely in the remarks the minority leader has made. We deal every day in the course of a week on hundreds, maybe some weeks even on thousands of matters, and some of them very sensitive, and we have a clearance process set up on our respective staffs that functions magnificently. In my judgment, they are the most dedicated staff people I have ever known on both sides, and they, too, handle hundreds of items, carefully collating and noting the desires and wishes of Senators on both sides of the aisle.

Those two staffs working together forthrightly and directly confer constantly in the course of the day on the floor and off the floor. We have set up a system here, the minority leader and I, that works, and the system is I never clear anything until I go to my calendar staff and say, "Senator so and so wants to do so and so. Is it cleared on our side?" If I get past that I say, "Would you please see if the Democrats have cleared it." If it is I go to Senator BYRD and I say, "This is a matter I want to take up." Sometimes he says, "No," but more often he says, "Yes," because the calendar people have already gone through it and worked out the details.

It is a monumental undertaking to make sure we deal directly and forthrightly with each other, but there is nothing more important to the Senate, in my view, than that we have the absolute confidence of each other on both sides of the aisle. I can say without any reservation I have never failed to have less than absolute confidence in the representations of the minority leader to me, and I have never failed to have absolute certainty he was going to protect the interests on his side. I will add to that I will not do anything nor have I ever done it knowingly that is going to catch the minority leader by surprise.

Mr. ROBERT C. BYRD. May I say one more thing, then I will yield to the Senator from Ohio.

Mr. METZENBAUM. Go ahead.

Mr. ROBERT C. BYRD. I am satisfied with the answers the majority leader gave to me anent the signing of that conference report. But if that is not signed—at what time was it?

Mr. BAKER. It will be in the press room at 2:30.

Mr. ROBERT C. BYRD. 2:30 I will be back on the floor asking the majority leader what has happened.

Mr. BAKER. I will tell you what. If that is not by 2:30, I will be well in advance of your inquiry finding out what happened.

Mr. ROBERT C. BYRD. Because I think if the President is holding the conference report on the continuing resolution hostage, the other House is entitled to know that.

Mr. BAKER. The President is not.

Mr. ROBERT C. BYRD. We are entitled to know that. I am perfectly satisfied by the assurance the majority leader has given. But if the pen is not off that paper by that given hour, I am going to be back here asking again.

Mr. BAKER. I yield to my friend from Maryland.

Mr. SARBANES. I thank the majority leader.

Mr. President, I was on my way to the floor and missed the majority leader's response to the minority leader's inquiry about when the President would sign the continuing resolution. I understand it, the majority leader has informed the Senate that the President does indeed intend to sign the continuing resolution and will do so by 2:30 this afternoon?

Mr. BAKER. That is quite right. What I said was the President has announced his intention to sign the bill; that the documentation has been completed, including the signing statement; that James Baker, the President's chief of staff, advised me on the phone a moment ago that he will physically deliver that document to the President for his signature as soon as the State Luncheon for the King of Jordan is concluded. He has estimated it will be at 2 o'clock. The 2:30 number comes about because he also told me that they will have copies of the signed statement and, of course, the bill itself in the press room.

Mr. SARBANES. I thank the majority leader for that statement and for his repeated efforts with respect to this matter for quite a period of time. I think the majority leader has done his best to move the continuing resolution forward, and I am very appreciative of that.

Mr. President, I want to point out that a crisis with respect to the continuing operation of the Government was provided by the administration in November 1981, when we were also considering a continuing resolution. The GAO did a study of the much-publicized shutdown of the Government which marked that crisis and concluded that the shutdown which the executive branch instituted at that time cost the taxpayer in wasted money over $50 million.

This time, we have gone a day and a half into the regular work week—actually the continuing resolution expired on midnight of last Friday—however, in this instance, because apparently it suited the executive branch's pur-

poses, the Government continued to work and the administration did not provoke a comparable crisis to the one which occurred last November, although apparently some of the President's advisers were considering doing so.

There is a story in the morning paper indicating that—and let me just quote it—

As the bill made its way through Congress yesterday, Federal workers received confusing and sometimes contradictory instructions on what they should do today. If the President had vetoed the spending bill by this morning, employees in agencies and departments where budgets have not already been approved were instructed to stay home. But earlier in the day the Office of Personnel Management told Federal employees to come to work today—

meaning Tuesday—

No matter what and wait for any official word about possible furloughs.

OMB countered that decision late yesterday despite OPM's contention that employees should get the word, whatever it is, in an organized fashion and not run the risk of further confusion about what to do.

Although many Federal agencies and departments technically ran out of money at midnight last Friday, Government employees worked through the day yesterday while waiting to see what Congress and Reagan would do with the funding measure. The last time a partial shutdown resulted from a spending bill veto the costs of shutting the Government down were more than $50 million, according to the General Accounting Office.

I did not think what transpired the last time was necessary. I am very frank to say it was a staged extravaganza on the part of the executive branch.

What is occurring now helps to prove that point. We have gone much longer now without a continuing resolution and yet no comparable crisis. Even if the President had vetoed the continuing resolution either late last night or the first thing this morning, given the assurances of prompt action on a new measure by the Congress, he would now have a stripped-down version before him; in other words, we could have acted on a new continuing resolution before the President signed the resolution that was sent to him since he has simply been holding it down there.

I hope the lesson is very clearly understood—what the Government went through on that previous occasion was not necessary. You will recall that the President appeared on the morning television programs vetoing the continuing resolution. Then the Government came to a halt. People were given furlough notices, pandemonium reigned across the country. Regional offices were closing down, people could not get the services which they were entitled to receive from their Government. Everything was supposed to come to a screeching halt. I quote from a Congressional Quarterly description of the shutdown:

The stop-payment shutdown—the second ever of a federal agency, the first of such broad scope—made an impressive show: Thousands of federal workers were sent home on furlough. The Statue of Liberty and Washington Monument were closed. The Constitution and Declaration of Independence were lowered into vaults below their public display cases in the National Archives. Trips, speeches and congressional testimony were canceled. A tape-recorded message at the White House told callers that "the White House is involved in an orderly phasedown * * * No one is here to answer your call."

That has not happened this time, and obviously it has not happened because it suits the purposes of the executive branch to proceed in the manner in which they have been proceeding.

I do not think we should have had that shutdown a year ago. It was part of a staged event; a political melodrama at the expense of the proper functioning of the Government and at a cost to the American people, as estimated by the General Accounting Office, of in excess of $50 million. That was money just wasted, lost. Furthermore, dedicated and able Federal employees were treated without any regard for their professionalism and their commitment.

I hope in light of how the current situation has been handled, that it is apparent to all that last November's melodrama was a staged event—unnecessary and harmful to the effective operation of our Government.

I thank the majority leader for yielding.

Mr. BAKER. Mr. President, I was reluctant to interrupt the Senator from Maryland, but I was emboldened to do so, had he not stopped at this point, to tell him I was called to the telephone just now by the President of the United States who, no doubt, was aware of the concerns of the Senator from Maryland and others, to say that he had at that moment finished signing the continuing resolution and that it is signed.

He also pointed out that it was the first cut-and-paste bill to be signed by any President of the United States since 1895, and I accept part of the responsibility for that in urging him to do so as promptly as possible, and he did it, and I am grateful and I wish to express my appreciation to the President for taking account of the concerns of the Senate in that respect.

He also wished me to point out, of course, that obviously that meant everyone in the Senate now will vote for everything he wanted for the remainder of this session. I expressed some doubt about that, but I promised to convey the message.

Now, Mr. President, the continuing resolution is signed. It is the law of the land.

ORDER THAT TIME FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS BE EXTENDED UNTIL 3 P.M. TODAY

Mr. BAKER. Mr. President, I think we might profit the Senate by having additional time for the transaction of routine morning business. I ask unanimous consent that it be extended until no later than 3 p.m. today.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader for his announcement, which certainly relieves the concerns of myself and several other Senators that that matter has been put to rest.

How long would the majority leader like to proceed before he takes up any business?

Mr. BAKER. Mr. President, I am prepared to take up any business available. I will check with our clearance staff.

Mr. RIEGLE. Will the Senator yield?

Mr. BAKER. I will yield to the Senator in a moment. I would like to ask the minority leader if there are some items, such as the agriculture PIK bill or the Montana wilderness bill, which have been called to my attention, that we might see if we can clear for action.

Mr. ROBERT C. BYRD. Neither of those matters is cleared for action at this point. May I say to the distinguished majority leader, we will continue to explore the possibility here. My only reason for asking the question that I asked was that I have a speech which I can make now or I can make next year, but I would only want to make it when the Senate does not have business ready to transact. I think the Senator from Michigan does have a statement to be made in morning business.

Mr. RIEGLE. If the Senator will yield, I do, and I would like to be recognized at an appropriate point for that purpose.

Mr. BAKER. Mr. President, I yield the floor so the Senator may be recognized.

Mr. RIEGLE. I thank the majority leader.

The PRESIDING OFFICER. The Senator from Michigan.

THE GAS TAX INCREASE

Mr. RIEGLE. Mr. President, I wish to now at this time express my thoughts as to why I voted last night against the gas tax increase. That decision was based on the following factors:

First, the 5-cents-a-gallon tax is a regressive tax that will be a new cost burden for rank and file citizens who are under increasing financial strain with shrinking disposable income. Working families will feel this added cost not only at the gas pumps—but in the increasing cost of products they consume that will carry the higher

transportation costs in the form of higher product prices.

I find it profoundly unfair and unwise, that the Government will be extracting the gas tax with one hand from low- and middle-income people, senior citizens, and others of modest circumstance, while, in mid-1983, the Government will be distributing a large tax cut to individuals at high-income levels who neither deserve nor need this large personal tax cut.

The net effect of these two tax actions will be to accelerate the redistribution of money from the people of modest means to those of great wealth. Taken together, this 5-cents-a-gallon gas tax increase and the third year of the Reagan income tax cut is a clear case of taking from the poor to give to the rich.

There is no justification for this tax redistribution. It is hurtful national economic policy and it is grossly unfair. I will not be a party to it.

I cosponsored an amendment to this bill that would have financed the road bill by deferring the third year of the income tax cut for those above $65,000 in annual income, and with a reduced tax cut for those with incomes from $50,000 to $65,000. That amendment was defeated at the instruction of the Reagan White House. Had that amendment passed, I would have supported this measure despite its other defects.

Also, I do not think we should be imposing across-the-board tax increases at a point of such serious national economic recession. I think it will deepen and prolong the downturn.

Second, I do not believe this bill will have a significant job-creating impact either in overall amount or immediacy. We have 12,000,000 officially unemployed Americans today—and another 8,000,000 who are discouraged workers or persons substantially underemployed. Various independent studies, including one by the Wharton School, forecast that this legislation will actually cost jobs in 1983—and add an estimated 119,000 over the entire life of the program. Other estimates range as high as 300,000 over a period of years. While any job stimulus is welcome, this amount is so small as to be relatively meaningless when measured against the need for some 20,000,000 jobs at this time. And while I strongly support the need to rebuild our roads, highways, and bridges, this package is insufficient to the task and flawed in its focus and priorities.

Moreover, I am concerned that passage of this measure will give the false impression that the Reagan administration and the Congress have now dealt with the jobs problem by passing this legislation. Its passage will lessen the sense of urgency about the unemployment crisis—and will diminish pressure for stronger action by creating a false hope that many people will be employed by this program.

It is largely due to the flawed lame-duck legislative process—that too little time is given to urgent problems—and a proposal can be hurriedly constructed in an attempt to show some sign of action, when the actual legislative produce is poorly crafted and inadequate in meeting our true needs.

In terms of developing an overall national economic policy response that can put people back to work, I think this now requires an immediate top-priority effort by the new Congress that will convene January 3. The gas tax bill is a hurried piecemeal proposition that is the product of hasty consideration and undue political pressure in the rush to enact it hours before the Christmas holidays.

In 2 weeks time we will have a new Congress convene with some 85 newly elected Members who could, with proper deliberation, put together the comprehensive economic package the Nation needs. Were these matters taken up in January, I believe we would do a much better job of tailoring the gas tax/roads bill as an integral part of that overall package.

Third, the State of Michigan historically has done poorly under the distribution formulas of these programs—contributing far more dollars into the national pot than we receive in return on any fair-share basis. While Michigan is to be guaranteed an 85 cent return on each dollar contributed, that still is expected to drain $60 million from Michigan workers and the Michigan economy at a time when we desperately need that money. And while some provisions of the legislation were designed to meet the problem of Michigan lacking the necessary money to provide the State matching share—the remedy is inadequate and will severely strain Michigan's ailing economy.

Fourth, I joined with others to try to insert a "buy American" provision in the bill that would have insured that American steel, cement, and other materials would be used in these road construction projects. I am sad to report that amendment was defeated—and now many of the jobs to be created will go to workers in Japan, Korea, and other foreign lands. I think that is wrong.

Fifth, along with Senator BRADLEY of New Jersey, I offered an amendment to rebate the annual gas tax to those working families earning less than $10,000 a year in the form of an offsetting increase in the earned income tax credit. While I received 42 votes in favor, when the opponents moved to table the amendment—this vital improvement in the legislation was rejected. The working poor cannot and should not be asked to bear this new tax.

Sixth, I am also greatly concerned about the impact of these new tax burdens on the trucking industry at this time. Intense competition brought on by trucking deregulation, plus ever higher costs for trucks, tires, and other operating expenses have pushed many truckers to the brink of bankruptcy. No adequate assessment was made of the economic impact on truckers of these new costs due to the extreme haste with which this legislation was initiated. While higher fees from truckers may be justified, it is essential that these costs be considered in terms of the industry's ability to pay.

Seventh. I was deeply distressed during recent days to observe the fate of the continuing resolution, the other major legislative package of the lame-duck session.

While both the Senate and House passed a jobs section in their respective versions of the continuing resolution, the Senate/House Conference Committee surrendered to President Reagan's veto threat, and completely dropped the jobs section of the bill. Thus, not $1 was provided for jobs, despite the mounting unemployment crisis in our country. When that section was abandoned—it removed as well a $50 million program to provide emergency funding to soup kitchens and emergency feeding programs across America which are desperately short of money as they try to feed the increasing number of homeless and hungry people. The elimination of that part of the bill was cruel and unwarranted.

At the same time, in the same continuing resolution, the House of Representatives increased its own pay and the amount of outside income that could be earned by House Members, and the Senate removed completely a cap on outside earnings, despite my opposition and vote to the contrary.

I am deeply troubled by the appearance and the fact of a double standard when one views the roads bill and the continuing resolution as companion measures passing back to back in the lameduck session.

Taken as a whole, we see the Congress and the Reagan administration failing to deal with the jobs crisis—and yet moving ahead with a pay increase for Members of Congress while simultaneously imposing a new 5-cents-a-gallon gasoline tax which will fall hardest on working families, the working poor, unemployed persons, and senior citizens.

When we take these legislative initiatives together, they show an appalling insensitivity and lack of equity that I find shameful. I find the sum total of it all to be bad national policy—and miserably unfair to boot. We are widening the disparities in America—and I find that unjustified and an increasing danger to people's faith in Government and even our ability to preserve civil order. Tremendous economic damage is being done to America and

to our people. These two companion measures mock these problems and put the Federal Government, as the guardian of the national interest, in the poorest possible light.

I regret these actions and, having fought hard in a losing cause to change them, I want to clearly disassociate myself from them.

Finally, it should also be noted that the legislative package had one key redeeming feature that will provide a further period of extended unemployment benefits to jobless persons. Senator LEVIN sponsored the amendment, and I and others were cosponsors. We all fought hard for its approval and we won that fight. I am proud of that success in an otherwise inadequate legislative package, and I withheld my vote against the entire package, in deference to this single amendment, until it was clear the votes for passage were clearly achieved before finally casting my vote against the entire package.

Assurances had also been given by the Senate Finance Committee Chairman Senator DOLE and others that another legislative vehicle would be found where passage in the lameduck session could be assured, even if the gas tax bill were defeated. These assurances were part of the reason why an effort was not made to attach the unemployment compensation extension to the continuing resolution.

The lameduck session has done very little to help the country—and that responsibility must be shared by a visionless Reagan administration and a self-interested Congress that gave every appearance of feathering its own nest while the Nation's urgent problems were pushed to the back burner.

It is for these reasons that I could not in good conscience support the gas tax increase.

Mr. ZORINSKY addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

PAYMENT IN KIND

Mr. ZORINSKY. Mr. President, I support the general concept of payment in kind as beneficial in the effort to reduce our excessive stocks of wheat, corn, rice, and cotton. However, I am concerned that the bill gives no assurance that market prices will be strengthened in 1983.

I feel it will be another alternative available upon the volition of a farmer to choose whether it will benefit his operation or whether he feels or she feels that it will do absolutely nothing.

There is an urgent need to give Nebraska wheat and feed grain producers something to take to the bank as they plan financing in 1983. Many are strapped with indebtedness they cannot repay on schedule and more farmers cannot give assurance to their creditors that they can repay loans made for operating expenses for the 1983 crops. I hope that any PIK program will help insure survival of farmers the next 12 months.

The Secretary's presentation to the Senate Agriculture Committee on December 9 left much to be desired in explaining how the program would be administered. The administration apparently views the program as a means to entice farmers to cut production without new budget outlays. Legitimate questions are being raised as to whether the Government or producers benefit the most. It is becoming apparent that the administration is transferring its inability to export surplus grain onto the backs of the farmers. The payment-in-kind program, for example, would result in responsibility for costs of storage, interest, transportation, and other costs being shifted from the Government to farmers. There is only the vague hope that the grain would somehow find a use that would remove it from the open market. The administration's endorsement of the program is a tacit admission of the failure to regain our export markets lost through embargoes and other repressive trade measures which have had the same effect as outright embargoes.

The PIK concept in buying land out of production is not new. Such a program was in effect in the early sixties. Before that time, such a program was authorized for cotton in the Agricultural Adjustment Act of 1983. These earlier programs generally had farmer support with incentive for participation which resulted in sharp reductions in supplies at end of harvest. For example, in the 1961 feed grain PIK program, 25.2 million acres were taken out of production with 40 percent of farm participation in the program.

But the other parts of the program were vastly different. Most farmers in the 1961 program asked CCC to market their certificates helping to cushion the impact of freeing stocks from a market-insulating position. In sharp contrast to the present, price support loans were pegged at no lower than 65 percent of parity. This was not considered high in 1961. However, consider the fact that the national average November 15 market price for corn was 44 percent of parity.

But the most that can be hoped for without a higher price support loan rate is more grain loaded onto the farmer's backs uninsulated from the reserve program and the price support loan program.

Questions over how the program will impact on the rural business community are for the most part unanswered. As I understand the administration's intent in this regard, no more than 50 percent of the commodity base acreage would be diverted within a county. This would provide some protection for agribusinesses that depend on farmers for their survival. The caution note is clearly that of awareness of the need to structure a program that will not undermine the farm-rural economy.

The tradeoff initially asked for by the Secretary of Agriculture that would freeze target prices at the 1983 level is unacceptable to me. Other members of the committee also rejected the Secretary's recommendation. There is little enough for farmers faced with continued increases in the cost of fuel, chemicals, fertilizer, and other production items in the target price increases Congress approved in the 1981 farm bill.

But at least there is recognition of the inflationary pressures on farmers in the target price increases. The 1983 target price is adjusted upward in the 1981 Farm Act to $3.03 per bushel in 1984 and $3.18 per bushel in 1985—very modest increases which the Secretary would deny farmers.

I am also concerned by the proposal that would permit the Secretary to sell stocks marketed for producers out of CCC inventory at prices below levels established in present law. CCC can sell corn currently at no less than 110 percent of the loan—$2.55 per bushel. This is an established provision which protects farmers from CCC dumping feed grains.

It would break precedent with traditional and historic actions of the Congress to prevent farmers from having to compete with the Commodity Credit Corporation.

In summary, with the existing weak market situation, there is cause for further concern in the shifting of stocks insulated from the market under the reserve program and in CCC inventory. There is a strong possibility that present low prices would be further depressed. At the earliest, price depressing stocks will not be reduced until after the next harvest. They will not go away by a change in ownership with producers becoming liable for storage and other costs.

The statement of the Senate Agriculture Committee accompanying this bill to the floor clearly indicates the support of the committee for continuing CCC storage payments on commodities received by producers until the commodity is sold or through the end of the marketing year, whichever occurs first.

Staggering the issuance of certificates to coincide with harvest periods, also supported by the Committee statement, would also be in the interest of orderly marketing.

Mr. President, there is urgent need as this program is developed to give attention to questions such as:

First. What could be the market impact if farmers receiving certificates were to sell them within a short time?

Second. What are essential measures to protect farm-related businesses who depend on farmers for their livelihood?

Third. What will be necessary in payment per bushel to get farmers to participate? And what percent of the acreage base will be covered?

Fourth. What is the administration's objective for reduced bushel carryover in 1983, and in 1984?

Fifth. What specific changes in existing law are required for authorizing a PIK program?

Sixth. Over and above the cost to the CCC of the stocks to be made available in payment for acreage reduction, what is the projected budget outlay for each of the commodities involved?

Seventh. If the program is to be designed to help farmers obtain operating credit, is an increase in price supports anticipated? If so, at what level?

I thank the Chair, and I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A SUBSIDY FOR AMERICAN SHIPBUILDERS

Mr. METZENBAUM. Mr. President, regardless of the hour, regardless of the day, there are forces in this arena who are ever persistent extremely stubborn. There is a conference report at the desk that would provide for American ships to be built overseas in various and sundry countries—Taiwan, Korea, Japan, and a number of other places. It would provide that the American subsidy that is paid for operating those ships would continue to be paid.

Think of it, Mr. President; we are going to provide a subsidy to American shipowners who have their ships built overseas.

There are 1,200 workers normally employed at Lorain, Ohio, in the American Shipbuilding Co. There are about 66 working at the present time. I believe that the American shipbuilding industry is a very vital part of our entire defense effort, but the American shipbuilding industry cannot continue operable, cannot keep its doors open, if we are going to permit indirectly with American dollars, ships to be built overseas. What kind of absurdity is this?

I do not rise to speak against this bill because I just want to make a speech. I rise to speak against this bill because the conference committee report is one of those matters that I have been holding at the desk. It is one of those that I have made it clear I am prepared to oppose and continue opposing, because I do not believe that we ought to have American shipowners build their ship overseas and then give then a subsidy for the purpose of operating.

Now there is a new development. The new development is that I just got word that one of the Senators is proposing in the conference committee report on 6211 that they add a provision. And, lo and behold, what is the provision? The same language that is provided in the conference report that is sitting at the desk.

Mr. President, I want it understood that I am opposed to this measure, have been opposed to it. I do not believe that we ought to be spending American taxpayers' dollars to build ships overseas. And so I want one and all to know that if that provision is included in the bill when it comes back, then I am prepared to fight the passage of the bill. I do not believe that is the way to legislate, to do indirectly what you cannot do directly. I tell those Members of the Senate who are meeting in conference at the moment that if the measure comes back with the maritime provisions in it, then be prepared to discuss the subject so the American people will understand that we are doing several things at the same time: We are raising their taxes a nickel a gallon; we refuse to put a "Buy American" provision in the bill with respect to the steel and the cement used for the highways and the infrastructure that is to be built with the nickel-a-gallon; we are increasing jobs 300,000 or more, according to Martin Feldstein, and then to cap off this glorious piece of legislation we are going to put something in to provide for buying ships overseas. No way. No way. I say to those who are at the Longworth Building meeting now that I hope my words carry loud enough and clear enough to them—do not bring back the maritime subsidy for foreign built ships or be prepared to see this Senator make every effort to defeat the total piece of legislation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, in order that my colleagues may be fully apprised with respect to this subject, let me put in the RECORD at this point the details of these ships that are to be built overseas. These are maritime newly approved section 615 applications:

Aeron Marine Shipping Co., for the construction or acquisition of one or two new bulk vessels of about 63,000 deadweight tons each. I am frank to say I am not certain where that company is located;

Delta Steamship Lines, Inc., in conjunction with Crowley Maritime Corp., for the construction of up to 10 self-sustaining containerships, each with some break-bulk capacity. They would be built in Japan or another foreign country, and at a cost of about $35 million each;

Equity Maritime, Inc., for the construction of six Panamax-type ore/bulk/oil carriers of approximately 80,000 deadweight tons each. Three vessels are to be built at Hitachi Zosen, Japan, and three at Hyundai Corp., Korea. The total cost of the project is $168 million;

First American Bulk Carrier Corp., for the construction of two 40,000 deadweight tons bulk/container cargo vessels. Samsung Shipbuilding Co., Ltd., Korea, was named as the builder, at a total cost of $69.1 million;

Moore McCormack Bulk Transport, Inc., for the reconstruction of three tankers—the Mormacstar, Mormacsun, and Mormacky—including retrofitting to meet requirements of the 1978 Port and Tanker Safety Act. A/S Nye Fredriskstad Mek. Verksted, Norway, was named as the prime turnkey contractor, with a total cost of approximately $7,350,000;

Phoenix Bulkship II, Inc., in conjuction with El Paso Columbia Tanker Co., to reconstruct the liquefied natural gas (LNG) carrier *El Paso Columbia* as a combination dry-bulk/oil carrier. Hyundai Mipo Dockyard Co., Ltd., Korea, was named as the shipyard to perform the work, at a cost of $23 million. The Board had approved the project along with the reconstruction of the LNG carriers *El Paso Savannah* and *El Paso Cover Point* last February. However, no contract had been signed for the work on the *El Paso Columbia.*

United States Lines, Inc., for the reconstruction of the *Astral Moon* from a barge-carrying vessel to a containership. Hyundai Mipo Dockyard Co., Ltd., and Hyundai Corp., South Korea, were named as the shipyards, at a cost of $4.2 million.

Previously announced section 615 approvals included permission for American President Lines, Ltd., to reconstruct three containerships—*The Presidents Grant, Hoover,* and *Tyler*—in Japan; for Margate Shipping Co. to retrofit three tankers—*Cherry Valley, Chelsea,* and *Coronado*—in Portugal to meet provisions of the Port and Tanker Safety Act; for Ogden Marine, Inc., to build two dry-bulk carriers in Japan; for United States Lines to build 14 jumbo econship container vessels in South Korea; and for the Phoenix LNG conversion project noted above.

In addition, permission which had been granted to Delta Steamship

Lines, Inc., to reconstruct six *Santa Lucia*-type vessels in the United Kingdom was withdrawn by Delta on September 2.

Section 615 permits recipients of or applicants for operating-differential subsidy to build, reconstruct, or acquire vessels in foreign shipyards upon certification from the Maritime Administration that funds are not available in the agency's construction-differential subsidy account and approval of an application to "build foreign."

This provision became law as part of the Omnibus Budget Reconciliation Act of 1981, enacted August 13, 1981, which I might say, rather significantly, Mr. President, is a good indication of how we do legislating on the budget legislation.

I might also point out that if they include this language in the bill, it would be subject to a point of order as being beyond the scope of the conference because it certainly does not reflect a matter in disagreement between the House and Senate. Suffice it to say, the bottom line is this Senator does not want any American-owned ships built overseas if we are going to provide an operating subsidy for those same ships. Those ships should be built in this country with American workers who are presently unemployed, and I hope that the Senate conferees on 6211 will not see fit to put into that bill part of a measure that is presently pending at the desk in a conference report. If the conference report cannot fly, and I certainly will make every attempt to keep it from passing, then I do not believe it ought to be put into H.R. 6211.

I yield the floor.

RECENT EVENTS IN CENTRAL AMERICA

Mr. DODD. Mr. President, two events have occurred in the last several days affecting Central America which on their face might seem contradictory.

One was a report of a day ago that Nicaraguan forces and insurgent groups operating from the Honduran border had been engaged in sporadic combat over the past 4 or 5 days and at least, according to a Washington Post article, the Nicaraguan military forces had repulsed those insurgents from the northwestern part of Nicaragua. That is the first event.

The second event, of course, was the decision of yesterday by the Nicaraguan Ambassador resigning his post because of what he had described as a very seriously deteriorating condition in Nicaragua and the threat that the directorate there poses in terms of the leftist dictatorship which could be taken over in Nicaragua.

Mr. President, last Saturday I offered an amendment in the Chamber calling for a curtailment of financial support for paramilitary groups operating in Central America.

I wish for a few moments this morning to discuss that amendment again in light of these two events that have occurred in the last 72 hours.

I realize that raising this issue at this hour I raise the question that some have regarded as frivolous material, but I must return once again to the question posed on Saturday morning.

Obviously, I realize as well the hour is late. I realize there is a growing impatience with matters of an extraneous nature, and I realize that nothing I am going to say here this afternoon is going to change much if anything at all.

But the fact of the matter is this: The situation in Central America is rapidly deteriorating and I believe it is rapidly deteriorating because of our efforts to support paramilitary groups which are hellbent on overthrowing the Government of Nicaragua. And in the meantime, this body refuses to deal, I think, with the issue in a seious fashion.

It is a sad day indeed when "the world's greatest deliberative body" decided it does not have time to focus on questions of war and peace, and I fear that is what we are facing in Central America. That is what I believe is at stake today, and the role of the United States is a decisive one.

How does this body respond? Unfortunately, because of time constraints we only devoted a total of 30 minutes to the brief discussion and at the end of that brief discussion we delivered a decision which I think provides this administration and others with a green light to do whatever it pleases in Central America.

At the risk of sounding like an alarmist or what Lyndon Johnson used to refer to as the "nervous Nelly" I wish to make my position as clear as possible.

The decision rendered on Saturday by this body, first, may well do for Central America what the Tonkin Gulf decison did for Southeast Asia. And that decision will not be undone by accepting the Boland language as part of the continuing resolution.

Of course, the stated purpose of our policy in Central America is not to overthrow the Government of Nicaragua. And, of course, the stated purpose of our policy in Central America is not to provoke a conflict between Honduras and Nicaragua. And if we are honest about this matter, we will recognize that the Boland language does nothing more than states the obvious. In many respects it is the legislative equivalent of "blue smoke and mirrors," and we should not have any illusions about it.

Mr. President, as I tried to explain on Saturday, my concern about U.S. policy toward Central America has nothing to do with defending the Government of Nicaragua. I will not defend that government. And I have the greatest respect for Ambassador Fiallos in reaching what must have been an extremely difficult decision for him to resign his post in light of the evidence that is overwhelming that the Directorate in that country is leading that country to a Marxist state. In fact, I join with Ambassador Fiallos, or former Ambassador Fiallos, as the case may be now, in sharing his concerns about the actions and direction of the Managua-based government. But I know that the courageous action he has taken will be interpreted by some to suggest that he agrees with U.S. policy, that he believes the Sandinistas must be driven from power, in one way or another and particularly in the way that we seem to be supporting at the present time.

I spent about an hour and a half with Ambassador Fiallos yesterday, and he could not be more clear to me. He was clear as well in the press conference he held about his deep concern for the present administration policies in supporting the Somoza forces along the Honduran border, and just as concerned as he is about the direction that the Sandinista government is going, he is just as equally concerned about our support for the old guardia forces, the Somoza forces. There is a growing number of people in Nicaragua who are deeply disappointed and opposed to the policies of the Sandinistas. But it would be a serious mistake to assume that they are readily going to return to the very forces that they helped overthrow only a few short years ago.

In fact, if we want to contribute to what the Sandinistas are trying to do to the detriment of those forces inside Nicaragua who are trying to change policy in that country, then we are handing the Sandinistas a vehicle and giving them the tools which they would not otherwise be able to achieve on their own, in effect, by supporting the very forces that these people who are opposed to the Sandinistas fear even more, the Somozistas.

I know, also, however, from my conversations that the Ambassador is deeply distressed with the present policy that would encourage these Somoza guardia forces on the Honduran border. It would be a serious mistake to believe that those disagreements constitute an endorsement of U.S. policy, let alone support for the Somozista paramilitary groups operating along the border.

Mr. President, when it comes to the issue of U.S. support for paramilitary groups along the Honduran-Nicaraguan border, Ambassador Fiallos and I

are in total agreement. Both of us understand that gunboat diplomacy is no more popular in Central America today than it was at the turn of the century.

Mr. President, I ask unanimous consent to have printed in the RECORD an article from yesterday morning's Washington Post entitled "Nicaragua Says It Repulsed Rebel Incursion In North," along with a New York Times article of today which is entitled "Nicaragua's Ex-Envoy Called Leftist Dictatorship A Threat."

There being no objection, the articles were ordered to be printed in the RECORD, as follow:

[From the Washington Post, Dec. 20, 1982]

NICARAGUA SAYS IT REPULSED REBEL INCURSION IN NORTH

(By Edward Cody)

JALAPA, NICARAGUA.—The Nicaraguan Army, in five days of sporadic combat ending last week, has broken up what it describes as a major attempt by U.S.-backed counterrevolutionary guerrillas to occupy part of Nicaragua and declare it a liberated zone.

The fighting 135 miles north of Managua involved mortar exchanges, artillery fire from Army gunners and the first open deployment of Managua's Soviet-made T55 tanks and BTR60 armored personnel carriers since the guerrillas stepped-up attacks against the three-year-old Sandinista government last summer, Army officers said.

It came in response to what Sandinista commanders here portrayed as coordinated approaches by three counterrevolutionary units totaling 900 men. This would be an unusually large force in what heretofore has been a series of harassment raids and sabotage by commando teams from hideaways inside Nicaragua and across the border in Honduras.

The State Department has refused to comment on widespread reports that the Reagan administration is providing direct and indirect assistance to the anti-Sandinista forces, saying that is it against policy to comment on intelligence matters.

The Jalapa regional commander, Capt. Rodrigo Gonzalez Garcia, said one group of about 250 men was discovered moving in from the east near the Arenal de Yali River. A second group was encountered moving west in the rugged border hills of Jesus, he said, and a third of 150 was found farther south, well inside Nicaragua, with the apparent mission of cutting off the region's only all-weather road linking Jalapa with the rest of the country.

Their aim, Gonzalez said, was to take Jalapa and make it the capital of a liberated zone in this northern-most salient of Nueva Segovia province. Although Jalapa has only 9,000 inhabitants and the area comprises mostly hillside coffee farms, occupying even a small piece of Nicaraguan territory would be a major advance for the anti-Sandinista guerrillas.

Gonzalez declared that all but a few dispersed bands were driven back into Honduras in five days of fighting that ended Tuesday, proving, in his eyes, that they are unable to remain inside Nicaragua. But he acknowledged that part of one unit came as close as two miles from Jalapa before being discovered and forced back in three days of shooting at the village of Santa Fe.

This means the guerrillas were able to advance four miles from the border hills undetected. A Sandinista officer said his men discovered more than 1,500 yards of trenches in the hills near Cerro el Aguila, suggesting the counterrevolutionaries had been inside Nicaragua some time before making their move.

A half dozen mules and ponies were seen wandering around mountain trails just under Cerro el Aguila, left behind by the retreating guerrillas. Sandinista officers said the pack animals had been used to bring guerrilla supplies across the steep slopes from Honduras, including 60 mm mortars, M60 machine guns, ammunition and food.

The counterrevolutionary units lost more than 30 men in the clashes that led to the dispersal, Gonzalez said. His own forces suffered seven killed, including two officers, and twice that many wounded, he added.

The Sandinista Army used artillery and 81 mm mortars to dislodge some guerrilla positions, an officer said. Although a few T55 tanks and BTR60 armored vehicles were deployed around Jalapa to protect it from attack, they were not used in combat, according to the Army spokesman, Capt. Roberto Sanchez.

Their deployment marked a change in Sandinista policy, however, since previously the tanks and APCs had been kept hidden from view at sites near Managua. One BTR60 seen parked at Army headquarters here was missing two of its eight wheels, apparently disabled in the rough terrain.

Foreign Minister Miguel D'Escoto dispatched two protest notes to the Honduran government Thursday, charging that the guerrillas had come from and retreated back to Honduran territory dispite pledges from President Roberto Suazo Cordova's government that they would be controlled. D'Escoto named what he said were several guerrilla camps inside Honduras and added that the Sandinista leadership "is running out of patience."

Some counterrevolutionary camps along the border were shut down about six weeks ago by the Honduran Army. Honduran military sources and Nicaraguans involved with the guerrillas said some of the units had gone to new bases inside Nicaragua while others had been taken to sites within Honduras for more training.

The latest fighting suggests the Honduran Army's decision to relocate camps amounted to an effort to gain more control and keep guerrilla activities out of public view rather than a move to halt cross-border movements.

[From the New York Times, Dec. 21, 1982]

NICARAGUA'S EX-ENVOY CALLS "LEFTIST DICTATORSHIP" A THREAT

(By Bernard Weinraub)

WASHINGTON, December 20.—Francisco Fiallos Navarro, who was removed over the weekend as Nicaraguan Ambassador to the United States, said today that his nation was threathened by a "leftist dictatorship" that censored the press and limited political freedoms.

At the same time, Mr. Fiallos said that the policy of the Reagan Administration in Central America was wrong and that the United States should stop supporting covert military activities against Nicaragua.

At times as the 36-year-old diplomat spoke at a news conference at the Ambassador's official residence, his eyes grew moist. "The love for my people, the reverence for my country and the most elemental sentiment of personal dignity could not allow me to go on representing a Government that has forbidden me to express my ideas and my feelings to the Nicaraguan people," he said quietly.

Mr. Fiallos was removed by the Sandanista Government after an interview with La Prensa, an opposition newspaper in Managua, in which the envoy called for a "dramatic change" in the direction of the Nicaraguan Government and urged "free, just and honest elections." The interview was censored out of the Dec. 10 issue of the newspaper, and Mr. Fiallos said he offered his resignation soon afterward.

Calling reporters to his residence before moving out, Mr. Fiallos said the Nicaraguan revolution was irreversible but added, "We have to avoid going from a rightist dictatorship to a leftist dictatorship.

"To overthrow a rightist dictatorship does not give us the right to repress our people, to forbid the press to publish anything they want," Mr. Fiallos, a Harvard-trained lawyer and economist, said. "We must preserve the liberties, the freedoms of the people."

Asked about the Reagan Administration's policies, which seek to encourage anti-Sandanist forces, including some aligned with the old Somoza dynasty, Mr. Fiallos said: "I think the policy of the Reagan Administration toward Nicaragua is wrong. The worst thing they can do is help the Somozins. The Nicaraguan problem should be solved between Nicaraguans and between Sandanistas. It has to be democratic. It has to be pluralistic. The problem of Nicaragua should be solved by Nicaraguans." Mr. Fiallos urged the Reagan Administration "to accept the Nicaraguan revolution as irreversible."

HE OPPOSES FOREIGN TROOPS

He added that all foreign forces had to leave the entire Central American region. "We have to get out the Cubans, the Soviets, the Americans, the Bulgarians, anybody," he said.

Mr. Fiallos, who has served here less than a year, indicated that he was unsure about returning to Nicaragua with his wife, Elsie, who stood silent several feet away as he spoke.

"For the moment I want to rest and think and then I will decide what course to take," he said. At another point Mr. Fiallos said, "I hope I will be going to Nicaragua."

Mr. Fiallos is the second Nicaraguan envoy to the United States to leave his post in disagreement with the leftist leaders in Managua. His predecessor, Arturo Cruz, resigned in late 1981 and remained in the United States.

A spokesman at the Nicaraguan Embassy said there would be no comment on Mr. Fiallo's statements but noted that his removal came as the Nicaraguan Government announced changes in diplomatic assignments to the Dominican Republic, Belgium, Ecuador, Algeria and El Salvador as well as the United States. Mr. Fiallo's successor has not been named.

TALKS WITH EXILES PROPOSED

In his comments today, Mr. Fiallos urged Nicaragua's leaders "to have a dialogue with the opposition and the Sandanistas who are not in agreement with some measures that the revolution has taken."

Many Sandanistas who fought the Somazo Government that was toppled in July 1979 have left Nicaragua, disillusioned with the revolution.

Mr. Fiallos urged Nicaragua's leaders to meet with Edén Pastora Gómez, a hero of the Nicaraguan revolution and now a leading opponent who lives in exile in Costa Rica. "I feel he should be part of the political process, the Government should have a conversation with him," Mr. Fiallos said. The envoy said there was a possibility he would see Mr. Pastora.

"I think he is a Sandanista," Mr. Fiallos said. "He is a patriotic man. He should be part of the process within the revolutionary movement."

Besides seeking an end to press censorship, Mr. Fiallos said he and a majority of Nicaraguans wanted free elections and a nonaligned foreign policy. "We are trying to save the revolution, to make it better," the diplomat said.

The envoy said he was a moderate, and added that "some elements" of the Nicaraguan leadership leaned toward the Soviet bloc.

Mr. DODD. Mr. President, I conclude by saying that it is my sincere hope that we will not find during our recess period that begins today and extends pretty much to the end of next month that kind of expanded conflict in Central America. We hope it does not occur. I hope that is not the case.

I am deeply distressed, however, by these most recent events.

Ambassador Fiallos is deeply distressed that events are moving very, very quickly and before the month is out we may find an expanded conflict in Central America far beyond the turmoil and terror that we see raging in El Salvador and Guatemala today.

I hope I am incorrect in that. I hope the administration will convey to the people involved in Honduras and to others who have been I think goading the insurgent paramilitary forces along the Honduran border to cease that activity.

We are not doing ourselves, the region, or the issue of peace or dealing with the legitimate threats that I believe we now face in Nicaragua in the most intelligent way. In fact, we may end up serving the Sandinistas all too well in their cause to achieve something other than a democratic pluralistic society in their own country.

I yield back the floor.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. LUGAR). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PAYMENT-IN-KIND PROGRAM

Mr. EXON. Mr. President, we are, hopefully, in the waning hours of this session of Congress. We all know that there is a great deal going on at the present time, much of it centered around whether or not the gas tax increase is going to be passed, and tied in with that is the push by the administration additionally to pass the so-called Caribbean Initiative.

Now, as important as those two programs are, and with the strongly held views on both sides of those questions, I am very fearful that we are going to lose sight of one of the real problems in America today and that is the ever-increasing disaster that is facing the agricultural sector and the agribusiness sector of our economy.

If I understand the situation correctly, as of now H.R. 7439, as passed by the House of Representatives, is at the desk, and if it were the will of the Senate and if we would not become bogged down in filibusters on this issue, we could indeed pass H.R. 7439 as sent over by the House of Representatives.

I am afraid there are conflicting opinions as to what H.R. 7439 has done as sent over to us from the House. The first correction I would like to make, and I have checked this with Members of the House whom I consider to be experts in agriculture, H.R. 7439 was not, as advertised in the news media, an endorsement of the PIK program as advanced by the President and the Secretary of Agriculture. To the contrary, and the discussion that took place on the House floor, before H.R. 7439 was passed and sent over here, was that it was not an endorsement of the PIK program for several reasons: many of us who are very much concerned about and involved in the agricultural sector have questions about the PIK program. What are the details? How will it work? The Secretary of Agriculture, in testimony before the appropriate committees, was unable to spell that out at the present time.

It seems to me, Mr. President, that in addition to the other things that are of paramount interest today, we should be cautious indeed in the U.S. Senate by allowing adjournment of the Congress without at least taking some action on the PIK program.

Again I would emphasize that this Senator is not totally sold on PIK, but certainly it is something, with the crisis that is facing family-sized farmers today, we should give some attention to, and we should not by action or inaction, in the opinion of this Senator, simply lay back and do nothing.

It seems to me one way out of the dilemma that presently confronts us—and that dilemma is that with all of the arrangements and back room discussions that are taking place we might indeed adjourn this session of Congress without doing anything at all on PIK by allowing nothing to happen on the floor of the United States Senate—is not to allow H.R. 7439, which is presently at the desk, to die.

It seems to me that those of us who have reservations on PIK should heed the advice that has been given to us by our colleagues in the House of Representatives. H.R. 7439, as it was dispatched to the Senate, does not under any circumstance endorse the PIK program. In fact, the extended discussions that took place on this on the floor of the House of Representatives indicate there was grave concern expressed as to how the program might work, what the details would be, as the Secretary of Agriculture and the administration proceed with the development of the program.

It was very clear that the House of Representatives, in passing this bill, reserved the right to come back in the new Congress and to make or approve any changes that they feel are necessary to make that program workable and fair as it affects the farm producers of this Nation.

Mr. President, it seems to me that the House Members have adequately expressed the fears and the concerns and have not endorsed the PIK program with H.R. 7439. I am suggesting to my colleagues that, while many people are sidetracked on the other important issues that face the Congress before adjournment, at least a recognition of the despair, the economic despair that affects American farmers today, should receive some attention.

Therefore, while I endorse and believe that the alterations through amendments that were suggested to the PIK program by the Senate Agriculture Committee are in order, I think the Agriculture Committee of the U.S. Senate had made some good suggestions for appropriate amendments to the PIK program. I also understand that there are forces at work that will prevent all of the amendments suggested by the Senate Agriculture Committee from passing, indeed, probably not even coming to a vote in these closing hours.

Therefore, I would throw out the suggestion to my colleagues who are listening to me on the floor of the U.S. Senate right now and those who hopefully are listening over our communications system to the offices and the Senate buildings and their staffs, that the Senator from Nebraska is calling for at least consideration of the passage of H.R. 7439 as it presently rests at the desk as the minimum that we should do with regard to the PIK program.

It would seem to me that we could develop some type of a consensus on this. It certainly does not address any of the fears of most of us with regard to PIK, but certainly if we give the authority that the administration has requested—and I would simply outline that, as I understand H.R. 7439, and I

believe I am correct, it does not endorse PIK, it simply waives the $50,000 limit that is presently in the agriculture bill and it does one other thing. Second, it would allow the administration the authority to plan a program and not have to deal with the present 110-percent limit with regard to the storage of certain grains in the reserve program.

I would simply say to my colleagues that if the administration comes forth with a program now and before the beginning of the next Congress or during that Congress, if we believe that the program they have advanced is not workable, is not reasonable and would further harm the agriculture sector of our economy, then I would suggest that we have the ample means to deal with that at that particular time. If we could simply pass H.R. 7439, then we are not endorsing PIK and we are not signing off that the administration has the right to go ahead and promulgate any rules and regulations and bureaucratic red tape that they want.

We are simply saying, "We give you, the administration and the Secretary of Agriculture, the right to proceed as you have requested." And, if I understand what the administration has requested, they say that all that they need to do now in legislation is for us to enact H.R. 7439 that contains the two provisions that I have outlined.

Therefore, it seems to me that with all of the other difficulties that we have, and if we are not successful in getting the Senate to accept the worthy amendments that have been offered by the Senate Agriculture Committee, as a minimum, if we cannot do anything else, we should pass H.R. 7439, with the clear understanding of the reservations that this Senator has expressed.

Mr. President, I yield the floor.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislation clerk proceeded to call the roll.

Mr. DENTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF BARTHOLOMEW HLAPANE

Mr. DENTON. Mr. President, I am saddened and shocked to learn of the death of Mr. Bartholomew Hlapane, a former member of the African National Congress (ANC) and the South African Communist Party, who was murdered in his home on December 16, 1982, in Soweto by assassins with AK-47 assault rifles. Based on the modus operandi and the choice of the weapon, it appears that these people were ANC terrorists. I am also informed that his wife, who was critically wounded, passed away in a hospital the following morning.

On March 25, 1982, Mr. Hlapane courageously testified before the U.S. Senate Subcommittee on Security and Terrorism about the clandestine role of the South African Communist Party in the ANC and in the formation of the ANC's terrorist wing, Umkonto We Sizwe, "The Spear of the Nation." Prior to giving that testimony, Mr. Hlapane met with the other witnesses, former members of the ANC and the South West Africa People's Organization (SWAPO), to discuss the possible consequences of their testimony. Mr. Hlapane and the other witnesses, knowing they would be marked for assassination, each made an individual decision to tell his story and to expose the role of the Soviet Union and other Communist countries in subverting and exploiting the ANC and SWAPO to accomplish their own foreign policy objectives. Those brave witnesses believed that someone had to tell the world the truth about what is really happening in Southern Africa. They said that if they did not do it, the real story would probably never be told.

Mr. Hlapane told his story. He has now paid the supreme price for his courage and truthfulness. It is my fervent hope that the tragic death of Mr. Hlapane and his wife will not pass unnoticed, but will serve to strip away from the ANC any vestige of legitimacy and expose its brutally terroristic nature for all the world to see. As another witness testified at the hearing, one does not resign from the organization—there is only one way out.

Mr. President, every member of this body should express his or her revulsion at the cruel and unwarranted act of vengeance against a Senate witness and his wife. If we make the mistake of ignoring this incident, we will indirectly sanction the killing of an important witness. We will signal others who may be inclined to testify that, once they have testified, our Government will not attempt to prevent those who are offended by the testimony from exacting the full measure of retribution.

Mr. President, the brutal murders are not only heinous offenses against two innocent people, but are in all out effort by a terrorist gang to intimidate the Senate itself.

I ask unanimous consent that the testimony given by Mr. Hlapane before the Subcommittee on Security and Terrorism on March 25, 1982, be placed in the RECORD immediately following my statement.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF BARTHOLOMEW HLAPANE

Mr. HLAPANE. I was born on August 24, 1918, in the Ficksburg District of the Orange Free State, South Africa. I became interested in politics in 1948 and joined the African National Congress (ANC) as an ordinary branch member. In 1952, I was appointed the branch secretary of the Jabavu Branch of the African National Congress, and in 1955 I was elected an ordinary member of Transvaal Executive Committee, at the same time being appointed an organizer of the Eastern Transvaal and East Rand regions of the African National Congress. I served in this position until 1959.

The African National Congress' aims and objects were to achieve democratic rights for the African people through peaceful means, and the organization's structure is as follows.

The lowest organ of the African National Congress is a branch, above which are regional committees, provincial committees and, at the top, control is exercised by the National Executive Committee.

The National Executive decided on matters of policy and instructed its organs to carry them out. Members of the African National Congress were recruited and given membership cards, and any African who wanted to join the African National Congress was allowed to do so.

During 1960, the African National Congress was banned and a state of emergency was declared by the South African Government. Almost all the members of the National Executive of the ANC were detained. The only exception was Moses Kotane. I was not detained.

I was then appointed to the National Executive of the African National Congress together with Moses Kotane, Ruth Matswane, Gordon Magote, and a woman by the name of Sebeko. Moses Kotane, Ruth Matswane, and myself also constituted the National Secretariat of the African National Congress.

The above-mentioned committee functioned only up to the end of the emergency. When the emergency ended, the old National Executive took over. A formal meeting of the National Executive was held and the new committee handed over to the old committee.

Moses Kotane, J. B. Marks, Duma Nokwe, Dan Tloome, and Walter Sisulu were all members of the old committee which took over from us and who had to decide whether the African National Congress had to go underground and if the activities had to continue or not. Subsequently, it was decided that the African National Congress would continue its activities underground.

I was then appointed to the Johannesburg Regional Committee of the African National Congress. A meeting consisting of delegates of the African National Congress, the Communist Party, Congress of Democrats, and the Indian Congress was held in Johannesburg during the first part of 1961 to discuss the formation of Umkonto We Sizwe, the military wing of the African National Congress.

Mr. Chairman, here I would say, if you would permit me, Umkonto We Sizwe, in English, was understood to be the "Spear of the Nation."

Senator DENTON. The "Spear of the Nation?"

Mr. HLAPANE. This is correct.

Senator DENTON. Thank you.

Mr. HLAPANE. I did not attend this meeting, but learned after the meeting that there was serious disagreement amongst the delegates and that no decision had been taken. Shortly after this meeting, Umkonto We Sizwe was formed, at the sole decision of

the African National Congress and the Communist Party.

In 1955, I was recruited by Joe Slovo, Mr. Chairman, again, if you would allow me, before I get to that, I think I should explain how the membership of the Communist Party was recruited. I have dealt with the membership of the African National Congress and how it was recruited, but I did not explain how the Communist Party recruited its membership.

Being a Communist, Mr. Chairman, we did not take anybody who wanted to join the Communist Party; its membership was strictly selective. It was a standing rule of the Communist Party that all its memberships go out to all mass organizations or even community organizations to find out about people who are influential, who are clever, and who could be recruited as members of the party, first of all getting these people interested in the party by giving them pamphlets and some literature concerning the party, and later on getting them into some discussions, and then if we are satisfied that they have interest, get them into some lecture rooms.

I will say now what Joe Slovo did with me. In 1955, I was recruited by Joe Slovo and became a member of the South African Communist Party. Slovo was my tutor and taught me the principles of communism, and later I was placed in a cell of the Jabavu Branch of the South African Communist Party, which at that time had already been proscribed and was operating illegally.

The structure of the South African Communist Party was as follows. The lowest organ of the organization was a cell, then a branch, a district committee, and eventually the central committee. A cell is an organ functioning in an area and composed of not less than three or more than five members. Its main purpose was to work amongst members of national organizations, trade unions and community organizations in order to influence their members to advance the aims and objects of the Communist Party.

The functions of a branch of the Communist Party were to coordinate the functions of the various cells and report to the district committee, which in turn was in charge of the province.

At the beginning, I was only an ordinary member of a cell consisting of five members, one of these being our contact with the branch committee, through whom we got instructions on how to organize and direct the African National Congress, and to recruit members for the Communist Party.

It is a standing rule that members of the South African Communist Party must along belong to a mass organization, such as the African National Congress or the South African Congress of Trade Unions. The idea was to get members to infiltrate any organization described as reactionary, to undermine the leadership and ultimately gain control of such organizations.

Between 1955 and early in 1960, I belonged to various cells of the South African Communist Party because of reorganization within the party, and during this period I was co-opted into the branch committee of the Communist Party. In October 1961, I was co-opted into the Johannesburg District Committee of the Communist Party, and at the same time was appointed a full-time functionary—that is, organizing secretary—with a fixed salary and given a car. All the organs of the South African Communist Party falling under the Johannesburg District Committee were under my control.

The main functions of the district committee were: (A) to carry out the instructions of the central committee and, in turn, to convey them to the lower organs of the South African Communist Party; (B) to receive reports from lower organs, discuss them, make decisions, and instruct the lower organs as to what action to take; (C) to supervise the branch committees and cells.

At this stage, Joe Slovo was a member of the central committee of the South African Communist Party and was our contact with the central committee.

After being co-opted into the Johannesburg District Committee of the South African Communist Party, I became a link between the National Executive of the African National Congress and the Transvaal Executive of the ANC.

I was also placed in charge of the African Area Committee of the South African Communist Party Johannesburg District Committee. Andrew Kumene and John Motsabi served with me on this area committee. The various area committees were: the African Area Committee, Trades Unions Area Committee, the Indian Area Committee, and the European Area Committee.

The above area committees, in turn, were responsible to the district committee of the South African Communist Party, and they were similarly directed by the said district committee.

The functions of these area committees were mainly the following: (A) to carry out the instructions of the district committee; (B) to supervise the cells or units; (C) other organizational matters.

I was in charge of the African Area Committee. Joe Slovo was representing the district committee on the central committee of the South African Communist Party.

At this stage, 1961, Ben Turok handled the party's finances. The finances for party purposes were derived from the following sources: (A) advances by the Soviet Union; (B) advances by Communist China; (C) by way of subscriptions by ordinary members of the party; (D) advances by the Communist Party of England.

Finances were mainly used for the following purposes: (A) paying of salaries to all organizers and other paid officials; (B) printing and propaganda matters; (C) purchasing of literature from overseas; (D) transport; (E) to assist other organizations, such as the African National Congress, the South African Congress of Trade Unions, Congress of Democrats and the Indian Congress, and also for the Federation of South African Women; (F) to pay for the defense of persons arrested for offenses under the Suppression of Communism Act and like offenses.

The Defense and Aid Fund, which at this juncture already existed, was extensively used for the purposes of the South African Communist Party. In turn, cash advances toward the fund were made by the South African Communist Party.

I was co-opted onto the central committee of the South African Communist Party toward the end of 1962 at a national conference of the South African Communist Party. All the Africans were members of the African National Congress, and most of them were members of the National Executive Committee of the African National Congress. And in this way, the South African Communist Party was able to influence and control the African National Congress.

Two resolutions were passed at this national conference concerning: (A) the program of action of the South African Communist Party—this was distributed in pamphlet form; (B) plans to organize and step up the activities of Umkonto We Sizwe. It was emphasized that we were embarking on the second phase. Joe Slovo represented Umkonto We Sizwe at this national conference.

Shortly after the national conference, I attended my first meeting of the central committee of the South African Communist Party. Not long after this meeting, Moses Kotane was placed under house arrest by the South African police, and we decided that he ought to leave the country. He went first to Bechuanaland, then on to Dar-es-Salaam.

During May 1963, Joe Slovo and J. B. Marks also left South Africa on the advice of the central committee. We decided that they would be based in London, from where they would contact organizations sympathetic to the African National Congress cause, give prominence to the activities of the African National Congress and Umkonto We Sizwe, and thus further the objectives of the freedom cause.

I was detained for questioning by the South African police on June 24, 1963, and released on December 13, 1963. During my detention on July 11, 1963, the police raided Lilliesleaf, a small holding at Rivonia, and arrested the members of the high command of Umkonto We Sizwe. These arrests led to the so-called Rivonia trial.

After my release by the police, I was suspended from both the ANC and South African Communist Party until April 1964. This was standard practice in both movements to ascertain whether or not a person who had been detained had not perhaps decided to become an informer while in detention.

Shortly before Christmas in 1963, I was, however, told by Dan Tloome to meet Hilda Bernstein at the offices of the Defense and Aid Fund in Kerk Street, Johannesburg. I kept this appointment and met Hilda Bernstein. She grilled me for abut 2 hours on the questions put to me by the police while under detention and the answers I gave to them. She did not intimate to me whether she was satisfied with the answers I gave her or not.

I am convinced that there was suspicion against me for having disclosed the whereabouts or existence of Rivonia, and I attribute my long suspension to this.

During March 1964, I was approached by Gabula Mahlasela. He informed me that due to other duties which had been imposed upon him, he could no longer carry out his duties on the regional committee of the African National Congress, and he nominated me to replace him on this committee.

Before Mahlasela could, however, introduce me to the regional committee, he was detained and I was once again left very much in the dark.

Early in April 1964, I was approached by Mike Dingaka. He informed me that I was to act on the regional committee of the African National Congress, as informed by Mahlasela prior to his arrest. He instructed me to report at the house of Letooane in Westcliff Extension on a given evening to meet the members of this Committee. Soon thereafter, I went to Letooane's house, as instructed.

I acted on this regional committee in a supervisory capacity and did not represent an area. At these and subsequent meetings of the regional committee, we discussed the program of the African National Congress

in an attempt to find means of effectively reorganizing it.

Soon thereafter, as part of the reorganization, I was co-opted onto the national secretariat of the African National Congress, where I served with Mike Dingaka, Levy Soloro, Nkonyana, and Mike Ngobeni.

At this stage, Dan Tloome and Alfred Nzo had left the Republic. Dan Tloome had been sent to Northern Rhodesia—Northern Rhodesia is today Zambia—in an effort to organize the establishment of a new headquarters for the African National Congress.

The Lukasa prospect of new headquarters was abandoned. Alfred Nzo was a member of the National Executive of the African National Congress, but because of hardships which he had suffered, it was felt that he had taken much punishment and that he should leave South Africa.

Bri Bri (Wilton Makwai) was solely responsible for their departures, as he was handling all such matters because he had the necessary pilots and contacts which minimized the risks pertaining to the organizing of escapes to Bechuanaland. Both Dan Tloome and Alfred Nzo are still outside of South Africa, and I understand that Nzo is now secretary-general of the African National Congress and Tloome deputy secretary-general.

I was detained by the police again on September 2, 1964, not long after my co-option onto the National Executive Committee of the African National Congress, on which I served with Bri-Bri (Wilton Makwai), Mike Dingaka, and Gabula Mahlasela.

During the 5 months between April 1964 and my detention on September 2, 1964, I was also brought back into the South African Communist Party. In April, I was approached by Mike Dingaka and informed that the district committee of the Communist Party had decided that I should serve on the African Area Committee of the party. I was subsequently introduced by Mike to the members of the African Area Committee.

We discussed various matters concerned with the African National Congress and the Communist Party. It was decided that I would also be drafted into an African cell of the Communist Party.

We held the first meeting of the cell at the house of Beauty Magote. We discussed the African National Congress and the Communist Party. The main program was the reorganization of the party and the African National Congress.

Toward the end of May 1964 and about a week before Dan Tloome left the country, I was summoned to his office. Dan Tloome informed me that I had been co-oped to the central committee of the Communist Party, as he was about to flee the country.

Dan told me that I would have to take over the finances in his absence. He told me also who my contacts were. He said I would be informed as to the origin of such funds by the central committee.

During June 1964, I was approached by Mike Dingaka, who said that I would be met by an Indian called Mack. I would find Mack seated on a certain day in the Kapitan Cafe in Kort Street, Johannesburg. I was to approach this Indian by saying, "Are you Mack?" And when he said "yes," I would introduce myself as Arthur.

I carried out instructions as outlined above on the prearranged day, and there I met Mack for the first time. Mack informed me that a meeting of the Communist Party would take place on a Saturday soon thereafter. Mack said that he would pick me up in his car for this meeting.

On the Saturday morning in question, Mack collected me and took me to a block of flats in Berea. In the flat which Mack indicated, I found Hilda Bernstein and Ivan Schermbrucker. Mack then joined us. Later in the morning, Abraham Fischer joined us and took the chair.

Among other matters, we discussed my position as treasurer. I was told that Mack was to be my contact and that wherever I needed cash, Mack would obtain it from Piet Beyleveld and Ivan Schermbrucker. Mack and I were to meet once a week to check up and to find out if there were any emergencies.

Second, we discussed the position of the African National Congress. I was not in possession of all the facts and the issue was left over for the next meeting.

Next, we discussed the position of Mack. He was asked whether he had severed all his connections with all other committees, including the Umkonto. This, however, included the district committee of the South African Communist Party, of which Mack was a member. Mack reported that he had not as yet finalized his association with such other committees and was still tied up to the Umkonto group. He was instructed to finalize these issues.

Next, we discussed the code system which would be handled by Hilda Bernstein. She explained that she had written to an address in London. All correspondence for any other center beyond the borders of the Republic were sent directly to London, from where it was readdressed to the persons and places intended. This London address——

Senator DENTON. Mr. Hlapane, excuse me, sir. You are the most experienced witness we have in the ANC and in the South African Communist Party.

Since we have your full prepared statement, which has been distributed, and since we are short on time, I would ask your permission to proceed to the questions, with the understanding that your entire statement will be included in the record.

Would you agree to that, sir?

Mr. HLAPANE. I have no objection, sir.

Senator DENTON. Thank you, sir.

You have presented us with remarkable narrative of your involvement in politics, of your experience and participation in the African National Congress, and of your experience and membership in the South African Communist Party.

You were a high official; you were involved as an individual in some of the most important events in the modern history of South Africa, indeed of Africa and, to a degree, of the entire world. So. I would like to ask you some questions in order to draw further from that valuable experience.

Would you please tell us why you decided to leave the ANC and the South African Communist Party?

Mr. HLAPANE. I decided to part with the African National Congress and the Communist Party, first, as result of their treatment of my family. Every time I got locked up, promises that were made to my family were never fulfilled; promises that were made to all the people that were locked up in jail were never fulfilled.

Many men were locked up; women and children were starving. All the promises that had been made that they would provide food for them were never fulfilled. And those who had been arrested, we promised to pay for them in jail or even to defend them. Those promises were never fulfilled.

I personally found that the Communists were dishonest and most of them had run out of the country and left us in this mess. And the families of many people who were never released came to my house and demanded now to get food and help from me. I was left with this baby in my hands and I did not know where to turn to.

I discovered that the African National Congress policy had now been changed. Now, the Umkonto We Sizwe was brought into the picture; that was not the original policy of the African National Congress. I joined this organization under the understanding that whatever we are doing, we are going to achieve democratic rights by peaceful means, but we were now changing to violence and we intended now overthrowing the state of the Republic of South Africa: That was not the original aim.

And when people like Chief Luthuli pulled out in 1961 and said, "Now that you are entering in violence"—1961 was when Umkonto We Sizwe was formed—I felt that we no longer followed, really, what we told the people of South Africa.

And I started thinking about all the presidents of the African National Congress. I can name them: Reverend Tansi, Dr. Moroka, and Chief Luthuli; none of them ever supported a policy of violence.

And these are the matters that come to me strongly when I kept on going into jail and finding that the Communists were dishonest and they misled us. And to come to the rescue of many people, I decided to pull out and openly cooperate with the police, because innocent people were being arrested and did not know that the Communist Party had, in fact, captured the leadership of the African National Congress. And the African National Congress could not do what they wanted, except to get permission from the Communist Party.

Those are some of the things that influenced me to pull out of it.

Senator DENTON. That is not only an informative answer but, if I may say so, sir, a very statesman-like answer. I am very happy for the free world that you are no longer on the side of those who would undo it.

You have been given a list of the members of the National Executive Committee of ANC. Please look at that list and tell us if you see any names of people whom you know or who you believe to be members of the South African Communist Party.[1]

Mr. HLAPANE. May I understand the question clearly, sir?

Senator DENTON. Yes.

Mr. HLAPANE. Would you like me to mention names of people I know here, or only those of the Communist Party.

Senator DENTON. Those whom you know to be members.

Mr. HLAPANE. For instance, we have Oliver Tambo there right on top. I know him, but I do not know him as a Communist.

Senator DENTON. Yes; those whom you know to be members of the Communist Party.

Mr. HLAPANE. Dan Tloome.

Senator DENTON. Dan Tloome.

Mr. HLAPANE. Josiah Jele, Joe Slovo, Reginald September, Thabo Mbeki, Stephen Dlamini, John Nkadimeng. I think that is all, sir.

Senator DENTON. Who was the one sir, after John Nkadimeng? Did you mention another name after him?

Mr. HLAPANE. I beg your pardon?

[1] The chart Mr. Hlapane was given appears on p. 34 of the March 22, 1982, hearing record.

Senator DENTON. John Nkadimeng is the last one you mentioned as a Communist, or did you mention one more?

Mr. HLAPANE. John Nkadimeng.

Senator DENTON. That is the last one you mentioned?

Mr. HLAPANE. Yes, that is the last one I mentioned.

Senator DENTON. All right, sir; thank you. Seven out of 22; one-third of the National Executive Committee are known Communists.

As you have pointed out, the aims of the African National Congress were originally peaceful. As you stated, the aims were to achieve democratic rights for the African people through peaceful means.

What were the aims and objectives of the South African Communist Party?

Mr. HLAPANE. The short-term policy of the South African Communist Party was to achieve democratic rights for the African people, like all other organizations, which was the first step. The second step was to go forward and establish a socialist state; that is the long-term policy.

Senator DENTON. All right, sir. That is consistent with all of the testimony we have previously received. The short-term stage is liberalization in the sense that the ANC wanted it, but by violent means; then, the second stage is clearly the establishment of a socialist state.

In your opinion, does the ANC, as it is presently composed and operating, represent the will of the people of South Africa?

Mr. HLAPANE. I would not say so at the present moment. There was a stage when the African National Congress represented the feelings of the people of South Africa, the blacks.

Senator DENTON. Yes.

Mr. HLAPANE. That was before it was banned; that was before it embarked on the policy of violence. That was at the stage when the people even in the countryside, some of them—the chiefs, and so on—supported the policy of the African National Congress.

For instance, the coming of Chief Luthuli to become the president of the African National Congress does show the interest that the people in the countryside had in the policy of the African National Congress.

But I think a parting of the ways started when the Communist Party applied pressure on the leadership of the African National Congress to embark on a violent policy. We can now go further and say their position in South Africa is now different from what is used to be.

You have what we call these separate developments. That was the intention of the South African government, though I do not really say I agree with that. But they have done something, and whether we like it or not, the situation is there.

They have got this separate development, you know; they have got each tribal group in a position. For example, you take the Transkei, you take Bophuthatswana, you take Zululand, and you take other tribal groups—Basotho, and so on. They placed them in their own areas where they say, "Well, you can make laws to govern yourselves and you can do this for yourselves, and your own people control you," and so on. "We have the whites out of you," and so on.

And the chiefs have taken this up, and I can assure you, you will find it difficult if you go to South Africa today to try and say that the Prime Minister of South Africa is wrong by so doing. Some people may find it, you know, wrong to divide South Africa into portions and call them states.

I agree with them to some extent, but it is there. What do you do? These people now support the government of South Africa. In fact, if I may call upon my friend, Mr. Tambo, to go back to South Africa and try and say that he is a member of the African National Congress and he will be sending the ANC and doing away with all these legal things—say, for instance, "Now, Matanzima (phonetic), you do away with this nonsense; we want you to fall under the African National Congress." He would be killed on the spot.

I think that is the situation we are facing in South Africa, and, as a result, one would definitely say that the African National Congress today has not much support amongst the black people of South Africa.

Senator DENTON. Thank you, sir. I will ask you a question now from Senator EAST, who is another member of this subcommittee.

You have mentioned Joe Slovo as one of those who is a communist. Did you know Joe Slovo's wife?

Mr. HLAPANE. I know his wife, Ruth Slovo, her maiden name being Ruth First.

Senator DENTON. Her maiden name is Ruth what?

Mr. HLAPANE. First, F-i-r-s-t.

Senator DENTON. Ruth First?

Mr. HLAPANE. That is right. She is the daughter of Mr. First, who owned a carpentry factory in an area called Industria in Johannesburg; that is what her father owned.

Senator DENTON. Would you describe what you know of her activities in the South African Communist Party?

Mr. HLAPANE. I know her to have been a member of the Communist Party, and she was a reporter for a newspaper of the Communist Party, called Advance, and I think it was called New Age later when it was finally banned.

Senator DENTON. Under the original constitution of the ANC, were the members permitted to resign?

Mr. HLAPANE. You were allowed to resign as you wished.

Senator DENTON. Why and how was Umkonto We Sizwe formed?

Mr. HLAPANE. I do not follow you.

Senator DENTON. The organization Umkonto We Sizwe—I think you have already established that that was formed by the ANC and SACP only. Is that correct?

Mr. HLAPANE. That is correct.

Senator DENTON. Did all funds for that organization—"the Spear for the Nation," in English—did all funds for it reach the movement through the South African Communist Party? Did they receive all their funds from the South African Communist Party?

Mr. HLAPANE. They received all their funds from the Communist Party of South Africa.

Senator DENTON. Is there anything that you have not stated about the purposes of Umkonto We Sizwe that you would like to express now?

Mr. HLAPANE. I do not have anything at the moment.

Senator DENTON. What was the Freedom Charter, and what role did Joe Slovo play in its creation?

Mr. HLAPANE. The Freedom Charter is a document adopted at a conference held in Kliptown by the Congress Alliance. Let me go further to explain that it consisted of organizations such as the African National Congress, the Congress of Democrats, the South African Congress of Trade Unions, Colored People's Organization, and the Indian Congress.

It is a document that I came to know about just having been drafted by Joe Slovo at the request of the central committee, and finally approved by the central committee of the Communist Party and sent down as a document that embodied all the demands of the people, as they were collected from all areas. It was placed before them for adoption, and finally it was adopted there.

Senator DENTON. In your written statement, which has been submitted for the record but which you did not reach in your verbal testimony, you say that when you were treasurer of the South African Communist Party, you had to pay large sums of money each month to Bri-Bri, Tiny Nokew and Mike Dingaka. What were these funds for?

Mr. HLAPANE. I think it would be correct to say these were sort of departments that I dealt with. Bri-Bri was responsible for Umkonto We Sizwe, and to carry out his work he needed money for all the activities of Umkonto We Sizwe—for transporting, paying out functionaries, and other matters. The same applies to the others.

Senator DENTON. Thank you, sir. Have any threats or promises been made to you by anyone with respect to your testimony before this subcommittee?

Mr. HLAPANE. I had no promises made to me.

Senator DENTON. How about threats?

Mr. HLAPANE. I beg your pardon?

Senator DENTON. Any threats made to you?

Mr. HLAPANE. No threats at all. I am doing this freely.

Senator DENTON. Yes, sir. We have a series of documents supporting your testimony which we will include in the record—the consititution of the ANC adopted in January 1958 and chapter 15 of the book "An African Explains Apartheid," by Jordan K. Kgubane, which is entitled "African Nationalism Sabotaged." Mr. Ngubane explains clearly, as you did, how the SACP gained control of the ANC. The final document is the "Constitution and Rules" of the SACP which was originally adopted in 1921.

I thank you again. You could give me lessons in the English language, as well as in international relations and many other fi 's. I express my admiration for you, Mr. Hlapane, and I wish you a long, healthful and successful life.

Mr. HLAPANE. Thank you, sir.

[The prepared statement of Mr. Hlapane follows: [2]

PREPARED STATEMENT OF BARTHOLOMEW HLAPANE

I was born on the 24th of August, 1918 in the Ficksburg District of the Orange Free State, South Africa. I completed ten years of schooling and received my Standard Eight certificate.

I became interested in politics in 1948, and joined the African National Congress (ANC) as an ordinary branch member. In 1952 I was appointed the branch secretary of the Jabavu Branch of the ANC and in 1955 I was elected an ordinary member of the Transvaal Executive Committee, at the same time being appointed as organizer of the Eastern Transvaal and East Rand regions of the ANC. I served in this position until 1959.

The ANC's aims and objects were to achieve democratic rights for the African people through peaceful means, and the organisation's structure is as follows:

The lowest organ of the organization is a branch, above which are regional commit-

[2] The chart Mr. Hlapane was given appears on p. 34 of the March 22, 1982, hearing record.

tees, provincial committees and at the top control is exercised by the National Executive Committee.

The National Executive decided on matters of policy and instructed its organs to carry them out. Members of the ANC were recruited and given membership cards and any African who wanted to join the ANC was allowed to do so.

During 1960 the A.N.C. was banned and a State of Emergency was declared by the S.A. Government. Almost all the members of the National Executive of the A.N.C. were detained. The only exception was MOSES KOTANE.

I was not detained.

I was then appointed to the National Executive of the A.N.C. together with Moses Kotane, Ruth Matswane, Gordon Magote and a woman by the name of SEBEKO.

Moses Kotane, Ruth Matswane and myself also constituted the National Secretariat of the A.N.C.

The above mentioned committee functioned only up to the end of the emergency.

When the emergency ended the old National Executive took over. A formal meeting of the National Executive was held and the new committee handed over to the old committee.

Moses, Kotane, J. B. Marks, Duma Nokwe, Dan Tloome and Walter Sisulu were all members of the old committee which took over from us and who had to decide whether the A.N.C. had to go underground and if the activities had to continue or not.

Subsequently it was decided that the A.N.C. would continue its activities underground.

I was then appointed to the Johannesburg Regional Committee of the A.N.C. together with Andrew Mlangene, Philcemon Matole, Abel Mtembu, John Motshabi, Tom Nkobi, Alfred Nzo, Stephen Segale and David Mahopo.

A meeting consisting of delegates of the A.N.C., the Communist Party, Congress of Democrats and the Indian Congress was held in Johannesburg during the first part of 1961 to discuss the formation of Umkonto We Sizwe, the military wing of the ANC.

I did not attend this meeting but learnt after the meeting that there was serious disagreement amongst the delegates and that no decision had been taken.

Shortly after this meeting Umkonto We Sizwe was formed, at the sole decision of the A.N.C. and the S.A. Communist Party.

In 1955 I was recruited by Joe Slovo and became a member of the SA Communist Party. Slovo was my tutor and taught me the principles of Communism, and later I was placed in a cell of the Jabavu branch of the SACP, which at that time had already been proscribed and was operating illegally.

The structure of the SACP was as follows:

The lowest organ of the organization was a Cell, then a Branch a District Committee and eventually the Central Committee. A Cell is an organ functioning in an area and composed of not less than three or more than five members. Its main purpose was to work amongst members of national organizations, trade unions and community organizations in order to influence their members to advance the aims and objects of the Communist Party.

The functions of a Branch of the Communist Party were to co-ordinate the functions of various cells and report to the District Committee which in turn was in charge of the province.

At the beginning I was only an ordinary member of a Cell consisting of 5 members, one of these being our contact with the Branch committee, through whom we got instructions on how to organize and direct the ANC and to recruit members for the Communist Party. It is a standing rule that members of the SACP must also belong to a mass organisation, such as the ANC or the SA Congress of Trade Unions. The idea was to get members to infiltrate any organisation described as reactionary, to undermine the leadership and ultimate gain control of such organisations.

Between 1955, and early in 1960 I belonged to various Cells of the SACP because of reorganization within the party, and during this period I was co-opted into the branch committee of the Communist Party. In October 1961 I was co-opted into the Johannesburg District Committee of the SACP, and at the same time was appointed a full-time functionary, i.e. Organizing Secretary, with a fixed salary and given a car. All the organs of the SACP falling under the Johannesburg District Committee were under my control.

The following persons served with me on the District Committee:

Bov Hepple, Ben Turok, Esther Barsel, Andrew Kunene, Ahmed Kathrada, and Joe Slovo.

The main functions of the District Committee were:

(a) To carry out the instructions of the Central Committee and in turn to convey them to the lower organs of the SACP.

(b) To receive reports from lower organs, discuss them, make decisions, and instruct the lower organs as to what action to take.

(c) To supervise the branch committees and cells. At this stage Joe Slovo was a member of the Central Committee of the SACP and was our contact with the Central Committee. The ANC was proscribed during 1960 and it decided to go underground. We then found it difficult to operate as an organization on its own, and had difficulty in getting people who could be employed as full-time organizers and have offices that were not known to the police. Most of the leading members had also gone underground and found it difficult to make contact with the ordinary ANC members.

After being co-opted into the Johannesburg District of the SACP I became a link between the National Executive of the ANC and the Transvaal Executive of the ANC.

I was also placed in charge of the African Area Committee of the SACP Johannesburg District Committee. Andrew Kumene and John Motsabi served with me on this Area Committee. The various Area Committee were:

The African Area Committee.

The Trade Unions Area Committee.

The Indian Area Committee.

The European Area Committee.

The above area committees were in turn responsible to the District Committee of the S.A. Communist Party and they were similarly directed by the said District Committee.

The functions of these area committees were mainly the following:

(A) To carry out the instructions of the District Committee.

(B) To supervise the cells or units.

(C) Other organizational matters.

At the same time I served in the Secretariat of the District Committee, with Bob Hepple, Ben Turok, and Ahmed Kathrada.

Kathrada was in charge of the Indian Area Committee, Bob Hepple was in charge of the Trade Unions Area Committee, Ben Turok was in charge of the European Area Committee.

I was in charge of the African Area Committee.

Joe Slovo was representing the District Committee on the Central Committee of the S.S. Communist Party.

At this stage, 1961, Ben Turok handled the Party's finances. The finances for Party purposes were derived from the following sources:

(A) Advances by the Soviet Union.

(B) Advances by Communist China.

(C) By way of subscriptions by ordinary members of the Party.

(D) Advances by the Communist Party of England.

Finances were mainly used for the following purposes:

(A) Paying of salaries to all organizers and other paid officials.

(B) Printing and propaganda matters.

(C) Purchasing of literature from overseas.

(D) Transport.

(E) To assist other organisations, such as A.N.C., S.A.C.T.U., Congress of Democrats and the Indian Congress and also for the Federation of South African Women.

(F) To pay for the defence of persons arrested for offences under the Suppression of Communism Act and the like offences.

The Defence and Aif Fund which at this junction already existed, was extensively used for the purposes of the S.A. Communist Party. In turn, cash advances towards the fund were made by the S.A. Communist Party.

I was co-opted onto the Central Committee of the SACP towards the end of 1962, at a National Conference of the SACP attended by the following members, among others:

Moses Kotane, M. P. Naiker, Joe Matthews, Ruth Slovo, J. B. Marks, Fred Carneson, Ahmed Kathrada, Govan Mbeki, Michael Harmel, Duma Nokwe, Bob Hepple, Billy Nair, Walter Sisulu, Joe Slovo, Dan Tloome, Rusty and Hilda Bernstein, Stephen Dlamini and Mark Shope.

All the Africans were members of the ANC and most of them were members of the National Executive Committee of the ANC and in this way the S.A. Communist Party was able to influence and control the ANC.

Two resolutions were passed at this National Conference concerning:

(A) The Programme of Action of the S.A. Communist Party. This was distributed in pamphlet form.

(B) Plans to organise and step up the activities of Umkonto We Sizwe. It was emphasised that we were embarking on the second phase. Joe Slovo represented Umkonto We Sizwe at this National Conference.

Shortly after the National Conference, I attended my first meeting of the Central Committee of the S.A. Communist Party. The following members were present:

Moses Kotane, Duma Nokwe, J. S. Marks, Walter Sisulu, Joe Slovo, Rusty Bernstein, Bob Hepple, Michael Harmel, Abrahm Fischer, Ruth Slovo, and Bartholomew Hlapane.

Not long after this meeting, Moses Kotane was placed under house arrest by the South African police and we decided that he ought to leave the country. He went first to Bechuanaland, then on to Dar-es-Salaam.

During May 1963 Joe Slovo and J. B. Marks also left South Africa on the advice of the Central Committee. We decided that they would be based in London from where they would contact organizations sympa-

thetic to the ANC cause, give prominence to the activities of the ANC and Umkonto We Sizwe and thus further the objectives of the Freedom Cause.

I was detained for questioning by the South African Police on 24 June 1963 and released on 13 December 1963. During my detention on 11 July 1963 the police raided "Lilliesleaf", a smallholding at Rivonia, and arrested the members of the High Command of Umkonto We Sizwe. These arrests led to the so-called "Rivonia trial". After my release by the police I was suspended from both the ANC and the S.A. Communist Party until April 1964. This was standard practice in both movements to ascertain whether or not a person who had been detained had not perhaps decided to become an informer while in detention.

Shortly before Christmas in 1963 I was, however, told by Dan Tloome to meet Hilda Bernstein at the offices of the Defence and Aid Fund in Kerk Street, Johannesburg.

I kept this appointment and met Hilda Bernstein. She grilled me for about two hours on the questions put to me by the police, while under detention and the answers I gave to them. She did not intimate to me whether she was satisfied with the answers I gave her or not.

I am convinced that there was suspicion against me for having disclosed the whereabouts or existence of Rivonia and I attribute by long suspension to this.

During March, 1964, I was approached by Gabula Mahlasela. He informed me that due to other duties which had been imposed upon him, he could no longer carry out his duties on the Regional Committee of the A.N.C. and he nominated me to replace him on this Committee.

Before Mahlasela could however introduce me to the Regional Committee, he was detained and I was once again left very much in the dark.

Early in April, 1964, I was approached by Mike Dingaka. He informed me that I was to act on the Regional Committee of the A.N.C. as informed by Mahlasela, prior to his arrest. He instructed me to report at the house of Letooane in Westcliff Extension on a given evening to meet the members of this Committee. Soon thereafter I went to Letooane's house as instructed.

There I met the members of the Regional Committee, who were the following:

Letooane, Jerry Joe, Molefe, Nkosi Bovu, Shumo, and Mohale.

At this meeting, only organisational matters were discussed.

I acted on this Regional Committee in a supervisory capacity and did not represent an area.

At these and subsequent meetings of the Regional Committee we discussed the programme of the ANC in an attempt to find means of effectively reorganizing it. Soon thereafter as part of the reorganisation, I was co-opted into the National Secretariat of the ANC where I served with Mike Dingaka, Levy Soloro, Nkonyana, and Mike Ngobeni.

At this stage Dan Tloome and Alfred Nzo had left the Republic. Dan Tloome had been sent to Northern Rhodesia in an effort to organise the establishment of a new Headquarters for the A.N.C.

As it was felt that the time had arrived to move the organisation Headquarters to a friendly neighbour State. When this scheme became known beyond the borders of our country, it was criticised and turned down as impractical and undesirable, as it was felt to be creating the impression of a Government in exile.

This issue was finalised by way of correspondence from overseas and the Lusaka prospect of new Headquarters was abandoned.

Alfred Nzo was a member of the National Executive of the ANC but because of hardships which he had suffered, it was felt that he had taken much punishment and that he should leave South Africa.

BRI-BRI (Wilson Makwai) was solely responsible for their departures, as he was handling all such matters, because he had the necessary Pilots and contacts which minimized the risks pertaining to the organizing of escapes to Bechuanaland. Both Dan Tloome and Alfred Nzo are still outside of South Africa and I understand that Nzo is now Secretary-General of the A.N.C. and Tloome Deputy Secretary-General.

Since the Rivonia trial the National Executive of the A.N.C. had given BRI-BRI a free hand in all matters concerning Umkonto We Sizwe which had by then become a fully independent organisation. This decision, to my mind, was taken because the National Executive could not meet as a unit, for the detention of members and in some cases the freeing of others. Since Rivonia, the National Executive had given no directives as to what targets to be attacked by Umkonto We Sizwe.

I was detained by the police again on 2 September 1964, not long after my cooption onto the National Executive Committee of the A.N.C. on which I served with BRI-BRI (Wilton Makwai) Mike Dingaka, Gabula Mahlasela.

During the five months between April 1964 and my detention on 2 September 1964, I was also brought back into the S.A. Communist Party.

In April I was approached by Mike Dingaka and informed that the District Committee of the Communist Party had decided that I should serve on the Africa Area Committee of the Party. I was subsequently introduced by Mike to the members of the African Area Committee, which consisted of the following persons: myself, Mike Dingaka, Josiah Jele, and Rasmetsi.

We discussed various matters concerned with the A.N.C. and the Communist Party. It was decided that I would also be drafted into an African cell of the Communist Party. The names of the other cell members were: Levy Seloro, Beauty Magote, Gordon Magote, Euphimia Hlapane, and Loabile.

We held the first meeting of the cell at the house of Beauty Magote. We discussed the A.N.C. and the Communist Party. The main programme was the reorganization of the Party and the ANC.

Towards the end of May, 1964, and about a week before Dan Tloome left the country, I was summoned to his office.

Dan Tloome informed me that I had been co-opted to the Central Committee of the Communist Party, as he was about to flee the country.

Dan told me that I would have to take over the finances in his absence. He told me also who my contacts were. He said I would be informed as to the origin of such funds by the Central Committee. I had to pay R1,270,000 to BRI-BRI monthly, R600.00 to Tiny Nokwe (wife of Duma Nokwe), R400.00 to Mike Dingaka, R160.00 to myself, which included salary and travelling expenses and a balance for emergency uses. Should further monies be required I would be told at the meeting of the Central Committee how it would be made available. Dan Tloome gave me R600.00 as part deposit to purchase a car for use by me. He then arranged for me to meet him on the corner of Kerk and Rissik Streets, Johannesburg on a certain afternoon at 3 p.m. from where he would take me to the place where the Central Committee meeting would be held.

Dan Tloome however failed to keep the appointment and when I saw him later he explained that the proposed place was tipped off. Dan Tloome told me that I would be approached for the next meeting of the Central Committee. No name of any contact in this connection was mentioned.

During June, 1964, I was approached by Mike Dingaka, who said that I would be met by an Indian called Mack. He described Mack to me as a person with a tiny face, chin beard, similar to that worn by General Smuts. I would find Mack seated on a certain day in the Kapitan Cafe in Kort Street, Johannesburg. I was to approach this Indian by saying: "Are you Mack", and when he says, "Yes", I would introduce myself as Arthur.

I carried out instructions as outlined above, on the pre-arranged day and there I met Mack for the first time. Mack informed me that a meeting of the Communist Party would take place on a Saturday soon thereafter. Mack said that he would pick me up in his car for this meeting.

On the Saturday morning in question Mack collected me and took me to a block of flats in Berea. In the flat which Mack indicated I found Hilda Bernstein and Ivan Schermbrucker. Mack then joined us. Later in the morning Abraham Fischer joined us and took the chair.

Among other matters we discussed:

(1) My position as Treasurer. They wanted to know whether Dan Tloome had given me the necessary information on the distribution of funds and whether I had the necessary contacts with the Africans concerned. After the Committee was satisfied I was told that Mack was to be my contact and that whenever I needed cash, Mack would obtain it from Piet Beyleveld and Ivan Schermbrucker. Mack and I were to meet once a week to check up and to find out if there were any emergencies.

(2) The position of the A.N.C. I was not in possession of all the facts and the issue was left over for the next meeting.

(3) The position of Mack. He was asked whether he had severed all his connections with all other committees including the Umkonto. This however included the District Committee of the S.A. Communist Party of which Mack was a member. Mack reported that he had not as yet finalised his association with such other committees and was still tied up to the Umkonto group. He was instructed to finalise these issues.

(4) The Code System which would be handled by Hilda Bernstein. She explained that she had written to an address in London. All correspondence for any other centre beyond the borders of the Republic were sent directly to London, from where it was re-addressed to the persons and places intended. This London address was however not mentioned and was never disclosed.

New Code books were thus awaited from London and in fact a letter had already been received, which could not be de-coded, because it appears to have been written on a new code book. As soon as the new code book arrived it would be passed onto Mack together with a letter to decode. Later on I received a letter from Mack for the A.N.C. This came from Dar-Es-Salaam, via London. This letter was in fact already de-coded by Mack. Mack gave me to understand that the

new code book had now been received and it was clear to me that there were two code books. One for the A.N.C. and one for use by the Communist Party. I myself am not in a position to explain the code system.

5. Propaganda. It was decided that no pamphlets were to come out under the name of the Communist Party as the Freedom Fighter which is in fact a covert Communist bulletin, appears to be serving the desired purpose and Mack had to see that this bulletin was to appear regularly once a month. Propaganda discussions did not cover a field beyond the Freedom Fighter.

6. Finances. Funds were running low and Hilda Bernstein was instructed to write to London to appeal for funds.

Abraham Fischer reported that some R36,000.00 was with Joe Matthews in Basutoland. I was given to understand that this was in fact funds sent for the Party to him and that he thus far failed to pay over anything. Fischer said that all attempts so far made to get this money had failed. He later on admitted that R8,000.00 had been received from Joe Matthews. It was said that the late Mrs. Molly Fischer had made various trips to Bloemfontein in an effort to obtain this money.

Towards the end of July, 1964, I was informed that I must meet Abraham Fischer at the same address in Berea, at 4 p.m. I kept the appointment and met Abraham Fischer and Eli Weinberg.

Discussions centred around the present position of the A.N.C. At this stage Rusty Bernstein and Hilda Bernstein had left South Africa. I was in a position to give a detailed report on the A.N.C. covering the following fields:

(A) The weaknesses in the National Secretariat, which obviously was no longer in touch with other centres except Johannesburg.

(B) The Regional Committees which were quite unable to assist in re-organising the organisation.

(C) The set-up of the entire organisation, which covered the National Secretariat, the Regional Committees and Area Committees. These Committees in my opinion were uselessly inadequate and nothing could seem to be done about the situation. My report on the A.N.C. no doubt, was a disturbing revelation. They were clearly shocked and it was evident that Dan Tloome had concealed this deteriorating position from them. Fischer and Weinberg could offer no solution, but suggested that I should make every endeavour to pull the position straight.

This meeting which lasted one hour was the last meeting of the Central Committee of the Communist Party which I attended.

After Mack was detained in June 1964, I was called upon to handle the finances due to the A.N.C. section. Towards the end of July, 1964, I obtained from Abraham Fischer R4,900.00 in cash, which was for wages, transport expenses and for the Umkonto movement. This money was to cover all such expenses for July and August, 1964.

Fischer asked me to request Tiny Nokwe to compile a list of names and addresses of all persons she paid and to make same available to Fischer. This action seemed proper as we knew that Tiny Nokwe was to leave South Africa by the end of July. She actually did leave the Republic at the end of July, 1964 in the company of Regina Nzo, the wife of Alfred Nzo and Mike Dingaka.

Fischer was going to arrange that all the persons who were normally paid by Tiny Nokwe would be paid directly from London. This again was a security measure, as it was felt that I was not to be used in this connection, whereby my position might become known to the police to the detriment of the A.N.C. and other organisations with which I was associated.

Issy Hayman also passed R2 450,000 to me at this time which he said was from Ivan Schermbrocker. This was for wages and transport for the various officials of the A.N.C. and Umkonto We Sizwe and Communist Party. He subsequently passed on to me R1,600.00 also from Ivan Schermbrucker. This was for BRI-BRI and his Umkonto We Sizwe commitments. Later Issy Hayman gave me a message to meet Ivan Schermbrucker at the Johannesburg Municipal Market. I kept this appointment and was met by Ivan Schermbrucker, who handed me R400.00. This was cash advanced to me for emergency uses.

During the period that I served in the ANC and the S.A. Communist Party, no major decision could be taken by the ANC without the concurrence and approval of the Central Committee of the S.A. Communist Party. Most major developments were in fact initiated by the Central Committee. Among examples of this, I would cite the following:

(A) At a mass meeting of the people at Kliptown in June 1955 the Freedom Charter was officially adopted as the Charter of the Congress Alliance. The Congress Alliance consisted of the ANC, SA Congress of Trade Unions, Coloured Peoples Organization, Congress of Democrats and the SA Indian Congress. The Freedom Charter was however, drawn up by Joe Slovo on instructions from the Central Committee of the SACP, and approved by the SA Communist Party before it was submitted to the ANC and the other members of the Congress Alliance.

(B) The military wing of the ANC, also known as Umkonto We Sizwe, was the brainchild of the SACP and after the decision to create it had been taken, Joe Slovo and J. B. Marks were sent by the Central Committee of the SACP to Moscow to organize arms and ammunition and to raise funds for Umkonto We Sizwe.

(c) Joe Slovo was the representive of the Central Committee of the SACP in the High Command of Umkonto We Sizwe, and was in fact originally the Commander-in-Chief of Umkonto We Sizwe.

The South African Communist Party acted independently of Moscow on the operations level, while I was a member I.E. it made its own decisions and did not need to get approval from Moscow on each decision. When the split between Moscow and Peking occurred, the SACP decided to follow the Moscow line. Although the SACP was operationally independent, it was, of course, influenced by Moscow and also supported financially, materially and ideologically by the Communist Party of the Soviet Union.

NUCLEAR FREEZE MOVEMENT

Mr. DENTON. Mr. President, Tuesday, December 7, 1982, was the 41st anniversary of the attack on Pearl Harbor. Its commemoration sharply reminds us of our responsibility to insure that the United States will never again so weaken its defense as to invite a major, devastating attack. The Japanese miscalculated, and attacked in a considered but erroneous belief that we would not be able to react with the speed, determination, and effectiveness to render their attack disastrous to them.

Today, in spite of the stark reminder, there is afoot in our Nation a mood, expressed in political activities such as the so-called nuclear freeze movement, that is spreading rapidly toward the point of inviting the Soviet Union to deliver another surprise attack on us. Only this time, the devastation and loss of life would look miniscule the losses inflicted at Pearl Harbor and, indeed, all of the losses of World War II or of any other war.

I am opposed to the nuclear freeze because it is not "liberal" and "antiwar" enough. Our goal should be the reduction, not the freezing, of nuclear arms, and a significant relaxation in the tensions which might spark a nuclear war.

The "movements" that sponsor and promote that freeze mood are well organized and already effective enough to have prompted articles and editorials in the New York Times and the Washington Post crying out, in agreement with some in this body, "shame on you," not only in reference to me but also in reference to the President of the United States, for opposing them. Indeed, that label of "shame" would, by extrapolation, apply to all of our ex-Presidents since World War II, who have, without exception, opposed the erroneous assumptions and simplistic means the movement promotes to achieve perfectly legitimate aims that those Presidents and this Senator share with them.

Further to illustrate their progress, recently a benefit was held in the Kennedy Center, where the crowd laughed and applauded when the so-called peace play being presented had an American child tell our President that he was playing games to destroy our planet, that the United States is equally guilty with the Soviet Union, and that if our President and his friends want to play games they should find less dangerous ones.

I have recently publicly announced my current and enduring intention to oppose those movements, to support this and previous Presidents. My efforts will not be praised in Moscow, but they are designed to respond to the interests and the sentiments of the people of the United States.

I will not emphasize that the number one goal of the Soviet "actives measures" KGB campaign is the development of the nuclear freeze movement in Western Europe and the United States.

I do not want to establish or imply guilt by association for those involved in the move toward exemplary unilateral disarmament, nuclear freeze, or similar measures.

I do want to suggest well-meant error through innocence. It is the issues, and the errors in identifying and analyzing them, that I will emphasize.

One critical issue that patriotic innocence has failed to identify is that the Soviet Union now possesses the capability to attack and destroy 90 percent of our land-based missile force with only one-quarter of its currently available ICBM force.

Another issue which is insufficiently understood is one that may not have been clearly enough communicated by the "Great Communicator" in his speech of November 22, 1982, on this subject. On television, in an effort to clarify the critical problem we face, our courageous President showed red columns (U.S.S.R.) and blue columns (U.S.) to illustrate the shifting balance of ballistic missile power. In his last visual aid, he showed the current situation in which the red—Soviet—column was substantially higher than the blue—American—column.

The President was right as far as he went, but he did not stress the vital point that the missile force that could counterattack the U.S.S.R. is not the blue column, our peacetime missile arsenal, but the small part of it that would be left after this Nation absorbed an all-out preemptive attack, and the effective delivery of even that small portion of our missiles might be further reduced because of damage to launch, guidance, or other systems—damage inflicted preflight or en route.

During the past 20 years, while we have allowed our defense to decline, our sworn and active adversaries have carefully and relentlessly built their offensive strength toward the point where they may be tempted into delivering a preemptive nuclear attack to cripple and defeat the United States. The Soviet Union has also greatly increased its conventional forces to directly threaten the security of our allies and friends in Europe, the Middle East, and Asia.

Unlike U.S. defensive deployments, Soviet nuclear forces are deployed in an offensive posture principally directed at the United States. They are supported by an extensive civil defense organization and structure designed not to protect against a first attack upon the Soviet Union but to shield key leaders, military forces, and industry from a retaliatory attack.

Additionally, massive Soviet conventional forces are in offensive dispositions directed against their satellite nations in Eastern Europe, against our Western European Allies, and toward the Middle East and Asia. We have seen that offensive orientation and capability effectively employed in Hungary, Poland, Czechoslovakia, and Afghanistan.

Our nuclear and conventional forces are deployed defensively. Our walls of defense are to resist attack. Their walls point inward to contain the oppressed of Eastern Europe, Central Asia and Siberia, and Southeast Asia. They hold people and territory by force and terrorism. They expand their influence and control by the same means.

A day-by-day growing Soviet bloc military superiority has gained Moscow territory and enslaved peoples to build the capacity to gulp up more of both. They are developing toward a capacity to overwhelm the United States by increasing intimidation, threats, and blackmail in successive crises, or by the ultimate horror—a preemptiive nuclear strike. It is the prospect of this last eventuality, surprise nuclear attack, that we simply must address effectively to earn, even to deserve, survival.

Our goal is not to fight a nuclear war; it is to prevent one. We can do that only by having retaliatory power strong enough to deter the Soviet Union from attacking us. That means the Soviet leaders must be aware that we possess and sustain a truly operable capacity to inflict unacceptable damage to the Soviet Union if they choose to deliver a preemptive first strike upon us.

Our goal is not only to survive our individual collective mortal lives but to survive our freedoms, and to survive our potential for supporting and extending freedom and justice for the benefit of all humankind.

Our goal is not to freeze ourselves into a disadvantage but to bring about a reduction in nuclear weapons by both sides. That has been the goal of many successive administrations. It has been the goal of President Reagan and his administration from their first day in office.

The vast majority of those who support the so-called nuclear freeze movement are well meaning, patriotic, and legitimately concerned. They, in my opinion, are justifiably alarmed because they may have been persuaded that the Unites States has adopted the goal of fighting and "winning" a nuclear war. Perhaps the statements that gave rise to that misperception stem from some official spokesman's poor choice of rhetoric, or more likely those statements were taken out of context. No responsible person could believe that fighting an all out nuclear war is desirable or that such a war would be truly "winnable."

Even so, many of the people who support a "freeze" cannot sincerely and soundly conclude that a freeze would effectively diminish the chance of war, or serve to promote the goals I mentioned earlier, or serve to advance mankind's most important interests.

Even if the Soviet Union's leaders say they would agree to a balanced and mutual freeze, we would lock ourselves into the current position of dangerous inferiority and vulnerability. We would also certainly invite deceitful widening of the gap of disadvantage because of delayed or doubtful verification, while making it even more difficult to negotiate an effective agreement for an actual and truly verifiable reduction in nuclear weapons.

The fact of deceit, explicit and demonstrable in our adversary's dealings, simply cannot be over-emphasized to those extremely earnest but, I must say, naive advocates of a freeze as the answer to difficult problems. "A day that will live in infamy" is the way President Roosevelt referred to the "sneak attack" on Pearl Harbor. At the very moment when Japanese forces were deploying to attack, Japanese representatives in Washington were maintaining their desire to negotiate and find a peaceful resolution of the differences between the two nations.

Similarly, we recently marked the 20th anniverary of the greatest crisis of the nuclear age, the Cuban missile crisis of October 1962. That crisis came about because our adversary clandestinely introduced weapons with an offensive nuclear capability into Cuba. It came about because the Soviet leaders and their representatives in Washington lied to us about what they had done. They said they had no missiles in Cuba.

The record of our adversary is replete with instances of duplicity and deceit. But even with such a deceitful adversary, mutual and truly verifiable nuclear arms reductions are not wholly impossible. Such a result is more difficult to achieve than deterrence, but it is theoretically possible.

The only way, however, to achieve mutual and truly verifiable arms reduction is to render that kind of arms reduction agreement advantageous from the point of view of the Soviet leaders. The only means by which to instill that essential perception is for the United States to pursue a considered and measured program of continuously strengthening as necessary our defense position, while striving with clear sincerity to negotiate toward mutually reducing arms and defense expenditures.

Anyone, any group, who believes that we can achieve an arms control agreement that will truly reduce the risk of nuclear war and also preserve our security and our freedoms, without showing that staunch resolve, is what Lenin comfortably referred to as a "useful idiot."

Today we face a fundamental test of will, of determination, of our ability to assess reality. We must continually communicate to the American people the truth about the strategic balance, about the policy of the President and our country, about the nature of our adversary, and about the things that are really required if we are to preserve and insure our national security.

Today we must manifest that we have the requisite understanding and will to pay the price for security. If we continue to pay that price and render

pointless the increasing Soviet expenditures on offensive weapons, there is a rational hope that the leaders of the Soviet Union will decide it is better for them to desist and agree to the kind of sincere and forthcoming negotiations and reductions that will really work.

I believe that our people, given the facts and allowed to evaluate the realities of the world, will recognize the essentials for preserving peace and security. Although many of our citizens endorse the concept of a nuclear weapons freeze as a way to reduce the prospect of a horrible nuclear war, polls consistently show that an overwhelming majority of Americans oppose any freeze that would leave the United States at a disadvantage. Indeed, all things considered, a freeze now would leave the United States at a disadvantage and render nuclear war more likely.

We can change that situation, increase our security, diminish the possibility of war, and make productive negotiations more likely. Our people, and the Congress, continually face specific decisions on the development, production, and deployment of new strategic weapons systems. Those include the MX missile, the B–1 bomber, Cruise missiles, the Trident submarine, and intermediate range weapons to support our forces and those of our allies in Europe. There has been healthy discussion and debate about all those programs, and many misperceptions remain.

For example, many Americans think that the production of new weapons systems will increase the numbers of missiles and bombers the United States has deployed. In fact, however, the new weapons are not additive to our forces, but replace old and obsolete weapons that no longer serve adequately as part of our deterrent.

Few Americans realize that we have frozen the number of our ICBM's since 1967. We have frozen the number of our submarine-launched missiles since 1973. We have greatly reduced the size of our strategic bomber force. We have reduced the number of our nuclear missile submarines. We are now deactivating obsolete Titan missiles.

We have, it is true, upgraded many of our existing weapons as much as we can. But even with new seat covers an old car is still an old car. By contrast, while we have frozen or decreased the size of our forces, the Soviet Union has vastly increased its own forces, improved their quality, and introduced many entirely new weapons systems.

Few Americans understand that the replacement of old weapons systems with new ones is vital to the stability that maintains the peace. I am in full sympathy with many of the goals advocated by those bishops of the Catholic Church who strongly support the draft pastoral letter that has been so much in the news of late. Yet, in their commendable desire to insure peace, many bishops advocate policies that would, in some cases, have the opposite effect.

I believe it is correct to oppose a policy of strategic nuclear deterrence that relies on what is called "mutual assured destruction," the capability to destroy civilian populations to deter an attack. most of the bishops consider immoral a policy that relies upon the ability to kill millions of civilians, and I agree with them.

At the same time, however, many bishops oppose the development of new weapons systems such as MX. They do not realize that the failure to deploy new weapons will leave us with little alternative to "mutual assured destruction." Our older weapons are so inaccurate that they cannot be used to attack the specific military targets that should be our real concern. They can be used only to attack large general targets like cities.

Certainly, bishops of the Catholic Church, indeed all clergymen, are more than most people entitled, indeed obligated, to address questions involving great cost of human life. I emphasize this point because I have recently been misquoted or quoted out of context on public statements I made about the bishops' deliberations. Though entitled, like any citizens, to study and comment on this issue, religious leaders should, like any citizens, become knowledgeable in all aspects of the issue before resorting to a defiant judgment of the successive Presidents of the Nation that permits and encourages their free practice of religion and of free speech. Until they do this, one would hope that they will study further and meditate on what Jesus said about rendering unto Caesar what is Caesar's.

In an era when the willingness to possess deterrent power requires courage as well as enlightened humanity, the proponents of a freeze fail to see that this is not the time to emphasize an undermining of the courage required to adhere to a policy consistently followed by many administrations. When we have a half million of our young men who have failed to fulfill their minimum obligations as citizens by registering for the possibility of national service, it is inconsistent to attack the alleged "immorality" of our leaders who continue to implement nationally responsible policies.

If we wish to do away with mutual assured destruction, to move, now that we can, away from a policy that relies for its effectiveness on the ability to destroy millions of civilians, then we must have the new, refined, accurate weapons that present a threat to the weapons of our adversary, not just to the great mass of his citizens.

One such new weapon is the MX missile, an excellent missile that the President proposes to deploy in the so-called Dense Pack. The defensive nature of the President's proposal is shown by the fact that the emphasis is on deploying a weapon that is designed not for a first attack upon an enemy but to survive an attack upon us. It will contribute to deterrence in the most effective way, by making it impossible for an enemy to attack us without the certainty that we will retain the capability to inflict unacceptable damage upon him.

The Dense Pack concept is appealing, and it deserves a great deal of study and analysis. While we do that, however, we must insure that we have developed and will preserve the options to shift to other even more effective, deployment modes should our research and development effort identify them, or even to shift to other weapons systems altogether.

In my view, it is unfortunate that the MX decision has been interpreted so starkly as "Dense Pack or nothing." It is vitally important that we realize that we are simply proceeding with a long-overdue but essential program of upgrading and modernizing our forces, not just for its own sake but so that the Soviet Union will recognize that the American people, and their elected officials, have the collective will and determination to preserve their own security. Only when the Soviet leaders perceive that our country is truly dedicatd to that course will there be any real prospect of successful negotiations to reduce nuclear arms.

We are really talking about whether we can and will ante up enough to insure our survival. At a time when our economy is stagnant and when the expectations for a continued high level of social spending and entitlement programs condition our political and practical alternatives, the perceived competition between the requirments of national security and those of the domestic welfare puts us in a difficult situtation. Yet our first obligation is to insure the security of our country. That is the essential prereq-uisite to promoting the economic and social welfare of our citizens.

We will not solve our economic problems, the demands of our poor and disadvantaged, or our alarming budget deficits by cutting our defense. There simply is not enough money there to do it. And defense means jobs to, many jobs, as every Congressman or Senator finds out when there is a proposal to reduce or eliminate a program in his district or State.

We can, as many argue, save money by cutting nonessential or overly generous social programs. We can also save money in our defense establishment, and it is that upon which I want to dwell for a moment.

I am convinced that we can save a great deal of money without cutting

into the bone and muscle of our military strength.

We can save money by recognizing and addressing the waste that occurs perforce in any large program. We in Congress and the administration have talked a lot about that, but I am not sure that our actions measure up to our rhetoric.

We can save money by identifying and addressing the waste that is imposed by "the system" as it now exists.

We need to see whether the large bureaucracy in the Department of Defense is really essential.

We need to look at how our military services are organized.

We need to insure that our contracting system minimizes rather than maximizes costs.

We need the Congress to recognize that its reluctance to commit itself to long-term programs and its propensity to review and change every program every year are expensive luxuries that we can no longer afford.

National defense and national security are not partisan matters. They are vital to the survival of our country and the political system that makes partisanship possible. It does a great disservice to portray the vital issue of survival in partisan terms. Those who believe that President Reagan and the Republicans have unreasonably increased defense expenditures should recall that the amount of money we are likely to appropriate for defense in fiscal year 1983 will be no greater, and may be less, than that projected for the same year by the Democratic administration of President Carter. Nor does all this exclude my acknowledgement that with careful study we can still find ways to save a great deal of Defense Department expenditures without cutting the essential of our military strength.

It will be critical in the decisions we will make in the days ahead that we, in public positions, assist all Americans by clearly presenting the facts and by stimulating our citizens to consider carefully what we should and must do. Only when we all are able to make our policy decisions on the basis of reality, not emotion or wishful thinking, will our country, our lives, and our salvation be assured.

Mr. President, I suggest the absence of a quorum.

Mr. RUDMAN. Mr. President, will the Senator withhold?

Mr. DENTON. I do.

GERALD CARMEN, ADMINISTRATOR, GENERAL SERVICES ADMINISTRATION

Mr. RUDMAN. Mr. President, I rise to acknowledge the outstanding work Gerald Carmen has performed as Administrator of the General Services Administration. In these austere budgetary times, it is refreshing indeed to observe a superior administrator such as Mr. Carmen be able to take control of his agency, drag it out from under a cloud of scandal, and mold it into a streamlined model of efficiency and productivity. He is to be saluted for his efforts. I ask unanimous consent that the text of an article which appeared in today's Wall Street Journal reflecting his fine work at the GSA be entered into the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REAGAN'S HEAD OF THE GSA IMPRESSES MANY BY STREAMLINING AND CLEANING UP AGENCY

(By Timothy D. Schellhardt)

WASHINGTON.—Can a former auto-parts dealer from New Hampshire get a bureaucratic behemoth under control?

White House recruiters didn't think so in early 1981 when they opposed naming Gerald Carmen, a Reagan loyalist from Manchester, to head the scandal-marred General Services Administration. The $5 billion-a-year agency is Uncle Sam's landlord, housekeeper and supply sergeant. "We felt we needed a big corporate exec. not a small businessman, at GSA," says a former presidential headhunter.

But Mr. Carmen's political ties helped him land the job, and he has turned many of the skeptics around. "Jerry has erased our doubts," says the recruiter. Ralph Nader, never an easy man to please, calls the GSA chief "the most impressive" of President Reagan's appointees.

And some observers have been downright surprised by his performance, as his credentials were mainly political. Mr. Carmen managed the Reagan campaign in New Hampshire. A Reagan backer long before that, he had served as the state Republican chairman and as a delegate to national GOP conventions. He operated as a wholesale distributor of auto parts for 20 years before selling the business in 1979 and starting work on the Reagan campaign. He once was chairman of the New Hampshire Housing Authority, and he served on the Reagan transition team after the election. But until now he never headed any organization even remotely approaching the GSA in size.

TAINT OF CORRUPTION FADES

Mr. Carmen, a wiry, intense worker, can point to several early achievements at GSA, although it's too soon to gauge just how close he will get to his goal of transforming the agency into the government's "business manager instead of its janitor."

Gone are the headlines about pervasive fraud and corruption among some of the GSA's 30,000 employees. In the decade before Mr. Carmen took charge, more than 140 GSA employees and contractors had been convicted of bribery and other wrongdoing. From 1977 through last year, the GSA was under steady investigation by the Inernal Revenue Service and the Justice Department. But Mr. Carmen has laid down a strict code of ethics, and the taint of corruption has faded.

The GSA chief is winning praise, too, for cutting costs and improving management. In the past two years, the agency's work force has shrunk by more than 7,000 employees, or roughly 20%, through a hiring freeze and attrition rather than through layoffs. Officials calculate the saving at $150 million a year.

During the same period, the GSA has reduced government office space by 22%, exceeding Mr. Carmen's goal of a 20% cut. The agency has consolidated offices and squeezed more people into the same space. Mr. Carmen aims to shrink the space allotted to a typical federal worker to 135 square feet from the current 170 to 175 square feet; congressional experts say that would save about $100 million a year. Mr. Carmen himself shuns the cavernous administrator's office at GSA headquarters here, using instead a smaller office nearby.

Furthermore, the GSA chief has cut the average time for delivering supplies to customer agencies to less than seven days from the previous average of 41 days. To streamline the system for moving supplies, he has closed four distribution depots. And he has reduced the average time needed to negotiate building leases to about 200 days from 366 days.

At the White House, they're calling Mr. Carmen President Reagan's "Cousin Cheap," a nickname given to Hugh Carter, who was President Carter's cousin and a penny-pincher in that administration. The GSA chief does seem equally frugal. He has frozen purchases of new carpets, draperies and office equipment for his agency. He has opened a workshop to renovate old office equipment. He aims to cut the GSA's expenditures for magazine subscriptions and travel by 50%. "If you take care of the pennies, the dollars take care of themselves," he says.

His efforts are attracting attention outside government. Robert Scott, vice president of administration at Harvard University, says Mr. Carmen has a "knack for applying common sense business practices to complex government organizations." George Waters, a senior adviser at American Express Co., who has served for a number of years on an outside advisory group to the GSA, calls him "a rare individual who can pull people together and get results." He adds: "You certainly wouldn't expect that, looking at his resume with his limited business experience."

President Reagan has noticed, too, and he singles out the GSA chief for praise. Appointees like Mr. Carmen, he says, "are going to make a difference in the cost of government and the kind of government." He has asked Mr. Carmen to head an interagency group examining ways to cut costs all through the federal establishment.

But Mr. Carmen has his critics. Some of them spoke up earlier this year when it was disclosed that he had received a $425,000 Small Business Administration loan and hadn't reported it to a Senate committee considering his nomination. He called the omission an oversight and quickly sold the property for which he had obtained the loan. The GSA chief also has drawn fire for giving several choice GSA posts to Republican friends, including an aide to presidential counselor Edwin Meese.

Moreover, James Jones, a labor-relations specialist at the American Federation of Government Employees, complains that Mr. Carmen is bent on contracting with private companies whenever possible for such jobs as guarding and maintaining government buildings. The GSA chief replies that the practice saves money.

Rep. Patricia Schroeder (D., Colo.), a frequent GSA critic, favors abolishing the agency. "I don't think there's a need for GSA. Let every department and agency pick out its own buildings, buy its own supplies

and equipment. Remember, the whole world went to electric typewriters before GSA did," she says.

POLITICAL AMBITIONS

Mr. Carmen, and outspoken Reagan supporter, often disarms his critics. When he recently appeared before a Senate panel that oversees the GSA, he brought along two dozen officials, filling the hearing room; committee members called the officials "Carmen's army." But their attendance seemed to help the GSA chief, and committee members conceded that they were impressed by Mr. Carmen's grasp of the GSA's manifold activities.

What's still unclear is how effectively Mr. Carmen has attacked some long-standing GSA problems. Congressional investigators say that the GSA has been bled by private landlords from whom it rents space, and that it is years behind the times with its computer technology. Mr. Carmen has complained to his business advisory council that it has been difficult to control every part of the huge agency.

The GSA chief makes it clear that he prefers the political arena. "I enjoy politics very much and I think I'm very good at it," he says. He's had his eye on the New Hampshire governorship for a long time, but the recent election of Republican John Sununu dims his chances for landing that post any time soon.

American Express's Mr. Waters thinks Mr. Carmen would be a good governor. "I think running a small state would be easier than the job he has now," he says.

PRESIDENTIAL PARADOXES

Mr. RUDMAN. Mr. President, in the New York Times of December 19, 1982, this past Sunday, there appeared an article entitled, "Presidential Paradoxes," authored by our colleague, Senator WILLIAM S. COHEN, of Maine.

It is an unusual article but not unusual for BILL COHEN. It contains the kind of intellectual, thought-provoking series of logical conclusions that we have come to expect from BILL COHEN.

I ask unanimous consent that this article from the New York Times of Suday, December 19, 1982, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 19, 1982]

PRESIDENTIAL PARADOXES

(By William S. Cohen)

WASHINGTON.—A majority of voters in 1980 supported the proposition that the United States had to modernize its strategic and conventional forces if we were to avoid having to choose one day between conflict or capitulation. But something happened on the road to redemption.

Perhaps it was all the loose talk of firing a nuclear shot across the Soviet bow, confining a nuclear war to European soil, preparing for and surviving a long nuclear conflict, or throwing a shovel full of dirt on an underground shelter for every household in America. Maybe it was a sense of betrayal that we experienced in discovering we had elected a President who was putting into practice the very things he promised as a candidate.

Whatever the reason, it is clear that a new consensus evolved during 1982 that said significant defense cuts could and should be made. It was not that the world had become less dangerous, that the Soviet Union was not still butchering innocent people in Afghanistan, that Gen. Wojciech Jaruzelski was cutting the pressure of his water cannons in Poland, that the skies of Cambodia were not quite so yellow with poison, that the Middle East was any less volatile or Persian Gulf oil more secure. Rather, we concluded that President Reagan's military program was no longer affordable or desirable—that we must reduce our deficits and rebuild our domestic economy before our military capability, and should refuse to build systems that the Soviet Union would see as threatening and destablizing.

By noting the radical shift in public opinion within a two-year time span, I do not seek to denigrate the perceptions or wishes of the electorate. Nor do I suggest that the defense budget should be sacrosanct or immune from a surgeon's knife. Defense cuts can be made, although they should not be so substantial as to move us immediately within field-goal range of a balanced budget.

The shift in public opinion represents a political phenomenon more deeply rooted than fear or fickleness. It suggests that conservative Republican Presidents (moderates or liberals need not apply) may be able to open doors to China and secure support for arms control treaties yet be unable to sustain a significant or even stable growth in military spending.

By contrast, liberal or moderate Democratic Presidents may be able to secure support for strategic and conventional modernization (few questioned the need for the MX, Stealth aircraft, Trident submarine, or a Rapid Deployment Force under Jimmy Carter) but will be less able to obtain ratification of arms control treaties.

Ronald Reagan is viewed by many as being overly aggressive in word and deed—too likely to produce war rather than preserve peace. By contrast, if Jimmy Carter had proposed an MX "dense pack" or hardened silos reinforced by ballistic-missile defense, he would have stood a better chance of achieving Congressional approval. Mr. Carter was a self-proclaimed peace candidate who wanted to abolish nuclear weapons from the face of the earth. He was a religious man who prayed daily and publicly. Paradoxically, the perception of his weakness in the face of Soviet aggression would have provided the basis of bipartisan Congressional support for arms modernization. With Ronald Reagan, just the opposite appears to be the case—rearmament is seen by an increasing number of people as being unnecessary, unaffordable or dangerous.

Shortly before the November elections, the Kremlin revealed that it would welcome a new Congress that would be more moderate in character. It would be logical to conclude that it would also welcome a change in the occupant of the White House in 1984. But Yuri V. Andropov may possess a subtler turn of mind. He may prefer President Reagan to run as a peace candidate in 1984 with a ratified arms control treaty in hand. In the long run, Mr. Andropov may see the wisdom of having a Republican President with a treaty and without an arms buildup rather than a Democratic President with an arms buildup but without an arms control treaty.

Mr. RUDMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SYMMS). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended to 3:30 p.m.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

A WORD OF CAUTION

Mr. ARMSTRONG. Mr. President, as the lameduck session careens to its conclusion, I cannot help drawing the attention of anyone who may read the RECORD of this proceeding to the fact that, as we have rushed past many, many pieces of legislation, we have also considered numerous committee reports and numerous statements of floor managers. I want to note again today, as I have periodically, that for the most part, these are not valid expressions of the intent of Congress; that by and large, they are never read by Members of the Senate; that by and large, they are not written by Members of the Senate; that they are generally written by some anonymous person who is a member of the staff of the committee in the Senate or the House.

I am distressed to note periodically that agencies of the executive branch and courts will rely upon such statements as valid expressions of the intent of Congress in enacting legislation.

This is a particularly timely word of caution just now because, during the last several days, we have considered literally hundreds of pieces of legislation, many of which have had lengthy statements of this type appended to them.

I just want to reflect, as one Senator, that these statements for the most part have never been considered by the Senate and they are not subject to amendment by the Senate. Therefore, I urge utmost caution to anyone using them as a basis for interpretation.

I thank the Chair.

Mr. President, unless anyone seeks recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, I have a number of items that may be dealt with by unanimous consent, I believe, and I should like to go through this list for the consideration of the minority leader and other Senators.

PUBLIC EMPLOYEES' APPRECIATION DAY

Mr. BAKER. Mr. President, I propose to move to discharge the Committee on the Judiciary so that the Senate may proceed to the immediate consideration of House Joint Resolution 619, if the minority leader has no objection.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the matter and the Chair lay it before the Senate for immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution will be stated by title.

The legislative clerk read as follows:

A resolution (H. J. Res. 681) designating January 19, 1983 as "Public Employees' Appreciation Day."

The PRESIDING OFFICER. Is there objection to the consideration of the resolution?

Mr. ROBERT C. BYRD. There is no objection.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. BAKER. Mr. President, I yield to the Senator from Virginia on this measure.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, as one of the sponsors of this resolution, I am pleased that it is acted on on this day by the Senate. In view of the stress and strain to which we put so many of our faithful Government employees during the course of the deliberation of the countinuing resolution, I think it is most fitting that the Congress of the United States now recognize their services and designate this day as a day set aside in appreciation. I would like to thank G. Jerry Shaw, president of the Senior Executive Service, for this guidance and assistance regarding this legislation.

I thank the majority leader.

The PRESIDING OFFICER. The joint resolution is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the joint resolution.

The joint resolution (H.J. Res. 691) was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REINSTATEMENT AND VALIDATION OF U.S. OIL AND GAS LEASE

Mr. BAKER. Mr. President, I would propose to ask the Chair to lay before the Senate H.R. 5826, if that is cleared on the other side.

Mr. ROBERT C. BYRD. That bill is cleared on this side.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Chair lay before the Senate Calendar Order No. 954, H.R. 5826.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5826) to provide for the reinstatement and validation of U.S. oil and gas lease numbered W-24153.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on third reading and passage of the bill.

The bill (H.R. 5826) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL PARK SYSTEM VISITOR FACILITIES FUND ACT

Mr. BAKER. Mr. President, next I propose to call up H.R. 7316, if the minority leader will agree.

Mr. ROBERT C. BYRD. Mr. President, I have no objection on this side.

Mr. BAKER. Then, Mr. President, I ask unanimous consent that the Chair lay before the Senate Calendar Order No. 1009, H.R. 7316, for the consideration of the Senate.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7316) to establish the National Park System Visitor Facilities Fund.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7316) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELIEF OF ARTHUR J. GRAUF

Mr. BAKER. Mr. President, H.R. 4350 is cleared on this side. May I inquire of the minority leader if he is prepared to proceed to its consideration?

Mr. ROBERT C. BYRD. Mr. President, the measure is cleared for passage by unanimous consent on this side.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Chair lay before the Senate H.R. 4350, Calendar Order 1026.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4350) for the relief of Arthur J. Grauf.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4350) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SERVICE OF PROCESS BY MAIL

Mr. BAKER. Mr. President, I now ask that the Chair lay before the Senate a message from the House on H.R. 7154, an act to amend the Federal Rules of Civil Procedure.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 7154 entitled "An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes," with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, insert:

SEC. 6. Section 951 of title 18, United States Code, is amended by striking out "$5,000" and inserting in lieu thereof "$75,000".

Mr. BAKER. I move that the Senate concur in the House amendment.

The motion was agreed to.

COLLECTION OF FEDERAL ROYALTIES AND LEASE PAYMENTS

Mr. BAKER. I have another message from the House, Mr. President, if the minority leader is prepared to consider it. That is a message on H.R. 5121.

Mr. ROBERT C. BYRD. Yes, Mr. President, this side is ready to proceed.

Mr. BAKER. I thank the minority leader.

I ask the Chair to lay before the Senate a message from the House on H.R. 5121, the Federal Oil and Gas Royalty Management Act of 1982.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the amendment of the House to the amendment of the Senate to the bill (H.R. 5121) entitled "An Act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

NONCOMPETITIVE OIL AND GAS LEASE ROYALTY RATES

SEC. 114. (a) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended by inserting the words "not less than" after the words "payment by the lessee of a royalty of" and by inserting the words "nor more than 16⅔ per centum" after the word "per centum".

(b) Subsection 17(c) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(c)) is amended by changing the period to a colon and adding the following: *"Provided,* That the royalty rate shall be not more than 12½ per centum unless the Secretary finds that an increase in the royalty rate will not adversely affect the exploration, development or production of oil or gas or the overall revenue to the Federal Government generated by such activity.".

(c) The amendments made by subsections (a) and (b) shall take effect one year after completion and submission to Congress by the Secretary of a thorough study of the effects of a change in the royalty rate under section 17(c) of the Mineral Leasing Act of 1920 (1) on the exploration, development, or production of oil or gas and (2) on the overall revenues generated by such change. Such study shall be completed and submitted to Congress on the date one year after the date of enactment of this Act.

Mr. BAKER. Mr. President, I move that the Senate disagree to the House amendments.

The motion was agreed to.

ORDER DISCHARGING THE COMMITTEE ON THE JUDICIARY FROM FURTHER CONSIDERATION OF SENATE JOINT RESOLUTION 265

Mr. BAKER. Mr. President, I would next propose to discharge the Committee on the Judiciary from further consideration of Senate Joint Resolution 265 so that the Senate may proceed to its consideration.

May I inquire of the minority leader if he is prepared to agree to that?

Mr. ROBERT C. BYRD. Yes, Mr. President, I will not object. I am a little concerned by the great numbers of bills that are being discharged from committees at the last minute. This is not a thing unheard of, that some bills be discharged from committees, but it seems to me that committees ought to do their work on these pieces of legislation so that we would not have to take this extraordinary procedure of discharging committees. There is nothing in this request that there is any objection to.

Mr. BAKER. Mr. President, I agree with the minority leader. I have noted that of late it seems to me the unanimous-consent calendar is loaded with requests for the discharge of committees and the immediate consideration of measures, and I am prepared to do that. I inquired of our calendar staff how we go about the clearance process on that, and it appears satisfactory, that is, the chairman of the committee and the executive director are both involved in that process and, presumably, that covers all members of the committee who have an interest in that measure. But I do continue to view it as an extraordinary way of proceeding and urge committees to act in the manner prescribed by the rules to the extent that it is feasible.

Having said that, Mr. President, and based on the statement of the minority leader that he will not interpose an objection to this measure, I do then ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 265, which is a resolution to authorize and request the President to proclaim 1983 as National Year of Voluntarism.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

NATIONAL YEAR OF VOLUNTARISM

Mr. BAKER. Mr. President, I ask that the Senate proceed to the immediate consideration of Senate Joint Resolution 265.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S.J. Res. 265) to proclaim 1983 as the National Year of Voluntarism.

The Senate proceeded to consider the joint resolution.

Mr. DENTON. Mr. President, I rise to move the adoption of Senate Joint Resolution 265, designating 1983 as the National Year of Voluntarism. I introduced this resolution along with my distinguished colleagues, Senators HARRY F. BYRD, JR., HELMS, JEPSEN, MATTINGLY, and NICKLES. In addition, the resolution is now cosponsored by Senators BOSCHWITZ, CANNON, CHAFEE, DOMENICI, DOLE, EAST, GARN, HAWKINS, HAYAKAWA, HEFLIN, HUDDLESTON, INOUYE, LAXALT, LEVIN, LUGAR, NUNN, REIGLE, SPECTER, STENNIS, SYMMS, THURMOND, TOWER, and WARNER.

The generosity of the American people has been a noted characteristic of our Nation since its very inception. From its founding days, our Nation was known as one in which neighbor lent a hand to neighbor and families banded together to help one another in times of adversity. Alexis de Toqueville remarked, in his 1831 book, "Democracy in America," on the fascinating way in which Americans solved problems without the intrusion of Government. De Toqueville wrote:

I must say that I have often seen Americans make great and real sacrifices to the public welfare; and I have noticed a hundred instances in which they hardly ever failed to lend faithful support to one another.

It is that kind of generosity and service that built our country and provided our prosperity. I believe that the time has come to encourage and promote the inclination of our citizens to turn to one another in time of need and to help each other.

The designation of a National Year of Voluntarism will support and encourage efforts of Americans. In even the best of times we cannot rely solely on Government to provide remedies to all of our national ills. The solution lies, to a large degree, in the involvement of private individuals and businesses. We must learn to see ourselves, as individuals and as groups, as essential parts of the solution. President Reagan has called for an increase in citizen participation in all areas. Likewise, we in the Senate have a responsibility to urge more active cooperation and mutual support from individuals. It is the stark reality, in this time of such great need, that our social service delivery system is changing dramatically. More private initiative in this area will insure that community and individual needs continue to be met when Government dollars are not available.

Our country has more than adequate human potential to accomplish the challenge that lies before us. A 1979 Gallup poll estimated that 70 percent of Americans are willing to volunteer their time for worthy causes and projects, but it is estimated that only a fourth of those people actually perform voluntary activity. It is clear that, if they understand that their time and skills are needed, more people will contribute and participate.

I urge my colleagues to join me in proclaiming 1983 as the National Year of Voluntarism. To quote the February 1981 report of the National Steering Committee on Voluntarism:

If citizen participation and voluntary initiative are important to our effectiveness as a society, then the Federal Government, as the ultimate representative of the people, has a responsibility to be certain everything possible is done to encourage just such participation and initiative.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and to be read a third time. The joint resolution was read the third time and passed.

The preamble was agreed to.

The joint resolution (S.J. Res. 265) together with its preamble is as follows:

S.J. RES. 265

Whereas voluntarism is the cornerstone of the American way of life and a fundamental characteristic of our American heritage;

Whereas voluntary service, a proud American tradition dating to colonial times, can and should be utilized throughout the United States today, as it was utilized then, to address local community needs; and

Whereas there is a need for greater emphasis on developing more volunteer community leaders to encourage voluntary service in organizational activities: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating 1983 as the "National Year of Voluntarism" and calling upon the people of the United States and interested groups and organizations to observe the National Year of Voluntarism with appropriate activities of voluntary service.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LANDS HELD IN TRUST FOR RAMAH BAND OF NAVAJO INDIANS

Mr. BAKER. Mr. President, I have another discharge request, I say to the minority leader. I propose now to discharge and I ask unanimous consent that the Indian Affairs Committee be discharged from further consideration of H.R. 5916, the Ramah Band of Navajo Indians, and I ask, further, upon discharge that the Senate proceed to the immediate consideration of that measure.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, there will be no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5916) to declare certain Federal lands acquired for the benefit of Indians to be held in trust for the Tribes of such Indians.

There being no objection, the Senate proceeded to consider the bill.

Mr. DOMENICI. Mr. President, I am most pleased that we are finally able to consider a piece of legislation that is necessary to complete actions that were started in the 1930's and 1940's. At that time lands were acquired for the Ramah Band of Navajo Indians in what is now Cibola County, N. Mex. The bill before us today, H.R. 5916, will transfer 4,807 acres of land to the Ramah Band of Navajos. This land and all the underlying minerals will be held in trust for this tribe. The estimated fair market value, according to testimony by the Deputy Assistant Secretary for Indian Affairs of the Department of the Interior, is $480,000. The area in question is completely surrounded by existing reservation lands of Ramah Band.

I believe, Mr. Chairman, that the record is complete. The administration has expressed its support. We are, in effect, removing the doubts about the status of this land that have clouded previous improvements and future plans. By endorsement of this bill, we are completing the intent of the Federal Government to make this land available to the Ramah Band of Navajo Indians. The field solicitor states in his report that the land in question should have been published in the Federal Register on Friday, March 31, 1950, along with the other parcels that were declared to be held in trust on that date. He calls the omission an oversight and finds nothing "in the records to evidence an intent to omit the lands conveyed by the two warranty deeds or other lands that may have been acquired under the authorities of the emergency relief appropriation acts for needy Ramah Navajo Indians."

The facts have not changed, Mr. Chairman, since my bill was introduced in the 96th Congress (S. 1730) to achieve the same goals. Therefore, I am pleased that we now have the full record available to substantiate our contention that we are simply correcting an oversight that is limiting the ability of the Ramah Navajo Indians to have full use of land that has been intended for their use. I thank the Chair and my colleagues for their support, and I urge immediate passage of H.R. 5916.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5916) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote for which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE DON H. CLAUSEN FISH HATCHERY

Mr. BAKER. Mr. President, I now ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 7420, a bill to designate the Warm Springs Dam component of the Russian River, Dry Creek, in California, as the "Don H. Clausen Fish Hatchery," and upon discharge I ask the Senate to proceed to the immediate consideration of that measure.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, there is no objection being interposed on this side as far as I know.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

The bill (H.R. 7420) to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, California project as the Don H. Clausen Fish Hatchery.

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7420) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TENNYSON GUYER FEDERAL BUILDING

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from another measure, and that is H.R. 6538, a bill to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building," and upon discharge I ask that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee.

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6538) to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building."

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6538) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

B. F. SISK FEDERAL BUILDING

Mr. BAKER. Mr. President, I now ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 5029, a bill to designate the Federal building at 1130 O Street, Fresno. Calif., as the "B. F. Sisk Federal Building." and upon discharge I ask the Senate to turn to its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5029) to designate the Federal Building in Fresno, California, as the "B. F. Sisk Federal Building".

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open amendment. If there be no amendment to be offered, the question is on third reading and passage of the bill.

The bill (H.R. 5029) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FISHERIES MANAGEMENT—CONFERENCE REPORT

Mr. BAKER. Mr. President, there is a conference report which will accompany H.R. 5002 that is here and available. If the minority leader is prepared to do so, I am prepared to ask the Senate to proceed to the consideration of that measure.

Mr. METZENBAUM. Mr. President, reserving the right to object.

Mr. BAKER. I have not made the request yet.

Mr. METZENBAUM. Would the majority leader be good enough to tell us what that is?

Mr. BAKER. Yes, Mr. President, I am happy to. The notation I have here is that it is the conference report to accompany H.R. 5002, the fisheries consultation bill.

Mr. METZENBAUM. I have no objection.

I thank the majority leader.

Mr. ROBERT C. BYRD. There is no objection.

Mr. BAKER. I thank the minority leader and the Senator from Ohio.

Mr. President, I submit a report of the committee of conference on H.R. 5002 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5002) to improve fishery conservation and management, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there are certain items of Executive Calendar business that can be considered according to my marked calendar, and I ask the minority leader if he is prepared to agree that the Senate may go into executive session for the purpose of considering nominations on today's calendar and also the WARC Treaty.

I may say before the minority leader replies that it is not my intention to ask for a record vote on the nominations. I have been advised by the distinguished Senator from New Hampshire (Mr. HUMPHREY) that while he previously had indicated a wish for a rollcall vote on one nomination he no longer has a requirement for a rollcall vote. He wishes to insert a statement on this subject in the RECORD.

I believe the Senators from New Mexico are here in the Chamber and ready to proceed.

Other than that, I believe the nominations will be routine.

Mr. President, on the treaty, if the minority leader thinks well of the idea, I am agreeable to considering the treaty by division vote instead of by rollcall vote.

Mr. ROBERT C. BYRD. Mr. President, I have no objection on this side.

Mr. BAKER. I thank the minority leader.

Mr. ROBERT C. BYRD. I understand that there is one nomination and one treaty to which the distinguished majority leader refers.

Mr. BAKER. Only one treaty, that the requirement for a division vote is only for the treaty.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. There is no longer a requirement for a rollcall or a division on the nomination.

Mr. ROBERT C. BYRD. On the one nomination?

Mr. BAKER. Yes.

Mr. President, let me advise the minority leader, then, that I am about to propound a request which would begin that would go into executive session for the purpose of considering nominations beginning with Calendar Order No. 1014 on page 3 under Department of State, continuing through the nominations on the remainder of that page, all of the nominations on pages 4, 5, 6, and on 7 with the exception of the first nomination, which is Calendar Order No. 1129, on page 8, on page 9, on page 10, on page 11, on page 12, on page 13, and the nominations placed on the Secretary's desk in the Marine Corps, the Navy, and the Public Health Service on page 15.

Those are the items that I propose to consider at this time, and before I propound the unanimous-consent request could I inquire of the minority leader if he is prepared to agree to that?

Mr. ROBERT C. BYRD. Mr. President, in response to the inquiry by the distinguished majority leader, the minority is ready to proceed with the following Calendar Order No. 1013 on page 3 and No. 1071 on page 3 and beginning with 1125, Department of Defense, on page 3, and going through the remainder of the calendar through page 15.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I thank the minority leader for sharing with me the information on his position with respect to approval for consideration of these nominees by unanimous consent.

Let me see if I can put together a request now that will embody those nominations that he can clear and that I can clear; that is, that have been cleared on both sides.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. On page 3, Calendar Order Nos. 1071, 1125, and 1126, three nominations on page 3, all the nominations on page 4, all of the nominations on page 5, all of the nominations on page 6, the nominations appearing on page 7 beginning with Calendar Order No. 1130, which would except and exclude Calendar Order No. 1129 on page 7, all of the nominations on page 8, all of the nominations on page 9, all of the nominations on pages 10 and 11, all of the nominations on page 12.

Mr. President, I ask unanimous consent that when item Calendar Order No. 1167 is reached that the distinguished Senator from New Hampshire

(Mr. HUMPHREY) may place a statement in the RECORD in connection with the consideration of this nomination, and that the distinguished Senators from New Mexico (Mr. DOMENICI and Mr. SCHMITT) may be recognized to speak.

Mr. DOMENICI. Mr. Leader, we do not intend to speak unless somebody is here to speak in opposition.

Mr. BAKER. Very well. The right will be preserved in any event.

All nominations on page 13, and all of the nominations placed on the Secretary's desk in the Marine Corps, Navy, and Public Health Service on page 15.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side to proceeding with the nominations which have just been enumerated by the distinguished majority leader.

On the treaty we would want a division vote.

Mr. BAKER. Yes, Mr. President. I include in my request then on the treaty considered in executive session that there be a division vote.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominees just identified be considered en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The nominees are considered and confirmed en bloc.

The nominees considered and confirmed en bloc are as follows:

DEPARTMENT OF JUSTICE

Daniel F. Lopez Romo, of Puerto Rico, to be U.S. attorney for the district of Puerto Rico for the term of 4 years, vice Raymond L. Acosta.

DEPARTMENT OF DEFENSE

Thomas Edward Cooper, of Virginia, to be an Assistant Secretary of the Air Force, vice Alton Gold Keel, Jr., resigned.

IN THE AIR FORCE

The following officers for appointment in the U.S. Air Force to the grade of brigadier general, under the provisions of chapter 36, title 10 of the United States Code:

To be brigadier general

Col. Marcus A. Anderson, xxx-xx-xxxx FR, Regular Air Force.

Col. Charle W. Bartholomew, xxx-xx-xxxx xxx-... FR, Regular Air Force.

Col. Philippe O. Bouchard, xxx-xx-xxxx xxx-... FR, Regular Air Force.

Col. Charles P. Cabell, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. James S. Cassity, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Larry D. Church xxx-xx-xxxx FR, Regular Air Force.

Col. Gaylord W. Clark, xxx-xx-xxxx FR, Regular Air Force.

Col. John A. Corder, xxx-xx-xxxx FR, Regular Air Force.

Col. Donald R. Delauter, xxx-xx-xxxx FR, Regular Air Force.

Col. Robert F. Durkin xxx-xx-xxxx FR, Regular Air Force.

Col. Anthony J. Farrington, Jr., xxx-xx-xxxx xxx-... FR, Regular Air Force.

Col. Edsel R. Field, xxx-xx-xxxx FR, Regular Air Force.

Col. Richard F. Gillis xxx-xx-xxxx FR, Regular Air Force.

Col. David M. Goodrich, xxx-xx-xxxx FR, Regular Air Force.

Col. Samuel J. Greene xxx-xx-xxxx FR, Regular Air Force.

Col. William J. Grove, Jr., xxx-xx-xxxx FR, Regular Air Force.

Col. Michael D. Hall, xxx-xx-xxxx FR, Regular Air Force.

Col. Trevor A. Hammond, xxx-xx-) xxx-... FR, Regular Air Force.

Col. Paul A. Harvey, xxx-xx-xxxx FR, Regular Air Force.

Col. Richard G. Head xxx-xx-xxxx FR, Regular Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert Charles Kingston, xxx-xx-x... xxx-... U.S. Army.

IN THE NAVY

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Kenneth M. Carr, xxx-xx-xxxx /1120, U.S. Navy.

Donald Barr, of Connecticut, to be a member of the National Council on Educational Research for the reminder of the term expiring September 30, 1982, vice Helen S. Astin.

Carl W. Salser, of Oregon, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1983, vice Maria B. Cerda.

J. Floyd Hall, of South Carolina, to be a member of the National Council on Educational Research for a term expiring September 30, 1983, vice Alonzo A. Crim, term expired.

Donna Helene Hearne, of Missouri, to be a member of the National Council on Educational Research for a term expiring September 30, 1983, vice Catharine C. Stimpson, term expired.

George Charles Roche III, of Michigan, to be a member of the National Council on Educational Research for a term expiring September 30, 1983, vice Harold Howe II, term expired.

M. Blouke Carus, of Illinois, to be a member of the National Council on Educational Research for a term expiring September 30, 1984, vice Barbara S. Uehling, term expired.

Onalee McGraw, of Virginia, to be a member of the National Council on Educational Research for a term expiring September 30, 1984, vice Jon L. Harkness, term expired.

Penny Pullen, of Illinois, to be a member of the National Council on Educational Research for a term expiring September 30, 1984, vice Tomas A. Arciniega, term expired.

Elaine Y. Schadler, of Pennsylvania, to be a member of the National Council on Educational Research for a term expiring September 30, 1984, vice Harold L. Enarson, term expired.

Donald Barr, of Connecticut, to be a member of the National Council on Educational Research for a term expiring September 30, 1985. (Reappointment.)

Paul Copperman, of California, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982, vice Joseph J. Davis, Jr.

James Harvey Harrison, Jr., of Virginia, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982, vice Timothy S. Healy.

Wallie Cooper Simpson, of New York, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982, vice John S. Shipp, Jr.

Paul Copperman, of California, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985. (Reappointment.)

James Harvey Harrison, Jr., of Virginia, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985. (Reappointment.)

Wallie Cooper Simpson, of New York, to be a member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985. (Reappointment.)

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

John E. Juergensmeyer, of Illinois, to be a member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987, vice Frances Healy Naftalin.

Jerald Conway Newman, of New York, to be a member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987, vice Joan Helene Gross.

Julia Li Wu, of California, to be a member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987, vice Clara Stanton Jones.

Byron Leeds, of New Jersey, to be a member of the National Commission on Libraries and Information Science for a term expiring July 19, 1986, vice Horace E. Tate, term expired.

HARRY S TRUMAN SCHOLARSHIP FOUNDATION

Richard J. Fitzgerald, of Illinois, to be a member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1985, vice Elliott D. Marshall, term expired.

Truman McGill Hobbs, of Alabama, to be a member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1985, vice Walter E. Craig, term expired.

Margaret Truman Daniel, of New York, to be a member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1987. (Reappointment.)

Gloria Ann Hay, of Alaska, to be a member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1987, vice John Portner Humes, term expired.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Richard V. Backley, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of six years expiring August 30, 1988 (reappointment), to which position he was appointed during the last recess of the Senate.

L. Clair Nelson, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of six years expiring August 30, 1988, vice Marian Pearlman Nease, resigned, to which position she was appointed during the last recess of the Senate.

NATIONAL SCIENCE FOUNDATION

Charles E. Hess, of California, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice William F. Hueg, Jr., term expired.

John H. Moore, of California, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice Raymond L. Bisplinghoff, term expired.

Norman C. Rasmussen, of Massachusetts, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice Alexander Rich, term expired.

Roland W. Schmitt, of New York, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice Lloyd Miller Cooke, term expired.

Robert F. Gilkeson, of Pennsylvania, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice Herbert D. Doan, term expired.

William F. Miller, of California, to be member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice John R. Hogness, term expired.

William A. Nierenberg, of California, to be a member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988, vice Joseph Mayo Pettit, term expired.

FEDERAL COUNCIL ON THE AGING

Edmund T. Dombrowski, of California, to be a member of the Federal Council on the Aging for a term expiring June 5, 1985, vice Aaron E. Henry, term expired.

NATIONAL COUNCIL ON THE HANDICAPPED

Nanette Fabray MacDougall, of California, to be a member of the National Council on the Handicapped for a term expiring September 17, 1984. (Reappointment.)

ACTION AGENCY

Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency, vice Winifred Ann Pizzano.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

David L. Slate, of California, to be General Counsel of the Equal Employment Opportunity Commission for a term of 4 years, vice Michael Joseph Connolly, resigned.

NATIONAL INSTITUTE OF EDUCATION

Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education, vice Edward A. Curran, resigned.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Allen Drury, of California, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice Willard L. Boyd, term expired.

Celeste Holm, of New York, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice Theodore Bikel, term expired.

Raymond J. Learsy, of New York, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice William H. Eells, term expired.

Samuel Lipman, of New York, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice Martina Arroyo, term expired.

George L. Schaefer, of California, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice Harold Prince, term expired.

Robert Stack, of California, to be a member of the National Council on the Arts for the term expiring September 3, 1988, vice J. C. Dickinson, Jr., term expired.

C. Douglas Dillon, of New Jersey, to be a member of the National Council on the Arts for a term expiring September 3, 1988, vice Franklin J. Schaffner, term expired.

William Laurens Van Alen, of Pennsylvania, to be a member of the National Council on the Arts for a term expiring September 3, 1988, vice Geraldine Stutz, term expired.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE MARINE CORPS, NAVY, PUBLIC HEALTH SERVICE

Marine Corps nominations beginning Stephen P. Freiherr, and ending Donald L. Hairston, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 10, 1982.

Navy nominations beginning Anthony P. Battaglia, and ending Henryk Bronislaw Zaleski, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 15, 1982.

Public Health Service nominations beginning David W. Anderson, and ending Kevin S. Yesky, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 14, 1982.

NOMINATION OF MANUEL J. JUSTIZ, OF NEW MEXICO, TO BE DIRECTOR OF THE NATIONAL INSTITUTE OF EDUCATION

Mr. BAKER. Mr. President, I ask the distinguished Senators from New Mexico if they wish to speak at this point to the nomination.

Mr. DOMENICI. Mr. Leader, I do not intend to speak.

Mr. SCHMITT. Mr. Leader, it is not necessary to speak other than to say that I am very pleased, as I know my distinguished colleague is, to see that this distinguished Hispanic, Mr. Justiz, and whose origins are other than those of his country of choice, has reached such a high position. I thank the leader for his courtesy.

Mr. BAKER. I thank the Senator.

Mr. DOMENICI. Mr. President, I am convinced Dr. Manuel Justiz is one of the most capable young men in the State of New Mexico. He knew at an early age what he wanted. He wanted to teach at a university, and in particular, he wanted to teach at our university—the University of New Mexico. To accomplish his goal he attended and succeeded at universities in Kansas and Illinois. Manuel is a doctor of philosophy in higher education administration from the Southern Illinois University in Carbondale, Ill. At the University of New Mexico in Albuquerque, Dr. Justiz is director of Latin American programs in education and associated professor in the college of education.

He has become the pride of many in the State of New Mexico. His reputation as an educational researcher is sterling. His credentials are superb.

We are very proud of him as a leader, as an educator.

Frankly, as I look at our country, there is no doubt that the role of our national government in education is changing, but the one role that continues to remain in the minds of almost everyone is that of educational research. And I am convinced that he will do a superb job.

I highly recommend him. I think we must get on with filling this position. I would not be here if I did not think Dr. Justiz is the man for the job.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominees were confirmed en bloc.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIO REGULATIONS (GENEVA, 1979) AND FINAL PROTOCOL

Mr. BAKER. Mr. President, I ask unanimous consent that the Chair lay before the Senate Executive Treaty

Document No. 97-21, the Treaty on International Radio Frequencies (WARC-79).

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider Treaty Document No. 97-21, Radio Regulations (Geneva, 1979) and Final Protocol, which was read the second time.

Mr. BAKER. Mr. President, I ask unanimous consent that the treaty be advanced through its various parliamentary stages up to and including the presentation of the resolution of ratification, and that the resolution shall be deemed to include the reported reservations and the condition from the committee, as specified in Executive Report No. 97-61, and that no other reservation, understanding, condition, proviso, declaration, or statements be in order, with the exception of the following proviso which I send to the desk on behalf of Senator SCHMITT.

The PRESIDING OFFICER. Without objection, the treaty will be considered as having passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which the clerk will state:

The assistant legislative clerk read as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of The Radio Regulations (Geneva, 1979) and a Final Protocol signed on behalf of the United States at Geneva, December 6, 1979, with several reservations; provided that in the implementation of this treaty for the United States, the introduction of a Direct Broadcasting Satellite Service into the 12.2-12.7 GHz band shall be carried out in a manner which minimizes unreasonable disruptions to existing uses in that band.

Mr. BAKER. I send the proposed text of the resolution of ratification, as amended by paragraph 2, and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

Resolved (two thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of The Radio Regulations (Geneva, 1979) and a Final Protocol signed on behalf of the United States at Geneva, December 6, 1979, with several reservations, provided:

(1) that in the implementation of this treaty for the United States, the introduction of a Direct Broadcasting Satellite Service into the 12.2-12.7 GHz band shall be carried out in a manner which minimizes unreasonable disruptions to exisiting uses in that band; and

(2) that the Secretary of State shall take expeditious action to strengthen and improve the coordination of United States international communications and information policy, including consideration of appropriate changes in the organization of the Department of State for this purpose.

Mr. SCHMITT. Mr. President, the Final Acts of the General World Administrative Radio Conference (WARC-79), which are now before the Senate for advice and consent to ratification, reflect growing world tensions over the effective use of spectrum and orbit resources. A study done for the Committee on Commerce, Science, and Transportation by the Congressional Office of Technology Assessment concluded:

Many of the important consequences of WARC-79 were derived from resolutions and recommendations approved by the conference and from reservations and declarations by individual countries, indicating a refusal to be bound by a particular decision of the conference or agreeing to undertake certain actions in order to conform to a decision.

The study pointed out that 87 resolutions and 90 recommendations were adopted by WARC-79, many of which can have far-reaching consequences for the United States. These resolutions and recommendations will be referred to specialized world or regional administrative radio conference.

The United States found it necessary to take formal protocol exception and not to be bound by certain decisions in the Final Acts through six reservations covering several issues, service, and frequency bands. Also, the United States entered a formal declaration of intent regarding designation of certain frequency bands for fixed satellite service which are now used by the United States for military radars and radiolocation services. Other nations entered additional reservations on a variety of subjects. Moreover, the table of frequency allocations set by WARC-79 has almost 500 footnotes in which countries took exception to the table and proposed to operate different or additional services.

The basic objective of WARC-79 was to provide uniformity and certainty in the table of allocations so that countries may effectively plan for their telecommunications needs. Clearly, that objective was not accomplished. Nor did WARC-79 resolve the major issues that face the United States and the other 157 member countries of the International Telecommunication Union (ITU) regarding the future use of the spectrum and geostationary satellite orbit. Resolution of these issues was postponed until later ITU conferences.

Recent events indicate that the developing countries, through the exercise of their numerical majority, could force decisions in those conferences which will be inimical to U.S. interests. For example, decisions made at the ITU Plenipotentiary Conference held in Nairobi, Kenya, this fall were frequently based on political considerations. Although the U.S. delegation worked closely with the delegations of other developed countries to defeat politically motivated proposals to radically restructure the ITU, our appeals were disregarded and, when votes were counted, we ended up on the losing side. One particularly unfortunate example of this departure from traditional procedures was the plenipotentiary's decision to elect the directors of the international consultative committees at plenipotentiary conferences. In the past, these committees have been concerned with technical, not political, matters, and, before the Nairobi meeting, their directors were elected at the plenary meetings of the consultative committees. This change in the ITU Convention will inevitably draw these technical committees into the highly charged political environment of the plenipotentiary conferences.

The specialized conferences scheduled throughout the decade are likely to reach decisions that will make it difficult, if not impossible, for the United States to meet its future telecommunications needs.

In June 1983, a conference of Western Hemisphere nations will meet in Geneva to determine the future of broadcast satellite services in this hemisphere. If the results of broadcast satellite conferences in the other ITU regions are any precedent, this Western Hemisphere conference could inhibit the growth of U.S. broadcast satellite services by limiting the radio frequency and orbital slots needed for our purposes.

A World Administrative Conference on high frequency broadcasting is scheduled for January 1984. Principles will be agreed to and decisions will be made at that conference which could adversely affect the ability of the Voice of America, Radio Free Europe, and Radio Liberty to continue their operations.

The Space World Administrative Radio Conference, scheduled to convene in 1985, will be important to the future of satellite communications. Adoption of the principle of a rigid a priori allotment scheme, similar to the model agreed to at the 1977 broadcast satellite conference, would inhibit the United States and other countries from utilizing new technologies to satisfy national needs.

My fear is that the United States will not be able to effectively advocate and protect our Nation's future telecommunications needs at these conferences.

We must recognize that competing national interests are leading to growing differences over the allocation of frequencies and satellite orbits. Nations traditionally allied with the United States on other matters may join developing nations to protect their own communications interests. As a result, there will be definite winners and losers at these conferences. To place continued reliance on achieving consensus decisions would be misplaced.

Thus, I propose that the Senate place a declaration in the treaty, mandating expeditious and thorough review of executive branch coordination of international communications and information policy. For several years, I have sought to focus attention on the need to develop a systematic

mechanism that will further U.S. interests. Little has been accomplished. In my judgment, it is absolutely necessary that the President revise Executive Order No. 12046. That order established the National Telecommunications and Information Administration (NTIA) and assigned certain responsibilities to the Department of State.
